Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions
[JTN-94-80544] p 3170 N94-30932

COMMUNICATION NETWORKS
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
DLR's ATM demonstration programme p 3140 N94-29575
Optimizing the Galileo space communication link p 3250 N94-29663
Decoder synchronization for deep space missions p 3250 N94-29664
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106
Performance evaluation of intelligent network services
[MEMO-INF-93-20] p 3438 N94-30373
Performance issues of signalling protocols for broadband ISDN
[MEMO-INF-93-30] p 3255 N94-30374
Customer creation and combination in queueing networks
[MEMO-INF-93-35] p 3438 N94-30375
Design and analysis of dynamic leader election protocols in broadcast networks
[MEMO-INF-93-43] p 3260 N94-30520
Cascaded clocks measurement and simulation findings p 3469 N94-30649
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772

COMMUNICATION SATELLITES
Arcjet system integration development
[NASA-CR-187147] p 3171 N94-28736
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350
Remote clocks linked by a fully calibrated two-way timing link p 3471 N94-30659

COMMUNICATION THEORY
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634

COMMUNICATIONS TECHNOLOGY SATELLITE
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions
[JTN-94-80544] p 3170 N94-30932

COMMUTER AIRCRAFT
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799

COMPARISON
Electrical and mechanical testing of wire insulation for space applications p 3166 N94-28710
Evaluation of discretization schemes for advection-diffusion equations
[CWI-NM-R9311] p 3481 N94-30751

COMPARTMENTS
Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640

COMPATIBILITY
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
COMPENSATORY TRACKING
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887
COMPILERS
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE94-006428] p 3514 N94-30001
Federal grammars and modular compilers
[REPT-93-054] p 3429 N94-30928
COMPLETENESS
Completeness of the Lambek calculus with respect to relativized relational semantics
[LP-93-03] p 3455 N94-30326
A note on the complexity of local search problems
[CT-93-02] p 3456 N94-30370
COMPLEX COMPOUNDS
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation
p 3188 N94-28681
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770
COMPLEX SYSTEMS
The lectures in complex systems, volume 5
[AD-A275458] p 3466 N94-28807
Performing specifications for complex systems' software p 3155 N94-29317
Potential software failures methodology analysis
p 3414 N94-29329
Validation and test of complex weapon systems
p 3150 N94-29336
Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
COMPLEXITY
A note on the complexity of local search problems
[CT-93-02] p 3456 N94-30370
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434
Relations between varieties of Kolmogorov complexities
[CWI-CS-R9329] p 3427 N94-30732
COMPONENT RELIABILITY
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868
COMPOSITE MATERIALS
Safety enhancement of composites via periodic proof testing
[AD-A275662] p 3176 N94-28655
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
Rules and definition of the range of paints applied on aeronautical structrural composites
[REPT-932-600-106] p 3215 N94-29459
Non-rectangular towpreg architectures
[NASA-CASE-LAR-14863-1-CU] p 3180 N94-29485
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole
p 3181 N94-29735
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Composite hot drape forming p 3240 N94-30448
Composite redesign of obstetrical forceps
p 3397 N94-30457
Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773
COMPOSITE PROPELLANTS
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092
COMPOSITE STRUCTURES
Composite panel failure analysis and improvement plan
[AD-A275655] p 3176 N94-28653
Safety enhancement of composites via periodic proof testing
[AD-A275662] p 3176 N94-28655
Numerical and experimental investigation of the bending response of thin-walled composite cylinders
[NASA-CR-195730] p 3317 N94-28801
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
Review of sonic fatigue technology
[NASA-CR-4587] p 3479 N94-29407
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
Composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Active control of delaminations in smart composite structures p 3181 N94-29593
Performance of a higher-order triangular finite element for composite laminated structures
p 3181 N94-29810
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Integral equation analysis of composite bodies of revolution and arbitrary surfaces with application to cavity-backed antennas p 3253 N94-29883
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Computational simulation of composite structures with and without damage
[NASA-CR-194433] p 3183 N94-30190
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
Composite hot drape forming p 3240 N94-30448
Thin-walled orthotropic laminated beam theory
p 3324 N94-30920
COMPRESSIBILITY
On the numerical analysis of shear flows
p 3126 N94-28972
Manufacturing methods for machining spring ends parallel at loaded length
[NASA-CASE-MFS-28767-1] p 3231 N94-29379
COMPRESSIBILITY EFFECTS
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922
COMPRESSIBLE FLOW
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel
p 3126 N94-28967
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method
p 3128 N94-28983
Interaction of multiple spark-generated bubbles in a compressible liquid
[AD-A275037] p 3272 N94-29149
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958
COMPRESSIBLE FLUIDS
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175
COMPRESSION LOADS
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975
Simulation of composite material response under dynamic compressive loading
[DE94-005272] p 3184 N94-30589
COMPRESSION TESTS
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975
COMPRESSIVE STRENGTH
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Manufacturing methods for machining spring ends parallel at loaded length
[NASA-CASE-MFS-28767-1] p 3231 N94-29379
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
COMPRESSOR ROTORS
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
COMPRESSORS
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977
COMPUTATION
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
Analysis of 3-D acoustic problems using boundary element method p 3127 N94-28974
Digital filter
[DE94-607902] p 3406 N94-30074
Computational balance in real-time cyclic spectral analysis
[DE94-005091] p 3432 N94-30100
Logic of transition systems
[CT-93-03] p 3424 N94-30371
Comparing curried and uncurried rewriting
[CWI-CS-R9350] p 3425 N94-30415
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
Perpetual reductions and strong normalization in orthogonal term rewriting systems
[CWI-CS-R9345] p 3426 N94-30437
Numerical precision and roundoff considerations concerning computer code migration
[DE94-005421] p 3427 N94-30590
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980
COMPUTATIONAL CHEMISTRY
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378
COMPUTATIONAL FLUID DYNAMICS
Large eddy simulations using lattice Boltzmann algorithms
[DE94-005666] p 3270 N94-28549
Aerodynamic design using parallel processors
[AD-A275470] p 3122 N94-28674
A method for the modelling of porous and solid wind tunnel walls in computational fluid dynamics codes
[NASA-CR-195699] p 3270 N94-28724
Development of a new generation solid rocket motor ignition computer code
[NASA-CR-195734] p 3171 N94-28800
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics
[NAL-SP-19] p 3123 N94-28946
Engineering of systems for application of scientific computing in industry p 3123 N94-28947
Monte Carlo simulation or normal shock wave. Part 2: VHS model and VSS model p 3123 N94-28948
Variable soft sphere molecular model in the Monte Carlo simulation of air species p 3123 N94-28949
Rarefied gas numerical wind tunnel. Part 8: HOPE
p 3123 N94-28950

Numerical simulation of arc heated wind tunnel flow p 3123 N94-28951
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
Numerical simulation of steady Mach reflection by shock capturing schemes p 3123 N94-28953
Higher-order accurate numerical simulation of 3D supersonic mixing layers p 3124 N94-28954
Numerical simulation of aerothermodynamic heating of hypersonic space transportation vehicles p 3124 N94-28955
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains p 3124 N94-28956
Numerical simulation of supersonic flow around space plane with engine installed p 3125 N94-28961
Numerical analysis of sonic boom in the near field p 3125 N94-28962
Role of computational fluid dynamics in aeronautical engineering. Part 10: Numerical analysis of flow around 2-D multi-element HLD p 3125 N94-28964
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2 p 3125 N94-28966
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel p 3126 N94-28967
Numerical analysis of incompressible viscous flow around a bubble p 3126 N94-28968
Unsteady aerodynamic computations around NACA0012 at high angles of attack p 3126 N94-28969
Study of modeling of turbulence of renormalization group analysis p 3126 N94-28970
The upsilon-q method and the psi-q method for incompressible flows p 3126 N94-28971
On the numerical analysis of shear flows p 3126 N94-28972
On approximate Riemann solvers: Improvement of HLLEM scheme and its generalization for chemically reacting flows p 3126 N94-28973
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
Numerical study on internal flows of centrifugal compressors p 3127 N94-28977
Application of flow field simulation to turbine vane design p 3127 N94-28978
Three-dimensional external flow computations using prismatic grid p 3127 N94-28979
Application of digital control theory to adaptive grid generation p 3127 N94-28980
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
Upwind method using local interpolation p 3128 N94-28982
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
Numerical analysis of laminar flow in S-curved square duct with inlet and outlet straight region p 3128 N94-28987
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Parallelization techniques for highly parallel vector computer p 3129 N94-28990
Parallel Fortran programming for NWT p 3129 N94-28991
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
A method of user interface for NWT p 3129 N94-28993
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall [AD-A275416] p 3129 N94-29197
Prediction of prompt NO(x) in hydrocarbon air flames p 3190 N94-29250
Flowfield prediction of NO(x) and smoke production in aircraft engines p 3191 N94-29252
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Application of CFD in combustor design technology p 3154 N94-29256
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262
Spray combustion experiments and numerical predictions p 3195 N94-29277
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Scramjet CFD methods and analysis. Part 1: Scramjet CFD methods. Numerical simulation of the flow in scramjet duct p 3152 N94-29296
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor p 3152 N94-29300
A non-local computational boundary condition for duct acoustics [NASA-TM-109091] p 3478 N94-29382
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual [NASA-CR-187105] p 3152 N94-29438
RNS optimization procedure for three-dimensional composite velocity multi-block applications p 3273 N94-29534
Industrial ventilation p 3232 N94-29604
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Computational fluid dynamics in ventilation. 2: Theory and codes p 3233 N94-29607
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608
Computational fluid dynamics in ventilation. 4: Commercial application of CFD in ventilation p 3233 N94-29609
Computational fluid dynamics in ventilation. 5: New developments in CFD with relevance to ventilation p 3233 N94-29610
Computational fluid dynamics in ventilation: Practical approach p 3233 N94-29611
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
Numerical solution of 3-D Navier-Stokes equations in vorticity-velocity form for incompressible flows p 3276 N94-29843
Aspects of model-based rocket engine condition monitoring and control [NASA-CR-195116] p 3173 N94-29848
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
A numerical method for confined unsteady flows related to fluid-structure interactions [ISBN-0-315-74739-0] p 3277 N94-29902
High-resolution algorithms for the Navier-Stokes equations for generalized discretizations p 3278 N94-29965
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973
Computational fluid and combustion dynamics [DE94-006596] p 3279 N94-30003
Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades [NASA-CR-195786] p 3153 N94-30013
Canonical-variables multigrid method for steady-state Euler equations [NASA-CR-194888] p 3454 N94-30208
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations [PB94-125598] p 3133 N94-30387
Numerical investigation into high-angle-of-attack leading-edge vortex flow [PB94-125564] p 3133 N94-30388
Aspects of the modeling and numerical simulation of leading-edge vortex flow [AD-B179108] p 3133 N94-30492
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design [NLR-TP-92524-U] p 3134 N94-30493
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Prospects of time-linearized unsteady calculation methods for exponentially diverging motions in aeroelasticity [PB94-126224] p 3134 N94-30740
Euler results of the ISNaS compressible multi-block flow solver [AD-B179299] p 3281 N94-30756
Information system for flow simulation based on the Navier-Stokes equations vectorization [AD-B179293] p 3281 N94-30763
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade p 3282 N94-30816
Computing at the leading edge: Research in the energy sciences [DE94-006121] p 3563 N94-30844
Grid adaption in computational aerodynamics [PB94-126240] p 3134 N94-30858
Numerical simulation of leading-edge vortex flow [AD-B175154] p 3134 N94-30871
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958
Numerical simulation and prediction of implosion phenomena [GKSS-92/E/99] p 3284 N94-30968

COMPUTATIONAL GEOMETRY

Generation of gear tooth surfaces by application of CNC machines [NASA-CR-195306] p 3303 N94-30205
A deterministic algorithm for the three-dimensional diameter problem [RUU-CS-92-45] p 3424 N94-30348
Generalized hidden surface removal [RUU-CS-93-05] p 3424 N94-30364
Shape from diameter: Negative results [RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results [RUU-CS-93-17] p 3458 N94-30408
Piecewise linear paths among convex obstacles [RUU-CS-93-20] p 3460 N94-30721
Placing registration marks [RUU-CS-93-21] p 3427 N94-30725
Perfect binary space partitions [RUU-CS-93-23] p 3460 N94-30728
The (n squared)-hard problems in computational geometry [RUU-CS-93-15] p 3461 N94-30747

COMPUTATIONAL GRIDS

Analytic rendering of curvilinear volume data [DE94-004934] p 3407 N94-28506
Numerical simulation of steady Mach reflection by shock capturing schemes p 3123 N94-28953
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains p 3124 N94-28956
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code p 3124 N94-28958
Numerical simulation of supersonic flow around space plane with engine installed p 3125 N94-28961
Numerical analysis of sonic boom in the near field p 3125 N94-28962
Numerical analysis of incompressible viscous flow around a bubble p 3126 N94-28968
Three-dimensional external flow computations using prismatic grid p 3127 N94-28979
Application of digital control theory to adaptive grid generation p 3127 N94-28980
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
Upwind method using local interpolation p 3128 N94-28982
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
High-resolution algorithms for the Navier-Stokes equations for generalized discretizations p 3278 N94-29965
PCCM2: A GCM adapted for scalable parallel computers [DE94-005113] p 3350 N94-30116
Accurate finite difference methods for time-harmonic wave propagation [NASA-CR-194887] p 3454 N94-30209
Extended occupancy grid method for modelling unknown dynamic environments p 3144 N94-30281
Grid adaption in computational aerodynamics [PB94-126240] p 3134 N94-30858
Optimal size finite element meshes without obtuse and small angles [RUU-CS-92-39] p 3462 N94-30860

COMPUTER AIDED DESIGN
Object-oriented CAD tool implementations for the construction industry
[PB94-132370] p 3407 N94-28411
Aerodynamic design using parallel processors
[AD-A275470] p 3122 N94-28674
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual
[NASA-CR-194462] p 3317 N94-28815
Modification of ACSYNT aircraft computer program for preliminary design
[NASA-CR-195737] p 3145 N94-28817
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
Application of flow field simulation to turbine vane design p 3127 N94-28978
Exploring QDES as a tool for determining limits of achievable performance in aircraft design
[AD-A275359] p 3146 N94-28998
Some efficient procedures for correcting triangulated models
[PB94-136926] p 3452 N94-29171
Engineering document management system
[PB94-136934] p 3530 N94-29172
EXTdesign. Version 1.0: Reference manual
[PB94-136827] p 3411 N94-29193
A case-based approach to creative design
[AD-A275229] p 3417 N94-29390
Animation techniques in BRL-CAD
[AD-A275232] p 3417 N94-29392
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane
[REPT-932-440-107] p 3168 N94-29543
A variable selection heuristic for solid rocket motor design p 3173 N94-29544
Computational fluid and combustion dynamics
[DE94-006596] p 3279 N94-30003
Calculus of variations applied to 2D multi-point airfoil design
[PB94-125457] p 3133 N94-30401
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design
[NLR-TP-92524-U] p 3134 N94-30493
Realization of function logics by means of transmission gate
[REPT-93-061] p 3429 N94-30936

COMPUTER AIDED MANUFACTURING
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480
Generation of gear tooth surfaces by application of CNC machines
[NASA-CR-195306] p 3303 N94-30205
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570
Graphical simulation for aerospace manufacturing
[AIAA PAPER 94-1224-CP] p 3446 N94-30573

COMPUTER AIDED MAPPING
Feature mapping in a photogrammetric GIS
[AD-A275418] p 3325 N94-28863
Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037

COMPUTER AIDED TOMOGRAPHY
Computer Assisted Medical Interventions: Application to Conformal Radiotherapy
[RR-912-I] p 3395 N94-30028

COMPUTER ANIMATION
Animation techniques in BRL-CAD
[AD-A275232] p 3417 N94-29392

COMPUTER ASSISTED INSTRUCTION
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287

COMPUTER DESIGN
How to control the increase in the complexity of civil aircraft on-board systems p 3150 N94-29316
Neural network with dynamically adaptable neurons
[NASA-CASE-NPO-17803-1-CU] p 3436 N94-29756

COMPUTER GRAPHICS
Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations
[AD-A275459] p 3325 N94-28808
Optimizing ray tracing with visual coherence
[AD-A275218] p 3499 N94-29059
Financial resource review model user's guide
[AD-A274979] p 3410 N94-29088
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
Graphics for ABC
[CWI-CS-R9255] p 3418 N94-29449
PAW using under MS DOS
[DE94-608012] p 3406 N94-30081
Graphics in the Views system
[CWI-CS-R9260] p 3422 N94-30322
Modelling interaction tools in the Views architecture
[CWI-CS-R9261] p 3423 N94-30323
The beauty and the beast
[TR-93-03] p 3423 N94-30331
Generalized hidden surface removal
[RUU-CS-93-05] p 3424 N94-30364

COMPUTER INFORMATION SECURITY
Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640
Aid to Ada component reuse at Aerospatiale Cannes (France)
[REPT-932-440-102] p 3418 N94-29418
RIPE integrity primitives, part 1 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9324-PT-1] p 3252 N94-29692
RIPE integrity primitives, part 2 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9325-PT-2] p 3252 N94-29693
Secure network databases: Survey and analysis
[PB94-138492] p 3533 N94-29948
Management of PEM public key certificates using X.500 directory service: Some problems and solutions
[DE94-004200] p 3431 N94-29952

COMPUTER NETWORKS
Construction of a connectionist network supercomputer
[AD-A275765] p 3405 N94-28764
TRADOC library and information network (TRALINET). Union list of periodicals (TULIP)
[AD-A275263] p 3529 N94-28903
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
A neural network with modular hierarchical learning
[NASA-CASE-NPO-19077-1-CU] p 3435 N94-29492
The Common Modular Simulator (CMS): An architecture test bed for future advanced ATM systems p 3141 N94-29582
Extending the X Window System
[DE94-006496] p 3420 N94-29844
Secure network databases: Survey and analysis
[PB94-138492] p 3533 N94-29948
Management of PEM public key certificates using X.500 directory service: Some problems and solutions
[DE94-004200] p 3431 N94-29952
Customer creation and combination in queueing networks
[MEMO-INF-93-35] p 3438 N94-30375
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411
Service independent building blocks-1: Concepts, examples and formal specifications
[CWI-CS-R9326] p 3448 N94-30731
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772
Supercomputing has to be part of an organization-wide automation concept
[AD-B174654] p 3433 N94-30913

COMPUTER PROGRAMMING
A conceptual framework for software technology transition
[AD-A275637] p 3407 N94-28639
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
[AD-A275860] p 3156 N94-28752
Cleanroom engineering handbook. Volume 4. Specification team practices
[AD-A275861] p 3156 N94-28753
Basic research in computer science
[AD-A275222] p 3405 N94-28916
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068
Model-oriented analysis of a communications protocol
[PB94-138146] p 3244 N94-29109
North American jumelage 'type systems'
[AD-A275342] p 3411 N94-29214
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Reactive system software concept with automation using the LDS language p 3414 N94-29327
A common Ada run-time system for avionics software p 3150 N94-29331
Engineering specification editing tools
[AD-A275116] p 3419 N94-29746
Second-order algebraic specification of state semantics
[CWI-CS-R9254] p 3453 N94-29889
The beauty and the beast
[TR-93-03] p 3423 N94-30331
Derivation lengths in term rewriting from interpretations in the naturals
[RUU-CS-92-43] p 3455 N94-30346
On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347
A deterministic algorithm for the three-dimensional diameter problem
[RUU-CS-92-45] p 3424 N94-30348
Parsing in ISBES
[TR-92-32] p 3432 N94-30363
Models of the untyped lambda-calculus in semi Cartesian closed categories
[ML-93-05] p 3456 N94-30381
Event structures and orthogonal term graph rewriting
[CWI-CS-R9347] p 3459 N94-30412
Higher order recursive program schemes are Turing incomplete
[CWI-CS-R9348] p 3425 N94-30414
The secrets of causality
[RUU-CS-93-29] p 3426 N94-30490
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739
A new programming methodology for lazy functional languages
[MEMO-INF-93-44] p 3429 N94-30765
Federal grammars and modular compilers
[REPT-93-054] p 3429 N94-30928

COMPUTER PROGRAMS
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Process guide for the Domain-Specific Software Architectures (DSSA) process life cycle
[AD-A275642] p 3407 N94-28648
Software Technology for Adaptable, Reliable Systems (STARS) program
[AD-A275675] p 3407 N94-28664
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
Development of a new generation solid rocket motor ignition computer code
[NASA-CR-195734] p 3171 N94-28800
Modification of ACSYNT aircraft computer program for preliminary design
[NASA-CR-195737] p 3145 N94-28817
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
Advanced fuel properties: A computer program for estimating property values
[AD-A275248] p 3224 N94-28901
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3
[AD-A275390] p 3411 N94-29202
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) library access guide, revision 3
[AD-A275405] p 3411 N94-29207

Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
Rome Laboratory software engineering technology program p 3414 N94-29330
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438
Industrial ventilation p 3232 N94-29604
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
Software Management Environment (SME) concepts and architecture, revision 1
[NASA-CR-189293] p 3419 N94-29727
AFGWC Dial-In Subsystem (AFDIS) software users manual, version 2.2
[AD-A275844] p 3371 N94-29747
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE93-006428] p 3514 N94-30001
Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades
[NASA-CR-195786] p 3153 N94-30013
GNU debugger internal architecture
[DE94-006665] p 3422 N94-30251
COSMIC monthly progress report
[NASA-CR-195809] p 3422 N94-30273
Activities in machine vision at Imago Manufacturing Ltd. p 3308 N94-30297
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations
[PB94-125598] p 3133 N94-30387
MANIFOLD version 1.0 programming: Programs and problems
[CWI-CS-R9334] p 3425 N94-30428
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
Numerical precision and roundoff considerations concerning computer code migration
[DE94-005421] p 3427 N94-30590
On the unification free PROLOG programs
[CWI-CS-R9331] p 3427 N94-30733

COMPUTER STORAGE DEVICES

Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404

COMPUTER SYSTEMS DESIGN

Work-oriented development of interactive software tools: Understanding the work of software maintainers and making an interactive software tool for them
[PB94-132032] p 3406 N94-28401
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A275896] p 3405 N94-28798
Basic research in computer science
[AD-A275222] p 3405 N94-28916
Algorithms for treating redundancy in repairable and non-repairable systems
[DE94-005289] p 3315 N94-29020
Designing and maintaining decision-making processes p 3412 N94-29318
Embedded expert system: From the mock-up to the real world p 3412 N94-29319
Reactive system software concept with automation using the LDS language p 3414 N94-29327
Validation and test of complex weapon systems p 3150 N94-29336
Information engineering implementation and acceptance p 3530 N94-29533
Design and analysis of concurrency control schemes for heterogeneous database systems p 3531 N94-29591
Using RDD-100 with CoRE. Version 01.00.03
[AD-A275336] p 3419 N94-29797
Design for dependability: A simulation-based approach
[NASA-CR-195757] p 3420 N94-29890
DREV activities related to military vehicles robotization p 3305 N94-30278
Genetic algorithms for optimal database design
[TR-93-01] p 3535 N94-30330
Supercomputing has to be part of an organization-wide automation concept
[AD-B174654] p 3433 N94-30913
View integration: A survey of current developments
[REPT-93-053] p 3536 N94-30927

COMPUTER SYSTEMS PERFORMANCE

Performance analysis of memory hierachies in high performance systems
[DE94-005549] p 3404 N94-28517
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3
[AD-A275390] p 3411 N94-29202
Potential software failures methodology analysis p 3414 N94-29329
A common Ada run-time system for avionics software p 3150 N94-29331
A study of the relationship between the performance and dependability of a fault-tolerant computer
[NASA-CR-195758] p 3406 N94-29695
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
Design for dependability: A simulation-based approach
[NASA-CR-195757] p 3420 N94-29890
Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435
Numerical precision and roundoff considerations concerning computer code migration
[DE94-005421] p 3427 N94-30590
On the unification free PROLOG programs
[CWI-CS-R9331] p 3427 N94-30733
Early experiences with the IBM SP1 and the high-performance switch
[DE94-006261] p 3429 N94-30840

COMPUTER SYSTEMS PROGRAMS

The state transition diagram with path priority and it's applications
[AD-A275524] p 3434 N94-28672
Software systems reengineering process model, version 1.0
[AD-A275711] p 3407 N94-28691
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Performing specifications for complex systems' software p 3155 N94-29317
Ada run time system certification for avionics applications p 3150 N94-29332
Integrated formal verification and validation of safety critical software p 3416 N94-29338
Aid to Ada component reuse at Aerospatiale Cannes (France)
[REPT-932-440-102] p 3418 N94-29418
Using RDD-100 with CoRE. Version 01.00.03
[AD-A275336] p 3419 N94-29797
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431

COMPUTER SYSTEMS SIMULATION

Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
Design for dependability: A simulation-based approach
[NASA-CR-195757] p 3420 N94-29890
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912

COMPUTER TECHNIQUES

User-centered guidelines for environmental management
[DE94-004313] p 3341 N94-28454
The computer-aided system for the high resolution SQUID-magnetometer
[DE94-606138] p 3286 N94-28553
Capabilities, products, and services of USAFETAC (USAF Environmental Technical Applications Center)
[AD-A275654] p 3368 N94-28652
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report
[AD-A275298] p 3242 N94-28874
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28896
Solution of augmented systems
[PB94-138211] p 3452 N94-29111
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159
The discipline of defining the software product p 3416 N94-29343
A case-based approach to creative design
[AD-A275229] p 3417 N94-29390
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Information engineering implementation and acceptance p 3530 N94-29533
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
Computer-based linking of thesauri p 3534 N94-29961
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
TOTAL user manual
[NASA-TM-109101] p 3432 N94-30160
Total termination of term rewriting
[RUU-CS-92-42] p 3460 N94-30744
A new programming methodology for lazy functional languages
[MEMO-INF-93-44] p 3429 N94-30765
Measuring the impact of investments in information technologies on business performance
[REPT-93-056] p 3536 N94-30929
MPEG-2 video decoding architecture: Analysis and design
[REPT-93-069] p 3260 N94-30940

COMPUTER VISION

A new method for recognizing quadric surfaces from range data and its application to telerobotics and automation, final phase
[NASA-CR-195733] p 3408 N94-28825
Basic research in computer science
[AD-A275184] p 3405 N94-29181
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
Airside ground movements surveillance p 3141 N94-29585
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Robotic hand-eye motor learning p 3436 N94-29835
Computer Assisted Medical Interventions: Application to Conformal Radiotherapy
[RR-912-I] p 3395 N94-30028
Pre- and intra-radiotherapy multimodal image registration: Principles and first experiments p 3395 N94-30030
Computational methods for the shape shading problem
[ISBN-0-315-85430-8] p 3421 N94-30136
Encoding technique for automated guided vehicle POSE recovery in a structured environment p 3144 N94-30286
Activities in machine vision at Imago Manufacturing Ltd. p 3308 N94-30297
Thermal imaging for a mobile robot p 3308 N94-30300
Obstacle detection for an autonomous vehicle p 3309 N94-30302
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
VAS: A Vision Advisor System combining agents and object-oriented databases
[AIAA PAPER 94-1181-CP] p 3440 N94-30532

Application of the Modular Automated Reconfigurable Assembly System (MARAS) concept to adaptable vision gauging and parts feading
[AIAA PAPER 94-1182-CP] p 3440 N94-30533
Integration of vision and robotic workcell
[AIAA PAPER 94-1186-CP] p 3440 N94-30536
Design of an autonomous exterior security robot
[AIAA PAPER 94-1188-CP] p 3441 N94-30538
Technology for robotic surface inspection in space
[AIAA PAPER 94-1193-CP] p 3442 N94-30544
Design and control of active vision based mechanisms for intelligent robots
[AIAA PAPER 94-1196-CP] p 3442 N94-30547
Vision based object pose estimation for mobile robots
[AIAA PAPER 94-1197-CP] p 3442 N94-30548
Unsupervised texture image segmentation by improved neural network ART2
[AIAA PAPER 94-1199-CP] p 3442 N94-30549
Microwave vision for robots
[AIAA PAPER 94-0687-CP] p 3443 N94-30550
A reactive system for open terrain navigation: Performance and limitations
[AIAA PAPER 94-1218-CP] p 3445 N94-30566
The Automated Aircraft Rework System (AARS): A system integration approach
[AIAA PAPER 94-1225-CP] p 3446 N94-30574
Placing registration marks
[RUU-CS-93-21] p 3427 N94-30725
Aspects of vision and planning in a dynamic, uncertain environment p 3448 N94-30803

COMPUTERIZED SIMULATION
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Analysis of spark-induced bubble experiments using CALE
[DE94-003667] p 3270 N94-28476
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Computer simulation of martensitic transformations
[DE94-005213] p 3201 N94-28479
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Composite load spectra for select space propulsion structural components
[NASA-CR-194476] p 3316 N94-28508
Simulation of experiments on deep inelastic scattering of muons on superconducting magnetic toroidal spectrometer STORS
[DE94-606267] p 3483 N94-28554
Solution of charged particle transport equation by Monte-Carlo method in the BRANDZ code system
[DE94-606270] p 3484 N94-28614
Capabilities, products, and services of USAFETAC (USAF Environmental Technical Applications Center)
[AD-A275654] p 3368 N94-28652
Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations
[AD-A275459] p 3325 N94-28808
Modification of ACSYNT aircraft computer program for preliminary design
[NASA-CR-195737] p 3145 N94-28817
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241
Technology rigs: A tool for afterburner development p 3154 N94-29270
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor p 3152 N94-29300
Testing Operational Flight Programs (OFPs) p 3415 N94-29337
A distributed object-based environment in Ada p 3417 N94-29347
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415
Satellites: Reliability and operation security
[REPT-932-440-108] p 3168 N94-29419
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532
Simulation of fully automated air traffic control concepts p 3139 N94-29569
Radar estimations of atmospheric winds in the troposphere and lower stratosphere p 3370 N94-29697
Microgravity by parabolic flight with MU-300 aircraft p 3392 N94-29710
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry p 3333 N94-29762
A pot-pourri of results in QCD from large lattice simulations on the CM5
[DE94-005084] p 3514 N94-29818
Large eddy simulation of subsonic mixing layers p 3276 N94-29851
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions p 3253 N94-29882
Numerical simulation of radiative heat loss in an experimental burner
[DE94-002016] p 3277 N94-29923
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Algorithm and program ORANGE for magnetic field simulation of magnetic system spectrometer STORS
[DE94-608013] p 3421 N94-30083
Fractal approach to computer-analytical modelling of tree crown
[DE94-608089] p 3467 N94-30088
Large eddy simulation of the upper atmospheric surface layer
[ISBN-0-315-85393-X] p 3365 N94-30134
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253
Simulation of lightweight robots and their controllers p 3307 N94-30294
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
Biologically-inspired hexapod robot design and simulation
[AIAA PAPER 94-1178-CP] p 3439 N94-30530
Graphical simulation for aerospace manufacturing
[AIAA PAPER 94-1224-CP] p 3446 N94-30573
The second coming of cold dark matter?
[DE94-004992] p 3548 N94-30694
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871
Application of ALE techniques to metal forming simulations
[DE94-005358] p 3211 N94-30892

COMPUTERS
Basic research in computer science
[AD-A275184] p 3405 N94-29181

CONCATENATED CODES
Convolutional encoding of self-dual codes p 3250 N94-29662

CONCENTRATION (COMPOSITION)
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
Evaluating models of climate and forest vegetation p 3353 N94-30637
Chemical composition of insoluble particles in superimposed ice on Storoeya, Svalbard (Sweden)
[CM-82] p 3336 N94-30944

CONCENTRATORS
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033

CONCENTRIC CYLINDERS
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Multiple Concentric Cylinder Model (MCCM) user's guide
[NASA-CR-195299] p 3183 N94-30125

CONCRETE STRUCTURES
Development of the breakwater with submerged mound for interchanging sea water p 3234 N94-29703

CONCRETES
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
Contributions of DLR to air traffic capacity enhancement within a terminal area p 3138 N94-29567
Fracture process zone of brittle composites p 3182 N94-29876
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929

CONCURRENT PROCESSING
Reasoning about programs by exploiting the environment
[AD-A275852] p 3408 N94-28794
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
Tinkertoy(tm) transactions
[AD-A275271] p 3410 N94-29006
Batch updates and concurrency in B-trees
[PB94-136835] p 3530 N94-29167
Design and analysis of concurrency control schemes for heterogeneous database systems p 3531 N94-29591
Event structures and orthogonal term graph rewriting
[CWI-CS-R9347] p 3459 N94-30412
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
MANIFOLD version 1.0 programming: Programs and problems
[CWI-CS-R9334] p 3425 N94-30428
Manray: A replicated workers program in MANIFOLD
[CWI-CS-R9337] p 3433 N94-30429
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432
Efficient bounded timestamping using traceable use abstraction: Is writer's guessing better than reader's telling?
[RUU-CS-93-28] p 3426 N94-30489
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912

CONDENSATES
Qualitative vector optimization of a condensate stabilizer process
[PB94-133246] p 3189 N94-28789

CONDENSERS (LIQUEFIERS)
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855

CONDITIONS
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450

CONDUCTING POLYMERS
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806

CONDUCTIVE HEAT TRANSFER
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Unstructured space-time finite element method of heat conduction p 3279 N94-30224

CONDUCTORS
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289

Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192

CONES
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528

CONFERENCES
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics
[DE94-004955] p 3483 N94-28566
Local Measurement of Tropospheric HO(x)
[NASA-CP-3245] p 3342 N94-28587
Proceedings of the workshop on quark and lepton mass matrices
[DE94-707692] p 3485 N94-28624
Minutes. Accredited Standards Committee on Acoustics, S1. US tag for ISO/TC 43 acoustics and IEC/TC 29 electroacoustics
[AD-A275702] p 3477 N94-28689
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
Minutes: Accredited Standards Committee on Mechanical Vibration and Shock, S2. US TAG for ISO/TC 108 Mechanical Vibration and Shock
[AD-A275591] p 3316 N94-28726
The Seventh Annual National Conference of Black Physics Students
[NASA-CR-195735] p 3526 N94-28746
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Partial support for the Second International Symposium on Artificial Intelligence and Mathematics
[AD-A275199] p 3434 N94-29026
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
The 19th Convention on Radio Science: Abstracts of Papers
[PB94-136868] p 3244 N94-29169
Finnish astronomy days, 1992-1993. Proceedings of the Finnish Astronomical Society
[PB94-136892] p 3538 N94-29170
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Fuels and Combustion Technology for Advanced Aircraft Engines
[AGARD-CP-536] p 3189 N94-29246
Aerospace Software Engineering for Advanced Systems Architectures
[AGARD-CP-545] p 3412 N94-29315
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
Machine Intelligence in Air Traffic Management
[AGARD-CP-538] p 3136 N94-29558
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
[NASA-CR-195688] p 3235 N94-29767
The Seventh International Beer Sheva Seminar on MHD Flows and Turbulence
[DE94-607211] p 3506 N94-29831
Proceedings: SISAL 1993
[DE94-006641] p 3420 N94-30056
Proceedings of the 1991 Single Event Upset Symposium
[DSIS-92-00652] p 3495 N94-30211
Proceedings of the 3rd Conference on Military Robotic Applications
[DRES-SP-149] p 3304 N94-30275
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
Proceedings of the 1993 Windsor Workshop on Alternative Fuels
[DE94-003908] p 3226 N94-30612
International Energy and Environmental Congress: Proceedings
[DE93-040609] p 3353 N94-30715
Proceedings of the low cost materials of construction for biological processes workshop
[DE94-000218] p 3226 N94-30761
Index of NPL acoustics publications 1981-1990
[NPL-RSA(EXT)-0044] p 3480 N94-30786
NREL Photovoltaic Program FY 1993 bibliography
[DE94-000272] p 3340 N94-30820
Interagency advanced power group: Solar working group
[DE94-004953] p 3340 N94-30833

CONFIDENCE LIMITS
Ten new checks to assess the statistical quality of Monte Carlo solutions in MCNP
[DE94-006137] p 3465 N94-30366

CONFIGURATION INTERACTION
Numerical study on the interaction between scramjet engine modules caused by thermal choke
p 3125 N94-28960

CONFIGURATION MANAGEMENT
Guide to the Environmental-Language
[AD-A275849] p 3408 N94-28784
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Software engineering and software management in a distributed UNIX environment
[NLR-TP-92233-U] p 3422 N94-30314

CONFINEMENT
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760

CONFORMAL MAPPING
Reidemeister numbers of equivariant maps
[PB94-138286] p 3452 N94-29118
Remarks on Galois symmetry in RCFT
[PB94-138179] p 3467 N94-29147

CONGRUENCES
Reidemeister numbers of equivariant maps
[PB94-138286] p 3452 N94-29118

CONIFERS
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189

CONJUGATE GRADIENT METHOD
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532

CONJUGATE POINTS
Estimation of geomagnetic conjugate points by using Pc5 pulsations p 3357 N94-29079

CONJUGATION
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157

CONNECTION MACHINE
Global atmospheric and ocean modeling on the connection machine
[DE94-003930] p 3342 N94-28521

CONNECTORS
Quick connect fastener
[NASA-CASE-MFS-28829-1] p 3300 N94-29486
Development and testing of the Automated Fluid Interface System p 3161 N94-29636

CONSERVATION
Evaluation of monitoring audiometry in the United States Air Force Hearing Conservation Program
[AD-A275309] p 3391 N94-29211

CONSERVATION EQUATIONS
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758

CONSERVATION LAWS
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

CONSOLIDATION
Mechanical alloying processing with application to structural materials: ASSERT supplement
[AD-A275400] p 3204 N94-29205

CONSTRAINTS
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits
p 3467 N94-29910

CONSTRUCTION
Object-oriented CAD tool implementations for the construction industry
[PB94-132370] p 3407 N94-28411
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
Local interaction control for space construction
p 3170 N94-30960

CONSTRUCTION INDUSTRY
Object-oriented CAD tool implementations for the construction industry
[PB94-132370] p 3407 N94-28411

CONSTRUCTION MATERIALS
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483

CONTACT LOADS
Force control techniques for robot manipulators and their military applications p 3307 N94-30291

CONTAINERLESS MELTS
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371

CONTAMINANTS
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
Characterization of air emissions from the simulated open combustion of fiberglass materials
[PB94-136231] p 3347 N94-29192
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model
p 3190 N94-29251
Brief summary of accomplishments since our DOE-sponsored radon project commenced
[DE94-004643] p 3348 N94-29926
Intermedia transfer factors for fifteen toxic pollutants released to air basins in California
[DE94-005699] p 3349 N94-30044
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468
Dewatering of contaminated river sediments
p 3354 N94-30472

CONTAMINATION
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464

CONTEXT FREE LANGUAGES
Increasing the applicability of LR parsing
[TR-93-06] p 3423 N94-30332
Generalized left-corner parsing
[TR-92-21] p 3432 N94-30356

CONTINUITY (MATHEMATICS)
Splines and ocean wave modelling
[PB94-139409] p 3378 N94-30002

CONTINUOUS RADIATION
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
Induced crystallization in CW laser-irradiated sol-gel deposited titania films
[DE94-006527] p 3207 N94-30062

CONTINUOUS SPECTRA
Miln equation for the calculation of the phases and amplitudes of wave functions for continuum spectrum of Coulomb two-center problem
[DE94-606292] p 3522 N94-28616

CONTINUOUS WAVE LASERS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309

Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367

CONTINUOUS WAVE RADAR
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
Radar jet engine health monitoring project
[ASSGI-3U1] p 3153 N94-30130

CONTINUUM MECHANICS
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
The motion of deforming bodies
[AD-A275224] p 3271 N94-29061
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933

CONTOURS
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522
Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images
[TELECOM-93-D-016] p 3395 N94-30970

CONTRACT MANAGEMENT
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report
[AD-A275298] p 3242 N94-28874

CONTRACTION
Bounded contraction and many-valued semantics
[ML-93-04] p 3456 N94-30380

CONTRACTORS
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499

CONTRAROTATING PROPELLERS
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438

CONTROL BOARDS
Micro guidance and control technology overview
p 3144 N94-29772

CONTROL EQUIPMENT
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels
[NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495
Micro guidance and control technology overview
p 3144 N94-29772
Control of heating, ventilation and air conditioning (HVAC) systems
[PB94-138807] p 3401 N94-30000
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055

CONTROL MOMENT GYROSCOPES
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358

CONTROL SIMULATION
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
Simulation of fully automated air traffic control concepts p 3139 N94-29569
Elevation control system model for the DSS 13 antenna p 3248 N94-29622
Generation mechanisms of quasi-stationary waves in the Southern Hemisphere p 3365 N94-30789
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857

CONTROL STABILITY
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
The development procedures and tools applied for the attitude control software of the Italian satellite SAX
p 3170 N94-29324
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands
p 3301 N94-29847
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Robust adaptive control and filtering
p 3437 N94-29895
Vehicle following controller design for autonomous intelligent vehicles
[AIAA PAPER 94-1203-CP] p 3443 N94-30554
Robust adaptive control of a mechanical manipulator
p 3449 N94-30806
A control method for bilateral teleoperating systems
[ISBN-0-315-78705-8] p 3313 N94-30952

CONTROL SURFACES
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760

CONTROL SYSTEMS DESIGN
The development procedures and tools applied for the attitude control software of the Italian satellite SAX
p 3170 N94-29324
Software engineering methods in the Hermes on-board software p 3414 N94-29326
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels
[NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495
Intelligent systems for air space control and management p 3137 N94-29560
Elevation control system model for the DSS 13 antenna p 3248 N94-29622
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Pulse response based minimum time control of flexible structures p 3436 N94-29720
Control of micromachined deformable mirrors
p 3239 N94-29787
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798
Decoupled flight control system design using the singular perturbation method p 3155 N94-29850
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
Elements of supervisory control for military robotic applications p 3309 N94-30303
Aspects of the operator interface for military robotic applications in unstructured environments
p 3309 N94-30304
Supervised autonomous control for Space Station Special Purpose Dextrous Manipulator (SPDM) robot
p 3309 N94-30305
Motion control of mobile robots p 3310 N94-30309
Control system design for A and R supported microgravity experiments: An experiment payload control development
[AD-B179107] p 3229 N94-30421
A direct digital control-law synthesis in the w-domain: W-synthesis methodology p 3438 N94-30517
Design and control of active vision based mechanisms for intelligent robots
[AIAA PAPER 94-1196-CP] p 3442 N94-30547
Predictive sufficiency and the use of stored internal state
[AIAA PAPER 94-1213-CP] p 3445 N94-30564
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565
A reactive system for open terrain navigation: Performance and limitations
[AIAA PAPER 94-1218-CP] p 3445 N94-30566
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570
Robust adaptive control of a mechanical manipulator
p 3449 N94-30806
A stochastic control approach to flight path monitoring
[AD-B174630] p 3143 N94-30853
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946
A control method for bilateral teleoperating systems
[ISBN-0-315-78705-8] p 3313 N94-30952

CONTROL THEORY
Application of digital control theory to adaptive grid generation p 3127 N94-28980
Air traffic management as principled negotiation between intelligent agents p 3137 N94-29562
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
p 3142 N94-29837
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands
p 3301 N94-29847
Decoupled flight control system design using the singular perturbation method p 3155 N94-29850
Robust adaptive control and filtering
p 3437 N94-29895
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
Second order necessary conditions in optimal control
[ISBN-0-315-85443-X] p 3437 N94-30255
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
A direct digital control-law synthesis in the w-domain: W-synthesis methodology p 3438 N94-30517
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Dynamics and control of tethered satellite systems
p 3170 N94-30864
A control method for bilateral teleoperating systems
[ISBN-0-315-78705-8] p 3313 N94-30952
Robust control of robots via linear estimated state-feedback
[MEMO-1153] p 3449 N94-30963

CONTROLLABILITY
Exploring QDES as a tool for determining limits of achievable performance in aircraft design
[AD-A275359] p 3146 N94-28998

CONTROLLERS
Exploring QDES as a tool for determining limits of achievable performance in aircraft design
[AD-A275359] p 3146 N94-28998
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
An alternate method for achieving temperature control in the -160 to +90 C range
[NASA-CASE-NPO-18995-1-CU] p 3288 N94-29497
Design and test of electromechanical actuators for thrust vector control p 3163 N94-29650
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
Robotic hand-eye motor learning
p 3436 N94-29835
Integrated propulsion-airframe dynamics and control
p 3147 N94-29854
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
[NASA-TM-109105] p 3157 N94-30200
Experimental sliding mode control of a flexible single link manipulator
[ISBN-0-315-85466-9] p 3304 N94-30238
A fuzzy logic controller for hormone administration using an implantable pump p 3397 N94-30459
A direct digital control-law synthesis in the w-domain: W-synthesis methodology p 3438 N94-30517
Confessions of a robot lobotomist
[AIAA PAPER 94-1185-CP] p 3440 N94-30535
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Vehicle following controller design for autonomous intelligent vehicles
[AIAA PAPER 94-1203-CP] p 3443 N94-30554
Situational reaction and planning
[AIAA PAPER 94-1206-CP] p 3444 N94-30557
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Local interaction control for space construction
p 3170 N94-30960

CONVECTION
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
Convective turbulence and transport in stars
p 3546 N94-29913
A laboratory simulation of urban heat-island-induced circulation in a stratified environment
p 3367 N94-30921

CONVECTION CURRENTS
On the origins of low-level tornadic circulations within the remnants of hurricane Andrews
[AD-A275373] p 3369 N94-29011
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Prototype terminal aerodrome forecasts using a mesoscale model
[AD-A275308] p 3369 N94-29194
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744

CONVECTIVE FLOW
Convective flow effects on protein crystal growth
[NASA-CR-195785] p 3515 N94-30015

CONVECTIVE HEAT TRANSFER
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
CONVERGENCE
The bootstrapped algorithm: A fast algorithm for blind signal separation
[AD-A275759] p 3408 N94-28760
A study of the convergence of spherical harmonic expansions of gravity using distributed point-mass Earth models p 3362 N94-29909
Perpetual reductions in orthogonal combinatory reduction systems
[CWI-CS-R9349] p 3459 N94-30413
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-1255722-U] p 3281 N94-30743
CONVERGENT-DIVERGENT NOZZLES
Supersonic gas-liquid cleaning system
p 3240 N94-30467
CONVEXITY
Representations of dynamical systems described by behavioral inequalities
[AD-B173649] p 3458 N94-30402
CONVOLUTION INTEGRALS
Convolutional encoding of self-dual codes
p 3250 N94-29662
Decoder synchronization for deep space missions
p 3250 N94-29664
CONVULSIONS
Monitor for status epilepticus seizures
p 3397 N94-30460
COOL STARS
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
COOLANTS
Research and development of high thermal stability fuels p 3192 N94-29261
COOLING
Alleviation of thermal strain in the CF: Keeping our cool during the Gulf conflict p 3383 N94-28449
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
COOLING FINS
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
COOLING FLOWS (ASTROPHYSICS)
Numerical simulations of cluster cooling flows
p 3544 N94-29725
Optical depth effects in cluster cooling flows
p 3541 N94-30800
COOLING SYSTEMS
Recent Canadian advances in active thermal protection p 3384 N94-28451
Endothermic fuels for hypersonic aviation
p 3197 N94-29285
Liquid metal MHD and heat transfer in a tokamak blanket slotted coolant channel
[DE94-004622] p 3506 N94-29510
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846
COORDINATES
Variational calculation of the eigenpotential for H(sup -)-system
[DE94-606269] p 3407 N94-28622
Least-squares determination of burst-point coordinates
[AD-A275423] p 3452 N94-28864
Quasi-adiabatic motion of energetic particles in a dipole magnetic field
[DE94-607322] p 3362 N94-29935
COORDINATION
Coordinated control of multiple robot manipulators
p 3306 N94-30289
COPOLYMERIZATION
The polymerization of epsilon-caprolactone with stannous catalyst and lactide/epsilon-caprolactone (LA/epsilon-CL) and lactide/glycolide (LA/GA) copolymers. Polymer technology publication series no. 15
[PB94-137551] p 3220 N94-30713
COPOLYMERS
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
A new material for removing heavy metals from water
p 3354 N94-30471
The polymerization of epsilon-caprolactone with stannous catalyst and lactide/epsilon-caprolactone (LA/epsilon-CL) and lactide/glycolide (LA/GA) copolymers. Polymer technology publication series no. 15
[PB94-137551] p 3220 N94-30713
COPPER
Low frequency dynamics of CO/Cu-breakdown of Born-Oppenheimer approximation
[DE94-005508] p 3510 N94-28512
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Anodization of copper in chloride media
[AD-A275565] p 3202 N94-28793
Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446
COPPER ALLOYS
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions
[ISBN-0-315-86108-8] p 3209 N94-30146
Studies on the optimization of deformation processed metal-metal matrix composites
[DE94-006033] p 3185 N94-30704
COPPER CHLORIDES
Anodization of copper in chloride media
[AD-A275565] p 3202 N94-28793
COPPER OXIDES
Influence of doping on the electronic structure of (La, Sr)2CuO4
[DE94-006383] p 3516 N94-30054
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691
Normal state resistivity of MBa2Cu3O(7-x) ceramics
[DE94-608456] p 3220 N94-30745
Intra- versus interlayer pairing in the copper oxide superconductors: Response to a magnetic field
[DE94-005475] p 3521 N94-30898
CORE SAMPLING
Collecting cometary soil samples? Development of the ROSETTA sample acquisition system
p 3160 N94-29628
CORIOLIS EFFECT
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
CORN
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
CORNERS
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
COROTATION
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849
CORRELATION
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
CORRELATORS
A digital combining-weight estimation algorithm for broadband sources with the array feed compensation system p 3250 N94-29660
CORROSION
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Corrosion performance of materials for advanced combustion systems
[DE94-006726] p 3207 N94-30057
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521
Dual-band infrared imaging for quantitative corrosion detection in aging aircraft
[DE94-004187] p 3149 N94-30687
CORROSION PREVENTION
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Electrochemical behavior and surface chemistry of nonequilibrium aluminum alloys: Passivity mechanism and fabrication methods
[AD-A275401] p 3204 N94-29196
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
Development of a unique polyurethane primer/topcoat
p 3223 N94-30476
CORROSION RESISTANCE
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Electrochemical behavior and surface chemistry of nonequilibrium aluminum alloys: Passivity mechanism and fabrication methods
[AD-A275401] p 3204 N94-29196
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053
Corrosion performance of materials for advanced combustion systems
[DE94-006726] p 3207 N94-30057
COSINE SERIES
Some remarkable sine and cosine functions
[PB94-137759] p 3453 N94-29439
COSMIC DUST
Dust in the Small Magellanic Cloud
[NASA-CR-195764] p 3543 N94-29696
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832
COSMIC GASES
Energetic events in the early universe
p 3547 N94-30012
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352
COSMIC NOISE
Initial observation results with imaging riometer at NY-Alesund (L is equal to 16) p 3360 N94-29239
COSMIC RAY SHOWERS
A study of the ultrahigh-energy cosmic ray mass composition with the MACRO and EAS-TOP experiments p 3552 N94-29687
A study of ultra high-energy radiation associated with Hercules X-1 p 3552 N94-29823
COSMIC RAYS
Production rates of terrestrial in-situ-produced cosmogenic nuclides
[DE94-005156] p 3543 N94-28545
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580
A study of ultra high-energy radiation associated with Hercules X-1 p 3552 N94-29823
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857
Determination of cosmic ray latchup rate in CMOS devices p 3497 N94-30222
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352
COSMOCHEMISTRY
Production rates of terrestrial in-situ-produced cosmogenic nuclides
[DE94-005156] p 3543 N94-28545
COSMOLOGY
Cosmogenic C-14 in Antarctic and non-Antarctic meteorites and lunar samples
[NASA-CR-195795] p 3546 N94-29905
On dyonic black holes and cosmic censorship
p 3546 N94-29912
The angular two-point correlation function of galaxies down to 25th mag p 3547 N94-30010
Energetic events in the early universe
p 3547 N94-30012
COST ANALYSIS
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670

Analysis of cost: CVD diamond deposition and finishing --- Quarterly report
[AD-A275586] p 3212 N94-28725
Aircraft age impact on individual operating and support cost elements
[AD-A275739] p 3121 N94-28732
Business planning model user's guide
[AD-A274978] p 3409 N94-28895
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE94-006100] p 3226 N94-30885

COST EFFECTIVENESS
Risk-based prioritization: A comparison of approaches
[DE94-003368] p 3526 N94-28474
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Development of large area RF induction plasma for cost effective diamond
[AD-A275888] p 3504 N94-28776
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910
Ventilation cost and air cleaning p 3232 N94-29605
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603
Solar photovoltaics for development applications
[DE94-006116] p 3340 N94-30843

COST ESTIMATES
Demonstration of improved software support labor estimation for Air Force operational flight programs through functional orientation
[AD-A275789] p 3121 N94-28743
Business planning model user's guide
[AD-A274978] p 3409 N94-28895
Ventilation cost and air cleaning p 3232 N94-29605
Estimating the cost of large superconducting thin solenoid magnets
[DE94-006289] p 3468 N94-30026
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339

COST REDUCTION
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603

COSTS
Ventilation cost and air cleaning p 3232 N94-29605
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824

COULOMB COLLISIONS
Simulation of experiments on deep inelastic scattering of muons on superconducting magnetic toroidal spectrometer STORS
[DE94-606267] p 3483 N94-28554
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045

COULOMB POTENTIAL
Quasipotential in the fourth order of perturbation theory
[DE94-606299] p 3484 N94-28584

COUNTER ROTATION
Design and fabrication of forward-swept counterrotation blade configuration for wind tunnel testing
[NASA-CR-194868] p 3155 N94-28510

COUNTERMEASURES
NATO SOCMET trials p 3258 N94-30503

COUNTERS
A measurement of the LMP effect
[DE94-005225] p 3482 N94-28493

COUNTING
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515

COUPLERS
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529

COUPLING
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575

COUPLING COEFFICIENTS
Dynamics of a coupled solid state laser array p 3294 N94-29551

COUPLINGS
Quick connect fastener
[NASA-CASE-MFS-28829-1] p 3300 N94-29486
Development and testing of the Automated Fluid Interface System p 3161 N94-29636

CRACK CLOSURE
On fatigue crack closure: Analysis and measurement
[ISBN-0-315-74873-7] p 3321 N94-29812

CRACK INITIATION
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels
[AD-A275755] p 3315 N94-28646
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226

CRACK OPENING DISPLACEMENT
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
On fatigue crack closure: Analysis and measurement
[ISBN-0-315-74873-7] p 3321 N94-29812
Fracture process zone of brittle composites p 3182 N94-29876

CRACK PROPAGATION
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels
[AD-A275755] p 3315 N94-28646
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals p 3321 N94-29808
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Fracture process zone of brittle composites p 3182 N94-29876
Acoustic emission monitoring of aging aircraft structures
[DREP-93-17] p 3148 N94-30129
Enhanced fatigue crack detection in aging aircraft using continuous acoustic emission monitoring
[DREP-93-16] p 3148 N94-30131
Time-resolved holography for the microscopic study of crack-tip motion in dynamic fracture p 3290 N94-30254
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914

CRACK TIPS
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Flux-focusing eddy current probe and method for flaw detection
[NASA-CASE-LAR-15046-1] p 3315 N94-29366
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals p 3321 N94-29808
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
Fracture process zone of brittle composites p 3182 N94-29876
Time-resolved holography for the microscopic study of crack-tip motion in dynamic fracture p 3290 N94-30254
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689

CRACKING (FRACTURING)
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Effect of microstructure on the strength and fracture energy of bimaterial interfaces
[AD-A274987] p 3178 N94-29126
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690

CRACKS
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels
[AD-A275755] p 3315 N94-28646
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Effect of surface condition on strength and fatigue behavior of alumina ceramic
[AD-A275053] p 3214 N94-29133
Flux-focusing eddy current probe and method for flaw detection
[NASA-CASE-LAR-15046-1] p 3315 N94-29366
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals p 3321 N94-29808
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Fracture process zone of brittle composites p 3182 N94-29876
Delamination growth in composites under cyclic loads p 3183 N94-30256

CRASHWORTHINESS
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799

CRAWLER TRACTORS
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
A newly developed snow vehicle (SM100S) for Antarctica. Part 1: Necessity and process of the development p 3314 N94-29981
A newly developed snow vehicle (SM100S) for Antarctica. Part 2: Design of the system p 3314 N94-29982
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel p 3364 N94-29983
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984
A newly developed snow vehicle (SM100S) for Antarctica. Part 5: Result of general performance tests p 3314 N94-29985

CRAY COMPUTERS
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792

CREATIVITY
A case-based approach to creative design
[AD-A275229] p 3417 N94-29390

CREEP ANALYSIS
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885
Creep and physical aging of PVC: Dependence on stress and temperature
[NPL-DMM(A)-115] p 3217 N94-29886

CREEP PROPERTIES
Relationship between swelling and irradiation creep in cold-worked PCA stainless steel irradiated to approximately 178 dpa at approximately 400 C
[DE94-004368] p 3201 N94-28456
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel
[PB94-138328] p 3319 N94-29121
Effects of physical aging on long-term creep of polymers and polymer matrix composites
[NASA-TM-109081] p 3181 N94-29541
Creep and physical aging of PVC: Dependence on stress and temperature
[NPL-DMM(A)-115] p 3217 N94-29886

Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710

CREEP TESTS
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885

CRETACEOUS PERIOD
Motion and development of the Pacific Plate from the Middle Jurassic to the Late Cretaceous
p 3362 N94-29939
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940

CRETACEOUS-TERTIARY BOUNDARY
Field guide to Cretaceous-tertiary boundary sections in northeastern Mexico
[NASA-CR-195719] p 3354 N94-28416

CRITERIA
The development and demonstration of the metric assessment tool
[AD-A275788] p 3230 N94-28742

CRITICAL EXPERIMENTS
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556

CRITICAL LOADING
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

CROSS CORRELATION
Reconstruction of stellar images from correlations
[ISBN-0-315-85382-4] p 3541 N94-30133
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670

CROSS FLOW
The mixing process in the quenching zone of the rich-lean-combustion concept p 3196 N94-29281
Long-wavelength asymptotics of unstable crossflow modes, including the effect of surface curvature
[NASA-CR-4579] p 3273 N94-29460

CROSS SECTIONS
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980

CROSSED FIELDS
The investigation of electron-ion radiative and dielectronic recombination in high-temperature plasmas
[DE94-005150] p 3509 N94-30755

CROSSLINKING
Organic materials that respond to molecules
[AD-A275392] p 3174 N94-29307
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils
p 3221 N94-30797
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

CRRES (SATELLITE)
Proton switches
[AD-A275150] p 3167 N94-29022
Identification of an unexpected space radiation hazard
[AD-A275170] p 3552 N94-29046

CRUCIBLES
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073

CRUDE OIL
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630

CRYOGENIC COOLING
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337

CRYOGENIC EQUIPMENT
An absolute measurement of the cosmic background radiation temperature at 1.4 GHz p 3553 N94-30351

CRYOGENIC FLUID STORAGE
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904

CRYOGENIC FLUIDS
Development and testing of the Automated Fluid Interface System p 3161 N94-29636

CRYOGENIC TEMPERATURE
Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000
Collecting cometary soil samples? Development of the ROSETTA sample acquisition system
p 3160 N94-29628
The far-infrared absorption spectrum of low temperature hydrogen gas
[ISBN-0-315-85432-4] p 3199 N94-30137

CRYOGENIC WIND TUNNELS
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788

CRYOGENICS
ISO overview: General presentation of the satellite, cryogenic aspects
[REPT-932-440-102] p 3231 N94-29416

CRYOPUMPING
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832

CRYOSTATS
Estimating the cost of large superconducting thin solenoid magnets
[DE94-006289] p 3468 N94-30026

CRYPTOGRAPHY
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
RIPE integrity primitives, part 1 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9324-PT-1] p 3252 N94-29692
RIPE integrity primitives, part 2 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9325-PT-2] p 3252 N94-29693

CRYSTAL DEFECTS
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

CRYSTAL DISLOCATIONS
Nanodislocation structures generated in shocked crystals p 3514 N94-29915

CRYSTAL FIELD THEORY
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165
Magnetic properties of a transverse spin-1 Ising model with random crystal field interactions
[DE94-608117] p 3517 N94-30181

CRYSTAL GROWTH
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment
[AD-A275215] p 3357 N94-29070
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Process modelling for materials preparation experiments
[NASA-CR-195782] p 3175 N94-30242
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592
Thin EFG octagons
[DE94-000257] p 3339 N94-30605
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
Study of nucleation and growth in Al-Zn alloys using TEM
[DE94-006312] p 3211 N94-30852
A solid-on-solid invasion percolation model for self-affine interfaces
[DE94-608102] p 3521 N94-30888

CRYSTAL LATTICES
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
A pot-pourri of results in QCD from large lattice simulations on the CM5
[DE94-005084] p 3514 N94-29818
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082
Some results on the phase diagram of the antiferromagnetic Potts model in an external magnetic field
[DE94-608115] p 3468 N94-30110
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
Lattice gas simulations of replicating domains
[DE94-005008] p 3200 N94-30748

CRYSTAL OSCILLATORS
Ground control system for the midcourse space experiment UTC clock p 3474 N94-30674

CRYSTAL STRUCTURE
Synthesis and characterization of novel ternary and quaternary reduced molybdenum oxides
[DE94-005563] p 3510 N94-28529
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide
[AD-A275019] p 3513 N94-29130
Synthesis and molecular structures of R(Me3CCH2)2In-E(SiMe3) (R = Me3CCH2, E = P or As; R = Me, E = P)
[AD-A275020] p 3486 N94-29131
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
Nanodislocation structures generated in shocked crystals p 3514 N94-29915
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

CRYSTAL SURFACES
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592

CRYSTALLITES
Crystallization of silver chromate from ethanol via salt metathesis reactions of solubilized precursors
[AD-A275178] p 3189 N94-29058
Bench-scale synthesis of nanoscale materials
p 3240 N94-30473

CRYSTALLIZATION
Crystallization of silver chromate from ethanol via salt metathesis reactions of solubilized precursors
[AD-A275178] p 3189 N94-29058
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
Convective flow effects on protein crystal growth
[NASA-CR-195785] p 3515 N94-30015
Induced crystallization in CW laser-irradiated sol-gel deposited titania films
[DE94-006527] p 3207 N94-30062
Densification and crystallization of zirconia thin films prepared by sol-gel processing
[DE94-005573] p 3518 N94-30315
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691

CRYSTALLOGRAPHY
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774

CRYSTALS
Effect of phonon dispersion on properties of exciton in magnetic field
[DE93-634756] p 3481 N94-28469
Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Protein crystal growth in microgravity p 3228 N94-28943
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109
Overlap of metal clusters and nuclear structure physics
[DE94-608367] p 3517 N94-30183
CUBANE
Cubanes: Super explosives and potential pharmaceutical intermediates p 3227 N94-30454
CUBIC EQUATIONS
Approximation of solutions of the cubic NLSE by finite dimensional equations and non-squeezing properties
[PB94-138294] p 3452 N94-29148
CUBIC LATTICES
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
CULTIVATION
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Cell culture in space p 3228 N94-28944
CULTURE TECHNIQUES
Barley cell culture as a producer of heterologous protein
[PB94-132339] p 3379 N94-28408
Cell culture in space p 3228 N94-28944
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156
CURING
Dual cure low-VOC coating process, phase 3
[DE94-003202] p 3221 N94-30826
CURRENT ALGEBRA
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
CURRENT DENSITY
Fluctuation and transport reduction in a reversed field pinch by inductive poloidal current drive
[DE94-005542] p 3503 N94-28514
Stripline monitor electronics for the bundle position determination in AmPS
[DIGEL-1993-8] p 3495 N94-29888
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832
Magnetic flux reconstruction methods for shaped tokamaks
[DE94-005827] p 3510 N94-30882
CURRENT DISTRIBUTION
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106
CURRENT SHEETS
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128
CURVATURE
Analytic rendering of curvilinear volume data
[DE94-004934] p 3407 N94-28506
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522
CURVE FITTING
An efficient algorithm for 3D connect-the-dots
[AD-A275431] p 3409 N94-28866
The exact fitting problem in higher dimensions
[RUU-CS-92-37] p 3456 N94-30377
CURVED PANELS
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
CURVES (GEOMETRY)
Trace formulas and dynamical zeta functions in the Nielsen theory
[PB94-138195] p 3467 N94-29163
CUSHIONS
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
CUTTERS
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Influence of clearance and rake angles on the cutting force of rock p 3368 N94-29520
Metafusion: A breakthrough in metallurgy p 3211 N94-30446
CUTTING
Influence of clearance and rake angles on the cutting force of rock p 3368 N94-29520
CYANATES
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family
[REPT-932-600-107] p 3179 N94-29462
CYANIDES
Toxicity of carbon monoxide-hydrogen cyanide gas mixtures: Exposure concentration, time-to-incapacitation, carboxyhemoglobin, and blood cyanide parameters
[DOT/FAA/AM-94/7] p 3395 N94-29919
CYBERNETICS
A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334
CYCLES
Effect of surface condition on strength and fatigue behavior of alumina ceramic
[AD-A275053] p 3214 N94-29133
The transient period of a cyclic process: An horizon theorem
[MEMO-1149] p 3427 N94-30585
Modeling Earth system changes of the past p 3353 N94-30635
CYCLIC ACCELERATORS
Some remarks about pseudo-Hamiltonian
[DE94-003273] p 3487 N94-29700
CYCLIC HYDROCARBONS
The active titration method for measuring local hydroxyl radical concentration p 3345 N94-28602
CYCLIC LOADS
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Transient thermal fatigue of ceramic composites p 3216 N94-29874
Delamination growth in composites under cyclic loads p 3183 N94-30256
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872
CYCLOGENESIS
Physical processes associated with variability in successive operational model forecasts of cyclogenesis
[ISBN-0-315-74753-6] p 3371 N94-29751
CYCLONES
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Interannual temperature variability and cyclone frequency over Eastern Canada and the New England States. A case study: Winter seasons 1931-1932 to 1984-1985
[ISBN-0-315-74841-9] p 3373 N94-29908
CYCLOTRON FREQUENCY
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
CYCLOTRON RADIATION
A study of white dwarf radiative accretion shocks p 3544 N94-29731
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
CYCLOTRON RESONANCE
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
CYCLOTRONS
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
CYLINDRICAL ANTENNAS
Theoretical and experimental study of a cylindrical microstrip antenna
[REPT-932-440-109] p 3245 N94-29456
CYLINDRICAL BODIES
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528
Effect of surface condition on strength and fatigue behavior of alumina ceramic
[AD-A275053] p 3214 N94-29133
The flow field near the body surface with thin filaments p 3234 N94-29706
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
CYLINDRICAL SHELLS
Numerical and experimental investigation of the bending response of thin-walled composite cylinders
[NASA-CR-195730] p 3317 N94-28801
CYLINDRICAL TANKS
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478

D

D LINES
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646
DAMAGE
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975
DAMAGE ASSESSMENT
Cockpit video: A low cost BDA source
[AD-A275228] p 3150 N94-29389
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
Analysis concerning the inspection threshold for multi-site damage
[PB94-142429] p 3149 N94-30905
DAMPING
Identification of the damping ratio relationship of an autovehicle suspension
[REPT-93-063] p 3313 N94-30937
DARK MATTER
The second coming of cold dark matter?
[DE94-004992] p 3548 N94-30694
DATA ACQUISITION
Laser velocimeter data acquisition system for the Langley 14- by 22-foot subsonic tunnel. Software reference guide version 3.3
[NASA-CR-191606] p 3293 N94-28839
The Norwegian seismic array (NORSAR), phase 3
[AD-A275440] p 3356 N94-28868
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1
[AD-A275115] p 3136 N94-28914
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929
JERS-1 data acquisition and distribution p 3326 N94-28931
Parallelization techniques for highly parallel vector computer p 3129 N94-28990
Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037
Status and tendency of earth observation system p 3328 N94-29038

Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173
Application of JERS-1 data to geologic analyses
p 3330 N94-29222
Application of optical sensor data to resource survey
p 3330 N94-29223
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613
Radio science ground data system for the Voyager-Neptune encounter, part 1
p 3248 N94-29623
The Telecommunications and Data Acquisition Report
[NASA-CR-195689] p 3249 N94-29652
Recent results from testing fast ADCs
[DE94-005565] p 3406 N94-30004
Digital filter
[DE94-607902] p 3406 N94-30074
Program SCREEN for acquisition, visualization, processing and output of experimental data
[DE94-608009] p 3534 N94-30079
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
Air-deployable geophysics package
[DE94-005651] p 3335 N94-30594

DATA BASE MANAGEMENT SYSTEMS
The program for catalogization of magnetic tapes in EXCHARM experiment
[DE94-606271] p 3528 N94-28615
Specialized data base management system for data processing in the experiments at low energies
[DE94-606268] p 3485 N94-28621
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
Batch updates and concurrency in B-trees
[PB94-136835] p 3530 N94-29167
On conceptual design of active databases
p 3531 N94-29535
Object-oriented database support for scientific data management: A system for experimentation
p 3531 N94-29677
A unified framework for retrieval in image databases
p 3533 N94-29811
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Secure network databases: Survey and analysis
[PB94-138492] p 3533 N94-29948
The evolution of information management
[DE94-004173] p 3535 N94-30179
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435

DATA BASES
NASA space and Earth science data on CD-ROM
[NASA-TM-109709] p 3528 N94-28414
ARTI Refrigerant Database
[DE94-004906] p 3230 N94-28563
Specialized data base management system for data processing in the experiments at low energies
[DE94-606268] p 3485 N94-28621
Simulation Networking/Training Requirements Relational Database: User's guide
[AD-A275634] p 3528 N94-28637
Updated deep-tow acoustics/geophysics system compressional velocity database
[AD-A275477] p 3355 N94-28685
Aviation epidemiology data register: Age distribution of U.S. Army aviators stratified by gender and component of service
[AD-A275901] p 3388 N94-28757
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1
[AD-A275115] p 3136 N94-28914
Tinkertoy(tm) transactions
[AD-A275271] p 3410 N94-29006
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068
Decompression sickness risk versus time and altitude
[AD-A275261] p 3391 N94-29071
The covering property of the object-oriented data model: Design and implementation issues
[AD-A275048] p 3530 N94-29165
Engineering document management system
[PB94-136934] p 3530 N94-29172
The UNICON approach to through-life support and evolution of software-intensive systems
p 3416 N94-29340
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404
Tidal atlas software development
[AD-A275251] p 3377 N94-29432
On conceptual design of active databases
p 3531 N94-29535
The effects of inheritance on the properties of physical storage models in object-oriented databases
p 3531 N94-29537
Design and analysis of concurrency control schemes for heterogeneous database systems
p 3531 N94-29591
A unified framework for retrieval in image databases
p 3533 N94-29811
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
Secure network databases: Survey and analysis
[PB94-138492] p 3533 N94-29948
Extrapolation of point data for resource mapping
p 3334 N94-29959
Pausing behavior of end-users in online searching
p 3533 N94-29960
Computer-based linking of thesauri
p 3534 N94-29961
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
Genetic algorithms for optimal database design
[TR-93-01] p 3535 N94-30330
DTL: A deductive and typed object-oriented language
[MEMO-INF-93-41] p 3425 N94-30417
VAS: A Vision Advisor System combining agents and object-oriented databases
[AIAA PAPER 94-1181-CP] p 3440 N94-30532
Information-seeking in hypertext: Multiple access methods in a full-text hypertext database
p 3536 N94-30918
View integration: A survey of current developments
[REPT-93-053] p 3536 N94-30927

DATA COMPRESSION
Image-adapted visually weighted quantization matrices for digital image compression
[NASA-CASE-ARC-12015-1] p 3406 N94-29375
Integer cosine transform for image compression
p 3247 N94-29619
Optimizing the Galileo space communication link
p 3250 N94-29663
Extending the X Window System
[DE94-006496] p 3420 N94-29844
Low frame rate video coding for small bandwidth realtime multimedia tele-education systems
[PB94-125531] p 3256 N94-30398
Fast and efficient variable-to-fixed-length coding algorithm
[PB94-125465] p 3424 N94-30400

DATA CORRELATION
Correlation analysis on optical and radio light curves for a large sample of active galactic nuclei
p 3546 N94-29992

DATA FLOW ANALYSIS
Common spaceborne multicomputer operating system and development environment
[NASA-TM-109092] p 3422 N94-30197
Customer creation and combination in queueing networks
[MEMO-INF-93-35] p 3438 N94-30375
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432

DATA INTEGRATION
ACCS Surveillance Exploratory Prototype (ASEP)
p 3138 N94-29566
Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513
Multi-sensor data fusion and the use of artificial intelligence
[PB94-126216] p 3448 N94-30741

DATA LINKS
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
A new information system: Satellite observation
p 3330 N94-29219
Simulation of fully automated air traffic control concepts p 3139 N94-29569
Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29697
Installation of experimental mode-S data link in commercial aircraft
[PB94-138757] p 3254 N94-29998
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106
Achieving robot autonomy p 3310 N94-30307
A multiplexed two-way solid communications link for teleoperated robots p 3310 N94-30310

DATA MANAGEMENT
NASA space and Earth science data on CD-ROM
[NASA-TM-109709] p 3528 N94-28414
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Transferable Output ASCII Data (TOAD) editor version 1.0 user's guide
[NASA-CR-187507] p 3408 N94-28818
A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center
[NASA-TM-108438] p 3529 N94-28820
JERS-1 data acquisition and distribution
p 3326 N94-28931
JERS-1 data and information system for resources exploration p 3327 N94-28932
Principles and application tendency of remote sensing: Its principle, function and utilization
p 3328 N94-29037
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
Engineering document management system
[PB94-136934] p 3530 N94-29172
MODIS technical report series. Volume 3: MODIS airborne simulator level 1B data user's guide
[NASA-TM-104594] p 3231 N94-29385
Object-oriented database support for scientific data management: A system for experimentation
p 3531 N94-29677
Analysis of EDP performance
[NASA-CR-195726] p 3420 N94-29945
Mapping objects to files: A UNIX file system interface to an object management system
[RUU-CS-93-08] p 3428 N94-30746

DATA PROCESSING
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
Specialized data base management system for data processing in the experiments at low energies
[DE94-606268] p 3485 N94-28621
Defense Technical Information Center cataloging guidelines
[AD-A275100] p 3529 N94-28911
Basic research in computer science
[AD-A275222] p 3405 N94-28916
Operation semantics with read and write frames
[PB94-138138] p 3529 N94-29108
Invariants, frames and postconditions: A comparison of two formal specification notations
[PB94-138153] p 3405 N94-29110
A new information system: Satellite observation
p 3330 N94-29219
Designing and maintaining decision-making processes
p 3412 N94-29318
MODIS technical report series. Volume 3: MODIS airborne simulator level 1B data user's guide
[NASA-TM-104594] p 3231 N94-29385
Installation of experimental mode-S data link in commercial aircraft
[PB94-138757] p 3254 N94-29998
PAW using under MS DOS
[DE94-608012] p 3406 N94-30081

DATA PROCESSING EQUIPMENT
'Real time' and the NLR aerodynamic facilities
[AD-B173626] p 3158 N94-30856

DATA RECORDING
Cockpit video: A low cost BDA source
[AD-A275228] p 3150 N94-29389

DATA REDUCTION
Performance analysis of memory hierachies in high performance systems
[DE94-005549] p 3404 N94-28517
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1
[AD-A275115] p 3136 N94-28914
Image processing for hyperspectral data
p 3326 N94-28930
JERS-1 data acquisition and distribution
p 3326 N94-28931

JERS-1 data and information system for resources exploration p 3327 N94-28932
Application of optical sensor data to resource survey p 3330 N94-29223
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
[NASA-TM-108448] p 3160 N94-29470
Optimizing the Galileo space communication link p 3250 N94-29663
A study of cloud-to-ground lightning processes with emphasis on data analysis and modeling of the return stroke p 3372 N94-29802
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time p 3144 N94-30651
A comparison of several GPS data reduction methods p 3145 N94-30662
Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes
[PB94-147550] p 3378 N94-30714
Spatial interpolation, network bias, and terrestrial air temperature variability p 3374 N94-30810

DATA RETRIEVAL
The effects of inheritance on the properties of physical storage models in object-oriented databases p 3531 N94-29537
A unified framework for retrieval in image databases p 3533 N94-29811
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Computer-based linking of thesauri p 3534 N94-29961

DATA SAMPLING
Effects of low sampling rate in the digital data-transition tracking loop p 3251 N94-29669
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406

DATA SIMULATION
Simulation Networking/Training Requirements Relational Database: User's guide
[AD-A275634] p 3528 N94-28637

DATA SMOOTHING
Strategy for the approximation of large scattered data sets
[PB94-138518] p 3420 N94-29949

DATA STORAGE
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Performance analysis of memory hierachies in high performance systems
[DE94-005549] p 3404 N94-28517
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
The effects of inheritance on the properties of physical storage models in object-oriented databases p 3531 N94-29537
Efficient bounded timestamping using traceable use abstraction: Is writer's guessing better than reader's telling?
[RUU-CS-93-28] p 3426 N94-30489

DATA STRUCTURES
Ada, object-oriented techniques, and concurrency in teaching data structures and file management
[AD-A275385] p 3411 N94-29201
On conceptual design of active databases p 3531 N94-29535
Object-oriented database support for scientific data management: A system for experimentation p 3531 N94-29677
A conceptual language for the description and manipulation of complex information models
[TR-92-34] p 3423 N94-30344
Towards a general theory for the evolution of application domains
[TR-92-22] p 3535 N94-30357
A general theory for the evolution of application domains
[TR-92-26] p 3535 N94-30360
Event structures and orthogonal term graph rewriting
[CWI-CS-R9347] p 3459 N94-30412
Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
Homomorphism preserving algebraic specifications require hidden sorts
[CWI-CS-R9344] p 3459 N94-30436
Efficient bounded timestamping using traceable use abstraction: Is writer's guessing better than reader's telling?
[RUU-CS-93-28] p 3426 N94-30489
Dynamic microsets for RAMs
[RUU-CS-93-22] p 3406 N94-30727
A neural network-based technique for structural identification of SISO systems
[REPT-93-076] p 3449 N94-30941

DATA SYSTEMS
Program SCREEN for acquisition, visualization, processing and output of experimental data
[DE94-608009] p 3534 N94-30079
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
Predictive sufficiency and the use of stored internal state
[AIAA PAPER 94-1213-CP] p 3445 N94-30564

DATA TRANSFER (COMPUTERS)
I/O on the Tera file system
[AD-A275278] p 3530 N94-29182
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404

DATA TRANSMISSION
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report
[AD-A275298] p 3242 N94-28874
A new information system: Satellite observation p 3330 N94-29219
Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235
RIPE integrity primitives, part 1 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9324-PT-1] p 3252 N94-29692
RIPE integrity primitives, part 2 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9325-PT-2] p 3252 N94-29693
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
Data transfer system using a multi-ID ARGOS transmitter for the Antarctic polar patrol balloon experiment p 3363 N94-29980
Installation of experimental mode-S data link in commercial aircraft
[PB94-138757] p 3254 N94-29998
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Microsecond fiber optic delay line
[DE94-607903] p 3500 N94-30075
Program SCREEN for acquisition, visualization, processing and output of experimental data
[DE94-608009] p 3534 N94-30079
Fast and efficient variable-to-fixed-length coding algorithm
[PB94-125465] p 3424 N94-30400
End-to-end delay reduction in narrow bandwidth real-time multimedia tele-education applications
[AD-B179614] p 3260 N94-30518
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772

DAWN CHORUS
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245

DC GENERATORS
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913

DEATH
Aeropathological diagnosis of lethal hypothermia p 3382 N94-28440

DEBONDING (MATERIALS)
Intelligent material systems and structures. Part 7: Debonding and pull-out of two optical fibers from two epoxies
[PB94-137767] p 3180 N94-29475
Transient thermal fatigue of ceramic composites p 3216 N94-29874
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259

DEBYE LENGTH
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564

DECAY RATES
Application of semiclassical methods to reaction rate theory
[DE94-007041] p 3199 N94-30266

DECELERATION
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477

DECISION MAKING
Effects of workload on communication processes in decision making teams
[AD-A275894] p 3527 N94-28796
A cognitive model of decision making: Chunking and the radar detection device
[AD-A275185] p 3242 N94-28859
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Evaluating the analytic hierarchy process and recommended modifications for its use in multi-attribute decision making
[AD-A275065] p 3527 N94-29153
Temporal and qualitative decomposition of plausible reasoning
[AD-A275073] p 3398 N94-29154
Designing and maintaining decision-making processes p 3412 N94-29318
Advances in development capabilities for intelligent air traffic management systems p 3137 N94-29559
Air traffic management as principled negotiation between intelligent agents p 3137 N94-29562
Decision Making Aids (DMA) in on-line ATC systems p 3139 N94-29570
Cognitive approach to specifications on air traffic controllers' decision assistance systems p 3139 N94-29571
DAISY: A decision aid for an air situation interpretation system p 3139 N94-29574

DECISION THEORY
Subphonetic acoustic modeling for speaker-independent continuous speech recognition
[AD-A275217] p 3244 N94-29303

DECISIONS
Undecidability in diagonalizable algebras
[ML-93-13] p 3463 N94-30976

DECODERS
Non-orthogonal subband/transform coder
[NASA-CASE-LEW-15310-1] p 3246 N94-29589

DECODING
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Optimizing the Galileo space communication link p 3250 N94-29663
MPEG-2 video decoding architecture: Analysis and design
[REPT-93-069] p 3260 N94-30940

DECOMPOSITION
Chemical dynamics studies of reactions in energetic materials
[AD-A275607] p 3224 N94-28769
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901

DECOMPRESSION SICKNESS
Decompression sickness risk versus time and altitude
[AD-A275261] p 3391 N94-29071

DECONGESTANTS
Biochemical enhancement of cold tolerance p 3380 N94-28427

DECONTAMINATION
The 1992 report on the next generation ultra clean technology for advanced microfabrication
[DE94-744171] p 3157 N94-30268

DEDUCTION
Natural deduction for intuitionistic linear logic
[ML-93-09] p 3457 N94-30385
DTL: A deductive and typed object-oriented language
[MEMO-INF-93-41] p 3425 N94-30417

DEEP SPACE
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Decoder synchronization for deep space missions p 3250 N94-29664

DEEP SPACE NETWORK
Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621
Elevation control system model for the DSS 13 antenna p 3248 N94-29622

Radio science ground data system for the Voyager-Neptune encounter, part 1
p 3248 N94-29623
The Telecommunications and Data Acquisition Report
[NASA-CR-195689] p 3249 N94-29652
Toward astrometric tracking with the infrared spatial interferometer p 3249 N94-29653
Determining noise temperatures in beam waveguide systems p 3249 N94-29657
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
A digital combining-weight estimation algorithm for broadband sources with the array feed compensation system p 3250 N94-29660
An improved conscan algorithm based on a Kalman filter p 3251 N94-29670

DEEP WATER
Effect of surface condition on strength and fatigue behavior of alumina ceramic
[AD-A275053] p 3214 N94-29133

DEFECTS
Dynamics of defect ensembles in one-dimensional cellular automata
[PB94-136819] p 3464 N94-29030
Flux-focusing eddy current probe and method for flaw detection
[NASA-CASE-LAR-15046-1] p 3315 N94-29366
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment
[PB94-139318] p 3184 N94-30438
Sensing the gas metal arc welding process
p 3314 N94-30444
Characterization of defect geometries in multilayer optical coatings
[DE94-005820] p 3501 N94-30599

DEFENSE INDUSTRY
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688

DEFENSE PROGRAM
Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688
Defense Technical Information Center cataloging guidelines
[AD-A275100] p 3529 N94-28911
Towards an information model and mechanisms for design rationale capture and use
[AD-A275060] p 3530 N94-29138
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
Triple Diagonal modeling: A mechanism to focus productivity improvement for business success
[DE94-004309] p 3527 N94-30041
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
Loran-C time management p 3144 N94-30644

DEFLAGRATION
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879

DEFLECTION
Structural/aerodynamic blade analyzer (SAB) user's guide, version 1.0
[NASA-CR-194460] p 3151 N94-29103

DEFLUORINATION
Formation and chemical reactivity of carbon fibers prepared by defluorination of graphite fluoride
[NASA-TM-106398] p 3174 N94-28747

DEFOCUSING
Defocussing characteristics of the ACTS, T1-VSAT Earth terminal antennas
[NASA-TM-106420] p 3242 N94-28826

DEFORESTATION
Amazonia: Remote sensing test site and survey
p 3327 N94-28935
Utilization of remote sensing data in Southeast Asia
p 3327 N94-28936
GCM studies of the influence of vegetation on the general circulation: The role of albedo in modulating climate change p 3348 N94-29749

DEFORMATION
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys
[DE94-005013] p 3201 N94-28544
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel
[PB94-138328] p 3319 N94-29121
II-VI wide band gap semiconductors under hydrostatic pressure
[DE94-608106] p 3516 N94-30070
Thin-walled orthotropic laminated beam theory
p 3324 N94-30920
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-006] p 3396 N94-30978

DEGENERATE MATTER
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011

DEGENERATION
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903

DEGRADATION
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196

DEGREES OF FREEDOM
Mechanical flexible joint design document
[NASA-CR-193941] p 3297 N94-28419
Feedback control of a three-link planar under-actuated manipulator using a surge velocity
[AD-A275159] p 3435 N94-29044
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-1] p 3288 N94-29726
A highly redundant robot system for inspection
[AIAA PAPER 94-1194-CP] p 3442 N94-30545

DEHYDRATION
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
Work conditions assessment in pilots and ground personnel under high weather temperatures
p 3382 N94-28444

DEHYDROGENATION
Endothermic fuels for hypersonic aviation
p 3197 N94-29285

DELAMINATING
Active control of delaminations in smart composite structures p 3181 N94-29593
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Computational simulation of composite structures with and without damage
[NASA-CR-194433] p 3183 N94-30190
Delamination growth in composites under cyclic loads
p 3183 N94-30256
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

DELAWARE BAY (US)
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919

DELAY CIRCUITS
Microsecond fiber optic delay line
[DE94-607903] p 3500 N94-30075

DELAY LINES
Photorefractive adaptive antenna array processor
[AD-A275762] p 3241 N94-28762
Microsecond fiber optic delay line
[DE94-607903] p 3500 N94-30075

DELTA WINGS
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871

DEMODULATION
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646

DENSE PLASMAS
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752

DENSIFICATION
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
Analysis of pressureless densification of ceramic matrix composites p 3216 N94-29766
Densification and crystallization of zirconia thin films prepared by sol-gel processing
[DE94-005573] p 3518 N94-30315
Properties of chemical vapor infiltration diamond deposited in a diamond powder matrix
[DE94-005429] p 3220 N94-30591

DENSITY MEASUREMENT
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404

DEOXIDIZING
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089

DEOXYRIBONUCLEIC ACID
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156

DEPENDENCE
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450

DEPENDENT VARIABLES
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450

DEPLOYMENT
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360

DEPOSITION
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Surface structure and stereochemical properties of self-assembled monolayer materials
[DE94-004960] p 3484 N94-28578
Sweep rate and concentration effects on metastable structures formed in the underpotential deposition of silver on Pt(111)
[AD-A275369] p 3189 N94-29010
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
Properties of chemical vapor infiltration diamond deposited in a diamond powder matrix
[DE94-005429] p 3220 N94-30591

DEPOSITS
Plasma enhanced chemical vapor deposition of ZrO2 thin films
[DE94-006031] p 3218 N94-30104

DERIVATION
Derivation lengths in term rewriting from interpretations in the naturals
[RUU-CS-92-43] p 3455 N94-30346

DESCENT TRAJECTORIES
Advanced air traffic control and flight management system concepts p 3140 N94-29576

DESERTS
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448

DESIGN ANALYSIS
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957
Recent CFD applications in small gas turbine combustion systems development p 3154 N94-29257
On conceptual design of active databases
p 3531 N94-29535
A module concept for a cable-mesh deployable antenna p 3161 N94-29631
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721
EVA glove evaluation methodology and test protocol
p 3401 N94-29729
Using RDD-100 with CoRE. Version 01.00.03
[AD-A275336] p 3419 N94-29797

A newly developed snow vehicle (SM100S) for Antarctica. Part 2: Design of the system p 3314 N94-29982
Composite redesign of obstetrical forceps p 3397 N94-30457
Expanding the waverider design space using arbitrary generating flowfields p 3148 N94-30516
Design and analysis of dynamic leader election protocols in broadcast networks [MEMO-INF-93-43] p 3260 N94-30520
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787

DESORPTION
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces [DE94-005680] p 3522 N94-30901
Investigations into ultraviolet matrix-assisted laser desorption [DE94-005265] p 3296 N94-30908

DETECTION
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels [AD-A275755] p 3315 N94-28646
Using multiple searchers to locate a randomly moving target [AD-A275602] p 3463 N94-28768
Markov chains for random urinalysis 3: Daily model and drug kinetics [AD-A275540] p 3389 N94-28797
Optical flameout detector [NASA-CASE-LAR-14997-1] p 3287 N94-29368
Computerized in vitro test for chemical toxicity based on tetrahymena swimming patterns p 3354 N94-30463
Granulometry in environments with very small particle concentrations p 3259 N94-30511

DETERGENTS
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468

DETERIORATION
Design aspects in small aircraft gas turbine fuel injectors p 3154 N94-29264

DETONATION
Blast overpressure studies with animals and man [AD-A275038] p 3391 N94-29150

DEUTERIUM
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory [DE94-606442] p 3484 N94-28610

DEUTERONS
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory [DE94-606442] p 3484 N94-28610

DEVELOPING NATIONS
Report of feasibility study on international-cooperation in high efficient energy conversion technology [DE94-732340] p 3337 N94-28631
Solar photovoltaics for development applications [DE94-006116] p 3340 N94-30843

DEWATERING
Dewatering of contaminated river sediments p 3354 N94-30472

DIAGNOSIS
Aeropathological diagnosis of lethal hypothermia p 3382 N94-28440
Equilibrium dysfunction in the clinical field p 3390 N94-28858
Advanced diagnostics for reacting flows [AD-A275057] p 3272 N94-29136

DIAMETERS
A deterministic algorithm for the three-dimensional diameter problem [RUU-CS-92-45] p 3424 N94-30348

DIAMOND FILMS
Analysis of cost: CVD diamond deposition and finishing --- Quarterly report [AD-A275586] p 3212 N94-28725
Electron beam analysis for cyclotron harmonic and free-electron laser devices [AD-A275070] p 3293 N94-29179
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions [DE94-004582] p 3519 N94-30718

DIAMONDS
Development of large area RF induction plasma for cost effective diamond [AD-A275888] p 3504 N94-28776
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449
Properties of chemical vapor infiltration diamond deposited in a diamond powder matrix [DE94-005429] p 3220 N94-30591

DIATOMIC MOLECULES
Theoretical studies of solid-fluid phase equilibria [DE94-006406] p 3226 N94-30708

DICHROISM
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616

DICKE RADIOMETERS
Conceptual radiometer design studies for Earth observations from low Earth orbit [NASA-CR-4588] p 3329 N94-29098

DIELECTRIC PROPERTIES
Experimental and theoretical studies of molecular solids [AD-A275511] p 3485 N94-28668
Breakdown testing of wiring insulation p 3166 N94-28713
Acoustic or electromagnetic scattering from the penetrable wedge [AD-A275259] p 3243 N94-29054
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics [NASA-CR-189338] p 3287 N94-29400
RF and microwave dielectric measurements upon layered materials using reflectometric coaxial sensor [NPL-DES-125] p 3476 N94-30781

DIELECTRICS
High temperature polymer dielectric film insulation p 3167 N94-28715
A 3M high temperature dielectric film p 3167 N94-28717
Spatial light modulators with arbitrary quantum wells profiles [AD-A275023] p 3499 N94-29114
Low dielectric polyimide fibers [NASA-CASE-LAR-14526-1] p 3214 N94-29359
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics [NASA-CR-189338] p 3287 N94-29400
Radioelectric characterization of materials at 1000 C [REPT-932-430-104] p 3245 N94-29440
ECR plasma synthesis of silicon nitride films on GaAs and InSb [DE94-005575] p 3515 N94-30006
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources [DE94-005828] p 3506 N94-30045
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

DIESEL ENGINES
Feasibility study on introduction of a large methanol engine power generation plant [DE94-732338] p 3224 N94-28629
Thick thermal barrier coatings for diesel components [NASA-CR-187111] p 3537 N94-29350

DIESEL FUELS
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel [PB94-137536] p 3301 N94-29679
Biodiesel from aquatic species [DE94-000275] p 3225 N94-30038

DIETS
Work conditions assessment in pilots and ground personnel under high weather temperatures p 3382 N94-28444

DIFFERENCE EQUATIONS
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Representations of dynamical systems described by behavioral inequalities [AD-B173649] p 3458 N94-30402

DIFFERENTIAL CALCULUS
GL(sub q)(N)-covariant quantum algebras and covariant differential calculus [DE94-608072] p 3460 N94-30726
Non-commutative geometry [PB94-139342] p 3462 N94-30889

DIFFERENTIAL EQUATIONS
Some constraints and solutions of the Kadomtsev-Petviashvili equation [DE93-634355] p 3466 N94-28467
A numerical solver for initial and boundary value problems in differential-algebraic systems [AD-A275447] p 3452 N94-28883
Approximation of solutions of the cubic NLSE by finite dimensional equations and non-squeezing properties [PB94-138294] p 3452 N94-29148
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall [AD-A275416] p 3129 N94-29197
Compound matrix method for multi-point boundary-value problems [PB94-137791] p 3453 N94-29476
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Splines and ocean wave modelling [PB94-139409] p 3378 N94-30002
Formulas of the Runge-Kutta-Nystroem type [ISBN-0-315-85774-9] p 3454 N94-30241
An evaluation of explicit pseudo-steady-state approximation schemes for stiff ODE systems from chemical kinetics [CWI-NM-R9312] p 3353 N94-30729
Graded Froelicher-Nijenhuis brackets and the theory of recursion operators for super differential equations [MEMO-1147] p 3460 N94-30736
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods [TELECOM-93-C-003] p 3481 N94-30972

DIFFERENTIAL GEOMETRY
Non-commutative geometry [PB94-139342] p 3462 N94-30889

DIFFRACTION
Surface structure and stereochemical properties of self-assembled monolayer materials [DE94-004960] p 3484 N94-28578
Backscatter haze device for measurement of haze in aircraft transparencies [AD-A275127] p 3146 N94-29042
Hybrid optics for space applications [ESA-CP-1158] p 3501 N94-30418

DIFFUSION
Remote control of transcranial Doppler (TCD) probe during centrifuge exposures up to 9 +Gz [AD-A275253] p 3400 N94-29029
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials [DE94-005072] p 3226 N94-30615
Evaluation of discretization schemes for advection-diffusion equations [CWI-NM-R9311] p 3461 N94-30751
On some general properties of parabolic conservation equations [DE94-006101] p 3461 N94-30758
Superdiffusion [DE94-002333] p 3492 N94-30834

DIFFUSION FLAMES
Similarity solutions and numerical modeling in buoyancy controlled turbulent diffusion flames [AD-A275820] p 3188 N94-28777
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Lifted turbulent jet flames p 3198 N94-29676

DIFFUSION LENGTH
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface [DE94-005551] p 3521 N94-30899

DIFFUSION WELDING
Joining silicon carbide to austenitic stainless steel through diffusion welding [PB94-126331] p 3297 N94-28399

DIFFUSIVITY
Process modelling for materials preparation experiments [NASA-CR-195782] p 3175 N94-30242

DIFLUORIDES
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

DIGITAL DATA
The Image Digitizing System (IDS) [AD-A275341] p 3329 N94-29213
Digital camera with apparatus for authentication of images produced from an image file [NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958

DIGITAL ELECTRONICS
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805

DIGITAL FILTERS
Design and implementation of a hybrid digital phase-locked loop with a TMS320C25: An application to a transponder receiver breadboard p 3251 N94-29667
Digital filter [DE94-607902] p 3406 N94-30074

DIGITAL NAVIGATION
Automatic control steps for aircraft taxi guidance p 3141 N94-29584

DIGITAL RADAR SYSTEMS
Spurs in digital radio frequency memory and applications of DRFM [AD-A275013] p 3243 N94-28897

Digital pulse compression and its application in reducing radar interference
[ISBN-0-315-85767-6] p 3255 N94-30240

DIGITAL SIMULATION
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics
[NAL-SP-19] p 3123 N94-28946
Engineering of systems for application of scientific computing in industry p 3123 N94-28947
Monte Carlo simulation or normal shock wave. Part 2: VHS model and VSS model p 3123 N94-28948
Variable soft sphere molecular model in the Monte Carlo simulation of air species p 3123 N94-28949
Rarefied gas numerical wind tunnel. Part 8: HOPE p 3123 N94-28950
Numerical simulation of arc heated wind tunnel flow p 3123 N94-28951
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
Numerical simulation of steady Mach reflection by shock capturing schemes p 3123 N94-28953
Higher-order accurate numerical simulation of 3D supersonic mixing layers p 3124 N94-28954
Numerical simulation of aerothermodynamic heating of hypersonic space transportation vehicles p 3124 N94-28955
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Parallelization techniques for highly parallel vector computer p 3129 N94-28990
Parallel Fortran programming for NWT p 3129 N94-28991
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
A method of user interface for NWT p 3129 N94-28993
Simulation of lightweight robots and their controllers p 3307 N94-30294
Symbolic generation of dynamics equations for manipulators mounted on moving bases p 3308 N94-30296
Supercomputing has to be part of an organization-wide automation concept
[AD-B174654] p 3433 N94-30913

DIGITAL SYSTEMS
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
How to control the increase in the complexity of civil aircraft on-board systems p 3150 N94-29316
On ground system integration and testing: A modern approach p 3150 N94-29334
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Method of implementing digital phase-locked loops
[NASA-CASE-NPO-18757-1-CU] p 3265 N94-29374
Design and implementation of a hybrid digital phase-locked loop with a TMS320C25: An application to a transponder receiver breadboard p 3251 N94-29667
Effects of low sampling rate in the digital data-transition tracking loop p 3251 N94-29669
Performance issues of signalling protocols for broadband ISDN
[MEMO-INF-93-30] p 3255 N94-30374
A direct digital control-law synthesis in the w-domain: W-synthesis methodology p 3438 N94-30517

DIGITAL TECHNIQUES
The Image Digitizing System (IDS)
[AD-A275341] p 3329 N94-29213
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Method of implementing digital phase-locked loops
[NASA-CASE-NPO-18757-1-CU] p 3265 N94-29374
Image-adapted visually weighted quantization matrices for digital image compression
[NASA-CASE-ARC-12015-1] p 3406 N94-29375
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896
A direct digital control-law synthesis in the w-domain: W-synthesis methodology p 3438 N94-30517
Applicability of digital terrain analyses to wind energy prospecting and siting
[DE94-004363] p 3374 N94-30587
The experimental flight management system: An air traffic management research tool
[NLR-TP-92253-U] p 3143 N94-30943

DIGITAL TELEVISION
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910

DIGITAL TO ANALOG CONVERTERS
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372
Program SCREEN for acquisition, visualization, processing and output of experimental data
[DE94-608009] p 3534 N94-30079

DIMENSIONAL ANALYSIS
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997

DIMENSIONAL STABILITY
Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites
[DE94-006046] p 3508 N94-30365

DIODES
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms p 3502 N94-30462

DIPOLE ANTENNAS
Waves in space plasma dipole antenna subsystem p 3161 N94-29632

DIRAC EQUATION
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics
[DE94-004955] p 3483 N94-28566
The (j,0) + (0,j) representation space: Dirac-like construct
[DE94-005011] p 3522 N94-28572
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Large-scale 3-D solutions of the time-dependent Dirac equation
[DE94-005591] p 3454 N94-30317

DIRECT CURRENT
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913

DIRECTION FINDING
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896

DIRECTIONAL CONTROL
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523

DIRECTIONAL SOLIDIFICATION (CRYSTALS)
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions
[ISBN-0-315-86108-8] p 3209 N94-30146
Process modelling for materials preparation experiments
[NASA-CR-195782] p 3175 N94-30242

DIRECTIONAL STABILITY
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes p 3155 N94-29728

DIRICHLET PROBLEM
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072

DISABILITIES
Monitor for status epilepticus seizures p 3397 N94-30460

DISASTERS
Application of remote sensing in prevention of disasters p 3332 N94-29230

DISCOLORATION
Advanced development of PV encapsulents
[DE94-000219] p 3336 N94-28500

DISCONTINUITY
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities p 3506 N94-29822

DISCRETE COSINE TRANSFORM
Image-adapted visually weighted quantization matrices for digital image compression
[NASA-CASE-ARC-12015-1] p 3406 N94-29375

DISILICIDES
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites
[DE94-004982] p 3175 N94-28579
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730

DISK GALAXIES
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
Stellar and gas dynamics of interacting ring galaxies p 3548 N94-30340

DISK OPERATING SYSTEM (DOS)
PAW using under MS DOS
[DE94-608012] p 3406 N94-30081

DISLOCATIONS (MATERIALS)
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142

DISPERSING
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities p 3506 N94-29822

DISPLACEMENT
Toward a molecular scale understanding of frost heaving, phase 1
[AD-A275446] p 3356 N94-28882
Field methods to measure surface displacement and strain with the Video Image Correlation method
[NASA-CR-195796] p 3316 N94-29724

DISPLAY DEVICES
Key cognitive issues in the design of electronic displays of instrument approach procedure charts
[AD-A275647] p 3399 N94-28649
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
A comparison of three aircraft attitude display symbology structures
[AD-A275172] p 3150 N94-29048
Program SCREEN for acquisition, visualization, processing and output of experimental data
[DE94-608009] p 3534 N94-30079
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
A multi-mode manipulator display system for controlling remote robotic systems
[AIAA PAPER 94-0888-CP] p 3446 N94-30569

DISSOCIATION
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
Application of semiclassical methods to reaction rate theory
[DE94-007041] p 3199 N94-30266
Dissociative recombination of H3(+)
[DE94-005356] p 3493 N94-30891

DISSOLVED GASES
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021

DISSOLVING
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776

DISTANCE
Three forms of relativity
[DE94-606338] p 3523 N94-28782

DISTRIBUTED FEEDBACK LASERS
Longitudinal effects and intensity-phase coupling in distributed feedback semiconductor lasers p 3294 N94-29590

DISTRIBUTED PROCESSING
A distributed object-based environment in Ada p 3417 N94-29347
Extending the X Window System
[DE94-006496] p 3420 N94-29844
Checkpoint-based forward recovery using lookahead execution and rollback validation in parallel and distributed systems
[NASA-CR-195760] p 3431 N94-29869
Space reclamation for uncoordinated checkpointing in message-passing systems
[NASA-CR-195761] p 3420 N94-29906
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Software engineering and software management in a distributed UNIX environment
[NLR-TP-92233-U] p 3422 N94-30314
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411

Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
The secrets of causality
[RUU-CS-93-29] p 3426 N94-30490
On the relation between Unity properties and sequences of states
[RUU-CS-93-07] p 3433 N94-30720

DISTRIBUTION FUNCTIONS
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
The small-x behaviour of parton distribution functions
[DE94-606414] p 3485 N94-28758
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195264] p 3318 N94-28840
The modified Cramer-von mises goodness-of-fit criterion for time series
[AD-A275377] p 3464 N94-29014
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352

DIURNAL VARIATIONS
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign
[DE94-003989] p 3342 N94-28523
Thermal variation in vegetated or snow-covered background scenes and its effect on passive infrared systems
[AD-A275174] p 3325 N94-28849
An observational and numerical study of sea/land-breeze circulations in an area of complex coastal heating p 3372 N94-29813

DIVERTERS
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832

DIVING (UNDERWATER)
Advanced seal delivery system life support parameters
[AD-A275304] p 3401 N94-29184
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302

DOCUMENTATION
The discipline of defining the software product p 3416 N94-29343
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477

DOCUMENTS
Engineering document management system
[PB94-136934] p 3530 N94-29172
Modelling interaction tools in the Views architecture
[CWI-CS-R9261] p 3423 N94-30323

DOLPHINS
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707

DOMAIN WALL
Discrete quark-lepton symmetry need not pose a cosmological domain wall problem
[DE94-601606] p 3481 N94-28471
Discrete symmetries, strong CP problem and gravity
[DE94-608091] p 3524 N94-30089

DOMAINS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Investigation into formalization of domain-oriented parallel software development
[AD-A275177] p 3430 N94-29050

DOPED CRYSTALS
Electronic structure and mechanical properties of grain boundaries
[AD-A275198] p 3512 N94-28890
Effects of oxide charge and surface recombination velocity on the excess base current of BJT's
[DE94-003711] p 3263 N94-29025
Aggregation equilibria in arsenic doped silicon
[DE94-607269] p 3515 N94-30005

DOPPLER EFFECT
Apparent unambiguousness of relativistic time dilation
[DE94-606328] p 3522 N94-28586
Retarded distances and the Doppler effect
[DE94-606296] p 3523 N94-28618
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
On a direct experimental verification of the elongation formula
[DE94-606329] p 3523 N94-28721
Remote control of transcranial Doppler (TCD) probe during centrifuge exposures up to 9 +Gz
[AD-A275253] p 3400 N94-29029
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802

DOPPLER RADAR
Innovative direct detection range-Doppler laser radar
[AD-A275619] p 3292 N94-28635
Numerical simulations of a mountain thunderstorm. A comparison with Doppler radar observations
[AD-A275296] p 3369 N94-28873
New-type echoes observed with the 50 MHz auroral Doppler radar at Showa Station p 3360 N94-29238
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739

DOUBLE BASE ROCKET PROPELLANTS
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092

DOWNLINKING
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
Optimizing the Galileo space communication link p 3250 N94-29663

DRAFT (GAS FLOW)
Human requirements to the indoor air quality and the thermal environment p 3232 N94-29600

DRAG
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459

DRAG REDUCTION
Numerical analysis of supersonic transport wings p 3124 N94-28959

DRAINAGE
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046

DREDGED MATERIALS
Dewatering of contaminated river sediments p 3354 N94-30472

DREDGING
Dewatering of contaminated river sediments p 3354 N94-30472

DRIFT RATE
A comparative study of clock rate and drift estimation p 3473 N94-30669
Ground control system for the midcourse space experiment UTC clock p 3474 N94-30674

DRONE AIRCRAFT
HATT-X: A high performance flying laboratory for autonomous unmanned aircraft research and development p 3149 N94-30293

DROPS (LIQUIDS)
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries p 3154 N94-29255
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator p 3277 N94-29899
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447

DRUGS
Markov chains for random urinalysis 3: Daily model and drug kinetics
[AD-A275540] p 3389 N94-28797
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453

DRYING
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022

DUAL SPIN SPACECRAFT
The influence of appendage vibration on the attitude dynamics of a dual-spin satellite p 3168 N94-29828

DUCTED FANS
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438

DUCTED FLOW
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984
Numerical analysis of laminar flow in S-curved square duct with inlet and outlet straight region p 3128 N94-28987
Ducted kerosene spray flames p 3195 N94-29276
Scramjet CFD methods and analysis. Part 1: Scramjet CFD methods. Numerical simulation of the flow in scramjet duct p 3152 N94-29296
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519

DUCTILE-BRITTLE TRANSITION
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226

DUCTILITY
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
A class of inclusion problems for the strengthening of brittle and ductile composites p 3186 N94-30959

DUCTS
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors p 3151 N94-29292

DUMP COMBUSTORS
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911

DURABILITY
Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons
[DE94-605337] p 3202 N94-28551
Role of microstructure on the fatigue durability of aluminum aircraft alloys
[AD-A275814] p 3202 N94-28830
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Photovoltaic performance and reliability workshop
[DE94-000236] p 3339 N94-30601

DUST
Joint research activities with CCMRI (China) p 3240 N94-29521

DUST STORMS
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196

DWARF GALAXIES
Study of the stellar populations of the Fornax dwarf spheroidal galaxy
[ISBN-0-315-85526-6] p 3541 N94-30231

DWARF STARS
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827

DYE LASERS
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934

DYES
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599

DYNAMIC CHARACTERISTICS
Dynamics of a coupled solid state laser array p 3294 N94-29551
Elevation control system model for the DSS 13 antenna p 3248 N94-29622
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798

Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868
Analysis and design of inflatable aerospace structures p 3403 N94-30799

DYNAMIC CONTROL
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Pulse response based minimum time control of flexible structures p 3436 N94-29720
Integrated propulsion-airframe dynamics and control p 3147 N94-29854
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
Motion control of mobile robots p 3310 N94-30309
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793

DYNAMIC LOADS
Composite load spectra for select space propulsion structural components
[NASA-CR-194476] p 3316 N94-28508
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Simulation of composite material response under dynamic compressive loading
[DE94-005272] p 3184 N94-30589

DYNAMIC MODELS
Miniature linear-to-rotary motion actuator p 3163 N94-29647
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018
Symbolic generation of dynamics equations for manipulators mounted on moving bases p 3308 N94-30296
Development and validation of a linear recursive order-N algorithm for the simulation of flexible space manipulators dynamics
[AD-B173557] p 3311 N94-30391
Dynamic modeling of multibody flexible structures p 3323 N94-30813
Second-order structural identification via state space-based system realizations p 3323 N94-30815

DYNAMIC PRESSURE
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3288 N94-29484

DYNAMIC PROGRAMMING
The transient period of a cyclic process: An horizon theorem
[MEMO-1149] p 3427 N94-30585
Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images
[TELECOM-93-D-016] p 3395 N94-30970

DYNAMIC RESPONSE
On the dynamic mechanical behavior of 3-D integrated fabric reinforced composites
[AD-A275424] p 3177 N94-28865
Turbomachinery forced response prediction system (FREPS): User's manual
[NASA-CR-194465] p 3319 N94-29104
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203
Active control of delaminations in smart composite structures p 3181 N94-29593
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975
Modal analysis of solar panels using boundary integral equations
[NLT-TP-92218-U] p 3338 N94-30328
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525

DYNAMIC STABILITY
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Dissipation in Hamiltonian systems: Decaying cnoidal waves
[MEMO-1151] p 3460 N94-30738

DYNAMIC STRUCTURAL ANALYSIS
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Turbomachinery forced response prediction system (FREPS): User's manual
[NASA-CR-194465] p 3319 N94-29104
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868
A numerical method for confined unsteady flows related to fluid-structure interactions
[ISBN-0-315-74739-0] p 3277 N94-29902
Position control of a flexible beam with active damping of vibrations
[ISBN-0-315-85841-9] p 3321 N94-30033
A study of the flexible space platform based deployable manipulator
[ISBN-0-315-85410-3] p 3303 N94-30135
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525
Analysis and design of inflatable aerospace structures p 3403 N94-30799
Dynamic modeling of multibody flexible structures p 3323 N94-30813
Second-order structural identification via state space-based system realizations p 3323 N94-30815
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865

DYNAMIC TESTS
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799
Analysis and design of inflatable aerospace structures p 3403 N94-30799

DYNAMICAL SYSTEMS
Research activities of Martin C. Casdagli at SFI September 1989--May 1991
[DE94-005655] p 3463 N94-28548
On invariant measures for some infinite-dimensional dynamical systems
[DE94-606342] p 3522 N94-28609
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Boundary layer coherent structures
[AD-A275007] p 3272 N94-29195
On-line search for optimal controller parameters using interconnected learning automata
[MATHS-REPT-A-196] p 3436 N94-29526
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
Representations of dynamical systems described by behavioral inequalities
[AD-B173649] p 3458 N94-30402
Superdiffusion
[DE94-002333] p 3492 N94-30834
Dynamics and control of tethered satellite systems p 3170 N94-30864

DYNAMOMETERS
Deterioration of manual performance in cold and windy climates p 3381 N94-28434

DYSPROSIUM COMPOUNDS
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690

E

E GLASS
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

E REGION
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869
A study of the thermospheric dynamics of the high-latitude E region using a spectral thermospheric general circulation model p 3362 N94-29743

EARLY WARNING SYSTEMS
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694

EARTH ATMOSPHERE
On the linear stability of Verkley's modons p 3324 N94-28695
Structure of neutrally stratified turbulent Ekman layer as predicted by closure models with prognostic equation for master length scale p 3325 N94-28696
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083
Activities of the fourth wintering party at Asuka Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29084
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Second Japan-U.S. Workshop on Global Change: Environmental Response Technologies for Global Change (Mitigation and Adaptation) p 3354 N94-29522
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
Linkages between terrestrial ecosystems and the atmosphere p 3351 N94-30624
Modeling Earth system changes of the past p 3353 N94-30635
Generation mechanisms of quasi-stationary waves in the Southern Hemisphere p 3365 N94-30789

EARTH CORE
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Electromagnetic core-mantle coupling p 3366 N94-30808

EARTH CRUST
Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion p 3363 N94-29941

EARTH ENVIRONMENT
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Antarctic Record, volume 36, no. 1
[REPT-106-VOL-36-NO-1] p 3357 N94-29078
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083
Activities of the fourth wintering party at Asuka Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29084
Second Japan-U.S. Workshop on Global Change: Environmental Response Technologies for Global Change (Mitigation and Adaptation) p 3354 N94-29522
Modeling the Earth System, volume 3
[NASA-CR-194256] p 3350 N94-30616

EARTH GRAVITATION
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry p 3333 N94-29762

EARTH IONOSPHERE
Antarctic Record, volume 36, no. 1
[REPT-106-VOL-36-NO-1] p 3357 N94-29078
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083
Signatures of dayside solar wind/magnetosphere/ionosphere coupling as revealed by the pace HF radars and associated experiments p 3359 N94-29236
A theory of current generator in the magnetosphere-ionosphere coupling p 3360 N94-29240
Coupled magnetohydrodynamic oscillations in the magnetosphere-ionosphere system: Hall current effect p 3360 N94-29242
Scale-length dependence of the ratio between the magnetic and electric field perturbations in the ionospheric field-aligned current region p 3360 N94-29243
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244

Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245

EARTH MAGNETOSPHERE

Electron beams at geosynchronous orbit [AD-A275471] p 3355 N94-28684

Identification of an unexpected space radiation hazard [AD-A275170] p 3552 N94-29046

Antarctic Record, volume 36, no. 1 [REPT-106-VOL-36-NO-1] p 3357 N94-29078

Estimation of geomagnetic conjugate points by using Pc5 pulsations p 3357 N94-29079

Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083

Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235

Signatures of dayside solar wind/magnetosphere/ionosphere coupling as revealed by the pace HF radars and associated experiments p 3359 N94-29236

A theory of current generator in the magnetosphere-ionosphere coupling p 3360 N94-29240

Coupled magnetohydrodynamic oscillations in the magnetosphere-ionosphere system: Hall current effect p 3360 N94-29242

ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244

Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245

Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites [DE94-607323] p 3365 N94-30223

EARTH MANTLE

Electromagnetic core-mantle coupling p 3366 N94-30808

Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle p 3367 N94-30917

EARTH MOVEMENTS

Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion p 3363 N94-29941

EARTH OBSERVATIONS (FROM SPACE)

Application of remote sensing in prevention of disasters p 3332 N94-29230

Japan's Earth observation satellite programs p 3332 N94-29232

Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area [ISBN-0-315-85942-3] p 3334 N94-30037

EARTH OBSERVING SYSTEM (EOS)

EOS project and ASTER (ITIR) p 3331 N94-29226

EARTH ORBITAL ENVIRONMENTS

Electron beams at geosynchronous orbit [AD-A275471] p 3355 N94-28684

Robust 300 C wire insulation system p 3165 N94-28699

Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays [NASA-TM-106543] p 3172 N94-28999

Orbital debris radar instrumentation p 3248 N94-29626

Study of activation data of metal samples from LDEF-1 and Spacelab-2 [NASA-CR-195802] p 3205 N94-29736

Wave generation by contaminant ions near a large spacecraft [NASA-CR-195797] p 3169 N94-29917

Simulation of space-energy distributions of hot plasma on a geostationary orbit [DE94-607324] p 3365 N94-30107

EARTH ORIENTATION

Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614

EARTH RESOURCES

Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929

Image processing for hyperspectral data p 3326 N94-28930

JERS-1 data and information system for resources exploration p 3327 N94-28932

Observations by ERS-1 start p 3327 N94-28933

Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037

Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future [JTN-94-80597] p 3329 N94-29217

Remote sensing and the Earth p 3329 N94-29218

Application of optical sensor data to resource survey p 3330 N94-29223

Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224

JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems p 3331 N94-29229

Future expectation of remote sensing technology p 3332 N94-29231

Journal of NIRE, vol. 2, no. 3 [JTN-94-80553] p 3553 N94-29512

Extrapolation of point data for resource mapping p 3334 N94-29959

EARTH ROTATION

Hydrodynamics of convection under winter polar leads [AD-A275182] p 3369 N94-29067

Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614

Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames [NASA-CR-195768] p 3142 N94-30243

Electromagnetic core-mantle coupling p 3366 N94-30808

EARTH SCIENCES

A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center [NASA-TM-108438] p 3529 N94-28820

Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779

Research and technology, 1992 [NASA-TM-103996] p 3555 N94-29891

EARTH SURFACE

Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617

Models of atmosphere-ecosystem-hydrology interactions: Approaches and testing p 3353 N94-30636

EARTH TERMINALS

Defocussing characteristics of the ACTS, T1-VSAT Earth terminal antennas [NASA-TM-106420] p 3242 N94-28826

The two-way time synchronization system via a satellite voice channel p 3471 N94-30658

EARTH-MOON TRAJECTORIES

Optimal low-thrust, Earth-Moon trajectories p 3159 N94-30961

EARTHQUAKES

Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion p 3363 N94-29941

The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969

Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area [ISBN-0-315-85942-3] p 3334 N94-30037

EATING

Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429

Some issues on Japan's space food developrnent and relating preliminary experimental study p 3388 N94-28498

Effect of food intake on skin vasomotor responses to head-up tilt in humans p 3390 N94-28854

ECCENTRICS

Metal band drives in spacecraft mechanisms p 3162 N94-29637

ECHOCARDIOGRAPHY

Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images [TELECOM-93-D-016] p 3395 N94-30970

ECHOES

Seafloor characterization using texture [AD-A275399] p 3377 N94-29204

ECOLOGY

JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems p 3331 N94-29229

A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A [DE94-005853] p 3349 N94-30046

A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling p 3351 N94-30628

Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629

A toy terrestrial carbon flow model p 3352 N94-30630

ECONOMIC ANALYSIS

Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy [DE94-006654] p 3296 N94-30830

Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector [DE94-006100] p 3226 N94-30885

ECONOMIC DEVELOPMENT

Spin-off companies as agents of technology transfer: An empirical study of the spin-off companies of the Technical Research Centre of Finland [PB94-132248] p 3537 N94-28405

ECONOMIC IMPACT

Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system p 3348 N94-29901

Solar photovoltaics for development applications [DE94-006116] p 3340 N94-30843

Measuring the impact of investments in information technologies on business performance [REPT-93-056] p 3536 N94-30929

ECONOMICS

Proceedings of the low cost materials of construction for biological processes workshop [DE94-000218] p 3226 N94-30761

ECOSYSTEMS

Development and implementation of a scrub habitat compensation plan for Kennedy Space Center [NASA-TM-109202] p 3347 N94-29099

Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior [PB94-137809] p 3347 N94-29158

A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A [DE94-005853] p 3349 N94-30046

Linkages between terrestrial ecosystems and the atmosphere p 3351 N94-30624

A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling p 3351 N94-30628

Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629

A toy terrestrial carbon flow model p 3352 N94-30630

Carbon cycling in high-latitude ecosystems p 3352 N94-30631

Models of atmosphere-ecosystem-hydrology interactions: Approaches and testing p 3353 N94-30636

The development and evaluation of a tunable diode laser trace gas sensor for the measurement of N2O and CH4 fluxes using micrometeorological techniques [ISBN-0-315-78975-1] p 3296 N94-30801

EDDY CURRENTS

Three-dimensional finite element modeling of a magnet array spinning above a conductor [DE94-004573] p 3468 N94-28459

Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite [PB94-138310] p 3263 N94-29120

Flux-focusing eddy current probe and method for flaw detection [NASA-CASE-LAR-15046-1] p 3315 N94-29366

Mathematical models of hysteresis [DE94-005681] p 3260 N94-30902

EDDY VISCOSITY

Large eddy simulations using lattice Boltzmann algorithms [DE94-005666] p 3270 N94-28549

EDGE DETECTION

Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images [TELECOM-93-D-016] p 3395 N94-30970

EDGES

Stability properties of inclusive connectivity for graphs [AD-A275360] p 3452 N94-29016

EDITING

Engineering specification editing tools [AD-A275116] p 3419 N94-29746

EDITING ROUTINES (COMPUTERS)

Transferable Output ASCII Data (TOAD) editor version 1.0 user's guide [NASA-CR-187507] p 3408 N94-28818

The ABC structure editor: Structure-based editing for the ABC programming environment [CWI-CS-R9256] p 3418 N94-29487

EDUCATION

Simulation Networking/Training Requirements Relational Database: User's guide [AD-A275634] p 3528 N94-28637

The Seventh Annual National Conference of Black Physics Students
[NASA-CR-195735] p 3526 N94-28746
Summer intern program
[AD-A275194] p 3466 N94-28888
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910
An evaluation of techniques for ranking academic information systems journals
[AD-A275179] p 3529 N94-29066
Fundamentals of printing technology
[PB94-132602] p 3530 N94-29141
Ada, object-oriented techniques, and concurrency in teaching data structures and file management
[AD-A275385] p 3411 N94-29201
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
ECSU home-institution support program (1993)
[AD-A275244] p 3431 N94-29396
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175

EGGS
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853

EIGENVALUES
Calculation of eigenvalues of Schroedinger operators for arbitrary coupling
[DE94-606302] p 3522 N94-28582
Variational calculation of the eigenpotential for H(sup -)-system
[DE94-606269] p 3407 N94-28622
The bootstrapped algorithm: A fast algorithm for blind signal separation
[AD-A275759] p 3408 N94-28760
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
Eigenmode analysis of the destabilized ion acoustic mode in tokamaks
[PPL-142] p 3507 N94-30158
Further investigation of curve veering phenomena
p 3460 N94-30515
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-1255722-U] p 3281 N94-30743

EIGENVECTORS
Variational calculation of the eigenpotential for H(sup -)-system
[DE94-606269] p 3407 N94-28622
A semiclassical study of quantum maps
p 3524 N94-29987
Further investigation of curve veering phenomena
p 3460 N94-30515

EINSTEIN EQUATIONS
Physics, astronomy, and astrophysics: A numerical study of the black hole plus Brill wave spacetime
p 3540 N94-29990
A numerical study of gravitational collapse
p 3548 N94-30271

EJECTION
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report
p 3381 N94-28435
Sputtering of single crystals: Experimental evidence of the ejection process
[AD-A275819] p 3512 N94-28775

EKMAN LAYER
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
Structure of neutrally stratified turbulent Ekman layer as predicted by closure models with prognostic equation for master length scale p 3325 N94-28696

ELASTIC ANISOTROPY
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105

ELASTIC DAMPING
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018

ELASTIC DEFORMATION
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Dynamic modeling of multibody flexible structures
p 3323 N94-30813

ELASTIC MEDIA
A program for rapid computation of multioffset vertical seismic profile synthetic seismograms for layered media
[AD-A275464] p 3355 N94-28737
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956

ELASTIC PROPERTIES
Computer simulation of martensitic transformations
[DE94-005213] p 3201 N94-28479
Free vibration of thermally loaded panels including initial imperfections and post-buckling effects
[NASA-TM-109097] p 3479 N94-29461
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
Thermomechanical properties of 3-D transition metals
[DE94-604015] p 3487 N94-29500
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
A non-contacting vertical alignment system for mass properties measuring instruments
[DE94-004680] p 3289 N94-29927
High elongation elastomers p 3223 N94-30477
Measurement of bulk longitudinal modulus and correction for edge effects
[DE94-005581] p 3222 N94-30900

ELASTIC SCATTERING
Numerical solution of the multichannel scattering problem
[DE94-606297] p 3484 N94-28619
Incommensurate magnetic order in UNi2Al3
[DE94-005449] p 3209 N94-30246

ELASTIC WAVES
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740

ELASTOMERS
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
Novel techniques applied to polymer lifetime predictions
[DE94-005095] p 3218 N94-30102
High elongation elastomers p 3223 N94-30477

ELASTOPLASTICITY
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
Micromechanical analysis of thermo-inelastic multiphase short-fiber composites
[NASA-CR-195290] p 3183 N94-30178
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258

ELECTRIC ARCS
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications
p 3166 N94-28711
A new test method for the assessment of the arc tracking properties of wire insulation in air, oxygen enriched atmospheres and vacuum p 3167 N94-28714
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
Plasma arc welding torch having means for vortexing plasma for exiting the welding torch
[NASA-CASE-MFS-28828-1] p 3298 N94-29351

ELECTRIC AUTOMOBILES
DOE/KEURP site operator program
[DE94-005832] p 3267 N94-30701

ELECTRIC BATTERIES
Battery energy and superconducting magnetic energy storage for utility applications: A qualitative analysis
[DE94-005382] p 3336 N94-28489
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505
Electrochemical Power Source (EPS) selection for Energetically Independent Robots (EIR): A systematic approach p 3269 N94-30312
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819

ELECTRIC BRIDGES
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115

ELECTRIC CHARGE
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040

ELECTRIC CONDUCTORS
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459
NEMA wire and cable standards development programs p 3166 N94-28706

ELECTRIC CONNECTORS
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28543
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995
System for the installation and replacement of components in hostile environments
[NASA-CASE-LEW-14906-1-SB] p 3300 N94-29427

ELECTRIC CONTACTS
Current leads and magnetic bearings
[DE94-004607] p 3297 N94-28461

ELECTRIC CURRENT
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723

ELECTRIC DISCHARGES
Interaction of multiple spark-generated bubbles in a compressible liquid
[AD-A275037] p 3272 N94-29149

ELECTRIC ENERGY STORAGE
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

ELECTRIC EQUIPMENT
NASA Parts Program Office responsibilities
p 3165 N94-28702

ELECTRIC EQUIPMENT TESTS
A new test method for the assessment of the arc tracking properties of wire insulation in air, oxygen enriched atmospheres and vacuum p 3167 N94-28714

ELECTRIC FIELDS
Fluctuation and transport reduction in a reversed field pinch by inductive poloidal current drive
[DE94-005542] p 3503 N94-28514
On the EKL-effect
[DE94-606325] p 3468 N94-28720
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
A study of cloud-to-ground lightning processes with emphasis on data analysis and modeling of the return stroke p 3372 N94-29802
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
Missile launch detection electric field perturbation experiment
[DE94-004224] p 3466 N94-30586
Electric power lines: Questions and answers on research into health effects
[DE94-005637] p 3353 N94-30757

ELECTRIC GENERATORS
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162

ELECTRIC HYBRID VEHICLES
Analysis of data from electric and hybrid electric vehicle student competitions
[DE94-000269] p 3302 N94-29922
DOE/KEURP site operator program
[DE94-005832] p 3267 N94-30701

ELECTRIC MOTOR VEHICLES
Fuel Cell Seminar, 1992: Program and abstracts
[DE94-003882] p 3336 N94-28472

Analysis of data from electric and hybrid electric vehicle student competitions
[DE94-000269] p 3302 N94-29922
Technical analysis of alternative fueled vehicles
[DE94-744238] p 3304 N94-30269
DOE/KEURP site operator program
[DE94-005832] p 3267 N94-30701
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831

ELECTRIC MOTORS
Three high duty cycle, space-qualified mechanisms p 3162 N94-29642
Design of an electromagnetic accelerator for turbulent hydrodynamic mix studies
[DE94-005821] p 3281 N94-30600

ELECTRIC POTENTIAL
Breakdown testing of wiring insulation p 3166 N94-28713
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Effects of oxide charge and surface recombination velocity on the excess base current of BJT's
[DE94-003711] p 3263 N94-29025
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
A magnetically coupled quench detector for superconducting magnets
[DE94-006040] p 3268 N94-30904

ELECTRIC POWER PLANTS
Impact study on the use of biomass-derived fuels in gas turbines for power generation
[DE94-000261] p 3224 N94-28502
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018

ELECTRIC POWER SUPPLIES
Cosmic energy equipment p 3229 N94-28945
Electrochemical Power Source (EPS) selection for Energetically Independent Robots (EIR): A systematic approach p 3269 N94-30312

ELECTRIC POWER TRANSMISSION
Development of an accurate transmission line fault locator using the global positioning system satellites p 3144 N94-30652

ELECTRIC PROPULSION
Arcjet system integration development
[NASA-CR-187147] p 3171 N94-28736
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444

ELECTRIC SWITCHES
Measurand transient signal suppressor
[NASA-CASE-MSC-22027-1] p 3435 N94-29466

ELECTRIC WIRE
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
ESTEC wiring test programme materials related properties p 3165 N94-28698
Robust 300 C wire insulation system p 3165 N94-28699
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
NASA Parts Project Office: Basic goals p 3166 N94-28703
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Organized wiring systems p 3166 N94-28705
NEMA wire and cable standards development programs p 3166 N94-28706
MSFC inspections of installed polyimide wire p 3166 N94-28707
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035

ELECTRICAL ENGINEERING
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523

ELECTRICAL FAULTS
Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444
Development of an accurate transmission line fault locator using the global positioning system satellites p 3144 N94-30652

ELECTRICAL IMPEDANCE
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115

ELECTRICAL INSULATION
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
Robust 300 C wire insulation system p 3165 N94-28699
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
NEMA wire and cable standards development programs p 3166 N94-28706
Wiring for space applications program p 3166 N94-28708
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
Electrical and mechanical testing of wire insulation for space applications p 3166 N94-28710
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications p 3166 N94-28711
Wire insulation degradation and flammability in low gravity p 3166 N94-28712
Breakdown testing of wiring insulation p 3166 N94-28713
A new test method for the assessment of the arc tracking properties of wire insulation in air, oxygen enriched atmospheres and vacuum p 3167 N94-28714
High temperature polymer dielectric film insulation p 3167 N94-28715
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
Picosecond response of the quasiparticle current in superconducting tunnel junctions
[DE94-006300] p 3515 N94-30009
Development of radiation resistant electrical cable insulations p 3223 N94-30480
Development of radiation resistant electrical cable insulations
[DE94-005189] p 3222 N94-30906

ELECTRICAL MEASUREMENT
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057
System for improving measurement accuracy of transducer by measuring transducer temperature and resistance change using thermoelectric voltages
[NASA-CASE-ARC-12014-1] p 3287 N94-29361
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467

ELECTRICAL PROPERTIES
ESTEC wiring test programme materials related properties p 3165 N94-28698
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Electroset Technology: On the forefront of manufacturing
[AD-A275166] p 3263 N94-29045
Studies on the optimization of deformation processed metal-metal matrix composites
[DE94-006033] p 3185 N94-30704
Rotator phases in narrow-gap semiconductors
[DE94-005472] p 3521 N94-30897

ELECTRICAL RESISTANCE
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
System for improving measurement accuracy of transducer by measuring transducer temperature and resistance change using thermoelectric voltages
[NASA-CASE-ARC-12014-1] p 3287 N94-29361

ELECTRICAL RESISTIVITY
Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite
[PB94-138310] p 3263 N94-29120
High resistivity buffer layers by oxygen doping
[AD-A274986] p 3513 N94-29125
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
Aggregation equilibria in arsenic doped silicon
[DE94-607269] p 3515 N94-30005
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053
Localization in presence of magnetic field in 2-D disordered binary alloys
[DE94-608093] p 3208 N94-30108
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773

ELECTRICITY
NEMA wire and cable standards development programs p 3166 N94-28706

ELECTRO-OPTICAL EFFECT
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247

ELECTRO-OPTICS
Advanced optical A/D converter
[AD-A275663] p 3498 N94-28656
Gordon research conference on optical signal processing and holography
[AD-A275092] p 3499 N94-28848
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
[NASA-CR-195688] p 3235 N94-29767
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261
Photonics at Sandia National Laboratories: From research to applications
[DE94-006463] p 3501 N94-30828

ELECTROACOUSTIC TRANSDUCERS
Absolute calibration technique for broadband ultrasonic transducers
[NASA-CASE-LAR-14672-1] p 3287 N94-29199
Sensing the gas metal arc welding process p 3314 N94-30444

ELECTROACOUSTICS
Minutes. Accredited Standards Committee on Acoustics, S1. US tag for ISO/TC 43 acoustics and IEC/TC 29 electroacoustics
[AD-A275702] p 3477 N94-28689

ELECTROCARDIOGRAPHY
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892

ELECTROCHEMICAL CELLS
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505

ELECTROCHEMICAL CORROSION
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138

ELECTROCHEMICAL OXIDATION
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938

ELECTROCHEMISTRY
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Realtime structural electrochemistry of platinum clusters using dispersive XAFS
[DE94-005093] p 3208 N94-30101
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521

ELECTRODEPOSITION
Electrodeposition of bismuth alloys by the controlled potential method
[DE94-605318] p 3212 N94-28550
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215

Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape
[AD-A275378] p 3197 N94-29312
An improved plating process p 3223 N94-30451

ELECTRODES
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773

ELECTRODYNAMICS
The Klein-Fock equation, minimal surfaces and gravitational fields
[DE94-606340] p 3356 N94-28803
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172

ELECTROLESS DEPOSITION
Adhesion of electrolessly deposited Ni(P) on alumina ceramic
[ETN-94-95358] p 3212 N94-28539

ELECTROLYSIS
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468

ELECTROLYTE METABOLISM
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497

ELECTROLYTES
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946

ELECTROLYTIC CELLS
Fuel Cell Seminar, 1992: Program and abstracts
[DE94-003882] p 3336 N94-28472

ELECTROMAGNETIC ABSORPTION
UV laser long-path absorption spectroscopy p 3343 N94-28595
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598
Pushing the limit: Precision radial velocities, techniques, and applications p 3542 N94-30861

ELECTROMAGNETIC COMPATIBILITY
Arcjet system integration development
[NASA-CR-187147] p 3171 N94-28736
Development of electromagnetic compatibility tests
[REPT-932-430-110] p 3245 N94-29421

ELECTROMAGNETIC COUPLING
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Electromagnetic core-mantle coupling p 3366 N94-30808

ELECTROMAGNETIC FIELDS
The static and nonstatic electrical solenoids
[DE94-606326] p 3261 N94-28585
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Mathematical models of hysteresis
[DE94-005681] p 3260 N94-30902

ELECTROMAGNETIC INTERACTIONS
A measurement of the tau polarization at the resonance with the DELPHI detector at LEP
[DE94-005557] p 3482 N94-28520
Masses and mixing of leptons and quarks (Dirac particles)
[DE94-606446] p 3484 N94-28611
High sensitivity tests of the standard model for electroweak interactions
[DE94-005415] p 3490 N94-30262
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838

ELECTROMAGNETIC INTERFERENCE
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906
Digital pulse compression and its application in reducing radar interference
[ISBN-0-315-85767-6] p 3255 N94-30240
Guidance on eliminating interference from sensitive electrical circuits
[PB94-139300] p 3268 N94-30784

ELECTROMAGNETIC NOISE
High Tc superconducting bolometric and nonbolometric infrared (IR) detectors
[NASA-CR-195728] p 3262 N94-28846
Removal of coherent Extremely Low Frequency (ELF) background noise by adaptive noise cancellation
[AD-A275016] p 3243 N94-28898
The effect of enhanced backscattering on target detection p 3258 N94-30508

ELECTROMAGNETIC NOISE MEASUREMENT
Long term variations of radio auroral activity p 3359 N94-29237
New-type echoes observed with the 50 MHz auroral Doppler radar at Showa Station p 3360 N94-29238
Initial observation results with imaging riometer at NY-Alesund (L is equal to 16) p 3360 N94-29239

ELECTROMAGNETIC PROPERTIES
Radioelectric characterization of materials at 1000 C
[REPT-932-430-104] p 3245 N94-29440

ELECTROMAGNETIC PULSES
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071

ELECTROMAGNETIC RADIATION
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733
The effects of man-made smokes and battlefield-induced smokes on the propagation of electromagnetic radiation p 3258 N94-30505
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653

ELECTROMAGNETIC SCATTERING
Acoustic or electromagnetic scattering from the penetrable wedge
[AD-A275259] p 3243 N94-29054

ELECTROMAGNETIC SHIELDING
Flux-focusing eddy current probe and method for flaw detection
[NASA-CASE-LAR-15046-1] p 3315 N94-29366

ELECTROMAGNETIC SPECTRA
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115

ELECTROMAGNETIC WAVE TRANSMISSION
Atmospheric Propagation Effects Through Natural and Man-Made Obscurants for Visible to MM-Wave Radiation
[AGARD-CP-542] p 3256 N94-30495
The effects of man-made smokes and battlefield-induced smokes on the propagation of electromagnetic radiation p 3258 N94-30505

ELECTROMAGNETISM
Integral equation analysis of composite bodies of revolution and arbitrary surfaces with application to cavity-backed antennas p 3253 N94-29883
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

ELECTROMECHANICAL DEVICES
NASA Parts Program Office responsibilities p 3165 N94-28702
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
Design and test of electromechanical actuators for thrust vector control p 3163 N94-29650
SP-100 control drive assembly development p 3163 N94-29651
Micromanufacturing: Recent developments in this country and abroad p 3235 N94-29769

ELECTROMECHANICS
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459

ELECTROMIGRATION
Self-stressing test structures used for high-frequency electromigration
[DE94-006142] p 3267 N94-30368

ELECTRON ACCELERATION
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580

ELECTRON BEAMS
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564
Low voltage electron beam lithography
[AD-A275648] p 3262 N94-28650
Electron beams at geosynchronous orbit
[AD-A275471] p 3355 N94-28684
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Electron beam analysis for cyclotron harmonic and free-electron laser devices
[AD-A275070] p 3293 N94-29179
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467
Stripline monitor electronics for the bundle position determination in AmPS
[DIGEL-1993-8] p 3495 N94-29888
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Investigations of large area electron beam diodes for excimer lasers
[DE94-005670] p 3295 N94-30595
The use of thermistors in the NPL electron-beam calorimeter
[PB94-139334] p 3290 N94-30782
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

ELECTRON BUNCHING
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564

ELECTRON CAPTURE
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

ELECTRON CLOUDS
Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686

ELECTRON DENSITY (CONCENTRATION)
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses p 3188 N94-28682
Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686
Transport properties of epitaxial lift off films
[NASA-TM-106156] p 3264 N94-29209
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

ELECTRON DIFFRACTION
Photoelectron diffraction and holography: Some new directions
[DE94-006297] p 3289 N94-30027
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899

ELECTRON EMISSION
Electron beam analysis for cyclotron harmonic and free-electron laser devices
[AD-A275070] p 3293 N94-29179
Characteristics of secondary electron emission from CsI induced by x rays with energies up to 100 keV
[DE94-608422] p 3395 N94-30185

ELECTRON ENERGY
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Distribution functions of electrons within aluminium oxide thin films
[DE94-608418] p 3490 N94-30184
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

ELECTRON FLUX DENSITY
Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites
[DE94-607323] p 3365 N94-30223
ELECTRON GAS
Transport properties of epitaxial lift off films
[NASA-TM-106156] p 3264 N94-29209
ELECTRON IRRADIATION
Irradiation polymerization of bismaleimide resins
[REPT-932-430-105] p 3215 N94-29441
ELECTRON MICROSCOPES
A sub-cm micromachined electron microscope
p 3236 N94-29775
ELECTRON MOBILITY
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
ELECTRON OSCILLATIONS
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035
ELECTRON PARAMAGNETIC RESONANCE
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Non-invasive temperature measurements using electron paramagnetic resonance spectroscopy
p 3198 N94-29881
ELECTRON PHONON INTERACTIONS
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724
ELECTRON PLASMA
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
ELECTRON PRECIPITATION
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869
ELECTRON RADIATION
Optical depth effects in cluster cooling flows
p 3541 N94-30800
ELECTRON SCATTERING
A measurement of the LMP effect
[DE94-005225] p 3482 N94-28493
Quantum-mechanical suppression of bremsstrahlung
[DE94-005223] p 3497 N94-30712
Dissociative recombination of H3(+)
[DE94-005356] p 3493 N94-30891
ELECTRON SPECTROSCOPY
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
ELECTRON STATES
Electronic structure and mechanical properties of grain boundaries
[AD-A275198] p 3512 N94-28890
ELECTRON TRANSFER
The generalized spin-boson model for electron-transfer reactions involving two harmonic potentials with a different force constant
[DE94-005470] p 3482 N94-28509
Quenching of the excited state of hydrated Europium(3) ions by electron transfer
[DE94-005553] p 3482 N94-28518
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3262 N94-28687
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE94-004958] p 3200 N94-30769
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770
Theory for electron-transfer reactions involving two Marcus surfaces with a different force constant
[DE94-005925] p 3493 N94-30874
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903
ELECTRON TUNNELING
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3262 N94-28687
Micromachined electron tunneling infrared sensors
p 3238 N94-29785
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035
Strong overlap and transmission in triple barrier resonant structures
[DE94-608103] p 3516 N94-30067
ELECTRON-POSITRON PAIRS
Experiment studies of electron-positron interactions at the Stanford Linear Accelerator Center
[DE94-005877] p 3491 N94-30702
ELECTRON-POSITRON PLASMAS
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
ELECTRONIC CONTROL
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467
ELECTRONIC COUNTERMEASURES
Spurs in digital radio frequency memory and applications of DRFM
[AD-A275013] p 3243 N94-28897
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906
Detection methods for stealth radio signals: A literature survey
[PB94-137452] p 3244 N94-29176
ELECTRONIC EQUIPMENT
NASA Parts Program Office responsibilities
p 3165 N94-28702
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution
p 3354 N94-30466
ELECTRONIC EQUIPMENT TESTS
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Self-stressing test structures used for high-frequency electromigration
[DE94-006142] p 3267 N94-30368
Fiber optical solar simulator p 3341 N94-30486
ELECTRONIC MAIL
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report
[AD-A275298] p 3242 N94-28874
Management of PEM public key certificates using X.500 directory service: Some problems and solutions
[DE94-004200] p 3431 N94-29952
ELECTRONIC MODULES
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A275896] p 3405 N94-28798
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467
ELECTRONIC PACKAGING
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A275896] p 3405 N94-28798
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261
ELECTRONIC TRANSDUCERS
Micromachined electron tunneling infrared sensors
p 3238 N94-29785
ELECTRONS
Interband optical absorption in the Wannier-Stark ladder under the electron-LO-phonon resonance condition
[DE94-608097] p 3267 N94-30092
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779
Self-similar variables and the problem of nonlocal electron heat conductivity
[DE94-005826] p 3493 N94-30881
ELECTRONYSTAGMOGRAPHY
Disturbance of equilibrium on JAL flight crew
p 3390 N94-28856
ELECTROPHORESIS
Instrumental development of novel detection and separation methods for capillary electrophoresis
[DE94-005554] p 3187 N94-28519
Properties of chemical vapor infiltration diamond deposited in a diamond powder matrix
[DE94-005429] p 3220 N94-30591
ELECTROPLATING
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770
ELECTROSTATIC CHARGE
The impact of electrically charged microspheres with planar surfaces under vacuum conditions
p 3320 N94-29765
ELECTROSTATIC ENGINES
Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546
ELECTROSTATIC GYROSCOPES
Integrated microgyroscope p 3239 N94-29789
ELECTROSTATICS
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Toward milli-Newton electro- and magneto-static microactuators p 3238 N94-29784
ELECTROWEAK MODEL
High sensitivity tests of the standard model for electroweak interactions
[DE94-005415] p 3490 N94-30262
ELEMENTARY PARTICLE INTERACTIONS
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
ELEVATION
Elevation control system model for the DSS 13 antenna p 3248 N94-29622
ELLIPSOIDS
The stability of perfect elliptic disks
p 3545 N94-29834
ELLIPTICAL GALAXIES
The stability of perfect elliptic disks
p 3545 N94-29834
ELLIPTICAL POLARIZATION
Infrared polarization signatures p 3258 N94-30506
EMBEDDED COMPUTER SYSTEMS
Object-based design of embedded software
[PB94-132073] p 3407 N94-28403
Technology transition push. Part 1: A case study of rate monotonic analysis
[AD-A275616] p 3407 N94-28633
Embedded expert system: From the mock-up to the real world p 3412 N94-29319
Experiences with the HOOD design method on avionics software development p 3414 N94-29325
Rome Laboratory software engineering technology program p 3414 N94-29330
Design of a thinwire real-time multiprocessor operating system p 3415 N94-29333
Software testing practices and their evolution for the 1990's p 3415 N94-29335
Integrated formal verification and validation of safety critical software p 3416 N94-29338
A common approach for an aerospace software environment p 3417 N94-29346
Analysis of EDP performance
[NASA-CR-195726] p 3420 N94-29945
Predictive sufficiency and the use of stored internal state
[AIAA PAPER 94-1213-CP] p 3445 N94-30564
EMBEDDING
HYPER-NPSNET: Embedded multimedia in a 3D virtual world
[AD-A275063] p 3410 N94-29152
Embeddings of Heyting algebras
[ML-93-14] p 3463 N94-30977
EMBRITTLEMENT
Radiation effects in beryllium used for plasma protection
[DE94-004599] p 3201 N94-28460
EMBRYOS
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853
EMERGENCIES
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
EMERGENCY LIFE SUSTAINING SYSTEMS
Emergency underwater breathing aids for helicopter passengers and crew p 3381 N94-28437
Portable ventilatory resuscitation systems
[AD-A274984] p 3401 N94-29093

Lunar surface operations. Volume 1: Lunar surface emergency shelter
[NASA-CR-195551] p 3299 N94-29354

EMISSION
The effects of relativistic neutrons on nonthermal models of active galactic nuclei p 3547 N94-29993

EMISSION SPECTRA
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
X ray emission scaling and energy balance of small gas-puff Z-pinch p 3505 N94-29077
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857
Spatially resolved spectroscopy of AG Carinae, and direct evidence for stellar evolution: The central star of NGC 2392
[NASA-CR-189291] p 3545 N94-29871
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862

EMITTANCE
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
An experimental and comprehensive method to measure emission characteristics p 3257 N94-30501

EMITTERS
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828

ENCAPSULATING
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453

END EFFECTORS
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands p 3301 N94-29847
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
A highly redundant robot system for inspection
[AIAA PAPER 94-1194-CP] p 3442 N94-30545
Dexterity enhancement in microsurgery using telemicro-robotics
[AIAA PAPER 94-1230-CP] p 3447 N94-30579
Kinematics and force analysis of a robot hand based on an artificial biological control scheme p 3313 N94-30957

ENDANGERED SPECIES
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099

ENDOCRINE SYSTEMS
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497

ENDOTHERMIC FUELS
Fuels combustion research
[AD-A275122] p 3189 N94-29004
Endothermic fuels for hypersonic aviation p 3197 N94-29285

ENDOTHERMIC REACTIONS
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203

ENERGETIC PARTICLES
A study of the ultrahigh-energy cosmic ray mass composition with the MACRO and EAS-TOP experiments p 3552 N94-29687
Quasi-adiabatic motion of energetic particles in a dipole magnetic field
[DE94-607322] p 3362 N94-29935
Energetic heavy-ion tracks in micron sites p 3495 N94-30213
Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites
[DE94-607323] p 3365 N94-30223

ENERGY ABSORPTION
Landing gear energy absorption system
[NASA-CASE-MSC-22277-1] p 3300 N94-29448

ENERGY CONSERVATION
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608
Analysis of data from electric and hybrid electric vehicle student competitions
[DE94-000269] p 3302 N94-29922
International Energy and Environmental Congress: Proceedings
[DE93-040609] p 3353 N94-30715

ENERGY CONSUMPTION
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630
Analysis of data from electric and hybrid electric vehicle student competitions
[DE94-000269] p 3302 N94-29922
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831

ENERGY CONVERSION
Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440

ENERGY CONVERSION EFFICIENCY
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313
Photovoltaic performance and reliabiiity workshop
[DE94-000236] p 3339 N94-30601

ENERGY DISSIPATION
Energy losses of fast charged particles in thin silicon detectors
[DE94-606065] p 3483 N94-28552
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064
AC losses for the self field of an AC transport current with a DC transport current offset in high T(c) superconducting magnet coils for MagLev application
[DE94-005187] p 3268 N94-30907
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980

ENERGY GAPS (SOLID STATE)
Energy gap structure of layered superconductors
[DE94-005132] p 3511 N94-28570
Silicon germanium carbon heteroepitaxial growth on silicon
[AD-A275197] p 3512 N94-28889
II-VI wide band gap semiconductors under hydrostatic pressure
[DE94-608106] p 3516 N94-30070
Rotator phases in narrow-gap semiconductors
[DE94-005472] p 3521 N94-30897

ENERGY LEVELS
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
Electronic structure of Zn-based quantum wells
[DE94-608104] p 3516 N94-30068
Reconstruction of spectra in the discrete quantum mechanics (new elements of the lattice quantum engineering)
[DE94-608075] p 3524 N94-30087
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903

ENERGY POLICY
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577
Proceedings of the 1993 Windsor Workshop on Alternative Fuels
[DE94-003908] p 3226 N94-30612
International Energy and Environmental Congress: Proceedings
[DE93-040609] p 3353 N94-30715

ENERGY SOURCES
Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631

ENERGY SPECTRA
Energy distribution of the leptons in top decay to charged Higgs
[DE94-005231] p 3482 N94-28494
Fast precise algorithm for simulation of ionization energy losses
[DE94-608010] p 3421 N94-30080
Distribution functions of electrons within aluminium oxide thin films
[DE94-608418] p 3490 N94-30184

ENERGY STORAGE
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
Electrochemical Power Source (EPS) selection for Energetically Independent Robots (EIR): A systematic approach p 3269 N94-30312

ENERGY TECHNOLOGY
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463
Development of the integrated environmental control model: Performance models of selective catalytic reduction NO(x) control systems
[DE94-002151] p 3341 N94-28465
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Summaries of FY 1993 geosciences research
[DE94-004710] p 3355 N94-28558
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630
Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631
Energy and Technology Review
[DE94-004472] p 3338 N94-29955
Proceedings: SISAL 1993
[DE94-006641] p 3420 N94-30056
Technical analysis of alternative fueled vehicles
[DE94-744238] p 3304 N94-30269
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440
Proceedings of the 1993 Windsor Workshop on Alternative Fuels
[DE94-003908] p 3226 N94-30612
International Energy and Environmental Congress: Proceedings
[DE93-040609] p 3353 N94-30715
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818
Interagency advanced power group: Solar working group
[DE94-004953] p 3340 N94-30833
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844

ENERGY TRANSFER
Density reduction: A mechanism for amorphization at high ion doses
[DE94-004793] p 3483 N94-28559
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Turboramjet engines: Types and performances p 3151 N94-29293
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339
On the nonlinear dynamics of ocean wave systems p 3378 N94-30790

Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

ENGINE AIRFRAME INTEGRATION
Numerical study on the interaction between scramjet engine modules caused by thermal choke
p 3125 N94-28960
Numerical simulation of supersonic flow around space plane with engine installed p 3125 N94-28961

ENGINE CONTROL
Research and development of ramjets/ramrockets. Part 2: Integral liquid fuel ramjets p 3152 N94-29297
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848

ENGINE COOLANTS
Endothermic fuels for hypersonic aviation
p 3197 N94-29285

ENGINE DESIGN
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
Fuels and Combustion Technology for Advanced Aircraft Engines
[AGARD-CP-536] p 3189 N94-29246
Combustion technology needs for advanced high pressure cycle engines p 3190 N94-29248
High temperature fuel requirements and payoffs
p 3192 N94-29259
Design aspects in small aircraft gas turbine fuel injectors p 3154 N94-29264
Technology rigs: A tool for afterburner development
p 3154 N94-29270
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures
p 3194 N94-29271
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future
p 3194 N94-29272
Spray combustion experiments and numerical predictions p 3195 N94-29277
The mixing process in the quenching zone of the rich-lean-combustion concept p 3196 N94-29281
CIAM experimental turboramjets p 3152 N94-29299
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor
p 3152 N94-29300
A variable selection heuristic for solid rocket motor design p 3173 N94-29544
Use of magnetic compression to support turbine engine rotors p 3314 N94-30484

ENGINE FAILURE
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403

ENGINE INLETS
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors
p 3151 N94-29292
Turboramjet engines: Types and performances
p 3151 N94-29293

ENGINE TESTING LABORATORIES
The nozzle acoustic test rig: An acoustic and aerodynamic free-jet facility
[NASA-TM-106495] p 3156 N94-28749

ENGINE TESTS
Research and development of high thermal stability fuels p 3192 N94-29261
Technology rigs: A tool for afterburner development
p 3154 N94-29270
CIAM experimental turboramjets p 3152 N94-29299
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Thick thermal barrier coatings for diesel components
[NASA-CR-187111] p 3537 N94-29350
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868

ENGINEERING MANAGEMENT
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
A generalization of the software engineering maturity model p 3416 N94-29341

ENTHALPY
Differential Scanning Calorimetry (DSC) for planetary surface exploration p 3236 N94-29776
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824

ENTRAINMENT
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator
p 3277 N94-29899

ENTRANCES
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel
p 3126 N94-28967

ENTROPY
Nucleon and nuclei at finite temperature, as a phenomenological test of the entropy bound
[DE94-608094] p 3489 N94-30097
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434
Relations between varieties of Kolmogorov complexities
[CWI-CS-R9329] p 3427 N94-30732

ENTROPY (STATISTICS)
Relations between varieties of Kolmogorov complexities
[CWI-CS-R9329] p 3427 N94-30732

ENVIRONMENT EFFECTS
Fuel Cell Seminar, 1992: Program and abstracts
[DE94-003882] p 3336 N94-28472
Global change research: Summaries of research in FY 1993
[DE94-003150] p 3341 N94-28473
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099
On the effect of emissions from aircraft engines on the state of the atmosphere p 3189 N94-29247
Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system
p 3348 N94-29901
Impact of biomass burning on the atmosphere
[DE94-004333] p 3349 N94-29954
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021

ENVIRONMENT MANAGEMENT
User-centered guidelines for environmental management
[DE94-004313] p 3341 N94-28454
Environmental Compliance Assessment System (ECAS) --- Japan supplement
[AD-A275549] p 3346 N94-28722
Environmental Compliance Assessment And Management System Program (ECAMP). US Air Force European Economic Community (EEC)
[AD-A275593] p 3346 N94-28727
Environmental Review Guide for Operations (ERGO)
[AD-A275611] p 3346 N94-28774
The European community directive: An alternative environmental impact assessment procedure after Massey?
[AD-A275550] p 3347 N94-28844
Remote sensing and the Earth p 3329 N94-29218
Research report on the potential of ocean development suitable for area characteristics
[JTN-94-80587] p 3377 N94-29595
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824

ENVIRONMENT MODELS
Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system
p 3348 N94-29901
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046
Modeling the Earth System, volume 3
[NASA-CR-194256] p 3350 N94-30616
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
Towards coupled physical-biogeochemical models of the ocean carbon cycle p 3350 N94-30618
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619
The role of sea ice dynamics in global climate change
p 3350 N94-30620
Land surface interaction p 3350 N94-30621
A toy model for estimating N2O emissions from natural soils p 3351 N94-30627
A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling
p 3351 N94-30628
Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629
A toy terrestrial carbon flow model
p 3352 N94-30630

ENVIRONMENT POLLUTION
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior
[PB94-137809] p 3347 N94-29158

ENVIRONMENT PROTECTION
Environmental Compliance Assessment System (ECAS) --- Japan supplement
[AD-A275549] p 3346 N94-28722
Environmental Compliance Assessment And Management System Program (ECAMP). US Air Force European Economic Community (EEC)
[AD-A275593] p 3346 N94-28727
Environmental Review Guide for Operations (ERGO)
[AD-A275611] p 3346 N94-28774
The European community directive: An alternative environmental impact assessment procedure after Massey?
[AD-A275550] p 3347 N94-28844
Protocol on environmental protection to the Antarctic Treaty and its annexes: International agreement on the comprehensive measures for the protection of Antarctic environment and ecosystems p 3354 N94-29086
Remote sensing and the Earth p 3329 N94-29218

ENVIRONMENT SIMULATION
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406

ENVIRONMENTAL CHEMISTRY
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464

ENVIRONMENTAL CONTROL
Development of the integrated environmental control model: Performance models of selective catalytic reduction NO(x) control systems
[DE94-002151] p 3341 N94-28485
Advanced seal delivery system life support parameters
[AD-A275304] p 3401 N94-29184

ENVIRONMENTAL ENGINEERING
Journal of NIRE, vol. 2, no. 3
[JTN-94-80553] p 3553 N94-29512

ENVIRONMENTAL LABORATORIES
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464

ENVIRONMENTAL MONITORING
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Environmental Compliance Assessment System (ECAS) --- Japan supplement
[AD-A275549] p 3346 N94-28722
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Research trends on remote sensing at research facilities in Japan: The priority area programme on better understanding of earth environment via satellite
p 3326 N94-28928
Observations by ERS-1 start p 3327 N94-28933
Amazonia: Remote sensing test site and survey
p 3327 N94-28935
Utilization of remote sensing data in Southeast Asia
p 3327 N94-28936
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Principles and application tendency of remote sensing: Its principle, function and utilization
p 3328 N94-29037
Tohoku district observed by artificial satellites
p 3328 N94-29041
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990
p 3358 N94-29083
Activities of the fourth wintering party at Asuka Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29084
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
Remote sensing and the Earth p 3329 N94-29218
A new information system: Satellite observation
p 3330 N94-29219
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
Earth-observation plan in Europe
p 3331 N94-29227
JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems
p 3331 N94-29229

Application of remote sensing in prevention of disasters p 3332 N94-29230
Future expectation of remote sensing technology p 3332 N94-29231
GOME: Global Ozone Monitoring Experiment [ESA-SP-1151] p 3347 N94-29452
Research report on the potential of ocean development suitable for area characteristics [JTN-94-80587] p 3377 N94-29595
Activities of the wintering party at Syowa Station by the 32nd Japanese Antarctic Research Expedition in 1991 p 3364 N94-29986
FAME: A Forest Assessment and Monitoring Environment scenario [AD-B179106] p 3335 N94-30759
Multitemporal analysis of a braiding river: The advanced study of 1992 [NLR-TP-93100-U] p 3335 N94-30942

ENVIRONMENTAL SURVEYS
The European community directive: An alternative environmental impact assessment procedure after Massey? [AD-A275550] p 3347 N94-28844
A broad-band microseismometer for planetary operations p 3237 N94-29778
Modeling Earth system changes of the past p 3353 N94-30635

ENVIRONMENTAL TESTS
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays [NASA-TM-106543] p 3172 N94-28999
Study of activation data of metal samples from LDEF-1 and Spacelab-2 [NASA-CR-195802] p 3205 N94-29736

ENZYMES
Barley cell culture as a producer of heterologous protein [PB94-132339] p 3379 N94-28408
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session [JTN-94-80584] p 3158 N94-28583
Development of novel switchable protein surfaces [AD-A275510] p 3384 N94-28667
Researches on bioconversion of coal into liquid product p 3187 N94-28677

EPHEMERIDES
GPS common-view time transfer p 3144 N94-30648
A comparison of GPS broadcast and DMA precise ephemerides p 3145 N94-30660

EPIDEMIOLOGY
Aviation epidemiology data register: Age distribution of U.S. Army aviators stratified by gender and component of service [AD-A275901] p 3388 N94-28757

EPILEPSY
Monitor for status epilepticus seizures p 3397 N94-30460

EPITAXY
Optoelectronic integrated circuits fabricated using atomic layer epitaxy [AD-A275454] p 3262 N94-28805
Silicon germanium carbon heteroepitaxial growth on silicon [AD-A275197] p 3512 N94-28889
Transport properties of epitaxial lift off films [NASA-TM-106156] p 3264 N94-29209
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors [NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793

EPOXY MATRIX COMPOSITES
Intelligent material systems and structures. Part 7: Debonding and pull-out of two optical fibers from two epoxies [PB94-137767] p 3180 N94-29475
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites [PB94-138633] p 3181 N94-29524
Simulation of composite material response under dynamic compressive loading [DE94-005272] p 3184 N94-30589

EPOXY RESINS
Poly(arylene ether-co-imidazole)s as toughness modifiers for epoxy resins [NASA-CASE-LAR-15229-1-CU] p 3215 N94-29451
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family [REPT-932-600-107] p 3179 N94-29462

EQUALIZERS (CIRCUITS)
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels [NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495

EQUATIONS OF MOTION
A non-linear simulation for an autonomous unmanned air vehicle [AD-A275062] p 3146 N94-29200
Iterative procedure as equation of motion [DE94-608008] p 3453 N94-30078
Theory of fundamental interactions [DE94-608126] p 3525 N94-30169
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494
Evaluation of discretization schemes for advection-diffusion equations [CWI-NM-R9311] p 3461 N94-30751

EQUATIONS OF STATE
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars [DE94-005214] p 3542 N94-28480
Equation of state of stellar plasmas [DE94-004186] p 3542 N94-28526
Dynamic response of ceramics [AD-A275396] p 3214 N94-29203

EQUATORIAL REGIONS
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes [AD-A275203] p 3356 N94-28891
Modeling deep equatorial circulation p 3378 N94-29815

EQUILIBRIUM FLOW
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer p 3282 N94-30807

EQUIPMENT SPECIFICATIONS
Composite redesign of obstetrical forceps p 3397 N94-30457
Development of the NASA/Baylor VAD p 3397 N94-30458
Status of frequency and time support for NASA systems p 3468 N94-30640
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS) [JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions [JTN-94-80544] p 3170 N94-30932

EQUIVALENCE
The conjoinability relation in Lambek calculus in linear logic [ML-93-03] p 3457 N94-30397
Remarks on uniformly finitely precomplete positive equivalences [ML-93-12] p 3463 N94-30975

EROSION
Modelling erosion damage from low-energy plasma gun simulations of disruptions [DE94-005196] p 3509 N94-30697

ERROR ANALYSIS
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1 [AD-A275115] p 3136 N94-28914
Solution of augmented systems [PB94-138211] p 3452 N94-29111
Error growth in poor ECMWF forecasts over the contiguous United States [AD-A275297] p 3369 N94-29183
Line-of-sight tropospheric calibration from measurements in arbitrary directions p 3249 N94-29654
Enhanced orbit determination filter sensitivity analysis: Error budget development p 3159 N94-29655
Enhanced orbit determination filter: Inclusion of ground system errors as filter parameters p 3159 N94-29656
Engineering specification editing tools [AD-A275116] p 3419 N94-29746
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry p 3333 N94-29762
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation [NASA-CR-195806] p 3164 N94-29880
The effect of enhanced backscattering on target detection p 3258 N94-30508
Prediction and standard error estimation for a finite universe total when a stratum is not sampled [DE94-004929] p 3465 N94-30696
Systematic error estimation in multisensor fusion systems [AD-B179298] p 3428 N94-30764
Spatial interpolation, network bias, and terrestrial air temperature variability p 3374 N94-30810

ERROR CORRECTING CODES
Convolutional encoding of self-dual codes p 3250 N94-29662

ERROR DETECTION CODES
Animators and error reporters for generated programming environments [CWI-CS-R9253] p 3418 N94-29503
Decoder synchronization for deep space missions p 3250 N94-29664
Checkpoint-based forward recovery using lookahead execution and rollback validation in parallel and distributed systems [NASA-CR-195760] p 3431 N94-29869
Space reclamation for uncoordinated checkpointing in message-passing systems [NASA-CR-195761] p 3420 N94-29906

ERRORS
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1 [AD-A275115] p 3136 N94-28914
Animators and error reporters for generated programming environments [CWI-CS-R9253] p 3418 N94-29503
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits p 3467 N94-29910
Numerical precision and roundoff considerations concerning computer code migration [DE94-005421] p 3427 N94-30590

ERS-1 (ESA SATELLITE)
Observations by ERS-1 start p 3327 N94-28933
Sea ice and oceans applications of SAR p 3327 N94-28934
GOME: Global Ozone Monitoring Experiment [ESA-SP-1151] p 3347 N94-29452

ESTERS
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel [PB94-137536] p 3301 N94-29679

ESTIMATES
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions [PB94-138112] p 3487 N94-29161
Triple Diagonal modeling: A mechanism to focus productivity improvement for business success [DE94-004309] p 3527 N94-30041

ESTIMATING
Advanced fuel properties: A computer program for estimating property values [AD-A275248] p 3224 N94-28901
A complex symbol signal-to-noise ratio estimator and its performance p 3251 N94-29671
Prediction and standard error estimation for a finite universe total when a stratum is not sampled [DE94-004929] p 3465 N94-30696

ESTUARIES
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919

ETCHING
Directional solidification studies in Ni-Al alloys [DE94-005562] p 3201 N94-28527
The effects of molecular orientation geometry and surface anisotropy upon etching [AD-A275154] p 3486 N94-29032

ETHERS
Matrix isolation studies of the interactions of BF3 with water and substituted diethyl ethers. Chemical ionization mass spectrometric determination of the proton affinity of (CF3CH2)2O [NASA-TM-106422] p 3189 N94-28832
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum [NASA-TM-106548] p 3218 N94-30177

ETHYL ALCOHOL
Crystallization of silver chromate from ethanol via salt metathesis reactions of solubilized precursors [AD-A275178] p 3189 N94-29058
Proceedings of the low cost materials of construction for biological processes workshop [DE94-000218] p 3226 N94-30761

ETHYL COMPOUNDS
Matrix isolation studies of the interactions of BF3 with water and substituted diethyl ethers. Chemical ionization mass spectrometric determination of the proton affinity of (CF3CH2)2O [NASA-TM-106422] p 3189 N94-28832

ETHYLENE COMPOUNDS
Anodization of copper in chloride media [AD-A275565] p 3202 N94-28793

EUCLIDEAN GEOMETRY
A deterministic algorithm for the three-dimensional diameter problem [RUU-CS-92-45] p 3424 N94-30348

Theoretical and experimental analysis of a new algorithm for the Euclidean 1-center problem
[REPT-93-045] p 3429 N94-30924

EULER EQUATIONS OF MOTION
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains p 3124 N94-28956
Numerical analysis of supersonic transport wings p 3124 N94-28959
Numerical analysis of sonic boom in the near field p 3125 N94-28962
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
High-resolution algorithms for the Navier-Stokes equations for generalized discretizations p 3278 N94-29965
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-1255722-U] p 3281 N94-30743
Euler results of the ISNaS compressible multi-block flow solver
[AD-B179299] p 3281 N94-30756
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade p 3282 N94-30816

EUROPE
The European community directive: An alternative environmental impact assessment procedure after Massey?
[AD-A275550] p 3347 N94-28844
European PTTI report p 3468 N94-30642

EUROPEAN AIRBUS
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480

EUROPEAN SPACE AGENCY
ESTEC wiring test programme materials related properties p 3165 N94-28698
Earth-observation plan in Europe p 3331 N94-29227

EUROPIUM
Quenching of the excited state of hydrated Europium(3) ions by electron transfer
[DE94-005553] p 3482 N94-28518

EUTECTIC ALLOYS
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions
[ISBN-0-315-86108-8] p 3209 N94-30146
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710

EUTECTICS
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527

EVACUATING (TRANSPORTATION)
Aircraft evacuations: The effect of a cabin water spray system upon evacuation rates and behaviour
[CAA-PAPER-93008] p 3148 N94-29887

EVALUATION
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913

EVAPORATION
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498

EVAPORATORS
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator p 3277 N94-29899

EVENT HORIZON
A numerical study of gravitational collapse p 3548 N94-30271

EVOLUTION (DEVELOPMENT)
Modelling the evolution of information systems
[TR-92-36] p 3535 N94-30329

EXCIMER LASERS
Investigations of large area electron beam diodes for excimer lasers
[DE94-005670] p 3295 N94-30595
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

EXCIMERS
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

EXCITATION
Quenching of the excited state of hydrated Europium(3) ions by electron transfer
[DE94-005553] p 3482 N94-28518
Search for excited quarks in p(bar p) collisions at the square root of s = 1.8 TeV
[DE94-004658] p 3484 N94-28573
Two-Photon/Laser-Induced Fluorescence (TP/LIF) sensor p 3342 N94-28588
Detection of tropospheric OH and HO2 by laser-induced fluorescence at low pressure using the 308nm excitation of OH p 3343 N94-28591

EXCITONS
Effect of phonon dispersion on properties of exciton in magnetic field
[DE93-634756] p 3481 N94-28469
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835

EXERCISE PHYSIOLOGY
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049

EXHAUST EMISSION
Development of the integrated environmental control model: Performance models of selective catalytic reduction NO(x) control systems
[DE94-002151] p 3341 N94-28465
On the effect of emissions from aircraft engines on the state of the atmosphere p 3189 N94-29247
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future p 3194 N94-29272
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
The influence of air distribution on homogeneity and pollutant formation in the primary zone of a tubular combustor p 3194 N94-29274
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
Spray combustion experiments and numerical predictions p 3195 N94-29277
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831

EXHAUST GASES
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future p 3194 N94-29272
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
Spray combustion experiments and numerical predictions p 3195 N94-29277
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860

EXHAUST NOZZLES
The nozzle acoustic test rig: An acoustic and aerodynamic free-jet facility
[NASA-TM-106495] p 3156 N94-28749

EXISTENCE THEOREMS
Existence of quantum characteristic exponents
[PB94-138161] p 3523 N94-29146

EXOBIOLOGY
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715

EXOTHERMIC REACTIONS
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411

EXPANDABLE STRUCTURES
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367

EXPEDITIONS
Evaluation of life support equipment during an unsupported North Pole expedition p 3379 N94-28422
Activities of the fourth wintering party at Asuka Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29084

EXPERIMENT DESIGN
Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405
Physiological Anatomical Rodent Experiment (PARE) .04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968

EXPERT SYSTEMS
Toward a model of expert knowledge structure and their role in cognitive task performance
[AD-A275641] p 3529 N94-28645
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063
Propagation of evidence through fuzzy rules
[AD-A275071] p 3411 N94-29180
Embedded expert system: From the mock-up to the real world p 3412 N94-29319
GPS/GNSS for ATM p 3138 N94-29565
DAISY: A decision aid for an air situation interpretation system p 3139 N94-29574
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513
A Modular Artificial Intelligence Inference Engine System (MAIS) for support of on orbit experiments
[AIAA PAPER 94-1237-CP] p 3448 N94-30584

EXPLOITATION
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627
Fiscal 1990 geothermal development promotion survey
[DE94-732333] p 3337 N94-28628

EXPLORATION
Activities of the wintering party at Syowa Station by the 32nd Japanese Antarctic Research Expedition in 1991 p 3364 N94-29986

EXPLOSIONS
Minutes: Accredited Standards Committee on Mechanical Vibration and Shock, S2. US TAG for ISO/TC 108 Mechanical Vibration and Shock
[AD-A275591] p 3316 N94-28726
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150
Joint research activities with CCMRI (China) p 3240 N94-29521

EXPLOSIVE DEVICES
Integration of pyrotechnics into aerospace systems p 3161 N94-29634

EXPLOSIVES
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308

Superior energetic materials that contain carbocations and anions. Energetic materials restricted in composition to C, H, N, and O atoms
[AD-A275449] p 3225 N94-29310
The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts
[REPT-932-430-113] p 3225 N94-29414
Cubanes: Super explosives and potential pharmaceutical intermediates p 3227 N94-30454

EXPONENTS
Existence of quantum characteristic exponents
[PB94-138161] p 3523 N94-29146
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits
p 3467 N94-29910
The structure of exponentials: Uncovering the dynamics of linear logic proofs
[ML-93-10] p 3430 N94-30973

EXPOSURE
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
The concept of Royal Navy air operations under extreme environmental conditions p 3379 N94-28424
Deterioration of manual performance in cold and windy climates p 3381 N94-28434
Aeropathological diagnosis of lethal hypothermia
p 3382 N94-28440
Rewarming methodologies in the field
p 3382 N94-28441
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
The Environmental Symptoms Questionnaire: Assessing reactions to environmental extremes in military operations p 3383 N94-28447
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility
[NASA-CR-4586] p 3175 N94-29458
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799

EXTENSOMETERS
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424

EXTRAPOLATION
Extrapolation of point data for resource mapping
p 3334 N94-29959

EXTRATERRESTRIAL RADIATION
CBSD: The celestial background scene descriptor
[AD-A275521] p 3538 N94-28671
Proton switches
[AD-A275150] p 3167 N94-29022
Identification of an unexpected space radiation hazard
[AD-A275170] p 3552 N94-29046

EXTRAVEHICULAR ACTIVITY
Extra-vehicular activity translation tool
[NASA-CASE-MSC-21955-1] p 3300 N94-29428
EVA glove evaluation methodology and test protocol
p 3401 N94-29729
Tactility as a function of grasp force: Effects of glove, orientation, pressure, load, and handle
[NASA-TP-3474] p 3402 N94-30210

EXTREME ULTRAVIOLET RADIATION
Broadband EUV survey spectrometer for short-timescale experiments
[DE94-005459] p 3498 N94-28534
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
A sounding rocket program in extreme and far ultraviolet interferometry
[NASA-CR-195114] p 3289 N94-29907
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014

EXTREMELY HIGH FREQUENCIES
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616
Digital combining-weight estimation for broadband sources using maximum-likelihood estimates
p 3250 N94-29661
A 32 GHz microstrip array antenna for microspacecraft application p 3251 N94-29668
Radar cross sections of ground clutter at 95 GHz for summer and fall conditions p 3259 N94-30512

EXTREMELY LOW FREQUENCIES
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings
p 3361 N94-29245

EXTREMELY LOW RADIO FREQUENCIES
Removal of coherent Extremely Low Frequency (ELF) background noise by adaptive noise cancellation
[AD-A275016] p 3243 N94-28898

EXTRUDING
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils
p 3221 N94-30797

EYE (ANATOMY)
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455

EYE MOVEMENTS
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
Non-intrusive gaze tracking using artificial neural networks
[AD-A275186] p 3397 N94-28860
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715

F

F REGION
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014

F-22 AIRCRAFT
A disciplined approach to software test and evaluation
p 3416 N94-29339

FABRICATION
Practical superconductor development for electrical power applications
[DE94-005378] p 3261 N94-28487
Design and fabrication of forward-swept counterrotation blade configuration for wind tunnel testing
[NASA-CR-194868] p 3155 N94-28510
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low I/f noise
[DE94-005209] p 3261 N94-28546
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
Polymer infiltration studies
[NASA-CR-195729] p 3213 N94-28748
A/GATECH DOSP fabrication --- optical programmable logic array
[AD-A275848] p 3430 N94-28781
Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838
3-D braided, continuous fiber ceramic composites produced by chemical vapor infiltration
[AD-A275192] p 3178 N94-29024
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators
[AD-A275235] p 3263 N94-29028
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073
Method for forming thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18877-1-CU] p 3264 N94-29357
Non-rectangular towpreg architectures
[NASA-CASE-LAR-14863-1-CU] p 3180 N94-29485
A module concept for a cable-mesh deployable antenna p 3161 N94-29631
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
The machining of fiber metal laminates. Part 1: An inventory of forming processes
[LR-710-PT-1] p 3184 N94-30343
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603
Large-area triple-junction a-Si alloy production scale up
[DE94-000249] p 3339 N94-30604
Microwave assisted chemical vapor infiltration
[DE94-005005] p 3185 N94-30771
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils
p 3221 N94-30797

FABRICS
The potential of new textiles in improving survival prospects p 3380 N94-28430
Development of a new chemical warfare agent protective material p 3381 N94-28432
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463
Analysis and design of inflatable aerospace structures
p 3403 N94-30799
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

FACE (ANATOMY)
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864

FACE CENTERED CUBIC LATTICES
A comparison of the evolution of cold and hot deformation microstructures and textures in fcc metals
[DE94-005103] p 3210 N94-30777

FACTOR ANALYSIS
The Environmental Symptoms Questionnaire: Assessing reactions to environmental extremes in military operations p 3383 N94-28447

FAILURE
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
Composite panel failure analysis and improvement plan
[AD-A275655] p 3176 N94-28653
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Failure strength and mechanism of composite laminates under multiaxial loading conditions p 3182 N94-29875
Ampoule failure sensor time response testing: Experiment 1
[NASA-TM-108449] p 3290 N94-30199

FAILURE ANALYSIS
Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511
Composite panel failure analysis and improvement plan
[AD-A275655] p 3176 N94-28653
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100
Potential software failures methodology analysis
p 3414 N94-29329
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
Lock-up failure of a four-bar linkage deployment mechanism p 3163 N94-29646
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole
p 3181 N94-29735
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114

FAILURE MODES
Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Interface engineering in alumina fiber/glass composites p 3182 N94-29852
Design for dependability: A simulation-based approach
[NASA-CR-195757] p 3420 N94-29890
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928

FALKNER-SKAN EQUATION
Experiments and theoretical considerations regarding the allowable roughness height in laminar flow
[PB94-125556] p 3133 N94-30389

FALLOUT
Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior
[PB94-137809] p 3347 N94-29158

FAR INFRARED RADIATION
Temperature depencence of the far infrared optical constants of polyethylene
[PB94-124336] p 3213 N94-28795
The far-infrared absorption spectrum of low temperature hydrogen gas
[ISBN-0-315-85432-4] p 3199 N94-30137
FAR ULTRAVIOLET RADIATION
Far ultraviolet images of the nighttime ionosphere
[AD-A275083] p 3356 N94-28843
A sounding rocket program in extreme and far ultraviolet interferometry
[NASA-CR-195114] p 3289 N94-29907
Ablation of polymers by ultraviolet pulsed laser
[DE94-608100] p 3218 N94-30066
FARM CROPS
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
FAST FOURIER TRANSFORMATIONS
Spectral analysis of wave propagation in connected waveguides p 3277 N94-29944
FAST NEUTRONS
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695
FASTENERS
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels
[AD-A275755] p 3315 N94-28646
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
Quick connect fastener
[NASA-CASE-MFS-28829-1] p 3300 N94-29486
FATIGUE (MATERIALS)
Effects of repair on structural integrity
[AD-A275756] p 3145 N94-28647
A moment plotting method for characterizing aircraft fatigue data population distributions
[AD-A275500] p 3145 N94-28660
Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperatures under tension-tension loading
[AD-A275466] p 3176 N94-28673
On fatigue crack closure: Analysis and measurement
[ISBN-0-315-74873-7] p 3321 N94-29812
Analysis concerning the inspection threshold for multi-site damage
[PB94-142429] p 3149 N94-30905
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947
FATIGUE LIFE
A moment plotting method for characterizing aircraft fatigue data population distributions
[AD-A275500] p 3145 N94-28660
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
The effect of mechanical paint stripping on the fatigue and fracture of thin aluminum airplane skin
p 3205 N94-29900
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
FATIGUE TESTS
Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperatures under tension-tension loading
[AD-A275466] p 3176 N94-28673
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
On fatigue crack closure: Analysis and measurement
[ISBN-0-315-74873-7] p 3321 N94-29812
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947
FAULT TOLERANCE
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A275896] p 3405 N94-28798
Algorithms for treating redundancy in repairable and non-repairable systems
[DE94-005289] p 3315 N94-29020
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
Potential software failures methodology analysis
p 3414 N94-29329
Rome Laboratory software engineering technology program p 3414 N94-29330
Distributed applications and failure tolerance programs using a reconfigurable parallel architecture
p 3417 N94-29345
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
A study of the relationship between the performance and dependability of a fault-tolerant computer
[NASA-CR-195758] p 3406 N94-29695
Checkpoint-based forward recovery using lookahead execution and rollback validation in parallel and distributed systems
[NASA-CR-195760] p 3431 N94-29869
Design for dependability: A simulation-based approach
[NASA-CR-195757] p 3420 N94-29890
Space reclamation for uncoordinated checkpointing in message-passing systems
[NASA-CR-195761] p 3420 N94-29906
TOTAL user manual
[NASA-TM-109101] p 3432 N94-30160
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
Design and analysis of dynamic leader election protocols in broadcast networks
[MEMO-INF-93-43] p 3260 N94-30520
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
FAULT TREES
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
FEASIBILITY
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
FEASIBILITY ANALYSIS
KC-135 cockpit modernization study and crew reduction feasibility demonstration
[AD-A275230] p 3146 N94-29391
Electron microscopy: Metal alloy x ray microanalysis
[REPT-932-600-101] p 3205 N94-29525
Compressed natural gas fueled vehicles: The Houston experience
[DE94-005804] p 3312 N94-30878
FEDERAL BUDGETS
Omnibus Budget Reconciliation Act of 1990
[PUB-LAW-101-508] p 3537 N94-28540
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688
FEED SYSTEMS
Gaussian beam and physical optics iteration technique for wideband beam waveguide feed design
p 3248 N94-29624
A digital combining-weight estimation algorithm for broadband sources with the array feed compensation system p 3250 N94-29660
Application of the Modular Automated Reconfigurable Assembly System (MARAS) concept to adaptable vision gauging and parts feeding
[AIAA PAPER 94-1182-CP] p 3440 N94-30533
FEEDBACK
Enhancing performance of full-text retrieval systems using relevance feedback p 3532 N94-29806
Reinforcement learning for robots using neural networks p 3437 N94-29853
Integrated propulsion-airframe dynamics and control
p 3147 N94-29854
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128
FEEDBACK CONTROL
Integrated active and passive control design methodology for the LaRC CSI evolutionary model
[NASA-CR-4580] p 3164 N94-28417
Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
Feedback control of a three-link planar under-actuated manipulator using a surge velocity
[AD-A275159] p 3435 N94-29044
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels
[NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495
Control of micromachined deformable mirrors
p 3239 N94-29787
Decoupled flight control system design using the singular perturbation method p 3155 N94-29850
Integrated propulsion-airframe dynamics and control
p 3147 N94-29854
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Robust adaptive control and filtering
p 3437 N94-29895
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
A study of the flexible space platform based deployable manipulator
[ISBN-0-315-85410-3] p 3303 N94-30135
Force control techniques for robot manipulators and their military applications p 3307 N94-30291
The response of flexible manipulators to a new computed torque control strategy: Simulation results
p 3308 N94-30295
Dynamics and control of tethered satellite systems
p 3170 N94-30864
Local interaction control for space construction
p 3170 N94-30960
Robust control of robots via linear estimated state-feedback
[MEMO-1153] p 3449 N94-30963
FEEDFORWARD CONTROL
Non-intrusive gaze tracking using artificial neural networks
[AD-A275186] p 3397 N94-28860
Robotic hand-eye motor learning
p 3436 N94-29835
Vehicle following controller design for autonomous intelligent vehicles
[AIAA PAPER 94-1203-CP] p 3443 N94-30554
FEEDING (SUPPLYING)
Application of the Modular Automated Reconfigurable Assembly System (MARAS) concept to adaptable vision gauging and parts feeding
[AIAA PAPER 94-1182-CP] p 3440 N94-30533
FERMAT PRINCIPLE
Method of Chabauty-Coleman and the second case of Fermat's last theorem for regular primes
[PB94-138187] p 3467 N94-29162
FERMENTATION
One carbon metabolism in anaerobic bacteria: Regulation of carbon and electron flow during organic acid production
[DE94-004852] p 3386 N94-30180
Proceedings of the low cost materials of construction for biological processes workshop
[DE94-000218] p 3226 N94-30761
FERMIONS
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
Gluon and fermion damping in hot QCD
[ISBN-0-315-85982-2] p 3490 N94-30141
Incommensurate magnetic order in UNi2Al3
[DE94-005449] p 3209 N94-30246
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775
FERRITIC STAINLESS STEELS
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel
[PB94-138328] p 3319 N94-29121
FERROELECTRICITY
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
FERROMAGNETIC MATERIALS
Flux-focusing eddy current probe and method for flaw detection
[NASA-CASE-LAR-15046-1] p 3315 N94-29366

Magnetic properties of the three dimensional Ising model with interface single-ion anisotropy
[DE94-608116] p 3525 N94-30164

FERTILIZATION

Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619

FIBER COMPOSITES

Service life prediction of composite structures through fiber testing
[AD-A275661] p 3176 N94-28654
Innovative processing of composites for ultra-high temperature applications, book 1
[AD-A275597] p 3176 N94-28729
Polymer infiltration studies
[NASA-CR-195729] p 3213 N94-28748
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
3-D braided, continuous fiber ceramic composites produced by chemical vapor infiltration
[AD-A275192] p 3178 N94-29024
Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
Intelligent material systems and structures. Part 7: Debonding and pull-out of two optical fibers from two epoxies
[PB94-137767] p 3180 N94-29475
Apparatus for providing a uniform, consolidated, unidirectional, continuous, fiber-reinforced polymeric material and method relating thereto
[NASA-CASE-LAR-15173-1-CU] p 3180 N94-29496
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite
[NASA-CASE-LEW-15264-2] p 3180 N94-29508
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Interface engineering in alumina fiber/glass composites p 3182 N94-29852
Transient thermal fatigue of ceramic composites
p 3216 N94-29874
Failure strength and mechanism of composite laminates under multiaxial loading conditions p 3182 N94-29875
Micromechanical analysis of thermo-inelastic multiphase short-fiber composites
[NASA-CR-195290] p 3183 N94-30178
Delamination growth in composites under cyclic loads
p 3183 N94-30256
The machining of fiber metal laminates. Part 1: An inventory of forming processes
[LR-710-PT-1] p 3184 N94-30343
Effect of fiber coating on mechanical properties of Nicalon fibers and Nicalon-fiber/SiC matrix composites
[DE94-005477] p 3185 N94-30593
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956

FIBER OPTICS

Broadband EUV survey spectrometer for short-timescale experiments
[DE94-005459] p 3498 N94-28534
Preliminary analysis of Asynchronous Transfer Mode (ATM) over microwave channels
[AD-A275214] p 3243 N94-29069
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928
Microsecond fiber optic delay line
[DE94-607903] p 3500 N94-30075
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms
p 3502 N94-30462
Fiber optical solar simulator p 3341 N94-30486
Optical techniques for time and frequency transfer
p 3469 N94-30647

FIBER ORIENTATION

Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955

FIBER STRENGTH

Safety enhancement of composites via periodic proof testing
[AD-A275662] p 3176 N94-28655
Effect of fiber coating on mechanical properties of Nicalon fibers and Nicalon-fiber/SiC matrix composites
[DE94-005477] p 3185 N94-30593

FIBER VOLUME FRACTION

Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
Assessment of the fibre volume distribution around optical fibres
[FFA-TN-1993-12] p 3179 N94-29425

FIBERS

Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats
p 3387 N94-29866

FIELD EFFECT TRANSISTORS

Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Solid-state, active-phased arrays: Some aspects of receiver design
[AD-A275893] p 3527 N94-28779
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445

FIELD EMISSION

A sub-cm micromachined electron microscope
p 3236 N94-29775

FIELD STRENGTH

Formulae for the calculation of the magnetic field strength in a Helmholtz system with circular coils
[NPL-DES-130] p 3260 N94-30785
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

FIELD THEORY (ALGEBRA)

Is it possible to extend the deformed Weyl algebra W(sub q)(n) to a Hopf algebra?
[DE94-608092] p 3467 N94-30202

FIELD THEORY (PHYSICS)

Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
The (j,0) + (0,j) representation space: Majorna-like construct
[DE94-005010] p 3522 N94-28543
On the EKL-effect
[DE94-606325] p 3468 N94-28720
The Klein-Fock equation, minimal surfaces and gravitational fields
[DE94-606340] p 3356 N94-28803
Remarks on Galois symmetry in RCFT
[PB94-138179] p 3467 N94-29147
Trace formulas and dynamical zeta functions in the Nielsen theory
[PB94-138195] p 3467 N94-29163
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733
A pot-pourri of results in QCD from large lattice simulations on the CM5
[DE94-005084] p 3514 N94-29818
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Space-time symmetries: P and CP violation
[DE94-005012] p 3526 N94-30750

FIGHTER AIRCRAFT

Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947

FILAMENT WINDING

Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528

FILE MAINTENANCE (COMPUTERS)

Work-oriented development of interactive software tools: Understanding the work of software maintainers and making an interactive software tool for them
[PB94-132032] p 3406 N94-28401
I/O on the Tera file system
[AD-A275278] p 3530 N94-29182
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404

FILLERS

Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1-SB] p 3300 N94-29506
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557

FILM CONDENSATION

The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662

FILM THICKNESS

A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073
Effect of fiber coating on mechanical properties of Nicalon fibers and Nicalon-fiber/SiC matrix composites
[DE94-005477] p 3185 N94-30593

FILTRATION

Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463
Gas stream purifier p 3354 N94-30469

FINANCIAL MANAGEMENT

Business planning model user's guide
[AD-A274978] p 3409 N94-28895
Financial resource review model user's guide
[AD-A274979] p 3410 N94-29088

FINES

Preparation of monodispersed fine particles containing rare metals and rare earths p 3201 N94-29514
Bench-scale synthesis of nanoscale materials
p 3240 N94-30473

FINGERS

Deterioration of manual performance in cold and windy climates p 3381 N94-28434
Effect of food intake on skin vasomotor responses to head-up tilt in humans p 3390 N94-28854

FINISHES

The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522

FINITE DIFFERENCE THEORY

Numerical solution of the multichannel scattering problem
[DE94-606297] p 3484 N94-28619
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Large eddy simulation of subsonic mixing layers
p 3276 N94-29851
Unsteady transonic aerodynamics in frequency domain for flutter analysis p 3131 N94-29879
Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades
[NASA-CR-195786] p 3153 N94-30013
Accurate finite difference methods for time-harmonic wave propagation
[NASA-CR-194887] p 3454 N94-30209
Comparison of RCS prediction techniques, computations and measurements
[PB94-125515] p 3256 N94-30392
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972

FINITE ELEMENT METHOD

Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459
Numerical analysis and computation of nonlinear partial differential equations from applied mathematics
[AD-A275582] p 3451 N94-28723
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479

Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
Elevation control system model for the DSS 13 antenna p 3248 N94-29622
Aircraft system aft telescope cavity configuration study for Stratospheric Observatory for Infrared Astronomy (SOFIA), phase 2
[NASA-CR-194266] p 3147 N94-29685
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688
Analysis of pressureless densification of ceramic matrix composites p 3216 N94-29766
Performance of a higher-order triangular finite element for composite laminated structures p 3181 N94-29810
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Radiation and scattering from cylindrically conformal printed antennas
[NASA-CR-195546] p 3253 N94-29873
Rotorcraft airframe structural optimization for vibration and dynamic stress reduction including damping treatment p 3147 N94-29878
Computational simulation of composite structures with and without damage
[NASA-CR-194433] p 3183 N94-30190
Unstructured space-time finite element method of heat conduction p 3279 N94-30224
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258
Plane strain finite element analysis of sheet forming operations including bending effects p 3322 N94-30354
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade p 3282 N94-30816
Optimal size finite element meshes without obtuse and small angles
[RUU-CS-92-39] p 3462 N94-30860
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956

FINITE VOLUME METHOD
On the numerical analysis of shear flows p 3126 N94-28972
Numerical analysis of laminar flow in S-curved square duct with inlet and outlet straight region p 3128 N94-28987
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
High-resolution algorithms for the Navier-Stokes equations for generalized discretizations p 3278 N94-29965
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954

FINLAND
Application of high-speed milling to the Finnish manufacturing industry
[PB94-135548] p 3230 N94-29187

FINNED BODIES
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228

FINS
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228

FIRE EXTINGUISHERS
Aircraft evacuations: The effect of a cabin water spray system upon evacuation rates and behaviour
[CAA-PAPER-93008] p 3148 N94-29887

FIRE FIGHTING
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912

FIRE PREVENTION
Wire insulation degradation and flammability in low gravity p 3166 N94-28712

FIRES
Similarity solutions and numerical modeling in buoyancy controlled turbulent diffusion flames
[AD-A275820] p 3188 N94-28777
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Characterization of air emissions from the simulated open combustion of fiberglass materials
[PB94-136231] p 3347 N94-29192
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754
Impact of biomass burning on the atmosphere
[DE94-004333] p 3349 N94-29954

FISHES
Bulletin of National Research Institute of Fisheries Engineering, No. 13
[JTN-94-80596] p 3233 N94-29701
Reproduction in the Japanese anchovy (Engraulis japonica) as related to population fluctuation p 3235 N94-29708
Posture control of goldfishes under microgravity p 3387 N94-29712
Behavior and visual control of cyprinodonts under microgravity p 3387 N94-29713

FISHING
Bulletin of National Research Institute of Fisheries Engineering, No. 13
[JTN-94-80596] p 3233 N94-29701

FISSION
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183

FITTINGS
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206

FIXED POINTS (MATHEMATICS)
Reidemeister numbers of equivariant maps
[PB94-138286] p 3452 N94-29118

FIXTURES
A non-contacting vertical alignment system for mass properties measuring instruments
[DE94-004680] p 3289 N94-29927
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206

FLAME RETARDANTS
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Thermal protective performance and instrumented mannequin evaluation of multi-layer garment systems p 3381 N94-28433

FLAME STABILITY
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Lifted turbulent jet flames p 3198 N94-29676

FLAMEOUT
Optical flameout detector
[NASA-CASE-LAR-14997-1] p 3287 N94-29368

FLAMMABILITY
Thermal protective performance and instrumented mannequin evaluation of multi-layer garment systems p 3381 N94-28433
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
Wire insulation degradation and flammability in low gravity p 3166 N94-28712

FLAMMABLE GASES
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
Joint research activities with CCMRI (China) p 3240 N94-29521

FLANGES
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057

FLARED BODIES
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473

FLAT CONDUCTORS
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814

FLAT PLATES
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916

FLAVOR (PARTICLE PHYSICS)
Operator analysis for quark and lepton masses in SO(10)
[DE94-005201] p 3491 N94-30709
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719

FLEXIBILITY
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
High elongation elastomers p 3223 N94-30477

FLEXIBLE BODIES
Mechanical flexible joint design document
[NASA-CR-193941] p 3297 N94-28419
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532
Pulse response based minimum time control of flexible structures p 3436 N94-29720
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018
Position control of a flexible beam with active damping of vibrations
[ISBN-0-315-85841-9] p 3321 N94-30033
A study of the flexible space platform based deployable manipulator
[ISBN-0-315-85410-3] p 3303 N94-30135
Experimental sliding mode control of a flexible single link manipulator
[ISBN-0-315-85466-9] p 3304 N94-30238
The response of flexible manipulators to a new computed torque control strategy: Simulation results p 3308 N94-30295
Dynamic modeling of multibody flexible structures p 3323 N94-30813
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866

FLEXIBLE SPACECRAFT
Integrated active and passive control design methodology for the LaRC CSI evolutionary model
[NASA-CR-4580] p 3164 N94-28417
Development and validation of a linear recursive order-N algorithm for the simulation of flexible space manipulators dynamics
[AD-B173557] p 3311 N94-30391
Local interaction control for space construction p 3170 N94-30960

FLEXIBLE WINGS
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658

FLEXING
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

FLICKER
Accuracy metrics for judging time scale algorithms p 3471 N94-30656

FLIGHT CLOTHING
Advanced integrated cold protection for aircrew p 3381 N94-28436
Emergency underwater breathing aids for helicopter passengers and crew p 3381 N94-28437
Implications of climatic extremes in aircrew NBC operations p 3383 N94-28446
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766

FLIGHT CONDITIONS
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions
[PB94-142106] p 3136 N94-30890

FLIGHT CONTROL
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887
Exploring QDES as a tool for determining limits of achievable performance in aircraft design
[AD-A275359] p 3146 N94-28998
Flight command software development: RAFALE studies p 3413 N94-29320
On ground system integration and testing: A modern approach p 3150 N94-29334
Decoupled flight control system design using the singular perturbation method p 3155 N94-29850
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204

FLIGHT CREWS
Effect of seasickness on aircrew student survivor ability after ditching in cold water p 3379 N94-28425
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report
p 3381 N94-28435
Implications of climatic extremes in aircrew NBC operations p 3383 N94-28446
Alleviation of thermal strain in the CF: Keeping our cool during the Gulf conflict p 3383 N94-28449
Experimental evaluation of two systems of individual air-conditioning p 3384 N94-28450
An evaluation of personality testing and the five-factor model in the selection of landing craft air cushion vehicle crew members
[AD-A275869] p 3397 N94-28754
Aviation epidemiology data register: Age distribution of U.S. Army aviators stratified by gender and component of service
[AD-A275901] p 3388 N94-28757
Disturbance of equilibrium on JAL flight crew
p 3390 N94-28856
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996

FLIGHT ENVELOPES
Integrated propulsion-airframe dynamics and control
p 3147 N94-29854

FLIGHT HAZARDS
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161

FLIGHT MANAGEMENT SYSTEMS
Machine Intelligence in Air Traffic Management
[AGARD-CP-538] p 3136 N94-29558
Advances in development capabilities for intelligent air traffic management systems p 3137 N94-29559
Intelligent systems for air space control and management p 3137 N94-29560
Use of advanced technologies in ATM (air traffic management) domain p 3137 N94-29561
Air traffic management as principled negotiation between intelligent agents p 3137 N94-29562
GPS/GNSS for ATM p 3138 N94-29565
Contributions of DLR to air traffic capacity enhancement within a terminal area p 3138 N94-29567
Design of Center-TRACON Automation System
p 3138 N94-29568
Advanced air traffic control and flight management system concepts p 3140 N94-29576
Opportunities for integrating the aircraft FMS, aeronautical operational control centers, and future air traffic management systems in oceanic airspace
p 3140 N94-29577
Profile negotiation: An air/ground automation integration concept for managing arrival traffic
p 3140 N94-29578
Air-ground integration of the ATM system in PHARE
p 3141 N94-29579
Experimental flight management system
p 3141 N94-29580
The PHARE advanced tools p 3141 N94-29581
The experimental flight management system: An air traffic management research tool
[NLR-TP-92253-U] p 3143 N94-30943

FLIGHT PATHS
An efficient algorithm for 3D connect-the-dots
[AD-A275431] p 3409 N94-28866
Decision Making Aids (DMA) in on-line ATC systems
p 3139 N94-29570
Advanced air traffic control and flight management system concepts p 3140 N94-29576
Profile negotiation: An air/ground automation integration concept for managing arrival traffic
p 3140 N94-29578
Air-ground integration of the ATM system in PHARE
p 3141 N94-29579
The PHARE advanced tools p 3141 N94-29581
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
A stochastic control approach to flight path monitoring
[AD-B174630] p 3143 N94-30853

FLIGHT PLANS
ACCS Surveillance Exploratory Prototype (ASEP)
p 3138 N94-29566
Opportunities for integrating the aircraft FMS, aeronautical operational control centers, and future air traffic management systems in oceanic airspace
p 3140 N94-29577
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439

FLIGHT SAFETY
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799
Integrated formal verification and validation of safety critical software p 3416 N94-29338
Aircraft accident/incident summary report: In-flight loss of control, leading to forced landing and runway overrun, Continental Express, Inc., N24706 Embraer EMB-120 RT, Pine Bluff, Arkansas, 29 April 1993
[PB94-910404] p 3135 N94-29402
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
Interactive analysis and planning tools for air traffic and airspace management p 3139 N94-29573
DAISY: A decision aid for an air situation interpretation system p 3139 N94-29574
Development of precision runway monitor system for increasing capacity of parallel runway operations
p 3142 N94-29587
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847

FLIGHT SIMULATION
Modification of ACSYNT aircraft computer program for preliminary design
[NASA-CR-195737] p 3145 N94-28817
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Physiological Anatomical Rodent Experiment (PARE) .04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968
Flight simulator evaluation of advanced MLS procedures
[AD-B174270] p 3143 N94-30915

FLIGHT SIMULATORS
Six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-1] p 3288 N94-29726

FLIGHT TESTS
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Testing Operational Flight Programs (OFPs)
p 3415 N94-29337
Microgravity by parabolic flight with MU-300 aircraft
p 3392 N94-29710

FLOATING
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824

FLOATING POINT ARITHMETIC
Numerical precision and roundoff considerations concerning computer code migration
[DE94-005421] p 3427 N94-30590

FLOCCULATING
Dewatering of contaminated river sediments
p 3354 N94-30472

FLOW CHARACTERISTICS
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Recent CFD applications in small gas turbine combustion systems development p 3154 N94-29257
An experimental study of wing tip vortex in the near wake of a rectangular wing
[AD-A275389] p 3129 N94-29306
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228

FLOW DISTRIBUTION
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments
[NASA-TM-106532] p 3271 N94-28835
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2
p 3125 N94-28966
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel
p 3126 N94-28967
Numerical analysis of incompressible viscous flow around a bubble p 3126 N94-28968
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985
Numerical analysis of laminar flow in S-curved square duct with inlet and outlet straight region
p 3128 N94-28987
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall
[AD-A275416] p 3129 N94-29197
Flowfield prediction of NO(x) and smoke production in aircraft engines p 3191 N94-29252
Numerical modelling of turbine combustion chambers
p 3154 N94-29254
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures
p 3194 N94-29271
The influence of air distribution on homogeneity and pollutant formation in the primary zone of a tubular combustor p 3194 N94-29274
Time-resolved measurements in a three dimensional model combustor p 3196 N94-29283
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars?
[MATHS-REPT-A-198] p 3333 N94-29528
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
p 3130 N94-29674
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight
p 3131 N94-29826
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator
p 3277 N94-29899
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973
The 3-D LDV measurements on a 30-degree swept wing with a simulated ice accretion
[NASA-CR-195327] p 3132 N94-30124
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations
[PB94-125598] p 3133 N94-30387
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
Expanding the waverider design space using arbitrary generating flowfields p 3148 N94-30516
In-cylinder gas velocity measurements comparing crankcase and blower scavenging in a fired two-stroke cycle engine
[DE94-005752] p 3311 N94-30596
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
Evaluation of flip-flop jet nozzles for use as practical excitation devices
[NASA-TM-106377] p 3135 N94-30949
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955

FLOW EQUATIONS
On the linear stability of Verkley's modons
p 3324 N94-28695
Advanced Design of Ventilation Systems
[VKI-LS-1993-07] p 3231 N94-29598
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations
[PB94-125598] p 3133 N94-30387
Euler results of the ISNaS compressible multi-block flow solver
[AD-B179299] p 3281 N94-30756

FLOW MEASUREMENT
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404

Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Improved in-flow acoustic sensor
[NASA-CASE-ARC-12001-1] p 3478 N94-29363
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3288 N94-29484
Development of a simple current meter using solution p 3233 N94-29702
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788

FLOW STABILITY
On the linear stability of Verkley's modons p 3324 N94-28695
Structure of neutrally stratified turbulent Ekman layer as predicted by closure models with prognostic equation for master length scale p 3325 N94-28696
Long-wavelength asymptotics of unstable crossflow modes, including the effect of surface curvature
[NASA-CR-4579] p 3273 N94-29460
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705
The dynamics of tropical intraseasonal variability p 3371 N94-29741
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet p 3278 N94-29976
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958

FLOW VELOCITY
Development of laser velocimetry for the measurements of turbulence intensity and flow velocity ahead of a NGV row in a full-stage rotating turbine
[AD-A275712] p 3270 N94-28692
Qualitative vector optimization of a condensate stabilizer process
[PB94-133246] p 3189 N94-28789
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Remote control of transcranial Doppler (TCD) probe during centrifuge exposures up to 9 +Gz
[AD-A275253] p 3400 N94-29029
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
Development of a simple current meter using solution p 3233 N94-29702
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
The effect of a wavy boundary on turbulent flow p 3280 N94-30272
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399
In-cylinder gas velocity measurements comparing crankcase and blower scavenging in a fired two-stroke cycle engine
[DE94-005752] p 3311 N94-30596
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791

FLOW VISUALIZATION
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466
A flow visualization study of acoustically enhanced hairpin vortices
[AD-A275467] p 3271 N94-28809
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
The flow field near the body surface with thin filaments p 3234 N94-29706
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes p 3155 N94-29728
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945

FLOWMETERS
Development of a simple current meter using solution p 3233 N94-29702

FLUE GASES
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407

FLUENCE
Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit
[NPL-RSA(EXT)-46] p 3492 N94-30795

FLUID DYNAMICS
Fluid and transportation phenomena under microgravity p 3227 N94-28939
The motion of deforming bodies
[AD-A275224] p 3271 N94-29061
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494

FLUID FILTERS
Gas stream purifier p 3354 N94-30469

FLUID FLOW
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Computational fluid and combustion dynamics
[DE94-006596] p 3279 N94-30003
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494
Information system for flow simulation based on the Navier-Stokes equations vectorization
[AD-B179293] p 3281 N94-30763

FLUID JETS
Liquid atomization in supersonic flows p 3276 N94-29839

FLUID MANAGEMENT
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904
Microgravity fluid science research in Europe
[AD-B179178] p 3229 N94-30409

FLUID MECHANICS
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Microgravity fluid science research in Europe
[AD-B179178] p 3229 N94-30409

FLUID PRESSURE
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29365

FLUID-SOLID INTERACTIONS
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
A numerical method for confined unsteady flows related to fluid-structure interactions
[ISBN-0-315-74739-0] p 3277 N94-29902
Theoretical studies of solid-fluid phase equilibria
[DE94-006406] p 3226 N94-30708

FLUIDIZED BED PROCESSORS
Application of the extended Kalman filter to the estimation of the char mass in a fluidized bed combustor
[REPT-93-065] p 3200 N94-30938

FLUORESCENCE
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599

FLUORIDES
Formation and chemical reactivity of carbon fibers prepared by defluorination of graphite fluoride
[NASA-TM-106398] p 3174 N94-28747
Graphite intercalation compounds prepared from graphite fluoride
[NASA-TM-106447] p 3174 N94-28924

FLUORINE
Reinterpretation of rate data for the reaction of ClF and F2
[DE94-005819] p 3200 N94-30880

FLUORINE COMPOUNDS
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245

FLUORINE ORGANIC COMPOUNDS
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177

FLUORO COMPOUNDS
Polyimides containing the penta fluoro sulfanyl benzene moiety
[NASA-CASE-LAR-15082-1] p 3175 N94-29554

FLUTTER ANALYSIS
Unsteady transonic aerodynamics in frequency domain for flutter analysis p 3131 N94-29879
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
Prospects of time-linearized unsteady calculation methods for exponentially diverging motions in aeroelasticity
[PB94-126224] p 3134 N94-30740

FLUX DENSITY
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404

FLUX PINNING
New evidence for flux cutting in type II superconductors
[ISBN-0-315-85830-3] p 3515 N94-30032

FLYBY MISSIONS
Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623
The Pluto fast flyby mission: Completing the reconnaissance of the solar system p 3235 N94-29768

FOAMS
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483

FOCAL PLANE DEVICES
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems
[AD-A275745] p 3511 N94-28734
Monolithic in-based III-V compound semiconductor focal plane array cell with single stage CCD output
[NASA-CASE-NPO-18978-1-CU] p 3265 N94-29488
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781

FOCUSING
Radiation transport and focusing systems for power industrial lasers
[DE94-606817] p 3293 N94-28786
An Earth observation telescope refocusing mechanism
[REPT-932-440-103] p 3332 N94-29417
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780

FOG
Multispectral transmittance measurements through man-made water fogs p 3257 N94-30499

FOKKER-PLANCK EQUATION
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045

FOLDING STRUCTURES
Low melting temperature alloy deployment mechanism and recent experiments p 3163 N94-29644

FOOD
Evaluation of life support equipment during an unsupported North Pole expedition p 3379 N94-28422

FOOD PROCESSING
Evaluation of life support equipment during an unsupported North Pole expedition
p 3379 N94-28422
FOOD PRODUCTION (IN SPACE)
Publications of the NASA Controlled Ecological Life Support System (CELSS) program 1989-1992
[NASA-CR-4603] p 3401 N94-30122
FORCE-FREE MAGNETIC FIELDS
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723
FORCED VIBRATION
Turbomachinery forced response prediction system (FREPS): User's manual
[NASA-CR-194465] p 3319 N94-29104
FORECASTING
Research activities of Martin C. Casdagli at SFI September 1989--May 1991
[DE94-005655] p 3463 N94-28548
FOREST MANAGEMENT
Utilization of remote sensing data in Southeast Asia
p 3327 N94-28936
Tohoku district observed by artificial satellites
p 3328 N94-29041
FAME: A Forest Assessment and Monitoring Environment scenario
[AD-B179106] p 3335 N94-30759
FORESTS
Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior
[PB94-137809] p 3347 N94-29158
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
The extraction and representation of forest inventory information using continuous density surfaces
[ISBN-0-315-85658-0] p 3334 N94-30236
A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling
p 3351 N94-30628
Evaluating models of climate and forest vegetation
p 3353 N94-30637
Atmospheric turbulence within and above a coniferous forest
[ISBN-0-315-75468-0] p 3375 N94-30870
FORMALISM
Operation semantics with read and write frames
[PB94-138138] p 3529 N94-29108
Invariants, frames and postconditions: A comparison of two formal specification notations
[PB94-138153] p 3405 N94-29110
Flight command software development: RAFALE studies p 3413 N94-29320
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352
Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
FORMAT
Object-oriented CAD tool implementations for the construction industry
[PB94-132370] p 3407 N94-28411
FORMING TECHNIQUES
Apparatus for providing a uniform, consolidated, unidirectional, continuous, fiber-reinforced polymeric material and method relating thereto
[NASA-CASE-LAR-15173-1-CU] p 3180 N94-29496
Plane strain finite element analysis of sheet forming operations including bending effects
p 3322 N94-30354
FORTRAN
Comparing Ada and FORTRAN lines of code: Some experimental results
[AD-A275322] p 3409 N94-28878
Parallel Fortran programming for NWT
p 3129 N94-28991
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
FOSSIL FUELS
Development of the integrated environmental control model: Performance models of selective catalytic reduction NO(x) control systems
[DE94-002151] p 3341 N94-28465
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Fossil energy biotechnology: A research needs assessment
[DE94-004239] p 3338 N94-29953
FOUR-WAVE MIXING
Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface
p 3479 N94-29988
FOURIER TRANSFORMATION
JPL Fourier transform ultraviolet spectrometer
p 3343 N94-28593
Temperature depencence of the far infrared optical constants of polyethylene
[PB94-124336] p 3213 N94-28795
A new guided wave lens structure and its application
[AD-A275541] p 3499 N94-28813
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry
[DE94-006208] p 3207 N94-30024
Meso-optical Fourier transform microscope with double focusing
[DE94-607851] p 3290 N94-30148
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455
FRACTALS
A fractal analysis of near-field atmospheric concentration data
[AD-A275460] p 3355 N94-28728
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958
Fractal approach to computer-analytical modelling of tree crown
[DE94-608089] p 3467 N94-30088
FRACTOGRAPHY
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914
FRACTURE MECHANICS
Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperatures under tension-tension loading
[AD-A275466] p 3176 N94-28673
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811
Role of microstructure on the fatigue durability of aluminum aircraft alloys
[AD-A275814] p 3202 N94-28830
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel
[PB94-138328] p 3319 N94-29121
Effect of microstructure on the strength and fracture energy of bimaterial interfaces
[AD-A274987] p 3178 N94-29126
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814
Material properties and fracture mechanics in relation to ceramic machining
[DE94-006623] p 3221 N94-30829
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947
FRACTURE STRENGTH
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Effects of repair on structural integrity
[AD-A275756] p 3145 N94-28647
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
Effect of microstructure on the strength and fracture energy of bimaterial interfaces
[AD-A274987] p 3178 N94-29126
The effect of mechanical paint stripping on the fatigue and fracture of thin aluminum airplane skin
p 3205 N94-29900
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel
p 3364 N94-29983
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227
A review of mechanical test methods for ceramic matrix composites
[PB94-147576] p 3184 N94-30524
FRACTURES (MATERIALS)
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
FRACTURING
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Fracture process zone of brittle composites
p 3182 N94-29876
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Time-resolved holography for the microscopic study of crack-tip motion in dynamic fracture
p 3290 N94-30254
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689
FREDHOLM EQUATIONS
Procedures for basic inverse problems: Black body radiation problem and phonon density of states problem
[ISBN-0-315-85757-9] p 3525 N94-30244
FREE CONVECTION
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612
FREE ELECTRON LASERS
Linac Coherent Light Source (LCLS) at 2-4 nm using the SLAC linac
[DE94-005235] p 3292 N94-28481
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934
Towards short wavelengths FELs workshop
[DE94-004346] p 3296 N94-30688
FREE ELECTRONS
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980
FREE ENERGY
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene
[NASA-TM-106460] p 3213 N94-28922
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903
FREE FLOW
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
FREE JETS
The nozzle acoustic test rig: An acoustic and aerodynamic free-jet facility
[NASA-TM-106495] p 3156 N94-28749
FREE VIBRATION
Free vibration of thermally loaded panels including initial imperfections and post-buckling effects
[NASA-TM-109097] p 3479 N94-29461
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257

FREEZE DRYING
Evaluation of life support equipment during an unsupported North Pole expedition p 3379 N94-28422

FREQUENCIES
An absolute measurement of the cosmic background radiation temperature at 1.4 GHz p 3553 N94-30351
Status of frequency and time support for NASA systems p 3468 N94-30640

FREQUENCY ANALYZERS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400

FREQUENCY MODULATION
Longitudinal effects and intensity-phase coupling in distributed feedback semiconductor lasers p 3294 N94-29590

FREQUENCY RANGES
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115
Measurement of bulk longitudinal modulus and correction for edge effects
[DE94-005581] p 3222 N94-30900

FREQUENCY RESPONSE
Identification of the damping ratio relationship of an autovehicle suspension
[REPT-93-063] p 3313 N94-30937

FREQUENCY SHIFT
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation p 3188 N94-28681
Inter-comparison of Wildfire and High-resolution Interferometer Sounder (HIS) data from STORM-FEST: An investigation of wildfire spectral channel discrepancies
[NASA-TM-108439] p 3333 N94-29553

FREQUENCY STABILITY
Accuracy metrics for judging time scale algorithms p 3471 N94-30656
Precision frequency synthesizing sources with excellent time/frequency performances p 3473 N94-30671
Measurement of the frequency stability of responders in aircraft p 3261 N94-30673
Ground control system for the midcourse space experiment UTC clock p 3474 N94-30674

FREQUENCY STANDARDS
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Time and frequency technology at NIST p 3468 N94-30641
European PTTI report p 3468 N94-30642
Report on NATO PTTI p 3469 N94-30645
Optical techniques for time and frequency transfer p 3469 N94-30647
Cesium and rubidium frequency standards status and performance on the GPS program p 3145 N94-30663
Hydrogen masers and cesium fountains at NRC p 3297 N94-30664
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670
Measurement of the frequency stability of responders in aircraft p 3261 N94-30673
Russian national time scale long-term stability p 3475 N94-30679
A look into the crystal ball: The next 25 years p 3475 N94-30681
Frequency standards from government laboratories over the next 25 years p 3475 N94-30682
Frequency standards from industry over the next 25 years p 3475 N94-30683
The future of time and frequency dissemination p 3476 N94-30684

FREQUENCY SYNTHESIZERS
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Precision frequency synthesizing sources with excellent time/frequency performances p 3473 N94-30671

FRESH WATER
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment
[AD-A275215] p 3357 N94-29070

FRESNEL LENSES
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999

FRICTION
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Lock-up failure of a four-bar linkage deployment mechanism p 3163 N94-29646
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996

FRICTION FACTOR
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
Plane strain finite element analysis of sheet forming operations including bending effects p 3322 N94-30354

FRICTION MEASUREMENT
Atomic-scale friction measurements using friction force microscopy. Part 2: Application to magnetic media
[AD-A275202] p 3298 N94-29290
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538

FRONTS (METEOROLOGY)
US National Weather experiment STORM-FEST: Waves and turbulence in frontal zones
[AD-A275084] p 3369 N94-28847
Modeling studies of frontogenesis in the upper and middle troposphere p 3375 N94-30868

FROST
Toward a molecular scale understanding of frost heaving, phase 1
[AD-A275446] p 3356 N94-28882
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017

FUEL CELL POWER PLANTS
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798
Fundamental stack and system issues in molten carbonate fuel cell development
[DE94-005960] p 3338 N94-30048
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313

FUEL CELLS
Fuel Cell Seminar, 1992: Program and abstracts
[DE94-003882] p 3336 N94-28472
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Fundamental stack and system issues in molten carbonate fuel cell development
[DE94-005960] p 3338 N94-30048
Electrochemical Power Source (EPS) selection for Energetically Independent Robots (EIR): A systematic approach p 3269 N94-30312
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313

FUEL COMBUSTION
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Combustion studies under microgravity p 3228 N94-28940
Fuels combustion research
[AD-A275122] p 3189 N94-29004
Fuels and Combustion Technology for Advanced Aircraft Engines
[AGARD-CP-536] p 3189 N94-29246
Combustion technology needs for advanced high pressure cycle engines p 3190 N94-29248
Studies of lean blowout in a research combustor p 3193 N94-29266
Computational and experimental results in high pressure combustions of H2/air and H2/O2/H2O p 3193 N94-29268
Ducted kerosene spray flames p 3195 N94-29276
Spray combustion experiments and numerical predictions p 3195 N94-29277
Time-resolved measurements in a three dimensional model combustor p 3196 N94-29283
Temperature and combustion analysis of combustor with acoustically controlled primary zone air-jet mixing p 3196 N94-29284
Endothermic fuels for hypersonic aviation p 3197 N94-29285
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets p 3151 N94-29294
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409
Lifted turbulent jet flames p 3198 N94-29676
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860
Corrosion performance of materials for advanced combustion systems
[DE94-006726] p 3207 N94-30057

FUEL CONSUMPTION
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
Optimal low-thrust, Earth-Moon trajectories p 3159 N94-30961

FUEL CONTROL
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273

FUEL FLOW
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
The effect of incomplete fuel-air mixing on the lean limit and emissions characteristics of a Lean Prevaporized Premixed (LPP) combustor p 3193 N94-29265
Evaluation of the transient operation of advanced gas turbine combustors p 3154 N94-29269

FUEL INJECTION
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
Design aspects in small aircraft gas turbine fuel injectors p 3154 N94-29264
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
Ducted kerosene spray flames p 3195 N94-29276
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Investigation of the two-phase flow in a research combustor under reacting and non-reacting conditions p 3196 N94-29282
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29365
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230

FUEL PRODUCTION
Biodiesel from aquatic species
[DE94-000275] p 3225 N94-30038

FUEL PUMPS
Method of reducing hydraulic instability
[NASA-CASE-LEW-15463-1] p 3273 N94-29539

FUEL SPRAYS
Ducted kerosene spray flames p 3195 N94-29276
Spray combustion experiments and numerical predictions p 3195 N94-29277
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280

FUEL SYSTEMS
High temperature fuel requirements and payoffs p 3192 N94-29259
Research and development of high thermal stability fuels p 3192 N94-29261
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future p 3194 N94-29272

FULLERENES
Production of fullerenes with concentrated solar flux
[DE94-000266] p 3514 N94-29801
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

FUNCTION SPACE
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430

FUNCTIONAL ANALYSIS
Engineering of systems for application of scientific computing in industry p 3123 N94-28947

FUNCTIONAL DESIGN SPECIFICATIONS
Engineering of systems for application of scientific computing in industry p 3123 N94-28947
How to control the increase in the complexity of civil aircraft on-board systems p 3150 N94-29316

Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions
[JTN-94-80544] p 3170 N94-30932

FUNCTIONS (MATHEMATICS)
Remarks on the theory of semi-functors
[ML-93-08] p 3457 N94-30384
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406
Comparing curried and uncurried rewriting
[CWI-CS-R9350] p 3425 N94-30415

FUNGI
Barley cell culture as a producer of heterologous protein
[PB94-132339] p 3379 N94-28408
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189

FUSELAGES
Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight
p 3131 N94-29826

FUSION REACTORS
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology
[DE94-002642] p 3497 N94-30825
Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830

FUSION WELDING
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557

FUZZY SETS
Propagation of evidence through fuzzy rules
[AD-A275071] p 3411 N94-29180
Situational reaction and planning
[AIAA PAPER 94-1206-CP] p 3444 N94-30557
Fuzzy-algebra uncertainty analysis for abnormal-environment safety assessment
[DE94-006257] p 3462 N94-30849
ELF: Learning incomplete fuzzy rule sets for an autonomous robot
[REPT-93-043] p 3449 N94-30923

FUZZY SYSTEMS
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
Propagation of evidence through fuzzy rules
[AD-A275071] p 3411 N94-29180
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
[NASA-TM-109105] p 3157 N94-30200
A fuzzy logic controller for hormone administration using an implantable pump p 3397 N94-30459
Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Situational reaction and planning
[AIAA PAPER 94-1206-CP] p 3444 N94-30557
Some methodological issues about designing autonomous agents which learn their behaviors: The ELF experience
[REPT-93-068] p 3449 N94-30939

G

GALACTIC CLUSTERS
Numerical simulations of cluster cooling flows
p 3544 N94-29725
The angular two-point correlation function of galaxies down to 25th mag p 3547 N94-30010
Optical depth effects in cluster cooling flows
p 3541 N94-30800
Substructure, dynamics and evolution in clusters of galaxies p 3548 N94-30951

GALACTIC EVOLUTION
The angular two-point correlation function of galaxies down to 25th mag p 3547 N94-30010
Energetic events in the early universe
p 3547 N94-30012
Multicolor photometry of barred spiral galaxies
p 3541 N94-30270
Substructure, dynamics and evolution in clusters of galaxies p 3548 N94-30951

GALACTIC RADIATION
Correlation analysis on optical and radio light curves for a large sample of active galactic nuclei
p 3546 N94-29992
The effects of relativistic neutrons on nonthermal models of active galactic nuclei p 3547 N94-29993
Energetic events in the early universe
p 3547 N94-30012

GALACTIC STRUCTURE
Substructure, dynamics and evolution in clusters of galaxies p 3548 N94-30951

GALAXIES
Numerical simulations of cluster cooling flows
p 3544 N94-29725

GALERKIN METHOD
Theoretical study of the incompressible Navier-Stokes equations by the least-squares method
[NASA-TM-106535] p 3272 N94-29096
Unstructured space-time finite element method of heat conduction p 3279 N94-30224
Dynamics and control of tethered satellite systems
p 3170 N94-30864

GALILEO PROJECT
Optimizing the Galileo space communication link
p 3250 N94-29663
Decoder synchronization for deep space missions
p 3250 N94-29664

GALILEO SPACECRAFT
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621
A comparison of full-spectrum and complex-symbol combining techniques for the Galileo S-band mission
p 3250 N94-29665

GALLIUM ARSENIDES
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Response of GaAs charge storage devices to transient ionizing radiation
[DE94-005273] p 3510 N94-28484
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3262 N94-28687
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems
[AD-A275745] p 3511 N94-28734
Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805
High resistivity buffer layers by oxygen doping
[AD-A274986] p 3513 N94-29125
Quantum interference phenomena and novel switching in split gate high electron mobility transistors
p 3266 N94-29734
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Band structure of superlattice with (delta)-like potential
[DE94-608108] p 3516 N94-30072
Ampoule failure sensor time response testing: Experiment 1
[NASA-TM-108449] p 3290 N94-30199
Photoelectronic study of GaAs epilayers and In(x)Ga(1-x)As/GaAs quantum wells
[ISBN-0-315-85756-0] p 3518 N94-30239
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
Ion damage studies in GaAs/Al(0.6)Ga(0.4)As/GaAs heterostructures
[DE94-005384] p 3521 N94-30894

GALLIUM ISOTOPES
Recent results from SAGE
[DE94-006229] p 3551 N94-30845

GALLIUM NITRIDES
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871

GALLIUM PHOSPHIDES
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide
[AD-A275019] p 3513 N94-29130

GAME THEORY
Markov chains for random urinalysis 3: Daily model and drug kinetics
[AD-A275540] p 3389 N94-28797
Set games
[MEMO-1148] p 3466 N94-30737

GAMMA RAY ASTRONOMY
A study of ultra high-energy radiation associated with Hercules X-1 p 3552 N94-29823

GAMMA RAY BURSTS
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248

GAMMA RAY SPECTRA
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Study of activation data of metal samples from LDEF-1 and Spacelab-2
[NASA-CR-195802] p 3205 N94-29736
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248

GAMMA RAY SPECTROMETERS
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Miniaturization in x ray and gamma ray spectroscopy
p 3236 N94-29773

GAMMA RAYS
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695
Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit
[NPL-RSA(EXT)-46] p 3492 N94-30795

GAPS
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528

GARMENTS
Thermal protective performance and instrumented mannequin evaluation of multi-layer garment systems
p 3381 N94-28433
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766

GAS ANALYSIS
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599
Properties of adsorbents for collection and analysis of trace amount of chlorofluorocarbons in air
p 3188 N94-28680
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047

GAS BAGS
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477

GAS CHROMATOGRAPHY
Properties of adsorbents for collection and analysis of trace amount of chlorofluorocarbons in air
p 3188 N94-28680

GAS COMPOSITION
Evaluating models of climate and forest vegetation
p 3353 N94-30837

GAS DENSITY
Transport properties of epitaxial lift off films
[NASA-TM-106156] p 3264 N94-29209

Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Stellar and gas dynamics of interacting ring galaxies p 3548 N94-30340

GAS DETECTORS
The development and evaluation of a tunable diode laser trace gas sensor for the measurement of N2O and CH4 fluxes using micrometeorological techniques
[ISBN-0-315-78975-1] p 3296 N94-30801

GAS DISSOCIATION
Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton
[NASA-CR-195727] p 3549 N94-28816
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675

GAS DYNAMICS
Low energy ion-molecule reactions and chemiionization kinetics
[DE94-005414] p 3481 N94-28491
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203
Stellar and gas dynamics of interacting ring galaxies p 3548 N94-30340

GAS EXCHANGE
Ocean-atmospheric linkages p 3350 N94-30623

GAS EXPANSION
Tropospheric HO determination by FAGE p 3342 N94-28590

GAS FLOW
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms p 3502 N94-30462

GAS GENERATORS
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets p 3151 N94-29294

GAS INJECTION
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
The mixing process in the quenching zone of the rich-lean-combustion concept p 3196 N94-29281

GAS IONIZATION
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry
[DE94-006208] p 3207 N94-30024

GAS LASERS
Reactor-pumped laser experimental results
[DE94-005247] p 3292 N94-28482

GAS LUBRICANTS
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922

GAS MIXTURES
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

GAS PRESSURE
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819

GAS STREAMS
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms p 3502 N94-30462
Gas stream purifier p 3354 N94-30469
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487

GAS TRANSPORT
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials
[DE94-005072] p 3226 N94-30615

GAS TURBINE ENGINES
Combustion technology needs for advanced high pressure cycle engines p 3190 N94-29248
High temperature fuel requirements and payoffs p 3192 N94-29259
Design aspects in small aircraft gas turbine fuel injectors p 3154 N94-29264
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future p 3194 N94-29272
The influence of air distribution on homogeneity and pollutant formation in the primary zone of a tubular combustor p 3194 N94-29274
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860
Use of magnetic compression to support turbine engine rotors p 3314 N94-30484

GAS TURBINES
Advanced gas turbine systems research
[DE94-005303] p 3297 N94-28485
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Impact study on the use of biomass-derived fuels in gas turbines for power generation
[DE94-000261] p 3224 N94-28502
Numerical modelling of turbine combustion chambers p 3154 N94-29254
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries p 3154 N94-29255
Application of CFD in combustor design technology p 3154 N94-29256
Recent CFD applications in small gas turbine combustion systems development p 3154 N94-29257
Studies of lean blowout in a research combustor p 3193 N94-29266
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Computational and experimental results in high pressure combustions of H2/air and H2/O2/H2O p 3193 N94-29268
Evaluation of the transient operation of advanced gas turbine combustors p 3154 N94-29269
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313

GAS-LIQUID INTERACTIONS
Liquid atomization in supersonic flows p 3276 N94-29839
Numerical simulation and prediction of implosion phenomena
[GKSS-92/E/99] p 3284 N94-30968

GAS-SOLID INTERACTIONS
The effects of molecular orientation geometry and surface anisotropy upon etching
[AD-A275154] p 3486 N94-29032
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378

GASEOUS DIFFUSION
Ocean-atmospheric linkages p 3350 N94-30623

GASEOUS ROCKET PROPELLANTS
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848

GASIFICATION
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
The direct observation of alkali vapor species in biomass combustion and gasification
[DE94-000262] p 3339 N94-30606

GASOHOL (FUEL)
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818

GASOLINE
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818

GATES (CIRCUITS)
Realization of function logics by means of transmission gate
[REPT-93-061] p 3429 N94-30936

GAUGE INVARIANCE
The proper field of charges and gauge-invariant variables in electrodynamics
[DE94-606405] p 3523 N94-28751
Twistor-like type 2 superstring and bosonic string
[DE94-606339] p 3523 N94-28802
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Space-time symmetries: P and CP violation
[DE94-005012] p 3526 N94-30750

GAUGE THEORY
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
Gluon and fermion damping in hot QCD
[ISBN-0-315-85982-2] p 3490 N94-30141
Curved-space quantization, and Dirac versus reduced quantization of Poincare gauge theories
[ISBN-0-315-85990-3] p 3525 N94-30142
Glueball and meson dispersion and diffusion relations in compact U(1)(2+1) gauge theory
[ISBN-0-315-85577-0] p 3490 N94-30234
Problems in particle theory
[DE94-003665] p 3491 N94-30685
Research in elementary particle physics
[DE94-001657] p 3491 N94-30762

GEAR TEETH
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996
Generation of gear tooth surfaces by application of CNC machines
[NASA-CR-195306] p 3303 N94-30205

GEARS
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996
Generation of gear tooth surfaces by application of CNC machines
[NASA-CR-195306] p 3303 N94-30205
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227

GELS
Low dielectric polyimide fibers
[NASA-CASE-LAR-14526-1] p 3214 N94-29359

GENERAL AVIATION AIRCRAFT
National Transportation Safety Board annual review of aircraft accident data. US general aviation, 1990
[PB94-126869] p 3135 N94-29185

GENERAL OVERVIEWS
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects p 3326 N94-28926
Review of sonic fatigue technology
[NASA-CR-4587] p 3479 N94-29407
The evolution of information management
[DE94-004173] p 3535 N94-30179
A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling p 3351 N94-30628

GENES
Role of x ray-induced transcripts in adaptive responses following x rays
[DE94-005412] p 3386 N94-30895

GENETIC ALGORITHMS
Using multiple searchers to locate a randomly moving target
[AD-A275602] p 3463 N94-28768
Partial support for the Second International Symposium on Artificial Intelligence and Mathematics
[AD-A275199] p 3434 N94-29026
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527
Genetic algorithms at UC Davis/LLNL
[DE94-006625] p 3421 N94-30117
Genetic algorithms for optimal database design
[TR-93-01] p 3535 N94-30330

GENETIC CODE
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156

GENETIC ENGINEERING
Barley cell culture as a producer of heterologous protein
[PB94-132339] p 3379 N94-28408
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156

GENETICS
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
Physiology and molecular-genetics of thermus and bacillus
[PB94-135571] p 3385 N94-29190

GEOCHEMISTRY
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Summaries of FY 1993 geosciences research
[DE94-004710] p 3355 N94-28558
Motion and development of the Pacific Plate from the Middle Jurassic to the Late Cretaceous p 3362 N94-29939

Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle p 3367 N94-30917

GEODESY
A study of the convergence of spherical harmonic expansions of gravity using distributed point-mass Earth models p 3362 N94-29909
Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames [NASA-CR-195768] p 3142 N94-30243
Time and position accuracy using codeless GPS p 3144 N94-30650

GEODETIC SATELLITES
The effects of altimeter sampling characteristics: Some Geosat examples [AD-A275225] p 3357 N94-29062
New perspectives for high accuracy SLR with second generation geodesic satellites [REPT-932-440-105] p 3336 N94-30965

GEODETIC SURVEYS
Time and position accuracy using codeless GPS p 3144 N94-30650

GEOGRAPHIC INFORMATION SYSTEMS
A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center [NASA-TM-108438] p 3529 N94-28820
Feature mapping in a photogrammetric GIS [AD-A275418] p 3325 N94-28863
Human and institutional factors in GIS implementation by local governments p 3532 N94-29804

GEOLOGICAL SURVEYS
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929
Activities of the fourth wintering party at Asuka Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29084
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future [JTN-94-80597] p 3329 N94-29217
Application of JERS-1 data to geologic analyses p 3330 N94-29222
Application of optical sensor data to resource survey p 3330 N94-29223
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
Application of remote sensing techniques in petroleum exploration: The Indonesian experience p 3331 N94-29225
Rock identification using thermal infrared data p 3331 N94-29228

GEOLOGY
Updated deep-tow acoustics/geophysics system compressional velocity database [AD-A275477] p 3355 N94-28685
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins [AD-A275134] p 3361 N94-29286

GEOMAGNETIC LATITUDE
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes [AD-A275203] p 3356 N94-28891

GEOMAGNETISM
Antarctic Record, volume 36, no. 1 [REPT-106-VOL-36-NO-1] p 3357 N94-29078
Estimation of geomagnetic conjugate points by using Pc5 pulsations p 3357 N94-29079
Solar-geophysical data number 592, December 1993. Part 1: Prompt reports. Data for October, November 1993 and late data [PB94-142130] p 3550 N94-29123
Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245
Fast gravity, gravity partials, normalized gravity, gravity gradient torque and magnetic field: Derivation, code and data [NASA-CR-188243] p 3361 N94-29588
Quasi-adiabatic motion of energetic particles in a dipole magnetic field [DE94-607322] p 3362 N94-29935
Motion and development of the Pacific Plate from the Middle Jurassic to the Late Cretaceous p 3362 N94-29939
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet [PAPER-93JA01991] p 3507 N94-30128
Electromagnetic core-mantle coupling p 3366 N94-30808

GEOMETRICAL OPTICS
Gaussian beam and physical optics iteration technique for wideband beam waveguide feed design p 3248 N94-29624

GEOMETRY
Symplectic topology of integrable Hamiltonian systems [DE94-608120] p 3467 N94-30166
The exact fitting problem in higher dimensions [RUU-CS-92-37] p 3458 N94-30377

GEOMORPHOLOGY
The Pluto fast flyby mission: Completing the reconnaissance of the solar system p 3235 N94-29768

GEOPHYSICAL SATELLITES
Outline of JERS-1 system p 3330 N94-29220
Application of remote sensing techniques in petroleum exploration: The Indonesian experience p 3331 N94-29225

GEOPHYSICS
Global atmospheric and ocean modeling on the connection machine [DE94-003930] p 3342 N94-28521
Summaries of FY 1993 geosciences research [DE94-004710] p 3355 N94-28558
Papers in meteorology and geophysics, vol. 44, no.1 [JTN-94-80585] p 3324 N94-28693
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data [PB94-140548] p 3550 N94-29122
Solar-geophysical data number 592, December 1993. Part 1: Prompt reports. Data for October, November 1993 and late data [PB94-142130] p 3550 N94-29123
Solar-geophysical data number 592, December 1993. Part 2: Comprehensive reports. Data for June 1993 and miscellaneous [PB94-142148] p 3550 N94-29124
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data [NASA-CR-195119] p 3507 N94-30126
Missile launch detection electric field perturbation experiment [DE94-004224] p 3466 N94-30586
Air-deployable geophysics package [DE94-005651] p 3335 N94-30594
Analysis of deep seismic reflection and other data from the southern Washington Cascades [DE94-005915] p 3367 N94-30883

GEOPOTENTIAL
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry p 3333 N94-29762

GEOSAT SATELLITES
The effects of altimeter sampling characteristics: Some Geosat examples [AD-A275225] p 3357 N94-29062

GEOSTROPHIC WIND
Multiple weather regimes and baroclinically forced spherical resonance [DM-65] p 3376 N94-30966

GEOSYNCHRONOUS ORBITS
Electron beams at geosynchronous orbit [AD-A275471] p 3355 N94-28684
Beam scanning offset Cassegrain reflector antennas by subreflector movement [NASA-CR-191604] p 3160 N94-28836
Simulation of space-energy distributions of hot plasma on a geostationary orbit [DE94-607324] p 3365 N94-30107
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

GEOTHERMAL ENERGY UTILIZATION
Fiscal 1990 geothermal development promotion survey [DE94-732333] p 3337 N94-28628
Geothermal direct-heat utilization assistance [DE94-005831] p 3340 N94-30700

GEOTHERMAL RESOURCES
Fiscal 1991 geothermal development promotion energy [DE94-732332] p 3337 N94-28627
Fiscal 1990 geothermal development promotion survey [DE94-732333] p 3337 N94-28628

GEOTHERMAL TECHNOLOGY
Geothermal direct-heat utilization assistance [DE94-005831] p 3340 N94-30700

GERMANIUM
Silicon germanium carbon heteroepitaxial growth on silicon [AD-A275197] p 3512 N94-28889

GERMANIUM ISOTOPES
Recent results from SAGE [DE94-006229] p 3551 N94-30845

GERMINATION
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461

GET AWAY SPECIALS (STS)
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635

GIMBALS
Suspension system for gimbal supported scanning payloads [NASA-CASE-MFS-28817-1] p 3287 N94-29358

GIRDERS
Study of bridge design and technology [PB94-137916] p 3121 N94-29160

GLACIAL DRIFT
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars? [MATHS-REPT-A-198] p 3333 N94-29528

GLACIERS
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins [AD-A275134] p 3361 N94-29286

GLACIOLOGY
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins [AD-A275134] p 3361 N94-29286

GLASS
Glass studies under microgravity p 3228 N94-28941
Glass-ceramic matrix composites [REPT-932-430-112] p 3179 N94-29413
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite [NASA-CASE-LEW-15264-2] p 3180 N94-29508
Interface engineering in alumina fiber/glass composites p 3182 N94-29852
Estimation of Weibull modulus from dynamic and static fatigue experiments [PB94-138641] p 3322 N94-30114
Optical studies of dynamical processes in disordered systems [DE94-006751] p 3501 N94-30252
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259

GLASS FIBER REINFORCED PLASTICS
Characterization of air emissions from the simulated open combustion of fiberglass materials [PB94-136231] p 3347 N94-29192
Simulation of composite material response under dynamic compressive loading [DE94-005272] p 3184 N94-30589

GLASS FIBERS
Catalytic fabric filtration for simultaneous NO(x) and particulate control [DE94-001660] p 3341 N94-28463
Development of braided rope engine seals [NASA-TM-105902] p 3298 N94-28838
Characterization of air emissions from the simulated open combustion of fiberglass materials [PB94-136231] p 3347 N94-29192
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility [NASA-CR-4586] p 3175 N94-29458
Failure strength and mechanism of composite laminates under multiaxial loading conditions p 3182 N94-29875

GLASS TRANSITION TEMPERATURE
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family [REPT-932-600-107] p 3179 N94-29462

GLOBAL AIR POLLUTION
Survey on effects of petroleum substitution energy utilization on the global environment [DE94-732339] p 3346 N94-28630

GLOBAL POSITIONING SYSTEM
Theoretical and experimental study of a cylindrical microstrip antenna [REPT-932-440-109] p 3245 N94-29456
Use of GPS in automated air traffic control p 3137 N94-29563
GPS/GNSS for ATM p 3138 N94-29565
Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614

TOPEX/POSEIDON operational orbit determination results using global positioning satellites p 3160 N94-29666
Application of extended Lagrange series to the precise determination of Global Positioning Satellite orbits [ISBN-0-315-85724-2] p 3159 N94-30237
Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames [NASA-CR-195768] p 3142 N94-30243
The use of low cost differential mode GPS receivers in unmanned vehicles p 3144 N94-30285
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting [NASA-CP-3267] p 3468 N94-30639
An Operational Control Segment (OCS) update on GPS constellation status and future program directions p 3144 N94-30643
Loran-C time management p 3144 N94-30644
GPS common-view time transfer p 3144 N94-30648
Time and position accuracy using codeless GPS p 3144 N94-30650
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time p 3144 N94-30651
Development of an accurate transmission line fault locator using the global positioning system satellites p 3144 N94-30652
A real-time prediction of UTC p 3470 N94-30654
Tropospheric corrections to GPS measurements using locally measured meteorological parameters compared with general tropospheric corrections p 3144 N94-30655
A comparison of GPS broadcast and DMA precise ephemerides p 3145 N94-30660
Some applications of GPS timing information p 3145 N94-30661
A comparison of several GPS data reduction methods p 3145 N94-30662
Comparison of LASSO and GPS time transfers p 3145 N94-30665
Ionospheric corrections to precise time transfer using GPS p 3145 N94-30677
A review of the status and capabilities of Navstar GPS [AD-B174629] p 3143 N94-30854

GLOBAL WARMING
Spatial interpolation, network bias, and terrestrial air temperature variability p 3374 N94-30810

GLOBULAR CLUSTERS
Binary-single star scattering: An investigation of a realistic chaotic scattering system p 3543 N94-29719
Globular cluster photometry near the turnoff: Blue stragglers, relative ages, and the horizontal branch p 3538 N94-29732
Abundance patterns in red-giant CH stars p 3539 N94-29820
A study of recycled pulsars in globular clusters p 3539 N94-29825
Study of the stellar populations of the Fornax dwarf spheroidal galaxy [ISBN-0-315-85526-6] p 3541 N94-30231

GLOVES
EVA glove evaluation methodology and test protocol p 3401 N94-29729
Tactility as a function of grasp force: Effects of glove, orientation, pressure, load, and handle [NASA-TP-3474] p 3402 N94-30210

GLUONS
Asymptotic coherence of gluons and of q-bosons [DE94-005417] p 3481 N94-28492
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics [DE94-004955] p 3483 N94-28566
The small-x behaviour of parton distribution functions [DE94-606414] p 3485 N94-28758
Statistical description of hot and dense clustering matter [DE94-608155] p 3490 N94-30112
Gluon and fermion damping in hot QCD [ISBN-0-315-85982-2] p 3490 N94-30141
Glueball and meson dispersion and diffusion relations in compact U(1)(2+1) gauge theory [ISBN-0-315-85577-0] p 3490 N94-30234

GLYCOLS
Analysis of infrared radiation heating process considering chemical reaction of material to be heated [DE94-744116] p 3199 N94-30267

GOGGLES
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast [AD-A275332] p 3400 N94-28918

GOLAY DETECTOR CELLS
Micromachined electron tunneling infrared sensors p 3238 N94-29785

GOLD
Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape [AD-A275378] p 3197 N94-29312
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225

GOLD ISOTOPES
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei [DE94-004178] p 3491 N94-30686

GOODNESS OF FIT
A moment plotting method for characterizing aircraft fatigue data population distributions [AD-A275500] p 3145 N94-28660
The modified Cramer-von mises goodness-of-fit criterion for time series [AD-A275377] p 3464 N94-29014

GOVERNMENT PROCUREMENT
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report [AD-A275298] p 3242 N94-28874

GOVERNMENT/INDUSTRY RELATIONS
Intelligent robotics can boost America's economic growth [AIAA PAPER 94-1301-CP] p 3439 N94-30527

GOVERNMENTS
Omnibus Budget Reconciliation Act of 1990 [PUB-LAW-101-508] p 3537 N94-28540
Human and institutional factors in GIS implementation by local governments p 3532 N94-29804

GRADIENTS
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients [PAPER-93JA03201] p 3507 N94-30127

GRAIN BOUNDARIES
Practical superconductor development for electrical power applications [DE94-005378] p 3261 N94-28487
Electronic structure and mechanical properties of grain boundaries [AD-A275198] p 3512 N94-28890
Mechanical alloying processing with application to structural materials: ASSERT supplement [AD-A275400] p 3204 N94-29205
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition [NASA-TM-106534] p 3205 N94-29758
First principles pseudopotential calculations on aluminum and aluminum alloys [DE94-004890] p 3206 N94-29931
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM [DE94-006563] p 3516 N94-30064

GRAIN SIZE
On the prediction of HAZ grain size using Monte Carlo simulation [DE94-005465] p 3511 N94-28535
Superplasticity in fine-grained ceramics [AD-A275461] p 3212 N94-28733
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite [AD-A275050] p 3178 N94-29166

GRAMMARS
Commutative Lambek categorial grammars [ML-93-01] p 3457 N94-30395
Federal grammars and modular compilers [REPT-93-054] p 3429 N94-30928

GRAND UNIFIED THEORY
Operator analysis for quark and lepton masses in SO(10) [DE94-005201] p 3491 N94-30709

GRANULAR MATERIALS
Granular bases for heavily loaded pavements [AD-A275171] p 3156 N94-29047

GRAPH THEORY
A characterization of graphs with interval two-step graphs [AD-A275652] p 3451 N94-28651
Stability properties of inclusive connectivity for graphs [AD-A275360] p 3452 N94-29016
Conditional dependence in probabilistic networks [RUU-CS-92-34] p 3464 N94-29450
Only few graphs have bounded treewidth [RUU-CS-92-35] p 3455 N94-30333
Two algorithms for finding rectangular duals of planar graphs [RUU-CS-92-41] p 3423 N94-30345
Bayesian belief networks and conditional independencies [RUU-CS-92-36] p 3465 N94-30376
Minimum fill-in for chordal bipartite graphs [RUU-CS-93-11] p 3458 N94-30404
Treewidth of circle graphs [RUU-CS-93-12] p 3458 N94-30405
Event structures and orthogonal term graph rewriting [CWI-CS-R9347] p 3459 N94-30412
Rectilinear decompositions with low stabbing number [RUU-CS-93-25] p 3459 N94-30425
A more compact visibility representation [RUU-CS-93-26] p 3425 N94-30426
Efficient and constructive algorithms for the pathwidth and treewidth of graphs [RUU-CS-93-27] p 3426 N94-30488
Relative length of long paths and cycles in graphs with large degree sums [MEMO-1145] p 3461 N94-30766
Pancyclicity of Hamiltonian line graphs [MEMO-1146] p 3461 N94-30767
Heuristic algorithms for static and dynamic problems of locating the center and the barycenter of a graph [REPT-93-050] p 3429 N94-30925
The structure of exponentials: Uncovering the dynamics of linear logic proofs [ML-93-10] p 3430 N94-30973

GRAPHIC ARTS
Fundamentals of printing technology [PB94-132602] p 3530 N94-29141

GRAPHICAL USER INTERFACE
Evaluation of access/navigational features of a graphical-user interface installed on a portable maintenance aid [AD-A275791] p 3136 N94-28744
HYPER-NPSNET: Embedded multimedia in a 3D virtual world [AD-A275063] p 3410 N94-29152
Basic research in computer science [AD-A275184] p 3405 N94-29181
Graphics for ABC [CWI-CS-R9255] p 3418 N94-29449
Considerations on graphical user interfaces for intelligent ATM support systems p 3139 N94-29572
The ergonomics of computer interfaces: Designing a system for human use [CWI-CS-R9258] p 3402 N94-30320
Programming aspects of Views: An open-architecture application environment [CWI-CS-R9259] p 3422 N94-30321
Graphics in the Views system [CWI-CS-R9260] p 3422 N94-30322
Maintaining presentation invariants in the Views system [CWI-CS-R9262] p 3423 N94-30324
The beauty and the beast [TR-93-03] p 3423 N94-30331
Object-based task-level control: A hierarchical control architecture for remote operation of space robots [AIAA PAPER 94-1209-CP] p 3444 N94-30560

GRAPHITE
Formation and chemical reactivity of carbon fibers prepared by defluorination of graphite fluoride [NASA-TM-106398] p 3174 N94-28747
Graphite intercalation compounds prepared from graphite fluoride [NASA-TM-106447] p 3174 N94-28924
Properties of graphite fiber reinforced copper matrix composites for space power applications [NASA-CR-191026] p 3178 N94-29208
Preparation of graphite fibers from polyimide p 3223 N94-29517
Deposition of tantalum carbide coatings on graphite by laser interactions p 3223 N94-30475

GRAPHITE-EPOXY COMPOSITES
Numerical and experimental investigation of the bending response of thin-walled composite cylinders [NASA-CR-195730] p 3317 N94-28801
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door [NASA-TM-108992] p 3178 N94-29100
Delamination growth in composites under cyclic loads p 3183 N94-30256

GRAPHS (CHARTS)
A characterization of graphs with interval two-step graphs [AD-A275652] p 3451 N94-28651
Only few graphs have bounded treewidth [RUU-CS-92-35] p 3455 N94-30333
Minimum fill-in for chordal bipartite graphs [RUU-CS-93-11] p 3458 N94-30404
Treewidth of circle graphs [RUU-CS-93-12] p 3458 N94-30405
A more compact visibility representation [RUU-CS-93-26] p 3425 N94-30426
Efficient and constructive algorithms for the pathwidth and treewidth of graphs [RUU-CS-93-27] p 3426 N94-30488

GRASHOF NUMBER
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849

GRATINGS (SPECTRA)
Characterization of a diffraction grating as a simulant of a selective frequency antenna for radiometric applications
[AD-A275793] p 3241 N94-28745
Deformed ellipsoidal diffraction grating blank
[NASA-CR-189334] p 3289 N94-29872
Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface
p 3479 N94-29988

GRAVIMETRY
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737

GRAVITATION
A study of the convergence of spherical harmonic expansions of gravity using distributed point-mass Earth models p 3362 N94-29909
Discrete symmetries, strong CP problem and gravity
[DE94-608091] p 3524 N94-30089
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

GRAVITATIONAL COLLAPSE
A numerical study of gravitational collapse
p 3548 N94-30271

GRAVITATIONAL EFFECTS
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Some issues on Japan's space food development and relating preliminary experimental study
p 3388 N94-28498
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Combustion studies under microgravity
p 3228 N94-28940
Glass studies under microgravity
p 3228 N94-28941
Fabrication of electronic materials in space
p 3228 N94-28942
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Microgravity by parabolic flight with MU-300 aircraft
p 3392 N94-29710
Space movement of Trichinella spiralis under microgravity p 3387 N94-29711
Posture control of goldfishes under microgravity
p 3387 N94-29712
Hemodynamic measurement during parabolic flight
p 3393 N94-29717
Motion sickness in parabolic flight: Possibility of electrogastrography as an objective index
p 3393 N94-29718
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction
p 3394 N94-29865
Physiological Anatomical Rodent Experiment (PARE) .04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968
Laser beam welding of AISI 316 stainless steel in microgravity environment: Experiments aboard a KC-135 flight
[ISBN-0-315-86095-2] p 3229 N94-30145
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions
[ISBN-0-315-86108-8] p 3209 N94-30146
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855

GRAVITATIONAL FIELDS
The Klein-Fock equation, minimal surfaces and gravitational fields
[DE94-606340] p 3356 N94-28803
Fast gravity, gravity partials, normalized gravity, gravity gradient torque and magnetic field: Derivation, code and data
[NASA-CR-188243] p 3361 N94-29588
Numerical simulations of cluster cooling flows
p 3544 N94-29725
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737

GRAVITATIONAL PHYSIOLOGY
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Image technology and information analysis of bone change with gravitational exposure
p 3389 N94-28851
Arterial oxygen saturation during +Gz acceleration by short-radius centrifuge p 3389 N94-28852
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853
Basic understanding of vertigo p 3390 N94-28855
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
Portable Linear Sled (PLS) for biomedical research
p 3163 N94-29648
Behavior and visual control of cyprinodonts under microgravity p 3387 N94-29713
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715
Analysis of various biological activity parameters during parabolic flight p 3393 N94-29716
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats
p 3387 N94-29866

GRAVITATIONAL WAVES
Physics, astronomy, and astrophysics: A numerical study of the black hole plus Brill wave spacetime
p 3540 N94-29990

GRAVITROPISM
Cellular polarity and interactions in plant graviperception
[NASA-CR-195261] p 3385 N94-29943

GRAVITY ANOMALIES
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737

GRAVITY GRADIOMETERS
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry
p 3333 N94-29762

GRAVITY WAVES
US National Weather experiment STORM-FEST: Waves and turbulence in frontal zones
[AD-A275084] p 3369 N94-28847
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802

GREASES
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468

GREEN'S FUNCTIONS
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783

GREENHOUSE EFFECT
Global change research: Summaries of research in FY 1993
[DE94-003150] p 3341 N94-28473
Role of satellite observations of sea-surface temperature in the detection of global change
[PB94-138120] p 3329 N94-29107
Second Japan-U.S. Workshop on Global Change: Environmental Response Technologies for Global Change (Mitigation and Adaptation) p 3354 N94-29522
Impact of biomass burning on the atmosphere
[DE94-004333] p 3349 N94-29954
Radiative flux calculations at UV and visible wavelengths
[DE94-004278] p 3350 N94-30613
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
The challenge of identifying greenhouse gas-induced climatic change p 3352 N94-30634

GRID GENERATION (MATHEMATICS)
Analytic rendering of curvilinear volume data
[DE94-004934] p 3407 N94-28506
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains
p 3124 N94-28956
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code
p 3124 N94-28958
Three-dimensional external flow computations using prismatic grid p 3127 N94-28979
Application of digital control theory to adaptive grid generation p 3127 N94-28980
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
Computational fluid and combustion dynamics
[DE94-006596] p 3279 N94-30003
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations
[PB94-125598] p 3133 N94-30387
Grid adaption in computational aerodynamics
[PB94-126240] p 3134 N94-30858
Optimal size finite element meshes without obtuse and small angles
[RUU-CS-92-39] p 3462 N94-30860
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954

GRINDING (MATERIAL REMOVAL)
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
Material properties and fracture mechanics in relation to ceramic machining
[DE94-006623] p 3221 N94-30829

GROUND BASED CONTROL
Design of Center-TRACON Automation System
p 3138 N94-29568
ARC2000: Automatic radar control
p 3141 N94-29583
A testbed for the development of ground-based control of space-based manipulators p 3309 N94-30306
Ground control system for the midcourse space experiment UTC clock p 3474 N94-30674

GROUND EFFECT (AERODYNAMICS)
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973

GROUND STATIONS
Status and tendency of earth observation system
p 3328 N94-29038
An Operational Control Segment (OCS) update on GPS constellation status and future program directions
p 3144 N94-30643
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646
Remote clocks linked by a fully calibrated two-way timing link p 3471 N94-30659
LASSO experiment: Intercalibrations of the LASSO ranging stations p 3297 N94-30666

GROUND SUPPORT EQUIPMENT
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279
The experimental flight management system: An air traffic management research tool
[NLR-TP-92253-U] p 3143 N94-30943

GROUND SUPPORT SYSTEMS
Status and tendency of earth observation system
p 3328 N94-29038
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633

GROUND TESTS
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837
On ground system integration and testing: A modern approach p 3150 N94-29334
A transmission-loss monitor using current transformers
[DE94-003974] p 3267 N94-30716
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846

GROUND TRUTH
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862

GROUND WATER
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627
Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173

GROUND WIND
On the annual cycle of the tropical Pacific atmosphere and ocean p 3371 N94-29763
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196

GROUND-AIR-GROUND COMMUNICATION
Simulation of interference between Earth stations and Earth-orbiting satellites p 3252 N94-29673

GROUP DYNAMICS
Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640

GROUP THEORY
Remarks on Galois symmetry in RCFT
[PB94-138179] p 3467 N94-29147
Coherent states of SU(l,1) groups
[DE94-603654] p 3524 N94-29498
Non-commutative geometry
[PB94-139342] p 3462 N94-30889
GROWTH
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853
GUIDANCE SENSORS
Micro guidance and control technology overview
p 3144 N94-29772
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551
GUN LAUNCHERS
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
GUN PROPELLANTS
Catalytic ignitor for regenerative propellant gun
[NASA-CASE-NPO-18987-1-CU] p 3225 N94-29490
GUST LOADS
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872
GYROSCOPES
GEC Ferranti piezo vibratory gyroscope
p 3239 N94-29790

H

H ALPHA LINE
Broad H alpha profiles of radio-loud active galactic nuclei and rapid profile variability in Seyfert and radio galaxies
p 3552 N94-29989
H II REGIONS
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
HABITATS
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099
HADRONS
Issues in light hadron spectroscopy
[PB94-138229] p 3486 N94-29112
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
Experimental setup for study of hadron and hard photon production in nucleus-nucleus collisions
[DE94-607849] p 3489 N94-30051
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719
Research in elementary particle physics
[DE94-001657] p 3491 N94-30762
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
HAFNIUM CARBIDES
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
HAFNIUM ISOTOPES
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
HALF LIFE
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
HALIDES
Halogen chemisorption on silver(111): Scanning tunneling microscopy of coadsorbed halogen atoms
[AD-A275219] p 3486 N94-29060
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide
[AD-A275019] p 3513 N94-29130
HALL EFFECT
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
Aggregation equilibria in arsenic doped silicon
[DE94-607269] p 3515 N94-30005
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Problems in particle theory
[DE94-003665] p 3491 N94-30685
HALOGENATION
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770
HALOGENS
Halogen chemisorption on silver(111): Scanning tunneling microscopy of coadsorbed halogen atoms
[AD-A275219] p 3486 N94-29060
HAMILTONIAN FUNCTIONS
On invariant measures for some infinite-dimensional dynamical systems
[DE94-606342] p 3522 N94-28609
Path integral for coherent states of the dynamical U(sub 2) group and U(sub 2/1) supergroup
[DE94-606382] p 3466 N94-28785
Some remarks about pseudo-Hamiltonian
[DE94-003273] p 3487 N94-29700
Periodic orbits of n-body type problems: The fixed period case
[DE94-608096] p 3453 N94-30091
Symplectic topology of integrable Hamiltonian systems
[DE94-608120] p 3467 N94-30166
Dissipation in Hamiltonian systems: Decaying cnoidal waves
[MEMO-1151] p 3460 N94-30738
Pancyclicity of Hamiltonian line graphs
[MEMO-1146] p 3461 N94-30767
An intrinsic Hamiltonian formulation of the dynamics of LC-circuits
[MEMO-1154] p 3462 N94-30964
HANDBOOKS
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
[AD-A275860] p 3156 N94-28752
Cleanroom engineering handbook. Volume 4. Specification team practices
[AD-A275861] p 3156 N94-28753
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
SI (Metric) handbook
[NASA-TM-109197] p 3231 N94-29376
HANDLES
Extra-vehicular activity translation tool
[NASA-CASE-MSC-21955-1] p 3300 N94-29428
HARD LANDING
Aircraft accident/incident summary report: In-flight loss of control, leading to forced landing and runway overrun, Continental Express, Inc., N24706 Embraer EMB-120 RT, Pine Bluff, Arkansas, 29 April 1993
[PB94-910404] p 3135 N94-29402
HARDENING (MATERIALS)
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
HARDNESS
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226
HARMONIC ANALYSIS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
HARMONIC EXCITATION
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
HARMONIC FUNCTIONS
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737
Iterative removal of boundary minima of harmonic potential function for mobile robot navigation
[REPT-93-059] p 3449 N94-30962
HARMONIC GENERATIONS
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008
Studies of interfaces and vapors with Optical Second Harmonic Generation
[DE94-006295] p 3476 N94-30841
HARMONIC OSCILLATION
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
HARMONIC OSCILLATORS
Model of polylinear Bose- and Fermi-like oscillator
[DE94-606303] p 3485 N94-28718
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Non-Markovian quantum Brownian motion of a harmonic oscillator
[DE94-005922] p 3477 N94-30873
HARMONICS
Spurs in digital radio frequency memory and applications of DRFM
[AD-A275013] p 3243 N94-28897
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008
Accurate finite difference methods for time-harmonic wave propagation
[NASA-CR-194887] p 3454 N94-30209
HARNESSES
MSFC inspections of installed polyimide wire
p 3166 N94-28707
HARTREE APPROXIMATION
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378
HAZARDOUS MATERIAL DISPOSAL (IN SPACE)
Design reuse experience of space and hazardous operations robots
[AIAA PAPER 94-1220-CP] p 3445 N94-30568
HAZARDS
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
Medical support for British operations in the Antarctic
p 3379 N94-28421
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
HAZE
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042
HEAD (ANATOMY)
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Effect of food intake on skin vasomotor responses to head-up tilt in humans p 3390 N94-28854
Basic understanding of vertigo p 3390 N94-28855
Equilibrium dysfunction in the clinical field
p 3390 N94-28858
HEAD DOWN TILT
Leg muscle volume during 30-day 6-degree head-down bed rest with isotonic and isokinetic exercise training
[NASA-TM-4580] p 3385 N94-29401
HEAD MOVEMENT
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715
HEALTH
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution
p 3354 N94-30466
Electric power lines: Questions and answers on research into health effects
[DE94-005637] p 3353 N94-30757
HEARING
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
Evaluation of monitoring audiometry in the United States Air Force Hearing Conservation Program
[AD-A275309] p 3391 N94-29211
HEART
Development of the NASA/Baylor VAD
p 3397 N94-30458
HEART FUNCTION
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
Development of the NASA/Baylor VAD
p 3397 N94-30458

HEART RATE
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Spectral analysis of heart rate and psychological state: A review of its validity as a workload index
[AD-B179387] p 3399 N94-30969

HEAT AFFECTED ZONE
On the prediction of HAZ grain size using Monte Carlo simulation
[DE94-005465] p 3511 N94-28535

HEAT ENGINES
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644

HEAT EXCHANGERS
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
Qualitative vector optimization of a condensate stabilizer process
[PB94-133246] p 3189 N94-28789
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337

HEAT FLUX
Prediction of survival times on land in a cold climate
p 3379 N94-28423
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
Heat flux instrumentation for Hyflite thermal protection system
[NASA-CR-195731] p 3286 N94-28824
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758
The validation of ocean surface heat fluxes in AMIP
[DE94-001539] p 3378 N94-30823

HEAT GENERATION
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals
p 3321 N94-29808

HEAT ISLANDS
A laboratory simulation of urban heat-island-induced circulation in a stratified environment
p 3367 N94-30921

HEAT MEASUREMENT
Differential Scanning Calorimetry (DSC) for planetary surface exploration p 3236 N94-29776

HEAT OF FORMATION
First principles pseudopotential calculations on aluminum and aluminum alloys
[DE94-004890] p 3206 N94-29931
Thermochemical data for CVD modeling from ab initio calculations
[DE94-005269] p 3222 N94-30909

HEAT PUMPS
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977
Large heat pumps using CO2 refrigerant
[PB94-138773] p 3279 N94-29999

HEAT RESISTANT ALLOYS
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
Corrosion performance of materials for advanced combustion systems
[DE94-006726] p 3207 N94-30057

HEAT SINKS
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556

HEAT STROKE
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443

HEAT TOLERANCE
The potential of new textiles in improving survival prospects p 3380 N94-28430
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
Implications of climatic extremes in aircrew NBC operations p 3383 N94-28446
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448
The use of liquid and air microclimate conditioning systems to alleviate heat stress in helicopter NBC operations p 3384 N94-28453
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049

HEAT TRANSFER
Treatment of mild immersion hypothermia by body-to-body and forced-air warming
p 3380 N94-28428
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2
p 3125 N94-28966
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
WINDOW 4.0: Documentation of calculation procedures
[DE94-004935] p 3410 N94-29019
Liquid metal MHD and heat transfer in a tokamak blanket slotted coolant channel
[DE94-004622] p 3506 N94-29510
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855
Self-similar variables and the problem of nonlocal electron heat conductivity
[DE94-005826] p 3493 N94-30881

HEAT TRANSFER COEFFICIENTS
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849

HEAT TRANSMISSION
Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
Differential Scanning Calorimetry (DSC) for planetary surface exploration p 3236 N94-29776
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724

HEAT TREATMENT
Practical superconductor development for electrical power applications
[DE94-005378] p 3261 N94-28487
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
Mechanical alloying processing with application to structural materials: ASSERT supplement
[AD-A275400] p 3204 N94-29205
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259

HEATING
Rewarming methodologies in the field
p 3382 N94-28441
Free vibration of thermally loaded panels including initial imperfections and post-buckling effects
[NASA-TM-109097] p 3479 N94-29461
Large heat pumps using CO2 refrigerant
[PB94-138773] p 3279 N94-29999
Composite hot drape forming p 3240 N94-30448

HEATING EQUIPMENT
Proceedings of the Joint Contractors Meeting: FE/EE Advanced Turbine Systems Conference FE Fuel Cells and Coal-Fired Heat Engines Conference
[DE93-011308] p 3336 N94-28499

HEAVING
Toward a molecular scale understanding of frost heaving, phase 1
[AD-A275446] p 3356 N94-28882

HEAVY IONS
The induction approach to heavy ion inertial fusion: Accelerator and target considerations
[DE94-005216] p 3494 N94-28507
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
Relativistic heavy ion research
[DE94-004701] p 3484 N94-28576
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
Energetic heavy-ion tracks in micron sites
p 3495 N94-30213
Kinetics of surface roughening and smoothing during ion sputtering
[DE94-006358] p 3219 N94-30263
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei
[DE94-004178] p 3491 N94-30686
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

HEAVY LIFT LAUNCH VEHICLES
Heavy-lift vehicle-launched Space Station method and apparatus
[NASA-CASE-MSC-21760-1] p 3160 N94-29369

HELICOPTER DESIGN
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
Helicopter mission and rotor performance optimization with quasi-linear inflow theory p 3147 N94-29594
Rotorcraft airframe structural optimization for vibration and dynamic stress reduction including damping treatment p 3147 N94-29878
Nonlinear multibody formulation for rotorcraft analysis
p 3149 N94-30787

HELICOPTER PERFORMANCE
Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
Boundary layers induced by three-dimensional vortex loops
[AD-A275678] p 3270 N94-28665
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
Helicopter mission and rotor performance optimization with quasi-linear inflow theory p 3147 N94-29594

HELICOPTER PROPELLER DRIVE
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552

HELICOPTERS
Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837

Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab
[AD-A275077] p 3146 N94-28870
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight
p 3131 N94-29826
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274

HELIOSPHERE
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132

HELIOTRONS
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499

HELIPORTS
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754

HELIUM ATOMS
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788

HELIUM IONS
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Optical field ionization of atoms and ions using ultrashort laser pulses
[DE94-006643] p 3488 N94-29845

HELIUM ISOTOPES
Acoustic and optical investigations of superfluid (3)He
[PB94-135415] p 3477 N94-29186

HELIUM PLASMA
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458

HELMHOLTZ EQUATIONS
Analysis of 3-D acoustic problems using boundary element method p 3127 N94-28974

HELMHOLTZ VORTICITY EQUATION
A spectral boundary integral equation method for the 2-D Helmholtz equation
[NASA-CR-194890] p 3454 N94-30207
Accurate finite difference methods for time-harmonic wave propagation
[NASA-CR-194887] p 3454 N94-30209

HEMODYNAMICS
Hemodynamic measurement during parabolic flight
p 3393 N94-29717

HEMOLYSIS
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370

HERMES MANNED SPACEPLANE
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane
[REPT-932-440-107] p 3168 N94-29543

HETEROGENEITY
Fundamental studies of hydrogen interaction with supported meta and bimetallic catalysts
[DE94-004887] p 3202 N94-28562
Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion
p 3363 N94-29941

HETEROJUNCTIONS
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
Quantum interference phenomena and novel switching in split gate high electron mobility transistors
p 3266 N94-29734
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Electronic structure of Zn-based quantum wells
[DE94-608104] p 3516 N94-30068
Ion damage studies in GaAs/Al(0.6)Ga(0.4)As/GaAs heterostructures
[DE94-005384] p 3521 N94-30894

HEURISTIC METHODS
Using multiple searchers to locate a randomly moving target
[AD-A275602] p 3463 N94-28768
Weighted and unweighted maximum clique algorithms with upper bounds from fractional coloring
[AD-A275328] p 3409 N94-28917
A variable selection heuristic for solid rocket motor design p 3173 N94-29544
Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513
Heuristic algorithms for static and dynamic problems of locating the center and the barycenter of a graph
[REPT-93-050] p 3429 N94-30925

HEWLETT-PACKARD COMPUTERS
'Real time' and the NLR aerodynamic facilities
[AD-B173626] p 3158 N94-30856

HEXAGONAL CELLS
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515

HIERARCHIES
Evaluating the analytic hierarchy process and recommended modifications for its use in multi-attribute decision making
[AD-A275065] p 3527 N94-29153
The covering property of the object-oriented data model: Design and implementation issues
[AD-A275048] p 3530 N94-29165
Hierarchical structures and asymmetric stochastic processes on p-adics and adeles
[PB94-138203] p 3464 N94-29178
Hierarchical Object Oriented Design (HOOD): Possibilities, limitations, and challenges
p 3413 N94-29322
A neural network with modular hierarchical learning
[NASA-CASE-NPO-19077-1-CU] p 3435 N94-29492

HIGH ALTITUDE
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893

HIGH ALTITUDE ENVIRONMENTS
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497

HIGH ASPECT RATIO
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770

HIGH DISPERSION SPECTROGRAPHS
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857

HIGH ELECTRON MOBILITY TRANSISTORS
Quantum interference phenomena and novel switching in split gate high electron mobility transistors
p 3266 N94-29734

HIGH ENERGY ELECTRONS
Quantum-mechanical suppression of bremsstrahlung
[DE94-005223] p 3497 N94-30712

HIGH ENERGY INTERACTIONS
US/Japan cooperation in high energy physics
[DE94-005376] p 3494 N94-28486
Elementary particle interactions
[DE94-004238] p 3482 N94-28504
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics
[DE94-004955] p 3483 N94-28566
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei
[DE94-004178] p 3491 N94-30686
Experiment studies of electron-positron interactions at the Stanford Linear Accelerator Center
[DE94-005877] p 3491 N94-30702
A search for rapidity gap events in p(bar p) collisions at D(0)
[DE94-004654] p 3491 N94-30722
Research in elementary particle physics
[DE94-001657] p 3491 N94-30762

HIGH LEVEL LANGUAGES
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
The covering property of the object-oriented data model: Design and implementation issues
[AD-A275048] p 3530 N94-29165
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465

HIGH POLYMERS
Molecular structure of coal studied by solvent extraction p 3187 N94-28676

HIGH POWER LASERS
Radiation transport and focusing systems for power industrial lasers
[DE94-606817] p 3293 N94-28786
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309
Space debris removal using a high-power ground-based laser
[DE94-006363] p 3169 N94-30264
Reactor-pumped laser facility at DOE's Nevada Test Site
[DE94-006371] p 3295 N94-30265

HIGH PRESSURE
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043
Combustion technology needs for advanced high pressure cycle engines p 3190 N94-29248
Computational and experimental results in high pressure combustions of H2/air and H2/O2/H2O
p 3193 N94-29268
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures
p 3194 N94-29271
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29365

HIGH RESOLUTION
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry
p 3333 N94-29762
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274

HIGH REYNOLDS NUMBER
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788

HIGH STRENGTH
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367

HIGH STRENGTH STEELS
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021

HIGH TEMPERATURE
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
Breakdown testing of wiring insulation
p 3166 N94-28713
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
A 3M high temperature dielectric film
p 3167 N94-28717
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731

Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
High temperature fuel requirements and payoffs p 3192 N94-29259
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
Low dielectric polyimide fibers
[NASA-CASE-LAR-14526-1] p 3214 N94-29359
Radioelectric characterization of materials at 1000 C
[REPT-932-430-104] p 3245 N94-29440
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336

HIGH TEMPERATURE ENVIRONMENTS
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
The concept of Royal Navy air operations under extreme environmental conditions p 3379 N94-28424
Experimental evaluation of two systems of individual air-conditioning p 3384 N94-28450
Recent Canadian advances in active thermal protection p 3384 N94-28451
Innovative processing of composites for ultra-high temperature applications, book 1
[AD-A275597] p 3176 N94-28729
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
Measurement and modelling of bolted joint stress relaxation in plastics
[PB94-124849] p 3318 N94-28841

HIGH TEMPERATURE GAS COOLED REACTORS
Overview of shielding analyses for the MHTGR from 1986 to 1991
[DE94-002448] p 3495 N94-29924

HIGH TEMPERATURE GASES
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841

HIGH TEMPERATURE LUBRICANTS
Matrix isolation studies of the interactions of BF3 with water and substituted diethyl ethers. Chemical ionization mass spectrometric determination of the proton affinity of (CF3CH2)2O
[NASA-TM-106422] p 3189 N94-28832

HIGH TEMPERATURE PLASMAS
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
X ray emission scaling and energy balance of small gas-puff Z-pinch p 3505 N94-29077
Transient internal probe
[AD-A275054] p 3505 N94-29134
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Simulation of space-energy distributions of hot plasma on a geostationary orbit
[DE94-607324] p 3365 N94-30107
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752
The investigation of electron-ion radiative and dielectronic recombination in high-temperature plasmas
[DE94-005150] p 3509 N94-30755

HIGH TEMPERATURE SUPERCONDUCTORS
Current leads and magnetic bearings
[DE94-004607] p 3297 N94-28461
Practical superconductor development for electrical power applications
[DE94-005378] p 3261 N94-28487
Energy gap structure of layered superconductors
[DE94-005132] p 3511 N94-28570
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
High Tc superconducting bolometric and nonbolometric infrared (IR) detectors
[NASA-CR-195728] p 3262 N94-28846
Nonaqueous slip casting of YBa2Cu3O(7-x) superconductive ceramics
[NASA-CR-4575] p 3512 N94-29101
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
New evidence for flux cutting in type II superconductors
[ISBN-0-315-85830-3] p 3515 N94-30032
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082
Butterfly and scaling law in YBa2Cu4O8
[DE94-006037] p 3519 N94-30338
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691
Normal state resistivity of MBa2Cu3O(7-x) ceramics
[DE94-608456] p 3220 N94-30745
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775
Intra- versus interlayer pairing in the copper oxide superconductors: Response to a magnetic field
[DE94-005475] p 3521 N94-30898
AC losses for the self field of an AC transport current with a DC transport current offset in high T(c) superconducting magnet coils for MagLev application
[DE94-005187] p 3268 N94-30907

HIGH TEMPERATURE TESTS
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperatures under tension-tension loading
[AD-A275466] p 3176 N94-28673
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
A review of mechanical test methods for ceramic matrix composites
[PB94-147576] p 3184 N94-30524

HIGH VOLTAGES
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444

HILSCH TUBES
Large eddy simulation of subsonic mixing layers p 3276 N94-29851

HISS
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245

HISTORIES
Perspectives of earth observing techniques: Expectation of earth observation in space development history p 3328 N94-29039
Fishermans Bend: A centre of Australian aviation
[AD-A274981] p 3121 N94-29090
Energy and Technology Review
[DE94-004472] p 3338 N94-29955
The evolution of information management
[DE94-004173] p 3535 N94-30179

HMX
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308

HODOGRAPHS
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985

HOLES (ELECTRON DEFICIENCIES)
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835

HOLES (MECHANICS)
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100

HOLLOW CATHODES
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446

HOLOGRAMMETRY
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491

HOLOGRAPHIC INTERFEROMETRY
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466

HOLOGRAPHY
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466
Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Gordon research conference on optical signal processing and holography
[AD-A275092] p 3499 N94-28848
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
Vacuum chamber and adaptors for shearography and holography
[NASA-CR-192467] p 3157 N94-29956
Photoelectron diffraction and holography: Some new directions
[DE94-006297] p 3289 N94-30027
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060
Time-resolved holography for the microscopic study of crack-tip motion in dynamic fracture p 3290 N94-30254

HOMING DEVICES
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694

HOMOGENEITY
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454

HOMOGENEOUS TURBULENCE
Spherical model for turbulence p 3274 N94-29730

HOMOMORPHISMS
Homomorphism preserving algebraic specifications require hidden sorts
[CWI-CS-R9344] p 3459 N94-30436

HONEYCOMB STRUCTURES
Composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916

HORIZON
The transient period of a cyclic process: An horizon theorem
[MEMO-1149] p 3427 N94-30585

HORIZONTAL FLIGHT
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight p 3131 N94-29826

HORMONES
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189
A fuzzy logic controller for hormone administration using an implantable pump p 3397 N94-30459

HORN ANTENNAS
An absolute measurement of the cosmic background radiation temperature at 1.4 GHz p 3553 N94-30351

HORSESHOE VORTICES
A flow visualization study of acoustically enhanced hairpin vortices
[AD-A275467] p 3271 N94-28809

HOSPITALS
Clinical investigation program
[AD-A275025] p 3391 N94-29116
An update on Lab Rover: A hospital material transporter
[AIAA PAPER 94-1228-CP] p 3447 N94-30577

HOT ELECTRONS
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3262 N94-28687

Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Optical depth effects in cluster cooling flows p 3541 N94-30800

HOT ISOSTATIC PRESSING
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387

HOT WORKING
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479
Composite hot drape forming p 3240 N94-30448
A comparison of the evolution of cold and hot deformation microstructures and textures in fcc metals
[DE94-005103] p 3210 N94-30777

HOT-WIRE FLOWMETERS
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399

HOUSINGS
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370

HOVERING
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight p 3131 N94-29826

HTPB PROPELLANTS
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092

HUMAN BEINGS
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715

HUMAN BODY
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049

HUMAN FACTORS ENGINEERING
Test of a new protection suit in a climatic chamber p 3384 N94-28452
Key cognitive issues in the design of electronic displays of instrument approach procedure charts
[AD-A275647] p 3399 N94-28649
Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface
[AD-A275187] p 3399 N94-28861
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905
Procedures and metrics for anti-G suit evaluations
[AD-A275349] p 3400 N94-28997
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
A comparison of three aircraft attitude display symbology structures
[AD-A275172] p 3150 N94-29048
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
Aircraft evacuations: The effect of a cabin water spray system upon evacuation rates and behaviour
[CAA-PAPER-93008] p 3148 N94-29887
The use of task network simulation in workload prediction
[DCIEM-92-32] p 3402 N94-30132
Tactility as a function of grasp force: Effects of glove, orientation, pressure, load, and handle
[NASA-TP-3474] p 3402 N94-30210
The ergonomics of computer interfaces: Designing a system for human use
[CWI-CS-R9258] p 3402 N94-30320
Graphics in the Views system
[CWI-CS-R9260] p 3422 N94-30322
Maintaining presentation invariants in the Views system
[CWI-CS-R9262] p 3423 N94-30324
The Views application environment
[CWI-CS-R9257] p 3423 N94-30341

HUMAN PATHOLOGY
Aeropathological diagnosis of lethal hypothermia p 3382 N94-28440

HUMAN PERFORMANCE
Deterioration of manual performance in cold and windy climates p 3381 N94-28434
Toward a model of expert knowledge structure and their role in cognitive task performance
[AD-A275641] p 3529 N94-28645
Effects of workload on communication processes in decision making teams
[AD-A275894] p 3527 N94-28796
Disturbance of equilibrium on JAL flight crew p 3390 N94-28856
Equilibrium dysfunction in the clinical field p 3390 N94-28858
Cognitive approach to specifications on air traffic controllers' decision assistance systems p 3139 N94-29571
Scanning and monitoring performance: Effects of the reinforcement values of the events being monitored
[DOT/FAA/AM-94/8] p 3398 N94-29918
Dexterity enhancement in microsurgery using telemicro-robotics
[AIAA PAPER 94-1230-CP] p 3447 N94-30579
Maintaining vigilance on a simulated ATC monitoring task across repeated sessions
[DOT/FAA/AM-94/6] p 3143 N94-30933

HUMAN REACTIONS
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE94-006428] p 3514 N94-30001

HUMAN RESOURCES
Development centres: Assessing or developing people
[PB94-138070] p 3536 N94-29144

HUMAN TOLERANCES
Medical support for British operations in the Antarctic p 3379 N94-28421
Biochemical enhancement of cold tolerance p 3380 N94-28427
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799

HUMAN WASTES
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938

HUMAN-COMPUTER INTERFACE
Work-oriented development of interactive software tools: Understanding the work of software maintainers and making an interactive software tool for them
[PB94-132032] p 3406 N94-28401
Evaluation of access/navigational features of a graphical-user interface installed on a portable maintenance aid
[AD-A275791] p 3136 N94-28744
Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface
[AD-A275187] p 3399 N94-28861
A method of user interface for NWT p 3129 N94-28993
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068
Advances in development capabilities for intelligent air traffic management systems p 3137 N94-29559
Intelligent systems for air space control and management p 3137 N94-29560
Use of advanced technologies in ATM (air traffic management) domain p 3137 N94-29561
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Decision Making Aids (DMA) in on-line ATC systems p 3139 N94-29570
Considerations on graphical user interfaces for intelligent ATM support systems p 3139 N94-29572
Aspects of the operator interface for military robotic applications in unstructured environments p 3309 N94-30304
The ergonomics of computer interfaces: Designing a system for human use
[CWI-CS-R9258] p 3402 N94-30320
Programming aspects of Views: An open-architecture application environment
[CWI-CS-R9259] p 3422 N94-30321
Graphics in the Views system
[CWI-CS-R9260] p 3422 N94-30322

HUMIDITY
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family
[REPT-932-600-107] p 3179 N94-29462
Atmospheric turbulence within and above a coniferous forest
[ISBN-0-315-75468-0] p 3375 N94-30870

HUMIDITY MEASUREMENT
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777

HURRICANES
On the origins of low-level tornadic circulations within the remnants of hurricane Andrews
[AD-A275373] p 3369 N94-29011

HYBRID COMPOSITES
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472

HYDRATION
Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448

HYDRAULIC ANALOGIES
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

HYDRAULIC EQUIPMENT
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane
[REPT-932-440-107] p 3168 N94-29543
Miniature linear-to-rotary motion actuator p 3163 N94-29647

HYDRAULIC FLUIDS
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612

HYDRAULIC JETS
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet p 3278 N94-29976

HYDROCARBON COMBUSTION
Prediction of prompt NO(x) in hydrocarbon air flames p 3190 N94-29250
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model p 3190 N94-29251
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Time-resolved measurements in a three dimensional model combustor p 3196 N94-29283
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
Measurements and predictions of the combustion characteristics of enclosed swirl-stabilized propane flames
[IECE-CFE-TR-001] p 3198 N94-30017

HYDROCARBON FUEL PRODUCTION
Researches on bioconversion of coal into liquid product p 3187 N94-28677
Structural changes during carbonization and oxidation of coal p 3187 N94-28678

HYDROCARBON FUELS
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679

HYDROCARBONS
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

HYDROCYANIC ACID
Toxicity of carbon monoxide-hydrogen cyanide gas mixtures: Exposure concentration, time-to-incapacitation, carboxyhemoglobin, and blood cyanide parameters
[DOT/FAA/AM-94/7] p 3395 N94-29919

HYDRODYNAMICS
Analysis of spark-induced bubble experiments using CALE
[DE94-003667] p 3270 N94-28476
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Interaction of multiple spark-generated bubbles in a compressible liquid
[AD-A275037] p 3272 N94-29149
Bulletin of National Research Institute of Fisheries Engineering, No. 13
[JTN-94-80596] p 3233 N94-29701
Numerical simulations of cluster cooling flows p 3544 N94-29725
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020

Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060

HYDROGEN
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
Fundamental studies of hydrogen interaction with supported meta and bimetallic catalysts
[DE94-004887] p 3202 N94-28562
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Fuels combustion research
[AD-A275122] p 3189 N94-29004
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
The far-infrared absorption spectrum of low temperature hydrogen gas
[ISBN-0-315-85432-4] p 3199 N94-30137
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

HYDROGEN ATOMS
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253

HYDROGEN BONDS
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021

HYDROGEN COMPOUNDS
Local Measurement of Tropospheric HO(x)
[NASA-CP-3245] p 3342 N94-28587
The radical amplifier p 3345 N94-28604

HYDROGEN EMBRITTLEMENT
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841

HYDROGEN FUELS
Computational and experimental results in high pressure combustions of H2/air and H2/O2/H2O p 3193 N94-29268
Research and development of ramjets/ramrockets. Part 3: The study of gaseous hydrogen ram combustors p 3152 N94-29298

HYDROGEN IONS
Variational calculation of the eigenpotential for H(sup -)-system
[DE94-606269] p 3407 N94-28622
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
A future, intense source of negative hydrogen ions p 3494 N94-30485
Dissociative recombination of H3(+)
[DE94-005356] p 3493 N94-30891

HYDROGEN MASERS
Accuracy metrics for judging time scale algorithms p 3471 N94-30656
Hydrogen masers and cesium fountains at NRC p 3297 N94-30664
A comparative study of clock rate and drift estimation p 3473 N94-30669
Hydrogen maser clocks in space for solid-Earth research and time-transfer applications: Experiment overview and evaluation of Russian miniature sapphire loaded cavity p 3474 N94-30676

HYDROGEN OXYGEN ENGINES
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments
[NASA-TM-106532] p 3271 N94-28835

HYDROGEN PLASMA
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752

HYDROGEN PRODUCTION
Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system p 3348 N94-29901
Biological conversion of synthesis gas
[DE94-005815] p 3340 N94-30879

HYDROGEN SULFIDE
Biological conversion of synthesis gas
[DE94-005815] p 3340 N94-30879

HYDROGEN-BASED ENERGY
Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system p 3348 N94-29901

HYDROGENATION
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD p 3223 N94-29518
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770

HYDROGRAPHY
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206
Tidal atlas software development
[AD-A275251] p 3377 N94-29432

HYDROLOGICAL CYCLE
Land surface interaction p 3350 N94-30621
Models of atmosphere-ecosystem-hydrology interactions: Approaches and testing p 3353 N94-30636

HYDROLOGY
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
Models of atmosphere-ecosystem-hydrology interactions: Approaches and testing p 3353 N94-30636

HYDROLOGY MODELS
Comprehensive system models: Strategies for evaluation p 3353 N94-30638

HYDROSTATIC PRESSURE
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
II-VI wide band gap semiconductors under hydrostatic pressure
[DE94-608106] p 3516 N94-30070

HYDROSTATICS
Four-dimensional data assimilation using the adjoint method p 3455 N94-30353
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings p 3311 N94-30792

HYDROTHERMAL SYSTEMS
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627

HYDROXIDES
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE94-004958] p 3200 N94-30769

HYDROXYL COMPOUNDS
The radiocarbon hydroxyl technique p 3344 N94-28600

HYDROXYL EMISSION
Mesopause winds and OH intensities at Mid-Latitudes-Fabry-Perot interferometer observations of the OH emission at 8430 A from bear lake observatory
[AD-A275246] p 3361 N94-29430

HYDROXYL RADICALS
Local Measurement of Tropospheric HO(x)
[NASA-CP-3245] p 3342 N94-28587
Two-Photon/Laser-Induced Fluorescence (TP/LIF) sensor p 3342 N94-28588
In situ detection of tropospheric OH and HO2 by laser-induced fluorescence in a detection chamber at low pressure p 3342 N94-28589
Tropospheric HO determination by FAGE p 3342 N94-28590
Detection of tropospheric OH and HO2 by laser-induced fluorescence at low pressure using the 308nm excitation of OH p 3343 N94-28591
Harvard ER-2 OH laser-induced fluorescence instrument p 3343 N94-28592
JPL Fourier transform ultraviolet spectrometer p 3343 N94-28593
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
UV laser long-path absorption spectroscopy p 3343 N94-28595
Measurement of tropospheric OH by laser long-path absorption spectroscopy p 3343 N94-28596
On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597
NOAA Aeronomy Laboratory long-path OH experiment, Fritz Peak Observatory, Colorado p 3344 N94-28598
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599
The active titration method for measuring local hydroxyl radical concentration p 3345 N94-28602
Tropospheric HO2 determination by FAGE p 3345 N94-28606
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260

HYPERBARIC CHAMBERS
Advanced seal delivery system life support parameters
[AD-A275304] p 3401 N94-29184

HYPERPLANES
The exact fitting problem in higher dimensions
[RUU-CS-92-37] p 3456 N94-30377
Perfect binary space partitions
[RUU-CS-93-23] p 3460 N94-30728

HYPERSONIC FLIGHT
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors p 3151 N94-29292
Turboramjet engines: Types and performances p 3151 N94-29293
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Potential of the ramjet engine for hypersonic flight speeds p 3153 N94-30935

HYPERSONIC FLOW
Numerical analysis of two dimensional/axisymmetric non-equilibrium hypersonic flow p 3125 N94-28963
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2 p 3125 N94-28966
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893

HYPERSONIC SPEED
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824
Potential of the ramjet engine for hypersonic flight speeds p 3153 N94-30935

HYPERSONIC VEHICLES
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
Expanding the waverider design space using arbitrary generating flowfields p 3148 N94-30516

HYPERSONIC WIND TUNNELS
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466

HYPERSONICS
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675

HYPERSPACES
Perfect binary space partitions
[RUU-CS-93-23] p 3460 N94-30728

HYPERSPHERES
The exact fitting problem in higher dimensions
[RUU-CS-92-37] p 3456 N94-30377

HYPERTHERMIA
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
Thermoregulation in the extreme cold environment p 3381 N94-28438

HYPERVELOCITY IMPACT
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383

HYPERVELOCITY PROJECTILES
Microwave Michelson interferometer system report of first use on a railgun, Green Farm, San Diego, CA
[DE94-005294] p 3289 N94-30059

HYPERVENTILATION
Emergency underwater breathing aids for helicopter passengers and crew p 3381 N94-28437

HYPOBARIC ATMOSPHERES
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497
Decompression sickness risk versus time and altitude [AD-A275261] p 3391 N94-29071
HYPOKINESIA
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866
HYPOTHERMIA
The Support of Air Operations under Extreme Hot and Cold Weather Conditions [AGARD-CP-540] p 3379 N94-28420
Fuelling shivering in humans during cold water immersion p 3379 N94-28426
Biochemical enhancement of cold tolerance p 3380 N94-28427
Treatment of mild immersion hypothermia by body-to-body and forced-air warming p 3380 N94-28428
Advanced integrated cold protection for aircrew p 3381 N94-28436
Emergency underwater breathing aids for helicopter passengers and crew p 3381 N94-28437
Thermoregulation in the extreme cold environment p 3381 N94-28438
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
Aeropathological diagnosis of lethal hypothermia p 3382 N94-28440
Rewarming methodologies in the field p 3382 N94-28441
A comparison of four methods of rewarming individuals cooled by immersion in cold water p 3382 N94-28442
HYPOTHESES
Selecting model complexity in learning problems [DE94-000764] p 3461 N94-30821
HYPOXIA
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
HYSTERESIS
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field [DE94-606851] p 3511 N94-28626
Butterfly and scaling law in YBa2Cu4O8 [DE94-006037] p 3519 N94-30338
Mathematical models of hysteresis [DE94-005681] p 3260 N94-30902

I

I BEAMS
Composite hot drape forming p 3240 N94-30448
IBM COMPUTERS
Early experiences with the IBM SP1 and the high-performance switch [DE94-006261] p 3429 N94-30840
IBM PERSONAL COMPUTERS
PAW using under MS DOS [DE94-608012] p 3406 N94-30081
ICE
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice [AD-A275149] p 3486 N94-29021
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment [AD-A275215] p 3357 N94-29070
On the temperature distribution near a cold surface [AD-A275162] p 3332 N94-29288
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
Propagation modeling of moist air and suspended water/ice particles at frequencies below 1000 GHz p 3256 N94-30497
ICE CLOUDS
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone [NASA-CR-195779] p 3347 N94-29549
ICE ENVIRONMENTS
Simulation of the effect of wind on clothing by measurements and calculations [PB94-132289] p 3399 N94-28406
Evaluation of life support equipment during an unsupported North Pole expedition p 3379 N94-28422
Thermoregulation in the extreme cold environment p 3381 N94-28438
A newly developed snow vehicle (SM100S) for Antarctica. Part 1: Necessity and process of the development p 3314 N94-29981
A newly developed snow vehicle (SM100S) for Antarctica. Part 2: Design of the system p 3314 N94-29982
ICE FLOES
The role of sea ice dynamics in global climate change p 3350 N94-30620
ICE FORMATION
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment [AD-A275215] p 3357 N94-29070
A toy model of sea ice growth p 3351 N94-30626
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions [PB94-142106] p 3136 N94-30890
ICE MAPPING
Sea ice and oceans applications of SAR p 3327 N94-28934
IDENTITIES
Identity: Quarrelling with an unproblematic notion [LP-93-04] p 3455 N94-30327
IFF SYSTEMS (IDENTIFICATION)
A cognitive model of decision making: Chunking and the radar detection device [AD-A275185] p 3242 N94-28859
Incorporating geometric constraints into rule-based systems using nonlinear optimization [AD-A275093] p 3452 N94-29063
IGNITERS
Catalytic ignitor for regenerative propellant gun [NASA-CASE-NPO-18987-1-CU] p 3225 N94-29490
IGNITION
Combustion studies under microgravity p 3228 N94-28940
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials [DE94-005072] p 3226 N94-30615
IGNITION SYSTEMS
The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts [REPT-932-430-113] p 3225 N94-29414
ILL-POSED PROBLEMS (MATHEMATICS)
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965
Computational methods for the shape shading problem [ISBN-0-315-85430-8] p 3421 N94-30136
ILLUMINANCE
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast [AD-A275332] p 3400 N94-28918
IMAGE ANALYSIS
A new method for recognizing quadric surfaces from range data and its application to telerobotics and automation, final phase [NASA-CR-195733] p 3408 N94-28825
Far ultraviolet images of the nighttime ionosphere [AD-A275083] p 3356 N94-28843
Image technology and information analysis of bone change with gravitational exposure p 3389 N94-28851
Environmental characterization for target acquisition. Analysis of thermal and visible imagery [AD-A275414] p 3242 N94-28862
Proceedings of the International Symposium on Remote Sensing [JTN-94-80578] p 3325 N94-28925
Image processing for hyperspectral data p 3326 N94-28930
JERS-1 data acquisition and distribution p 3326 N94-28931
JERS-1 data and information system for resources exploration p 3327 N94-28932
Application of optical sensor data to resource survey p 3330 N94-29223
Initial observation results with imaging riometer at NY-Alesund (L is equal to 16) p 3360 N94-29239
The extraction and representation of forest inventory information using continuous density surfaces [ISBN-0-315-85658-0] p 3334 N94-30236
Activities in machine vision at Imago Manufacturing Ltd. p 3308 N94-30297
VAS: A Vision Advisor System combining agents and object-oriented databases [AIAA PAPER 94-1181-CP] p 3440 N94-30532
Application of the Modular Automated Reconfigurable Assembly System (MARAS) concept to adaptable vision gauging and parts feeding [AIAA PAPER 94-1182-CP] p 3440 N94-30533
Vision based object pose estimation for mobile robots [AIAA PAPER 94-1197-CP] p 3442 N94-30548
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919
Multitemporal analysis of a braiding river: The advanced study of 1992 [NLR-TP-93100-U] p 3335 N94-30942
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery [TELECOM-93-E-006] p 3396 N94-30978
IMAGE CLASSIFICATION
Extrapolation of point data for resource mapping p 3334 N94-29959
A multiscale approach to image segmentation using Kohonen networks [RUU-CS-93-06] p 3438 N94-30349
Unsupervised texture image segmentation by improved neural network ART2 [AIAA PAPER 94-1199-CP] p 3442 N94-30549
Use of bad training data for better predictions [DE94-006233] p 3427 N94-30705
IMAGE CORRELATORS
Field methods to measure surface displacement and strain with the Video Image Correlation method [NASA-CR-195796] p 3316 N94-29724
IMAGE ENHANCEMENT
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536
Motion and structure from planar motion in noisy monocular image sequences p 3308 N94-30299
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461
IMAGE PROCESSING
Fusion of range and luminance data from laser radar systems [AD-A275608] p 3292 N94-28770
Image technology and information analysis of bone change with gravitational exposure p 3389 N94-28851
Aberrated point-spread functions and beam quality for optical systems with annular pupils [AD-A275311] p 3499 N94-28875
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties [AD-A275321] p 3377 N94-28877
Image processing for hyperspectral data p 3326 N94-28930
JERS-1 data acquisition and distribution p 3326 N94-28931
JERS-1 data and information system for resources exploration p 3327 N94-28932
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean [AD-A275121] p 3477 N94-29003
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region [AD-A275365] p 3499 N94-29009
Optimizing ray tracing with visual coherence [AD-A275218] p 3499 N94-29059
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system [AD-A275076] p 3329 N94-29095
The appearance of the Sun and Moon seen through clouds [AD-A275338] p 3551 N94-29212
The Image Digitizing System (IDS) [AD-A275341] p 3329 N94-29213
A new information system: Satellite observation p 3330 N94-29219
Application of optical sensor data to resource survey p 3330 N94-29223
Initial observation results with imaging riometer at NY-Alesund (L is equal to 16) p 3360 N94-29239
Digital camera with apparatus for authentication of images produced from an image file [NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Image-adapted visually weighted quantization matrices for digital image compression [NASA-CASE-ARC-12015-1] p 3406 N94-29375
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
Airside ground movements surveillance p 3141 N94-29585
Integer cosine transform for image compression p 3247 N94-29619
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
Field methods to measure surface displacement and strain with the Video Image Correlation method [NASA-CR-195796] p 3316 N94-29724
Stereo imaging based particle velocimeter [NASA-CR-195800] p 3289 N94-29742
Camera artifacts in IUE spectra [NASA-CR-189337] p 3198 N94-29857

Computer Assisted Medical Interventions: Application to Conformal Radiotherapy
[RR-912-I] p 3395 N94-30028
Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results
p 3395 N94-30029
Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Computational methods for the shape shading problem
[ISBN-0-315-85430-8] p 3421 N94-30136
Meso-optical Fourier transform microscope with double focusing
[DE94-607851] p 3290 N94-30148
Activities in machine vision at Imago Manufacturing Ltd. p 3308 N94-30297
Variable-resolution stereo matching
p 3308 N94-30298
Unmanned vehicle mobility: Limits of autonomous navigation p 3310 N94-30311
A multiscale approach to image segmentation using Kohonen networks
[RUU-CS-93-06] p 3438 N94-30349
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety
p 3314 N94-30442
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455
Analysis and an image recovery algorithm for ultrasonic tomography system p 3397 N94-30456
Design and control of active vision based mechanisms for intelligent robots
[AIAA PAPER 94-1196-CP] p 3442 N94-30547
Using stereoscopic imaging for visualization applications
[DE94-006247] p 3536 N94-30706
Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images
[TELECOM-93-D-016] p 3395 N94-30970
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-006] p 3396 N94-30978

IMAGE RECONSTRUCTION

Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
Reconstruction of stellar images from correlations
[ISBN-0-315-85382-4] p 3541 N94-30133
Computational methods for the shape shading problem
[ISBN-0-315-85430-8] p 3421 N94-30136
A locally synchronous globally asynchronous Vertex-8 processing element for image reconstruction on a mesh
[ISBN-0-315-86005-7] p 3432 N94-30143

IMAGE RESOLUTION

Optimizing ray tracing with visual coherence
[AD-A275218] p 3499 N94-29059
Image-adapted visually weighted quantization matrices for digital image compression
[NASA-CASE-ARC-12015-1] p 3406 N94-29375
Variable-resolution stereo matching
p 3308 N94-30298
Motion and structure from planar motion in noisy monocular image sequences p 3308 N94-30299
Thermal imaging for a mobile robot
p 3308 N94-30300
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791

IMAGES

The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
A unified framework for retrieval in image databases
p 3533 N94-29811
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857

IMAGING RADAR

Synthetic aperture radar applications: Now and in the future p 3260 N94-28927
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929

IMAGING SPECTROMETERS

Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779

IMAGING TECHNIQUES

Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations
[AD-A275459] p 3325 N94-28808
Image technology and information analysis of bone change with gravitational exposure
p 3389 N94-28851
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system
[AD-A275076] p 3329 N94-29095
Fundamentals of printing technology
[PB94-132602] p 3530 N94-29141
Seafloor characterization using texture
[AD-A275399] p 3377 N94-29204
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states
p 3294 N94-29531
Field methods to measure surface displacement and strain with the Video Image Correlation method
[NASA-CR-195796] p 3316 N94-29724
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Computer Assisted Medical Interventions: Application to Conformal Radiotherapy
[RR-912-I] p 3395 N94-30028
Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results
p 3395 N94-30029
Pre- and intra-radiotherapy multimodal image registration: Principles and first experiments
p 3395 N94-30030
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064
Study of the problems of nonuniformity of heating in infrared vision applied to the inspection of materials having non-planar relief
[ISBN-0-315-85637-8] p 3316 N94-30235
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
Thermal imaging for a mobile robot
p 3308 N94-30300
Analysis and an image recovery algorithm for ultrasonic tomography system p 3397 N94-30456
Calculation of turbulence degraded point spread function of an imaging system p 3260 N94-30514
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551
Using stereoscopic imaging for visualization applications
[DE94-006247] p 3536 N94-30706

IMPACT

The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
The impact of electrically charged microspheres with planar surfaces under vacuum conditions
p 3320 N94-29765

IMPACT DAMAGE

Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
Cockpit video: A low cost BDA source
[AD-A275228] p 3150 N94-29389

IMPACT MELTS

The thermal consequences of giant impacts in the early solar system p 3543 N94-29698

IMPACT RESISTANCE

Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets
[AD-A275462] p 3177 N94-28735
Air-deployable geophysics package
[DE94-005651] p 3335 N94-30594

IMPACT STRENGTH

On the dynamic mechanical behavior of 3-D integrated fabric reinforced composites
[AD-A275424] p 3177 N94-28865

IMPACT TESTS

Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
The impact of electrically charged microspheres with planar surfaces under vacuum conditions
p 3320 N94-29765
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975

IMPEDANCE MEASUREMENT

VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115

IMPELLERS

Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Numerical study on internal flows of centrifugal compressors p 3127 N94-28977
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550

IMPINGEMENT

Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546

IMPLOSIONS

Turbulence models and their application in implosion analyses with two-phase flow
[GKSS-92/E/98] p 3284 N94-30967
Numerical simulation and prediction of implosion phenomena
[GKSS-92/E/99] p 3284 N94-30968

IMPURITIES

Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
First principles pseudopotential calculations on aluminum and aluminum alloys
[DE94-004890] p 3206 N94-29931
Chemical composition of insoluble particles in superimposed ice on Storoeya, Svalbard (Sweden)
[CM-82] p 3336 N94-30944

IN SITU MEASUREMENT

X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777

INCENTIVES

TCM exemptions to promote alternative-fuel vehicles: The good, the bad, and the ugly
[DE94-005924] p 3311 N94-30703

INCINERATORS

Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938

INCLUSIONS

Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Analysis of pressureless densification of ceramic matrix composites p 3216 N94-29766
Method of test for cleanness assessment of metal alloys: The preparation of button specimens by electron beam melting and the characterisation of recovered inclusions
[NPL-DMM(A)-130] p 3210 N94-30796
A class of inclusion problems for the strengthening of brittle and ductile composites p 3186 N94-30959

INCOHERENT SCATTER RADAR

Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869

INCOMPRESSIBLE FLOW

Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475

Large eddy simulations using lattice Boltzmann algorithms
[DE94-005666] p 3270 N94-28549
Numerical analysis of incompressible viscous flow around a bubble p 3126 N94-28968
The upsilon-q method and the psi-q method for incompressible flows p 3126 N94-28971
Theoretical study of the incompressible Navier-Stokes equations by the least-squares method
[NASA-TM-106535] p 3272 N94-29096
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Numerical solution of 3-D Navier-Stokes equations in vorticity-velocity form for incompressible flows p 3276 N94-29843
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865

INCOMPRESSIBLE FLUIDS
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689

INCONEL (TRADEMARK)
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840

INDENTATION
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226
Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693

INDEPENDENT VARIABLES
A variable selection heuristic for solid rocket motor design p 3173 N94-29544

INDEXES (DOCUMENTATION)
Aeronautical engineering: A cumulative index to a continuing bibliography (supplement 300)
[NASA-SP-7037(300)] p 3121 N94-28537
Catalog of Air Force weather technical publications 1992-1993
[AD-A275635] p 3368 N94-28638
TRADOC library and information network (TRALINET). Union list of periodicals (TULIP)
[AD-A275263] p 3529 N94-28903
Index of NPL acoustics publications 1981-1990
[NPL-RSA(EXT)-0044] p 3480 N94-30786

INDIUM ALLOYS
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710

INDIUM ANTIMONIDES
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A275079] p 3512 N94-28872
The growth of InAsSb/InGaAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE94-005576] p 3518 N94-30316

INDIUM ARSENIDES
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3282 N94-28687
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems
[AD-A275745] p 3511 N94-28734
Photoelectronic study of GaAs epilayers and In(x)Ga(1-x)As/GaAs quantum wells
[ISBN-0-315-85756-0] p 3518 N94-30239
The growth of InAsSb/InGaAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE94-005576] p 3518 N94-30316
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592

INDIUM COMPOUNDS
Synthesis and molecular structures of R(Me3CCH2)2In-E(SiMe3) (R = Me3CCH2, E = P or As; R = Me, E = P)
[AD-A275020] p 3486 N94-29131
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
Monolithic in-based III-V compound semiconductor focal plane array cell with single stage CCD output
[NASA-CASE-NPO-18978-1-CU] p 3265 N94-29488

INDIUM PHOSPHIDES
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793

INDOOR AIR POLLUTION
Human requirements to the indoor air quality and the thermal environment p 3232 N94-29600
Theory of age distribution p 3232 N94-29602
Computational fluid dynamics in ventilation: Practical approach p 3233 N94-29611
Brief summary of accomplishments since our DOE-sponsored radon project commenced
[DE94-004643] p 3348 N94-29926
Using spacecraft trace contaminant control systems to cure sick building syndrome p 3354 N94-30470

INDUCTION (MATHEMATICS)
Bisimulations and predicate logic
[CWI-CS-R9333] p 3460 N94-30735
A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753

INDUCTORS
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444

INDUSTRIAL MANAGEMENT
Realizing the productivity potential of expeditious operations
[PB94-135555] p 3230 N94-29188
Agile manufacturing: The factory of the future
[AIAA PAPER 94-1184-CP] p 3440 N94-30534

INDUSTRIAL PLANTS
Agile manufacturing: The factory of the future
[AIAA PAPER 94-1184-CP] p 3440 N94-30534

INDUSTRIAL SAFETY
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159
Computational fluid dynamics in ventilation: Practical approach p 3233 N94-29611

INDUSTRIES
Spin-off companies as agents of technology transfer: An empirical study of the spin-off companies of the Technical Research Centre of Finland
[PB94-132248] p 3537 N94-28405
Nuclear energy related research
[DE94-606286] p 3494 N94-28623
Application of high-speed milling to the Finnish manufacturing industry
[PB94-135548] p 3230 N94-29187
Industrial ventilation p 3232 N94-29604
Scientific and technical information transfer: Promoting information acquisition in the Saudi Arabian industrial sector p 3532 N94-29803

INELASTIC COLLISIONS
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980

INELASTIC SCATTERING
Results on structure functions from fixed-target experiments
[DE94-005233] p 3482 N94-28541
Determination of the neutron spin-structure function
[DE94-005234] p 3483 N94-28542
Simulation of experiments on deep inelastic scattering of muons on superconducting magnetic toroidal spectrometer STORS
[DE94-606267] p 3483 N94-28554
Physics at HERA
[DE94-005117] p 3483 N94-28569
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory
[DE94-606442] p 3484 N94-28610
Numerical solution of the multichannel scattering problem
[DE94-606297] p 3484 N94-28619
Optical field ionization of atoms and ions using ultrashort laser pulses
[DE94-006643] p 3488 N94-29845

INEQUALITIES
Representations of dynamical systems described by behavioral inequalities
[AD-B173649] p 3458 N94-30402

INERTIAL CONFINEMENT FUSION
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

INERTIAL FUSION (REACTOR)
The induction approach to heavy ion inertial fusion: Accelerator and target considerations
[DE94-005216] p 3494 N94-28507
A review of the ablative stabilization of the Rayleigh-Taylor instability in regimes relevant to ICF
[DE94-005809] p 3509 N94-30597
Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830

INFERENCE
Index expression belief networks for information disclosure
[TR-92-23] p 3465 N94-30358

INFLATABLE STRUCTURES
Analysis and design of inflatable aerospace structures p 3403 N94-30799

INFLUENCE COEFFICIENT
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018

INFORMATION
Temporal and qualitative decomposition of plausible reasoning
[AD-A275073] p 3398 N94-29154
A conceptual language for the description and manipulation of complex information models
[TR-92-34] p 3423 N94-30344

INFORMATION DISSEMINATION
NASA space and Earth science data on CD-ROM
[NASA-TM-109709] p 3528 N94-28414
Defense Technical Information Center cataloging guidelines
[AD-A275100] p 3529 N94-28911
Information center assessment p 3533 N94-29855
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 23: The communications practices of US aerospace engineering faculty and students: Results of the phase 3 survey
[NASA-TM-109085] p 3534 N94-30149
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 22: US academic librarians and technical information specialists as information intermediaries: Results of the phase 3 survey
[NASA-TM-109067] p 3534 N94-30150
DOE New Technology: Sharing New Frontiers, April 1, 1993 - September 30, 1993
[DE93-041289] p 3535 N94-30699
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934

INFORMATION FLOW
A streamlined software environment for situated skills
[AIAA PAPER 94-1205-CP] p 3444 N94-30556

INFORMATION MANAGEMENT
The program for catalogization of magnetic tapes in EXCHARM experiment
[DE94-606271] p 3528 N94-28615
Software systems reengineering process model, version 1.0
[AD-A275711] p 3407 N94-28691
NASA Parts Program Office responsibilities p 3165 N94-28702
A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center
[NASA-TM-108438] p 3529 N94-28820
Engineering document management system
[PB94-136934] p 3530 N94-29172
Application of information management methodologies for project quality improvement in a changing environment p 3416 N94-29342
Information center assessment p 3533 N94-29855
Smart Document System (SDS) used in managing DOE order's with electronic Engineering Procedures
[DE94-005076] p 3534 N94-30099
The evolution of information management
[DE94-004173] p 3535 N94-30179
COSMIC monthly progress report
[NASA-CR-195809] p 3422 N94-30273

INFORMATION PROCESSING (BIOLOGY)
Temporal and qualitative decomposition of plausible reasoning
[AD-A275073] p 3398 N94-29154
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Analysis of various biological activity parameters during parabolic flight p 3393 N94-29716

INFORMATION RETRIEVAL
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28896
Enhancing performance of full-text retrieval systems using relevance feedback p 3532 N94-29806
Pausing behavior of end-users in online searching p 3533 N94-29960
Computer-based linking of thesauri p 3534 N94-29961
Index expression belief networks for information disclosure
[TR-92-23] p 3465 N94-30358

Information-seeking in hypertext: Multiple access methods in a full-text hypertext database p 3536 N94-30918

INFORMATION SYSTEMS
User-centered guidelines for environmental management
[DE94-004313] p 3341 N94-28454
TRADOC library and information network (TRALINET). Union list of periodicals (TULIP)
[AD-A275263] p 3529 N94-28903
Defense Technical Information Center cataloging guidelines
[AD-A275100] p 3529 N94-28911
A comparison of three aircraft attitude display symbology structures
[AD-A275172] p 3150 N94-29048
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Designing and maintaining decision-making processes p 3412 N94-29318
Information engineering implementation and acceptance p 3530 N94-29533
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613
Evaluation of the Resource Library System in Finland
[PB94-137734] p 3532 N94-29682
RIPE integrity primitives, part 1 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9324-PT-1] p 3252 N94-29692
RIPE integrity primitives, part 2 (RACE Integrity Primitives Evaluation)
[CWI-CS-R9325-PT-2] p 3252 N94-29693
Information center assessment p 3533 N94-29855
COSMIC monthly progress report
[NASA-CR-195809] p 3422 N94-30273
Modelling the evolution of information systems
[TR-92-36] p 3535 N94-30329
Towards a general theory for the evolution of application domains
[TR-92-22] p 3535 N94-30357
Evolving information systems: Meeting the ever-changing environment
[TR-92-24] p 3535 N94-30359
A general theory for the evolution of application domains
[TR-92-26] p 3535 N94-30360
A framework for comparing conceptual modelling languages
[TR-92-29] p 3535 N94-30361
A note on schema equivalence
[TR-92-30] p 3535 N94-30362
Information-seeking in hypertext: Multiple access methods in a full-text hypertext database p 3536 N94-30918
Measuring the impact of investments in information technologies on business performance
[REPT-93-056] p 3536 N94-30929
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934

INFORMATION THEORY
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634
Fast and efficient variable-to-fixed-length coding algorithm
[PB94-125465] p 3424 N94-30400
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
Relations between varieties of Kolmogorov complexities
[CWI-CS-R9329] p 3427 N94-30732

INFORMATION TRANSFER
NASA Parts Project Office: Basic goals p 3166 N94-28703
Technology transfer initiatives
[NASA-CR-195151] p 3537 N94-29410
Scientific and technical information transfer: Promoting information acquisition in the Saudi Arabian industrial sector p 3532 N94-29803
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 23: The communications practices of US aerospace engineering faculty and students: Results of the phase 3 survey
[NASA-TM-109085] p 3534 N94-30149
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 22: US academic librarians and technical information specialists as information intermediaries: Results of the phase 3 survey
[NASA-TM-109067] p 3534 N94-30150

INFRARED ABSORPTION
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608
Analysis of infrared radiation heating process considering chemical reaction of material to be heated
[DE94-744116] p 3199 N94-30267

INFRARED ASTRONOMY
Infrared observations of cometary dust by COBE p 3541 N94-29994

INFRARED DETECTORS
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems
[AD-A275745] p 3511 N94-28734
High Tc superconducting bolometric and nonbolometric infrared (IR) detectors
[NASA-CR-195728] p 3262 N94-28846
Thermal variation in vegetated or snow-covered background scenes and its effect on passive infrared systems
[AD-A275174] p 3325 N94-28849
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A275079] p 3512 N94-28872
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects p 3326 N94-28926
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators
[AD-A275235] p 3263 N94-29028
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Micromachined electron tunneling infrared sensors p 3238 N94-29785
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals p 3321 N94-29808

INFRARED IMAGERY
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892
Study of the problems of nonuniformity of heating in infrared vision applied to the inspection of materials having non-planar relief
[ISBN-0-315-85637-8] p 3316 N94-30235
Dual-band infrared imaging for quantitative corrosion detection in aging aircraft
[DE94-004187] p 3149 N94-30687

INFRARED INSPECTION
Study of the problems of nonuniformity of heating in infrared vision applied to the inspection of materials having non-planar relief
[ISBN-0-315-85637-8] p 3316 N94-30235

INFRARED INSTRUMENTS
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607

INFRARED INTERFEROMETERS
Toward astrometric tracking with the infrared spatial interferometer p 3249 N94-29653

INFRARED LASERS
Reactor-pumped laser experimental results
[DE94-005247] p 3292 N94-28482

INFRARED RADIATION
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Infrared observations of cometary dust by COBE p 3541 N94-29994
Analysis of infrared radiation heating process considering chemical reaction of material to be heated
[DE94-744116] p 3199 N94-30267
The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498
Multispectral transmittance measurements through man-made water fogs p 3257 N94-30499
Global approach towards the evaluation of thermal infrared countermeasures p 3258 N94-30504

INFRARED RADIOMETERS
Rock identification using thermal infrared data p 3331 N94-29228
Optical Chopper Assembly for the Mars Observer p 3162 N94-29639

INFRARED SIGNATURES
An experimental and comprehensive method to measure emission characteristics p 3257 N94-30501
Experimental evaluation of camouflage effectiveness in the thermal infrared p 3257 N94-30502
Infrared polarization signatures p 3258 N94-30506

INFRARED SPACE OBSERVATORY (ISO)
ISO overview: General presentation of the satellite, cryogenic aspects
[REPT-932-440-102] p 3231 N94-29416

INFRARED SPECTRA
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Inter-comparison of Wildfire and High-resolution Interferometer Sounder (HIS) data from STORM-FEST: An investigation of wildfire spectral channel discrepancies
[NASA-TM-108439] p 3333 N94-29553
The far-infrared absorption spectrum of low temperature hydrogen gas
[ISBN-0-315-85432-4] p 3199 N94-30137

INFRARED SPECTROMETERS
MODIS technical report series. Volume 3: MODIS airborne simulator level 1B data user's guide
[NASA-TM-104594] p 3231 N94-29385
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779

INFRARED SPECTROSCOPY
Temperature depencence of the far infrared optical constants of polyethylene
[PB94-124336] p 3213 N94-28795

INFRARED STARS
A near-infrared survey of the star forming region NGC 2264 p 3540 N94-29971

INHIBITORS
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189
Four advances in carbon-carbon materials technology p 3186 N94-30481

INITIATORS (EXPLOSIVES)
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429

INJECTION MOLDING
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955

INJECTORS
Ducted kerosene spray flames p 3195 N94-29276
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29385
Laminar Flow Supersonic Wind Tunnel primary air injector p 3158 N94-29649

INJURIES
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150

INLET AIRFRAME CONFIGURATIONS
Numerical study on the interaction between scramjet engine modules caused by thermal choke p 3125 N94-28960

INLET FLOW
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Scramjet CFD methods and analysis. Part 1: Scramjet CFD methods. Numerical simulation of the flow in scramjet duct p 3152 N94-29296

INLET TEMPERATURE
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227

INOCULATION
New inoculants for ductile cast iron
[PB94-138476] p 3206 N94-29947

INORGANIC COATINGS
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053

INPUT/OUTPUT ROUTINES
Operation semantics with read and write frames
[PB94-138138] p 3529 N94-29108
I/O on the Tera file system
[AD-A275278] p 3530 N94-29182
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404
The beauty and the beast
[TR-93-03] p 3423 N94-30331
Efficient bounded timestamping using traceable use abstraction: Is writer's guessing better than reader's telling?
[RUU-CS-93-28] p 3426 N94-30489

INSERTS
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts p 3186 N94-30482

INSOLATION
Advanced development of PV encapsulents
[DE94-000219] p 3336 N94-28500
INSPECTION
MSFC inspections of installed polyimide wire
p 3166 N94-28707
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929
Radar jet engine health monitoring project
[ASSGI-301] p 3153 N94-30130
Teleoperated systems for nuclear reactors: Inspection and maintenance
[AIAA PAPER 94-1176-CP] p 3439 N94-30528
Technology for robotic surface inspection in space
[AIAA PAPER 94-1193-CP] p 3442 N94-30544
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Automation for nondestructive inspection of aircraft
[AIAA PAPER 94-1223-CP] p 3446 N94-30572
Automated inspection of turbine blades: Challenges and opportunities
[AIAA PAPER 94-1226-CP] p 3446 N94-30575
INSTALLING
System for the installation and replacement of components in hostile environments
[NASA-CASE-LEW-14906-1-SB] p 3300 N94-29427
Installation of experimental mode-S data link in commercial aircraft
[PB94-138757] p 3254 N94-29998
INSTRUMENT APPROACH
Key cognitive issues in the design of electronic displays of instrument approach procedure charts
[AD-A275647] p 3399 N94-28649
INSTRUMENT ERRORS
Inter-comparison of Wildfire and High-resolution Interferometer Sounder (HIS) data from STORM-FEST: An investigation of wildfire spectral channel discrepancies
[NASA-TM-108439] p 3333 N94-29553
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399
A comparative study of clock rate and drift estimation
p 3473 N94-30669
Systematic error estimation in multisensor fusion systems
[AD-B179298] p 3428 N94-30764
INSTRUMENT FLIGHT RULES
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189
INSTRUMENT LANDING SYSTEMS
Los Angeles international airport instrument landing system approach data collection and reduction, phase 1
[AD-A275115] p 3136 N94-28914
Ground independent landing system
p 3137 N94-29564
INSTRUMENT PACKAGES
The Pluto fast flyby mission: Completing the reconnaissance of the solar system
p 3235 N94-29768
Air-deployable geophysics package
[DE94-005651] p 3335 N94-30594
INTEGRAL EQUATIONS
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965
A note on the Poisson brackets associated with Lax operators
[MATHS-REPT-A-195] p 3464 N94-29482
Integral equation analysis of composite bodies of revolution and arbitrary surfaces with application to cavity-backed antennas p 3253 N94-29883
A spectral boundary integral equation method for the 2-D Helmholtz equation
[NASA-CR-194890] p 3454 N94-30207
Modal analysis of solar panels using boundary integral equations
[NLT-TP-92218-U] p 3338 N94-30328
INTEGRAL ROCKET RAMJETS
Research and development of ramjets/ramrockets. Part 2: Integral liquid fuel ramjets p 3152 N94-29297
Research and development of ramjets/ramrockets. Part 3: The study of gaseous hydrogen ram combustors
p 3152 N94-29298
INTEGRALS
Path integral for coherent states of the dynamical U(sub 2) group and U(sub 2/1) supergroup
[DE94-606382] p 3466 N94-28785
INTEGRATED CIRCUITS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Exploratory research for a high temperature superconducting integrated circuit
[AD-A275798] p 3262 N94-28767
Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
A locally synchronous globally asynchronous Vertex-8 processing element for image reconstruction on a mesh
[ISBN-0-315-86005-7] p 3432 N94-30143
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
A bipolar analog front-end integrated circuit for the SDC silicon tracker
[DE94-005203] p 3267 N94-30711
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717
INTEGRATED OPTICS
A new guided wave lens structure and its application
[AD-A275541] p 3499 N94-28813
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
INTEGRATORS
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467
INTELSAT SATELLITES
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646
INTERACTING GALAXIES
Stellar and gas dynamics of interacting ring galaxies
p 3548 N94-30340
INTERACTIONAL AERODYNAMICS
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
RNS optimization procedure for three-dimensional composite velocity multi-block applications
p 3273 N94-29534
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight
p 3131 N94-29826
Aerodynamic analysis of slipstream/wing/nacelle interference for preliminary design of aircraft configurations
[AD-B173651] p 3135 N94-30916
INTERACTIVE CONTROL
Work-oriented development of interactive software tools: Understanding the work of software maintainers and making an interactive software tool for them
[PB94-132032] p 3406 N94-28401
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety
p 3314 N94-30442
INTERCALATION
Graphite intercalation compounds prepared from graphite fluoride
[NASA-TM-106447] p 3174 N94-28924
INTERFACIAL TENSION
Surface tension of tin and its alloys with particular reference to solders
[PB94-138302] p 3204 N94-29119
INTERFERENCE FIT
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
INTERFEROMETERS
Innovative direct detection range-Doppler laser radar
[AD-A275619] p 3292 N94-28635
Radar estimations of atmospheric winds in the troposphere and lower stratosphere
p 3370 N94-29697
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699
A sounding rocket program in extreme and far ultraviolet interferometry
[NASA-CR-195114] p 3289 N94-29907
INTERFEROMETRY
Longitudinal effects and intensity-phase coupling in distributed feedback semiconductor lasers
p 3294 N94-29590
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060
INTERLAMINAR STRESS
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family
[REPT-932-600-107] p 3179 N94-29462
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
INTERLAYERS
Development of a new chemical warfare agent protective material p 3381 N94-28432
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Effect of microstructure on the strength and fracture energy of bimaterial interfaces
[AD-A274987] p 3178 N94-29126
Intra- versus interlayer pairing in the copper oxide superconductors: Response to a magnetic field
[DE94-005475] p 3521 N94-30898
INTERMETALLICS
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma
p 3211 N94-29516
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
INTERNAL COMBUSTION ENGINES
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
In-cylinder gas velocity measurements comparing crankcase and blower scavenging in a fired two-stroke cycle engine
[DE94-005752] p 3311 N94-30596
INTERNAL FRICTION
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
INTERNATIONAL COOPERATION
US/Japan cooperation in high energy physics
[DE94-005376] p 3494 N94-28486
Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel
p 3188 N94-28683
Protocol on environmental protection to the Antarctic Treaty and its annexes: International agreement on the comprehensive measures for the protection of Antarctic environment and ecosystems p 3354 N94-29086
Second Japan-U.S. Workshop on Global Change: Environmental Response Technologies for Global Change (Mitigation and Adaptation) p 3354 N94-29522
European PTTI report p 3468 N94-30642
INTERNATIONAL LAW
Protocol on environmental protection to the Antarctic Treaty and its annexes: International agreement on the comprehensive measures for the protection of Antarctic environment and ecosystems p 3354 N94-29086
INTERNATIONAL SUN EARTH EXPLORER 1
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data
[NASA-CR-195119] p 3507 N94-30126

Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128

INTERNATIONAL SYSTEM OF UNITS
SI (Metric) handbook
[NASA-TM-109197] p 3231 N94-29376

INTERNETS
Learning about the Internet bibliography and beginners' guide
[AD-A275205] p 3430 N94-29051
The NIST Internet time service p 3475 N94-30678

INTERPLANETARY NAVIGATION
Enhanced orbit determination filter: Inclusion of ground system errors as filter parameters p 3159 N94-29656

INTERPOLATION
Upwind method using local interpolation p 3128 N94-28982
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406
Noise and drift analysis of non-equally spaced timing data p 3472 N94-30667
Spatial interpolation, network bias, and terrestrial air temperature variability p 3374 N94-30810

INTERPROCESSOR COMMUNICATION
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905
Model-oriented analysis of a communications protocol
[PB94-138146] p 3244 N94-29109
Invariants, frames and postconditions: A comparison of two formal specification notations
[PB94-138153] p 3405 N94-29110
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
Space reclamation for uncoordinated checkpointing in message-passing systems
[NASA-CR-195761] p 3420 N94-29906
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411
MANIFOLD version 1.0 programming: Programs and problems
[CWI-CS-R9334] p 3425 N94-30428
Manray: A replicated workers program in MANIFOLD
[CWI-CS-R9337] p 3433 N94-30429
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
Parallel iteration across the steps of high order Runge-Kutta methods for nonstiff initial value problems
[CWI-NM-R9313] p 3433 N94-30730

INTERSTELLAR EXTINCTION
Dust in the Small Magellanic Cloud
[NASA-CR-195764] p 3543 N94-29696
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
Multicolor photometry of barred spiral galaxies p 3541 N94-30270

INTERSTELLAR GAS
The kinematics of molecular gas and dust in the nearby galaxies Centaurus A and M82 p 3544 N94-29738
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821

INTERSTELLAR MATTER
Dust in the Small Magellanic Cloud
[NASA-CR-195764] p 3543 N94-29696
The kinematics of molecular gas and dust in the nearby galaxies Centaurus A and M82 p 3544 N94-29738

INTERSTITIALS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525

INTERVALS
A characterization of graphs with interval two-step graphs
[AD-A275652] p 3451 N94-28651

INVARIANCE
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758

INVENTIONS
DOE New Technology: Sharing New Frontiers, April 1, 1993 - September 30, 1993
[DE93-041289] p 3535 N94-30699

INVERSE KINEMATICS
Design and construction of the Aerobot Robotic Manipulator (ARM)
[AD-A275362] p 3298 N94-28894
Kinematics and force analysis of a robot hand based on an artificial biological control scheme p 3313 N94-30957

INVERSIONS
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002

INVISCID FLOW
Numerical simulation of supersonic flow around space plane with engine installed p 3125 N94-28961
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208

IO
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621

IODINE
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation p 3188 N94-28681

ION ACCELERATORS
The induction approach to heavy ion inertial fusion: Accelerator and target considerations
[DE94-005216] p 3494 N94-28507
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
McMaster accelerator facility p 3496 N94-30217
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

ION ACOUSTIC WAVES
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
Eigenmode analysis of the destabilized ion acoustic mode in tokamaks
[PPL-142] p 3507 N94-30158

ION ATOM INTERACTIONS
Energetic heavy-ion tracks in micron sites p 3495 N94-30213

ION BEAMS
The induction approach to heavy ion inertial fusion: Accelerator and target considerations
[DE94-005216] p 3494 N94-28507
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
A transmission-loss monitor using current transformers
[DE94-003974] p 3267 N94-30716
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

ION CURRENTS
A future, intense source of negative hydrogen ions p 3494 N94-30485
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773

ION CYCLOTRON RADIATION
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917

ION DISTRIBUTION
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127

ION EMISSION
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
X ray emission scaling and energy balance of small gas-puff Z-pinch p 3505 N94-29077

ION ENGINES
Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546

ION EXCHANGING
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
A new material for removing heavy metals from water p 3354 N94-30471

ION IMPACT
Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546

ION IMPLANTATION
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Density reduction: A mechanism for amorphization at high ion doses
[DE94-004793] p 3483 N94-28559
Silicon germanium carbon heteroepitaxial growth on silicon
[AD-A275197] p 3512 N94-28889
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
Synthesis of (SiC)3N4 thin films by ion implantation
[DE94-006311] p 3521 N94-30851

ION IRRADIATION
Ion damage studies in GaAs/Al(0.6)Ga(0.4)As/GaAs heterostructures
[DE94-005384] p 3521 N94-30894

ION PROPULSION
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355

ION RECOMBINATION
Dissociative recombination of H3(+)
[DE94-005356] p 3493 N94-30891

ION SCATTERING
Pulse height response of Si surface barrier detectors p 3497 N94-30221

ION SOURCES
A future, intense source of negative hydrogen ions p 3494 N94-30485
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

ION TEMPERATURE
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171

IONIC COLLISIONS
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry
[DE94-006208] p 3207 N94-30024

IONIC DIFFUSION
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787

IONIC REACTIONS
Low energy ion-molecule reactions and chemiionization kinetics
[DE94-005414] p 3481 N94-28491

Relativistic heavy ion research
[DE94-004701] p 3484 N94-28576

IONIZATION
Energy losses of fast charged particles in thin silicon detectors
[DE94-606065] p 3483 N94-28552
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481
Fast precise algorithm for simulation of ionization energy losses
[DE94-608010] p 3421 N94-30080

IONIZATION CROSS SECTIONS
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788

IONIZING RADIATION
Response of GaAs charge storage devices to transient ionizing radiation
[DE94-005273] p 3510 N94-28484
Recent results from testing fast ADCs
[DE94-005565] p 3406 N94-30004
Role of x ray-induced transcripts in adaptive responses following x rays
[DE94-005412] p 3386 N94-30895

IONOSPHERIC DISTURBANCES
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891

IONOSPHERIC ELECTRON DENSITY
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014

IONOSPHERIC ION DENSITY
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869

IONOSPHERIC PROPAGATION
Ionospheric corrections to precise time transfer using GPS p 3145 N94-30677

IONOSPHERIC SOUNDING
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Aurora stereo observation in Iceland
p 3359 N94-29234

IONS
Ion-assisted tropospheric OH measurement technique
p 3344 N94-28601
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
Brief summary of accomplishments since our DOE-sponsored radon project commenced
[DE94-004643] p 3348 N94-29926
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

IRIDIUM
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097

IRON
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619

IRON ALLOYS
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
New inoculants for ductile cast iron
[PB94-138476] p 3206 N94-29947
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690
Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707

IRON CHLORIDES
Graphite intercalation compounds prepared from graphite fluoride
[NASA-TM-106447] p 3174 N94-28924

IRON COMPOUNDS
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848

IRON ISOTOPES
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717

IRON 57
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774

IRRADIANCE
The automated rotating shadowband spectroradiometer
[DE94-001878] p 3269 N94-28464

IRRADIATION
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene
[NASA-TM-106460] p 3213 N94-28922
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators
[AD-A275235] p 3263 N94-29028
Induced crystallization in CW laser-irradiated sol-gel deposited titania films
[DE94-006527] p 3207 N94-30062
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201

ISING MODEL
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109
Some results on the phase diagram of the antiferromagnetic Potts model in an external magnetic field
[DE94-608115] p 3468 N94-30110
Magnetic properties of the three dimensional Ising model with interface single-ion anisotropy
[DE94-608116] p 3525 N94-30164
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165
The bond diluted spin-1 Blume-Emery-Griffiths model in a transverse field
[DE94-608121] p 3525 N94-30167
Magnetic properties of a transverse spin-1 Ising model with random crystal field interactions
[DE94-608117] p 3517 N94-30181

ISOMERS
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039

ISOMORPHISM
Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431
Remarks on uniformly finitely precomplete positive equivalences
[ML-93-12] p 3463 N94-30975

ISOTHERMAL LAYERS
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288

ISOTOPES
Interannual-decadal variability in tropical climate systems: Stable isotope records and general circulation model experiments p 3373 N94-29962

ISOTOPIC LABELING
Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle
p 3367 N94-30917

ISOTROPIC TURBULENCE
Spherical model for turbulence p 3274 N94-29730

ISRAEL
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168

ITERATION
Gaussian beam and physical optics iteration technique for wideband beam waveguide feed design
p 3248 N94-29624
Iterative procedure as equation of motion
[DE94-608008] p 3453 N94-30078
Categorial generalization of algebraic recursion theory
[ML-93-06] p 3456 N94-30382
Parallel iteration across the steps of high order Runge-Kutta methods for nonstiff initial value problems
[CWI-NM-R9313] p 3433 N94-30730
On the unification free PROLOG programs
[CWI-CS-R9331] p 3427 N94-30733

ITERATIVE SOLUTION
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Approximation methods for nonlinear operator equations of the m-accretive type
[DE94-608099] p 3467 N94-30065
Iterative procedure as equation of motion
[DE94-608008] p 3453 N94-30078
Calculus of variations applied to 2D multi-point airfoil design
[PB94-125457] p 3133 N94-30401
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design
[NLR-TP-92524-U] p 3134 N94-30493

IUE
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857

J

J INTEGRAL
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856

J-85 ENGINE
Radar jet engine health monitoring project
[ASSGI-301] p 3153 N94-30130

JACOBI INTEGRAL
Method of Chabauty-Coleman and the second case of Fermat's last theorem for regular primes
[PB94-138187] p 3467 N94-29162

JACOBI MATRIX METHOD
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-1255722-U] p 3281 N94-30743

JAMMING
Spurs in digital radio frequency memory and applications of DRFM
[AD-A275013] p 3243 N94-28897

JAPAN
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel
p 3188 N94-28683

JAPANESE SPACECRAFT
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects
p 3326 N94-28926
JERS-1 data acquisition and distribution
p 3326 N94-28931
Outline of JERS-1 system p 3330 N94-29220
Observatory system of Earth Resources Satellite-1
p 3330 N94-29221
Application of remote sensing techniques in petroleum exploration: The Indonesian experience
p 3331 N94-29225
Japan's Earth observation satellite programs
p 3332 N94-29232

JET AIRCRAFT
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005

JET ENGINE FUELS
High temperature fuel requirements and payoffs
p 3192 N94-29259
High temperature resistant jet fuels
p 3192 N94-29260

Research and development of high thermal stability fuels p 3192 N94-29261
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262
The effect of incomplete fuel-air mixing on the lean limit and emissions characteristics of a Lean Prevaporized Premixed (LPP) combustor p 3193 N94-29265
Endothermic fuels for hypersonic aviation p 3197 N94-29285
Liquid atomization in supersonic flows p 3276 N94-29839

JET ENGINES
Combustion for future supersonic transport propulsion p 3190 N94-29249
Automated inspection of turbine blades: Challenges and opportunities
[AIAA PAPER 94-1226-CP] p 3446 N94-30575

JET FLOW
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985
Lifted turbulent jet flames p 3198 N94-29676
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet p 3278 N94-29976
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953

JET IMPINGEMENT
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973

JET MIXING FLOW
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
The mixing process in the quenching zone of the rich-lean-combustion concept p 3196 N94-29281
Temperature and combustion analysis of combustor with acoustically controlled primary zone air-jet mixing p 3196 N94-29284
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor p 3152 N94-29300

JET PROPULSION
Combustion for future supersonic transport propulsion p 3190 N94-29249

JETS
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-005596] p 3482 N94-28531

JOINTS (JUNCTIONS)
Mechanical flexible joint design document
[NASA-CR-193941] p 3297 N94-28419
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367
Method and apparatus for indicating disbonds in joint regions
[NASA-CASE-LAR-14626-1] p 3315 N94-29548

JOSEPHSON JUNCTIONS
Exploratory research for a high temperature superconducting integrated circuit
[AD-A275798] p 3262 N94-28767
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082

JOURNAL BEARINGS
Effects of diffusion and inertia on chaotic mixing: A computational and experimental study p 3488 N94-29903

JP-8 JET FUEL
Research and development of high thermal stability fuels p 3192 N94-29261

JUDGMENTS
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464

JUNCTION DIODES
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906

JUNCTION TRANSISTORS
Effects of oxide charge and surface recombination velocity on the excess base current of BJT's
[DE94-003711] p 3263 N94-29025

JUPITER (PLANET)
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621

JUPITER ATMOSPHERE
Observation of Jovian auroral Ly-alpha line profile and emission variability with a sounding rocket and the IUE archives p 3550 N94-30798

K

K LINES
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827

K-EPSILON TURBULENCE MODEL
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries p 3154 N94-29255

KALMAN FILTERS
An improved conscan algorithm based on a Kalman filter p 3251 N94-29670
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time p 3144 N94-30651
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657
A comparison of GPS broadcast and DMA precise ephemerides p 3145 N94-30660
Application of the extended Kalman filter to the estimation of the char mass in a fluidized bed combustor
[REPT-93-065] p 3200 N94-30938

KAONS
Weak decays of charged K-mesons and charm particles
[PB94-138062] p 3486 N94-29143

KAPTON (TRADEMARK)
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Ablation of polymers by ultraviolet pulsed laser
[DE94-608100] p 3218 N94-30066

KELVIN-HELMHOLTZ INSTABILITY
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958

KERNEL FUNCTIONS
Method of Chabauty-Coleman and the second case of Fermat's last theorem for regular primes
[PB94-138187] p 3467 N94-29162
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE94-006428] p 3514 N94-30001
Euler results of the ISNaS compressible multi-block flow solver
[AD-B179299] p 3281 N94-30756

KEROSENE
High temperature resistant jet fuels p 3192 N94-29260
Ducted kerosene spray flames p 3195 N94-29276

KINEMATICS
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands p 3301 N94-29847
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793

KINESTHESIA
Basic understanding of vertigo p 3390 N94-28855

KINETIC ENERGY
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113

KINETIC EQUATIONS
Self-similar variables and the problem of nonlocal electron heat conductivity
[DE94-005826] p 3493 N94-30881

KIRCHHOFF LAW OF NETWORKS
An intrinsic Hamiltonian formulation of the dynamics of LC-circuits
[MEMO-1154] p 3462 N94-30964

KITS
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565

KLEIN-GORDON EQUATION
On dyonic black holes and cosmic censorship p 3546 N94-29912

KNOWLEDGE BASED SYSTEMS
Toward a model of expert knowledge structure and their role in cognitive task performance
[AD-A275641] p 3529 N94-28645
A cognitive model of decision making: Chunking and the radar detection device
[AD-A275185] p 3242 N94-28859
Investigation into formalization of domain-oriented parallel software development
[AD-A275177] p 3430 N94-29050
Neural network solutions to logic programs with geometric constraints
[AD-A275419] p 3435 N94-29198
Designing and maintaining decision-making processes p 3412 N94-29318
Embedded expert system: From the mock-up to the real world p 3412 N94-29319
Object oriented design of the autonomous fixtaking management system p 3143 N94-29323
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
Advances in development capabilities for intelligent air traffic management systems p 3137 N94-29559
Airside ground movements surveillance p 3141 N94-29585
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378
Multi-sensor data fusion and the use of artificial intelligence
[PB94-126216] p 3448 N94-30741

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063

KNOWLEDGE REPRESENTATION
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378

KOLMOGOROV THEORY
Hierarchical structures and asymmetric stochastic processes on p-adics and adeles
[PB94-138203] p 3464 N94-29178
Spherical model for turbulence p 3274 N94-29730
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434

KOLMOGOROV-SMIRNOV TEST
Relations between varieties of Kolmogorov complexities
[CWI-CS-R9329] p 3427 N94-30732

KONDO EFFECT
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775

KORTEWEG-DEVRIES EQUATION
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
Graded Froelicher-Nijenhuis brackets and the theory of recursion operators for super differential equations
[MEMO-1147] p 3460 N94-30736
Dissipation in Hamiltonian systems: Decaying cnoidal waves
[MEMO-1151] p 3460 N94-30738

L

LABORATORIES
Testing laboratories as notified bodies
[PB94-132396] p 3160 N94-28413
High Tc superconducting bolometric and nonbolometric infrared (IR) detectors
[NASA-CR-195728] p 3262 N94-28846
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328

LAGRANGE MULTIPLIERS
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

LAGRANGIAN FUNCTION
The Klein-Fock equation, minimal surfaces and gravitational fields
[DE94-606340] p 3356 N94-28803
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
Plane strain finite element analysis of sheet forming operations including bending effects p 3322 N94-30354
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787
Application of ALE techniques to metal forming simulations
[DE94-005358] p 3211 N94-30892
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

LAKE MICHIGAN
The suitability of low-cost urban airshed modeling in the Chicago area
[DE94-005114] p 3349 N94-30023
LAKES
Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173
LAMINAR BOUNDARY LAYER
Experiments and theoretical considerations regarding the allowable roughness height in laminar flow
[PB94-125556] p 3133 N94-30389
LAMINAR FLOW
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984
Numerical analysis of laminar flow in S-curved square duct with inlet and outlet straight region p 3128 N94-28987
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Laminar Flow Supersonic Wind Tunnel primary air injector p 3158 N94-29649
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30226
LAMINAR HEAT TRANSFER
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984
LAMINATES
Development of a new chemical warfare agent protective material p 3381 N94-28432
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites
[DE94-004962] p 3175 N94-28579
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
Numerical and experimental investigation of the bending response of thin-walled composite cylinders
[NASA-CR-195730] p 3317 N94-28801
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Assessment of the fibre volume distribution around optical fibres
[FFA-TN-1993-12] p 3179 N94-29425
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
Effects of physical aging on long-term creep of polymers and polymer matrix composites
[NASA-TM-109081] p 3181 N94-29541
Active control of delaminations in smart composite structures p 3181 N94-29593
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole p 3181 N94-29735
Performance of a higher-order triangular finite element for composite laminated structures p 3181 N94-29810
Failure strength and mechanism of composite laminates under multiaxial loading conditions p 3182 N94-29875
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Computational simulation of composite structures with and without damage
[NASA-CR-194433] p 3183 N94-30190
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
Damage analysis and mechanical response of as-received and heat-treated Nicalon/CAS-2 glass-ceramic matrix composites p 3219 N94-30259
The machining of fiber metal laminates. Part 1: An inventory of forming processes
[LR-710-PT-1] p 3184 N94-30343
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
Four advances in carbon-carbon materials technology p 3186 N94-30481
RF and microwave dielectric measurements upon layered materials using reflectometric coaxial sensor
[NPL-DES-125] p 3476 N94-30781
Thin-walled orthotropic laminated beam theory p 3324 N94-30920
LAND ICE
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080
Chemical composition of insoluble particles in superimposed ice on Storoeya, Svalbard (Sweden)
[CM-82] p 3336 N94-30944
LAND MANAGEMENT
Utilization of remote sensing data in Southeast Asia p 3327 N94-28936
Remote sensing and global management p 3328 N94-28937
Tohoku district observed by artificial satellites p 3328 N94-29041
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems p 3331 N94-29229
Application of remote sensing in prevention of disasters p 3332 N94-29230
Future expectation of remote sensing technology p 3332 N94-29231
LAND USE
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099
Extrapolation of point data for resource mapping p 3334 N94-29959
LANDFORMS
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046
LANDING GEAR
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Landing gear energy absorption system
[NASA-CASE-MSC-22277-1] p 3300 N94-29448
LANDING LOADS
Landing gear energy absorption system
[NASA-CASE-MSC-22277-1] p 3300 N94-29448
LANDING MATS
Composite panel failure analysis and improvement plan
[AD-A275655] p 3176 N94-28653
LANDING SIMULATION
Flight simulator evaluation of advanced MLS procedures
[AD-B174270] p 3143 N94-30915
LANGEVIN FORMULA
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
Non-Markovian quantum Brownian motion of a harmonic oscillator
[DE94-005922] p 3477 N94-30873
LANGUAGE PROGRAMMING
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
LANGUAGES
A framework for comparing conceptual modelling languages
[TR-92-29] p 3535 N94-30361
LANTHANUM COMPOUNDS
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337
LANTHANUM OXIDES
influence of doping on the electronic structure of (La, Sr)2CuO4
[DE94-006383] p 3516 N94-30054
Transient studies of low temperature catalysts for methane conversion
[DE94-005767] p 3200 N94-30877
LAP JOINTS
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
Analysis concerning the inspection threshold for multi-site damage
[PB94-142429] p 3149 N94-30905
LARGE SCALE INTEGRATION
Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511
The 1992 report on the next generation ultra clean technology for advanced microfabrication
[DE94-744171] p 3157 N94-30268
LARGE SPACE STRUCTURES
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
LASER ABLATION
Laser-material interactions: A study of laser energy coupling with solids
[DE94-005212] p 3292 N94-28478
Ablation of polymers by ultraviolet pulsed laser
[DE94-608100] p 3218 N94-30066
LASER APPLICATIONS
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts
[REPT-932-430-113] p 3225 N94-29414
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
Solid state laser systems for space application
[NASA-CR-195777] p 3294 N94-29914
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168
Development of high time-resolution laser flash equipment for thermal diffusivity measurements using miniature-size specimens
[NIFS-268] p 3295 N94-30186
Space debris removal using a high-power ground-based laser
[DE94-006363] p 3169 N94-30264
Sensing the gas metal arc welding process p 3314 N94-30444
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455
Optical techniques for time and frequency transfer p 3469 N94-30647
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653
LASER ARRAYS
Dynamics of a coupled solid state laser array p 3294 N94-29551
LASER BEAMS
Laser-material interactions: A study of laser energy coupling with solids
[DE94-005212] p 3292 N94-28478
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
Radiation transport and focusing systems for power industrial lasers
[DE94-606817] p 3293 N94-28786
Aberrated point-spread functions and beam quality for optical systems with annular pupils
[AD-A275311] p 3499 N94-28875
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
LASER CAVITIES
Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919
LASER CUTTING
Thin EFG octagons
[DE94-000257] p 3339 N94-30605
LASER DAMAGE
Characterization of defect geometries in multilayer optical coatings
[DE94-005820] p 3501 N94-30599
LASER DEPOSITION
Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805
Deposition of tantalum carbide coatings on graphite by laser interactions p 3223 N94-30475
LASER DOPPLER VELOCIMETERS
Development of laser velocimetry for the measurements of turbulence intensity and flow velocity ahead of a NGV row in a full-stage rotating turbine
[AD-A275712] p 3270 N94-28692
Laser velocimeter data acquisition system for the Langley 14- by 22-foot subsonic tunnel. Software reference guide version 3.3
[NASA-CR-191606] p 3293 N94-28839
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
LASER FUSION
Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830

LASER HEATING
Laser-material interactions: A study of laser energy coupling with solids
[DE94-005212] p 3292 N94-28478
Deposition of tantalum carbide coatings on graphite by laser interactions p 3223 N94-30475
LASER INDUCED FLUORESCENCE
Instrumental development of novel detection and separation methods for capillary electrophoresis
[DE94-005554] p 3187 N94-28519
Two-Photon/Laser-Induced Fluorescence (TP/LIF) sensor p 3342 N94-28588
In situ detection of tropospheric OH and HO2 by laser-induced fluorescence in a detection chamber at low pressure p 3342 N94-28589
Tropospheric HO determination by FAGE p 3342 N94-28590
Detection of tropospheric OH and HO2 by laser-induced fluorescence at low pressure using the 308nm excitation of OH p 3343 N94-28591
Harvard ER-2 OH laser-induced fluorescence instrument p 3343 N94-28592
JPL Fourier transform ultraviolet spectrometer p 3343 N94-28593
Tropospheric HO2 determination by FAGE p 3345 N94-28606
Advanced diagnostics for reacting flows
[AD-A275057] p 3272 N94-29136
LASER INTERFEROMETRY
Toward astrometric tracking with the infrared spatial interferometer p 3249 N94-29653
LASER MATERIALS
Optical studies of dynamical processes in disordered systems
[DE94-006751] p 3501 N94-30252
LASER MICROSCOPY
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states p 3294 N94-29531
LASER OUTPUTS
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934
LASER PLASMAS
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
LASER POWER BEAMING
Space debris removal using a high-power ground-based laser
[DE94-006363] p 3169 N94-30264
Reactor-pumped laser facility at DOE's Nevada Test Site
[DE94-006371] p 3295 N94-30265
Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367
LASER PROPULSION
Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367
LASER PUMPING
Reactor-pumped laser experimental results
[DE94-005247] p 3292 N94-28482
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309
Time and frequency technology at NIST p 3468 N94-30641
LASER RANGE FINDERS
Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
LASSO experiment: Intercalibrations of the LASSO ranging stations p 3297 N94-30666
New perspectives for high accuracy SLR with second generation geodesic satellites
[REPT-932-440-105] p 3336 N94-30965
LASER SPECTROMETERS
Measurement of tropospheric OH by laser long-path absorption spectroscopy p 3343 N94-28596
NOAA Aeronomy Laboratory long-path OH experiment, Fritz Peak Observatory, Colorado p 3344 N94-28598
LASER SPECTROSCOPY
UV laser long-path absorption speciroscopy p 3343 N94-28595
Measurement of tropospheric OH by laser long-path absorption spectroscopy p 3343 N94-28596
On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597
NOAA Aeronomy Laboratory long-path OH experiment, Fritz Peak Observatory, Colorado p 3344 N94-28598
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608
Advanced diagnostics for reacting flows
[AD-A275057] p 3272 N94-29136
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
LASER TARGETS
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060
LASER WELDING
Laser beam welding of AISI 316 stainless steel in microgravity environment: Experiments aboard a KC-135 flight
[ISBN-0-315-86095-2] p 3229 N94-30145
LASERS
Photonic devices and systems for optical signal processing
[AD-A275818] p 3498 N94-28804
Spatial light modulators with arbitrary quantum wells profiles
[AD-A275023] p 3499 N94-29114
LASING
Linac Coherent Light Source (LCLS) at 2-4 nm using the SLAC linac
[DE94-005235] p 3292 N94-28481
Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919
Dynamics of a coupled solid state laser array p 3294 N94-29551
LATCH-UP
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Single event upset and latchup measurements at Brookhaven National Laboratory p 3495 N94-30212
Single event upset susceptibilities of latchup immune CMOS process programmable gate arrays p 3495 N94-30214
Determination of cosmic ray latchup rate in CMOS devices p 3497 N94-30222
LATTICE PARAMETERS
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
Research on the improvement of shape-memory and magnetostrictive materials
[AD-A275397] p 3203 N94-29056
LATTICE VIBRATIONS
Vibrational properties of homopolar and heteropolar surfaces and interfaces of the CdTe/HgTe system
[DE94-608105] p 3516 N94-30069
LATTICES (MATHEMATICS)
Codes on the unit sphere
[PB94-136991] p 3453 N94-29174
Reconstruction of spectra in the discrete quantum mechanics (new elements of the lattice quantum engineering)
[DE94-608075] p 3524 N94-30087
LAUNCH VEHICLES
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721
Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367
LAUNCHING
The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts
[REPT-932-430-113] p 3225 N94-29414
Missile launch detection electric field perturbation experiment
[DE94-004224] p 3466 N94-30586
LAW (JURISPRUDENCE)
The European community directive: An alternative environmental impact assessment procedure after Massey?
[AD-A275550] p 3347 N94-28844
LAWS
Omnibus Budget Reconciliation Act of 1990
[PUB-LAW-101-508] p 3537 N94-28540
LAY-UP
Composite hot drape forming p 3240 N94-30448
LC CIRCUITS
An intrinsic Hamiltonian formulation of the dynamics of LC-circuits
[MEMO-1154] p 3462 N94-30964
LEAD ALLOYS
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
LEAD COMPOUNDS
Measurement of elemental speciation by liquid chromatography: Inductively coupled plasma mass spectrometry (LC-ICP-MS) with the Direct Injection Nebulizer (DIN)
[DE94-005261] p 3187 N94-28483
LEADING EDGES
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes p 3155 N94-29728
An experimental study of the aerodynamics of a swept and unswept semispan wing with a simulated glaze ice accretion
[NASA-CR-195330] p 3133 N94-30152
LEAST SQUARES METHOD
Least-squares determination of burst-point coordinates
[AD-A275423] p 3452 N94-28864
Theoretical study of the incompressible Navier-Stokes equations by the least-squares method
[NASA-TM-106535] p 3272 N94-29096
Prediction and standard error estimation for a finite universe total when a stratum is not sampled
[DE94-004929] p 3465 N94-30696
LECTURES
The (j,0) + (0,j) representation space: Dirac-like construct
[DE94-005011] p 3522 N94-28572
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors p 3151 N94-29292
LEG (ANATOMY)
Leg muscle volume during 30-day 6-degree head-down bed rest with isotonic and isokinetic exercise training
[NASA-TM-4580] p 3385 N94-29401
LEGENDRE FUNCTIONS
Fast gravity, gravity partials, normalized gravity, gravity gradient torque and magnetic field: Derivation, code and data
[NASA-CR-188243] p 3361 N94-29588
LENS DESIGN
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418
LENSES
A new guided wave lens structure and its application
[AD-A275541] p 3499 N94-28813
LENTICULAR BODIES
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
LEPTONS
Discrete quark-lepton symmetry need not pose a cosmological domain wall problem
[DE94-601606] p 3481 N94-28471
Energy distribution of the leptons in top decay to charged Higgs
[DE94-005231] p 3482 N94-28494
A measurement of the tau polarization at the resonance with the DELPHI detector at LEP
[DE94-005557] p 3482 N94-28520
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory
[DE94-606442] p 3484 N94-28610
Masses and mixing of leptons and quarks (Dirac particles)
[DE94-606446] p 3484 N94-28611
Proceedings of the workshop on quark and lepton mass matrices
[DE94-707692] p 3485 N94-28624
Measurement of the W mass in the D0 detector
[DE94-006002] p 3490 N94-30103
High sensitivity tests of the standard model for electroweak interactions
[DE94-005415] p 3490 N94-30262
Operator analysis for quark and lepton masses in SO(10)
[DE94-005201] p 3491 N94-30709
LESIONS
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810

LEVITATION
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250

LEVITATION MELTING
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371

LIAPUNOV FUNCTIONS
On the linear stability of Verkley's modons
p 3324 N94-28695
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Existence of quantum characteristic exponents
[PB94-138161] p 3523 N94-29146
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits
p 3467 N94-29910
Dynamics and control of tethered satellite systems
p 3170 N94-30864

LIBRARIES
TRADOC library and information network (TRALINET). Union list of periodicals (TULIP)
[AD-A275263] p 3529 N94-28903
Evaluation of the Resource Library System in Finland
[PB94-137734] p 3532 N94-29682
Information center assessment p 3533 N94-29855
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 22: US academic librarians and technical information specialists as information intermediaries: Results of the phase 3 survey
[NASA-TM-109067] p 3534 N94-30150
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934

LIE GROUPS
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
Path integral for coherent states of the dynamical U(sub 2) group and U(sub 2/1) supergroup
[DE94-606382] p 3466 N94-28785

LIFE (DURABILITY)
Process guide for the Domain-Specific Software Architectures (DSSA) process life cycle
[AD-A275642] p 3407 N94-28648
Service life prediction of composite structures through fiber testing
[AD-A275661] p 3176 N94-28654
Novel techniques applied to polymer lifetime predictions
[DE94-005095] p 3218 N94-30102

LIFE CYCLE COSTS
Aircraft age impact on individual operating and support cost elements
[AD-A275739] p 3121 N94-28732
Demonstration of improved software support labor estimation for Air Force operational flight programs through functional orientation
[AD-A275789] p 3121 N94-28743
Towards an information model and mechanisms for design rationale capture and use
[AD-A275060] p 3530 N94-29138

LIFE SCIENCES
Research and technology, 1992
[NASA-TM-103996] p 3555 N94-29891

LIFE SUPPORT SYSTEMS
Evaluation of life support equipment during an unsupported North Pole expedition
p 3379 N94-28422
Advanced seal delivery system life support parameters
[AD-A275304] p 3401 N94-29184

LIFT
Unsteady aerodynamic computations around NACA0012 at high angles of attack
p 3126 N94-28969
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
Computation of wind tunnel wall effects for complex models using a low-order panel method
[NASA-TM-104019] p 3132 N94-30151
Aerodynamic analysis of slipstream/wing/nacelle interference for preliminary design of aircraft configurations
[AD-B173651] p 3135 N94-30916

LIFT AUGMENTATION
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937

LIFT DEVICES
Role of computational fluid dynamics in aeronautical engineering. Part 10: Numerical analysis of flow around 2-D multi-element HLD p 3125 N94-28964

LIFT DRAG RATIO
Numerical analysis of supersonic transport wings
p 3124 N94-28959

LIFTING ROTORS
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957

LIGANDS
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Anodization of copper in chloride media
[AD-A275565] p 3202 N94-28793

LIGHT (VISIBLE RADIATION)
Estimation of the net production of moss community at Langhovde, East Antarctica p 3358 N94-29081
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360
Optical field ionization of atoms and ions using ultrashort laser pulses
[DE94-006643] p 3488 N94-29845
Correlation analysis on optical and radio light curves for a large sample of active galactic nuclei
p 3546 N94-29992
Circadian countermeasures for shiftworkers during USMP-2: A report to mission management
[NASA-CR-195260] p 3402 N94-30188

LIGHT AMPLIFIERS
Photonic devices and systems for optical signal processing
[AD-A275818] p 3498 N94-28804

LIGHT BEAMS
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934

LIGHT CURVE
On observing neutron star oscillations
p 3538 N94-29795
Correlation analysis on optical and radio light curves for a large sample of active galactic nuclei
p 3546 N94-29992

LIGHT EMISSION
A study of white dwarf radiative accretion shocks
p 3544 N94-29731
A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833

LIGHT GAS GUNS
Transient internal probe
[AD-A275054] p 3505 N94-29134

LIGHT IONS
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787
Kinetics of surface roughening and smoothing during ion sputtering
[DE94-006358] p 3219 N94-30263

LIGHT MODULATION
Spatial light modulators with arbitrary quantum wells profiles
[AD-A275023] p 3499 N94-29114
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
Optical Chopper Assembly for the Mars Observer
p 3162 N94-29639
Optical techniques for time and frequency transfer
p 3469 N94-30647

LIGHT SCATTERING
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
CBSD: The celestial background scene descriptor
[AD-A275521] p 3538 N94-28671
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042
Deformed ellipsoidal diffraction grating blank
[NASA-CR-189334] p 3289 N94-29872
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487

LIGHT SCATTERING METERS
Granulometry in environments with very small particle concentrations p 3259 N94-30511

LIGHT SOURCES
Linac Coherent Light Source (LCLS) at 2-4 nm using the SLAC linac
[DE94-005235] p 3292 N94-28481
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042

LIGHT SPEED
On the importance of the Michelson-Morley experiment
[DE94-606298] p 3523 N94-28620

LIGHT TRANSMISSION
UV laser long-path absorption spectroscopy
p 3343 N94-28595
Optical modeling of visibility and visibility instrumentation using stratified Mie theory p 3348 N94-29750
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335
Estimation of transmittance from satellite imagery
p 3257 N94-30500
Calculation of turbulence degraded point spread function of an imaging system p 3260 N94-30514

LIGHTNING
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
A study of cloud-to-ground lightning processes with emphasis on data analysis and modeling of the return stroke p 3372 N94-29802

LIMESTONE
Influence of clearance and rake angles on the cutting force of rock p 3368 N94-29520

LINE SPECTRA
UV laser long-path absorption spectroscopy
p 3343 N94-28595
Camera artifacts in IUE spectra
[NASA-CR-189337] p 3198 N94-29857
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862

LINEAR ACCELERATORS
Linac Coherent Light Source (LCLS) at 2-4 nm using the SLAC linac
[DE94-005235] p 3292 N94-28481
Towards short wavelengths FELs workshop
[DE94-004346] p 3296 N94-30688
Experiment studies of electron-positron interactions at the Stanford Linear Accelerator Center
[DE94-005877] p 3491 N94-30702
A transmission-loss monitor using current transformers
[DE94-003974] p 3267 N94-30716
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

LINEAR ARRAYS
Analysis of spark-induced bubble experiments using CALE
[DE94-003667] p 3270 N94-28476
Broadband EUV survey spectrometer for short-timescale experiments
[DE94-005459] p 3498 N94-28534
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491

LINEAR CIRCUITS
Digitally programmable composite operational amplifier applications
[AD-A275081] p 3262 N94-28842

LINEAR ENERGY TRANSFER (LET)
Adaption of the bubble detector for use as a LET spectrometer p 3291 N94-30216
Using Cf-252 for single event upset testing
p 3496 N94-30219

LINEAR EQUATIONS
Frequency-domain transfer-function identification using Chebyshev polynomials
[DE94-004777] p 3451 N94-28739
Solution of augmented systems
[PB94-138211] p 3452 N94-29111

LINEAR FILTERS
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204

LINEAR POLARIZATION
Infrared polarization signatures p 3258 N94-30506

LINEAR PROGRAMMING
Weighted and unweighted maximum clique algorithms with upper bounds from fractional coloring
[AD-A275328] p 3409 N94-28917
Solution of augmented systems
[PB94-138211] p 3452 N94-29111
Center for Parallel Optimization
[AD-A274988] p 3431 N94-29127
Natural deduction for intuitionistic linear logic
[ML-93-09] p 3457 N94-30385

LINEAR QUADRATIC GAUSSIAN CONTROL
A stochastic control approach to flight path monitoring
[AD-B174630] p 3143 N94-30853
LINEAR SYSTEMS
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996
Robust control of robots via linear estimated state-feedback
[MEMO-1153] p 3449 N94-30963
LINEAR TRANSFORMATIONS
Path integral for coherent states of the dynamical U(sub 2) group and U(sub 2/1) supergroup
[DE94-606382] p 3466 N94-28785
LINEARIZATION
The structure of exponentials: Uncovering the dynamics of linear logic proofs
[ML-93-10] p 3430 N94-30973
LINES OF FORCE
New evidence for flux cutting in type II superconductors
[ISBN-0-315-85830-3] p 3515 N94-30032
LINGUISTICS
An architecturally-based theory of human sentence comprehension
[AD-A275380] p 3398 N94-29313
Interrogatives and adverbs of quantification
[LP-92-14] p 3456 N94-30372
Commutative Lambek categorial grammars
[ML-93-01] p 3457 N94-30395
LININGS
Evaluation of life support equipment during an unsupported North Pole expedition
p 3379 N94-28422
LINKAGES
Simplified and symmetrical five-bar linkage driver for manipulating a six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-2] p 3301 N94-29556
Lock-up failure of a four-bar linkage deployment mechanism p 3163 N94-29646
LINKS
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
LIOUVILLE THEOREM
The generalized spin-boson model for electron-transfer reactions involving two harmonic potentials with a different force constant
[DE94-005470] p 3482 N94-28509
Theory for electron-transfer reactions involving two Marcus surfaces with a different force constant
[DE94-005925] p 3493 N94-30874
LIPIDS
Biodiesel from aquatic species
[DE94-000275] p 3225 N94-30038
LIPSCHITZ CONDITION
Complicated problem solution techniques in optimal parameter searching
[DE94-608007] p 3421 N94-30077
LIQUEFIED GASES
On possibility to create the scintillation trigger for liquid-argon neutrino detector
[DE94-607844] p 3489 N94-30050
LIQUEFIED NATURAL GAS
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE94-006100] p 3226 N94-30885
LIQUID ATOMIZATION
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
Investigation of the two-phase flow in a research combustor under reacting and non-reacting conditions
p 3196 N94-29282
Liquid atomization in supersonic flows
p 3276 N94-29839
LIQUID CHROMATOGRAPHY
Measurement of elemental speciation by liquid chromatography: Inductively coupled plasma mass spectrometry (LC-ICP-MS) with the Direct Injection Nebulizer (DIN)
[DE94-005261] p 3187 N94-28483
Chemically modified polymeric resins for separation of cations, organic acids, and small polar molecules by high performance liquid chromatography
[DE94-005548] p 3211 N94-28516
Structural analysis of amorphous phosphates using high performance liquid chromatography
[DE94-004791] p 3199 N94-30723
LIQUID COOLING
The use of liquid and air microclimate conditioning systems to alleviate heat stress in helicopter NBC operations p 3384 N94-28453
LIQUID CRYSTALS
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics
[NASA-CR-189338] p 3287 N94-29400
LIQUID FILLED SHELLS
Spin-up in a rectangular cylinder
[AD-A275465] p 3271 N94-28738
LIQUID FLOW
Spin-up in a rectangular cylinder
[AD-A275465] p 3271 N94-28738
LIQUID FUELS
Impact study on the use of biomass-derived fuels in gas turbines for power generation
[DE94-000261] p 3224 N94-28502
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets
p 3151 N94-29294
Biodiesel from aquatic species
[DE94-000275] p 3225 N94-30038
LIQUID HELIUM
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
Acoustic and optical investigations of superfluid (3)He
[PB94-135415] p 3477 N94-29186
LIQUID INJECTION
Investigation of the two-phase flow in a research combustor under reacting and non-reacting conditions
p 3196 N94-29282
Liquid atomization in supersonic flows
p 3276 N94-29839
LIQUID METALS
Liquid metal MHD and heat transfer in a tokamak blanket slotted coolant channel
[DE94-004622] p 3506 N94-29510
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776
LIQUID NITROGEN
An alternate method for achieving temperature control in the -160 to +90 C range
[NASA-CASE-NPO-18995-1-CU] p 3288 N94-29497
LIQUID OXYGEN
Liquid-oxygen droplet vaporization and combustion: Analysis of transcritical behavior and application to liquid-rocket combustion instability p 3197 N94-29592
LIQUID PHASE SINTERING
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
LIQUID PHASES
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
LIQUID ROCKET PROPELLANTS
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors
p 3151 N94-29292
Research and development of ramjets/ramrockets. Part 2: Integral liquid fuel ramjets p 3152 N94-29297
Catalytic ignitor for regenerative propellant gun
[NASA-CASE-NPO-18987-1-CU] p 3225 N94-29490
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848
LIQUID SLOSHING
Determination of acceleration field parameters with linear accelerometers
[PB94-125606] p 3290 N94-30742
LIQUID SODIUM
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182
LIQUID SURFACES
Liquid atomization in supersonic flows
p 3276 N94-29839
LIQUID-SOLID INTERFACES
A solid-on-solid invasion percolation model for self-affine interfaces
[DE94-608102] p 3521 N94-30888
LIQUID-VAPOR INTERFACES
Liquid atomization in supersonic flows
p 3276 N94-29839
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954
LIQUIDS
Interaction of multiple spark-generated bubbles in a compressible liquid
[AD-A275037] p 3272 N94-29149
LITHIUM
Analytic cross sections for collisions of H, H2, He and Li atoms and ions with atoms and molecules
[DE94-707686] p 3485 N94-28788
Tris(trimethylsily)arsine and lithium bis(trimethylsily)arsenide
[AD-A275075] p 3189 N94-29140
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505
LITHIUM HYDRIDES
A future, intense source of negative hydrogen ions
p 3494 N94-30485
LITHIUM ISOTOPES
Neutronics of a D-Li neutron source: An overview
[DE94-005372] p 3493 N94-30893
LITHOGRAPHY
Low voltage electron beam lithography
[AD-A275648] p 3262 N94-28650
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
LIVER
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
LOAD DISTRIBUTION (FORCES)
Coordinated control of multiple robot manipulators
p 3306 N94-30289
LOAD TESTS
Static fracture behavior of a ceramic matrix composite at elevated temperatures
[AD-A275363] p 3177 N94-29008
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872
LOADS (FORCES)
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment
[AD-A275215] p 3357 N94-29070
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258
LOCAL AREA NETWORKS
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Remote observatory access via the advanced communications technology satellite
p 3253 N94-29894
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912
LOCAL THERMODYNAMIC EQUILIBRIUM
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Abundance patterns in red-giant CH stars
p 3539 N94-29820
LOCI
Further investigation of curve veering phenomena
p 3460 N94-30515
LOCOMOTION
Computerized in vitro test for chemical toxicity based on tetrahymena swimming patterns
p 3354 N94-30463
Biologically-inspired hexapod robot design and simulation
[AIAA PAPER 94-1178-CP] p 3439 N94-30530
ODYSSEUS autonomous walking robot: The leg/arm design
[AIAA PAPER 94-1180-CP] p 3439 N94-30531

LOGIC CIRCUITS
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995
LOGIC DESIGN
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805
LOGIC PROGRAMMING
Partial support for the Second International Symposium on Artificial Intelligence and Mathematics
[AD-A275199] p 3434 N94-29026
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063
Neural network solutions to logic programs with geometric constraints
[AD-A275419] p 3435 N94-29198
Logic of transition systems
[CT-93-03] p 3424 N94-30371
Algorithmic problems concerning first-order definability of modal formulas on the class of all finite frames
[ML-93-07] p 3456 N94-30383
Remarks on the theory of semi-functors
[ML-93-08] p 3457 N94-30384
The Vanilla meta-interpreter for definite logic programs and ambivalent syntax
[CT-93-01] p 3424 N94-30386
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749
LOGISTICS
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
LOGISTICS MANAGEMENT
DOD Electronic Commerce (EC)/Electronic Data Interchange (EDI) in contracting report
[AD-A275298] p 3242 N94-28874
LONG DURATION EXPOSURE FACILITY
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility
[NASA-CR-4586] p 3175 N94-29458
Study of activation data of metal samples from LDEF-1 and Spacelab-2
[NASA-CR-195802] p 3205 N94-29736
LONGITUDINAL STABILITY
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473
LOOP ANTENNAS
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
LOOPS
Method of implementing digital phase-locked loops
[NASA-CASE-NPO-18757-1-CU] p 3265 N94-29374
Butterfly and scaling law in YBa2Cu4O8
[DE94-006037] p 3519 N94-30338
LORAN C
Loran-C time management p 3144 N94-30644
LORENTZ TRANSFORMATIONS
Possible explanation of the interaction cross-section growth at high energies
[DE94-606457] p 3494 N94-28612
LOSSES
Broad geoacoustic assessment of some regional areas
[AD-A275504] p 3356 N94-28791
AC losses for the self field of an AC transport current with a DC transport current offset in high T(c) superconducting magnet coils for MagLev application
[DE94-005187] p 3268 N94-30907
LOUDNESS
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464
LOVE WAVES
Extension of love wave transformation theory to laterally heterogeneous structures
[DE94-608098] p 3365 N94-30093
LOW CONCENTRATIONS
Granulometry in environments with very small particle concentrations p 3259 N94-30511
LOW CONDUCTIVITY
Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
LOW COST
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
The suitability of low-cost urban airshed modeling in the Chicago area
[DE94-005114] p 3349 N94-30023
Proceedings of the low cost materials of construction for biological processes workshop
[DE94-000218] p 3226 N94-30761
LOW GRAVITY MANUFACTURING
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session
[JTN-94-80584] p 3158 N94-28583
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Combustion studies under microgravity p 3228 N94-28940
Glass studies under microgravity p 3228 N94-28941
Fabrication of electronic materials in space p 3228 N94-28942
Protein crystal growth in microgravity p 3228 N94-28943
Cell culture in space p 3228 N94-28944
Cosmic energy equipment p 3229 N94-28945
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
LOW MOLECULAR WEIGHTS
Solventless, curable fluid oligomeric systems for high performance microwave, acoustical and mechanical applications p 3223 N94-30478
LOW NOISE
A gimbaled low noise momentum wheel p 3162 N94-29640
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717
LOW PRESSURE
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497
Metal inert gas welding system for use in vacuum
[NASA-CASE-MFS-28808-1] p 3298 N94-29352
Large eddy simulation of subsonic mixing layers p 3276 N94-29851
LOW SPEED
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865
LOW TEMPERATURE
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel p 3364 N94-29983
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337
LOW TEMPERATURE ENVIRONMENTS
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
Medical support for British operations in the Antarctic p 3379 N94-28421
The concept of Royal Navy air operations under extreme environmental conditions p 3379 N94-28424
Toward a molecular scale understanding of frost heaving, phase 1
[AD-A275446] p 3356 N94-28882
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
A newly developed snow vehicle (SM100S) for Antarctica. Part 1: Necessity and process of the development p 3314 N94-29981
A newly developed snow vehicle (SM100S) for Antarctica. Part 2: Design of the system p 3314 N94-29982
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984
A newly developed snow vehicle (SM100S) for Antarctica. Part 5: Result of general performance tests p 3314 N94-29985
Activities of the wintering party at Syowa Station by the 32nd Japanese Antarctic Research Expedition in 1991 p 3364 N94-29986
LOW TEMPERATURE TESTS
Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483
LOW THRUST PROPULSION
Determination of pressure response times for gaseous flow in a tube
[AD-A275274] p 3272 N94-29435
LOW VISIBILITY
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189
LOW VOLTAGE
Low voltage electron beam lithography
[AD-A275648] p 3262 N94-28650
LUBRICANT TESTS
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
LUBRICANTS
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
Lubricant rheology at high shear rates p 3217 N94-29967
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-004905] p 3220 N94-30692
LUBRICATION
Lubrication of space systems
[NASA-TM-106392] p 3214 N94-29399
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922
LUBRICATION SYSTEMS
Lubrication of space systems
[NASA-TM-106392] p 3214 N94-29399
LUMINANCE
Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
LUMINOSITY
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833
High redshift QSOs and the x ray background
[NASA-CR-195112] p 3540 N94-29957
LUMINOUS INTENSITY
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
Strategies to sustain and enhance performance in stressful environments
[AD-A275223] p 3398 N94-29027
Optical flameout detector
[NASA-CASE-LAR-14997-1] p 3287 N94-29368
LUNAR MINING
Lunar surface operations. Volume 4: Lunar rover trailer
[NASA-CR-195554] p 3299 N94-29386
LUNAR ROVING VEHICLES
Lunar surface operations. Volume 4: Lunar rover trailer
[NASA-CR-195554] p 3299 N94-29386
LUNAR SHELTERS
Lunar surface operations. Volume 1: Lunar surface emergency shelter
[NASA-CR-195551] p 3299 N94-29354
LUNAR SURFACE
Lunar surface operations. Volume 4: Lunar rover trailer
[NASA-CR-195554] p 3299 N94-29386
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774
LYMAN ALPHA RADIATION
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
Observation of Jovian auroral Ly-alpha line profile and emission variability with a sounding rocket and the IUE archives p 3550 N94-30798
LYSOZYME
Convective flow effects on protein crystal growth
[NASA-CR-195785] p 3515 N94-30015

M

MACH NUMBER
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788

MACHINE LEARNING
A neural network with modular hierarchical learning
[NASA-CASE-NPO-19077-1-CU] p 3435 N94-29492
On-line search for optimal controller parameters using interconnected learning automata
[MATHS-REPT-A-196] p 3436 N94-29526
Nonlinear PCA: Algorithms and applications
[PB94-137544] p 3419 N94-29680
Robotic hand-eye motor learning p 3436 N94-29835
Reinforcement learning for robots using neural networks p 3437 N94-29853
Unsupervised learning in analog networks
[ISBN-0-315-85959-8] p 3432 N94-30140
A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334
An intelligent robotic aid system for human services
[AIAA PAPER 94-1232-CP] p 3447 N94-30580
Use of bad training data for better predictions
[DE94-006233] p 3427 N94-30705
ELF: Learning incomplete fuzzy rule sets for an autonomous robot
[REPT-93-043] p 3449 N94-30923
Some methodological issues about designing autonomous agents which learn their behaviors: The ELF experience
[REPT-93-068] p 3449 N94-30939

MACHINE TOOLS
Application of high-speed milling to the Finnish manufacturing industry
[PB94-135548] p 3230 N94-29187
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Generation of gear tooth surfaces by application of CNC machines
[NASA-CR-195306] p 3303 N94-30205
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449

MACHINING
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
The machining of fiber metal laminates. Part 1: An inventory of forming processes
[LR-710-PT-1] p 3184 N94-30343
Confessions of a robot lobotomist
[AIAA PAPER 94-1185-CP] p 3440 N94-30535
Material properties and fracture mechanics in relation to ceramic machining
[DE94-006623] p 3221 N94-30829

MACROMOLECULES
Molecular structure of coal studied by solvent extraction p 3187 N94-28676
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

MACROSCOPIC EQUATIONS
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113

MAGELLANIC CLOUDS
Dust in the Small Magellanic Cloud
[NASA-CR-195764] p 3543 N94-29696
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722

MAGMA
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940

MAGNESIUM ALLOYS
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys
[DE94-005013] p 3201 N94-28544
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts p 3186 N94-30482

MAGNET COILS
AC losses for the self field of an AC transport current with a DC transport current offset in high T(c) superconducting magnet coils for MagLev application
[DE94-005187] p 3268 N94-30907

MAGNETIC ANOMALIES
Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235

MAGNETIC BEARINGS
Current leads and magnetic bearings
[DE94-004607] p 3297 N94-28461
A gimbaled low noise momentum wheel p 3162 N94-29640

MAGNETIC COILS
Formulae for the calculation of the magnetic field strength in a Helmholtz system with circular coils
[NPL-DES-130] p 3260 N94-30785

MAGNETIC COMPRESSION
Use of magnetic compression to support turbine engine rotors p 3314 N94-30484

MAGNETIC CONTROL
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398

MAGNETIC DISKS
Atomic-scale friction measurements using friction force microscopy. Part 2: Application to magnetic media
[AD-A275202] p 3298 N94-29290

MAGNETIC EFFECTS
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Localization in presence of magnetic field in 2-D disordered binary alloys
[DE94-608093] p 3208 N94-30108
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165

MAGNETIC ENERGY STORAGE
Battery energy and superconducting magnetic energy storage for utility applications: A qualitative analysis
[DE94-005382] p 3336 N94-28489

MAGNETIC EQUATOR
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891

MAGNETIC FIELD CONFIGURATIONS
Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192

MAGNETIC FIELD RECONNECTION
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241

MAGNETIC FIELDS
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459
Effect of phonon dispersion on properties of exciton in magnetic field
[DE93-634756] p 3481 N94-28469
Estimation of geomagnetic conjugate points by using Pc5 pulsations p 3357 N94-29079
Transient internal probe
[AD-A275054] p 3505 N94-29134
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216
Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
Nonadiabatic effects in the quantum Hall regime p 3513 N94-29530
Fast gravity, gravity partials, normalized gravity, gravity gradient torque and magnetic field: Derivation, code and data
[NASA-CR-188243] p 3361 N94-29588
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29962
Quasi-adiabatic motion of energetic particles in a dipole magnetic field
[DE94-607322] p 3362 N94-29935
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Estimating the cost of large superconducting thin solenoid magnets
[DE94-006289] p 3468 N94-30026
Algorithm and program ORANGE for magnetic field simulation of magnetic system spectrometer STORS
[DE94-608013] p 3421 N94-30083
Localization in presence of magnetic field in 2-D disordered binary alloys
[DE94-608093] p 3208 N94-30108
Some results on the phase diagram of the antiferromagnetic Potts model in an external magnetic field
[DE94-608115] p 3468 N94-30110
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
Electric power lines: Questions and answers on research into health effects
[DE94-005637] p 3353 N94-30757
Formulae for the calculation of the magnetic field strength in a Helmholtz system with circular coils
[NPL-DES-130] p 3260 N94-30785
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850
Intra- versus interlayer pairing in the copper oxide superconductors: Response to a magnetic field
[DE94-005475] p 3521 N94-30898

MAGNETIC FILMS
Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707

MAGNETIC FLUX
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723
New evidence for flux cutting in type II superconductors
[ISBN-0-315-85830-3] p 3515 N94-30032
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
Magnetic flux reconstruction methods for shaped tokamaks
[DE94-005827] p 3510 N94-30882
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948

MAGNETIC LENSES
Third-order beam optics of real solenoid magnetic lens
[DE94-608014] p 3500 N94-30084

MAGNETIC MATERIALS
Report on the development of low magnetic permeability reference materials
[NPL-DES-119] p 3476 N94-30783

MAGNETIC MEASUREMENT
Observations of the geomagnetic field by Polar Patrol Balloon (PPB) experiment in Antarctica p 3359 N94-29235
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723
Guidance notes for use with NPL low permeability reference materials
[NPL-DES-121] p 3476 N94-30780
Magnetic flux reconstruction methods for shaped tokamaks
[DE94-005827] p 3510 N94-30882

MAGNETIC MIRRORS
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193

MAGNETIC MOMENTS
Quasi-adiabatic motion of energetic particles in a dipole magnetic field
[DE94-607322] p 3362 N94-29935

MAGNETIC PERMEABILITY
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775
Guidance notes for use with NPL low permeability reference materials
[NPL-DES-121] p 3476 N94-30780
Report on the development of low magnetic permeability reference materials
[NPL-DES-119] p 3476 N94-30783

MAGNETIC PROPERTIES
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109
Magnetic properties of the three dimensional Ising model with interface single-ion anisotropy
[DE94-608116] p 3525 N94-30164
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165
The bond diluted spin-1 Blume-Emery-Griffiths model in a transverse field
[DE94-608121] p 3525 N94-30167
Magnetic properties of a transverse spin-1 Ising model with random crystal field interactions
[DE94-608117] p 3517 N94-30181
MuSR measurement of the magnetic penetration depth and coherence length in the high-Tc superconductor YBa2Cu3O(6.95)
[ISBN-0-315-85385-9] p 3517 N94-30203

MAGNETIC RELAXATION
On the (mu)SR activity at LNP JINR phasotron
[DE94-608385] p 3517 N94-30195
Nuclear magnetic relaxation studies of semiconductor nanocrystals and solids
[DE94-006301] p 3520 N94-30842

MAGNETIC RESONANCE
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862

MAGNETIC SPECTROSCOPY
Simulation of experiments on deep inelastic scattering of muons on superconducting magnetic toroidal spectrometer STORS
[DE94-606267] p 3483 N94-28554
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE94-006509] p 3489 N94-30061
Algorithm and program ORANGE for magnetic field simulation of magnetic system spectrometer STORS
[DE94-608013] p 3421 N94-30083

MAGNETIC STARS
Convective turbulence and transport in stars
p 3546 N94-29913

MAGNETIC STORMS
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014
Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites
[DE94-607323] p 3365 N94-30223

MAGNETIC SUSPENSION
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250

MAGNETIC TAPES
The program for catalogization of magnetic tapes in EXCHARM experiment
[DE94-606271] p 3528 N94-28615
Atomic-scale friction measurements using friction force microscopy. Part 2: Application to magnetic media
[AD-A275202] p 3298 N94-29290

MAGNETIC VARIATIONS
Mesopause winds and OH intensities at Mid-Latitudes-Fabry-Perot interferometer observations of the OH emission at 8430 A from bear lake observatory
[AD-A275246] p 3361 N94-29430

MAGNETIZATION
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109
Magnetic properties of the three dimensional Ising model with interface single-ion anisotropy
[DE94-608116] p 3525 N94-30164
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165
The bond diluted spin-1 Blume-Emery-Griffiths model in a transverse field
[DE94-608121] p 3525 N94-30167
Magnetic properties of a transverse spin-1 Ising model with random crystal field interactions
[DE94-608117] p 3517 N94-30181
Butterfly and scaling law in YBa2Cu4O8
[DE94-006037] p 3519 N94-30338

MAGNETO-OPTICS
Transient internal probe
[AD-A275054] p 3505 N94-29134

MAGNETOHYDRODYNAMIC FLOW
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241
The Seventh International Beer Sheva Seminar on MHD Flows and Turbulence
[DE94-607211] p 3506 N94-29831

MAGNETOHYDRODYNAMIC STABILITY
Nonlinear magnetohydrodynamics
[DE94-005654] p 3503 N94-28547
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Towards experimental verification and device applications of current driven plasma instabilities in solid state systems
[AD-A275395] p 3504 N94-29055
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241
Coupled magnetohydrodynamic oscillations in the magnetosphere-ionosphere system: Hall current effect
p 3360 N94-29242
Scale-length dependence of the ratio between the magnetic and electric field perturbations in the ionospheric field-aligned current region p 3360 N94-29243
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723
Higher order collisionless ballooning mode in tokamaks
[PPL-143] p 3507 N94-30156
Eigenmode analysis of the destabilized ion acoustic mode in tokamaks
[PPL-142] p 3507 N94-30158
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
A review of the ablative stabilization of the Rayleigh-Taylor instability in regimes relevant to ICF
[DE94-005809] p 3509 N94-30597
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
On the nonlinear dynamics of ocean wave systems
p 3378 N94-30790
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875

MAGNETOHYDRODYNAMIC TURBULENCE
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580
The Seventh International Beer Sheva Seminar on MHD Flows and Turbulence
[DE94-607211] p 3506 N94-29831

MAGNETOHYDRODYNAMIC WAVES
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Coupled magnetohydrodynamic oscillations in the magnetosphere-ionosphere system: Hall current effect
p 3360 N94-29242
Scale-length dependence of the ratio between the magnetic and electric field perturbations in the ionospheric field-aligned current region p 3360 N94-29243
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings
p 3361 N94-29245
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities
p 3506 N94-29822
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172

MAGNETOHYDRODYNAMICS
Nonlinear magnetohydrodynamics
[DE94-005654] p 3503 N94-28547
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
Liquid metal MHD and heat transfer in a tokamak blanket slotted coolant channel
[DE94-004622] p 3506 N94-29510
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768

MAGNETOMETERS
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low I/f noise
[DE94-005209] p 3261 N94-28546
The computer-aided system for the high resolution SQUID-magnetometer
[DE94-606138] p 3286 N94-28553
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
[NASA-TM-108448] p 3160 N94-29470
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699

MAGNETORESISTIVITY
Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848

MAGNETOSPHERE-IONOSPHERE COUPLING
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Signatures of dayside solar wind/magnetosphere/ionosphere coupling as revealed by the pace HF radars and associated experiments
p 3359 N94-29236
A theory of current generator in the magnetosphere-ionosphere coupling
p 3360 N94-29240
Coupled magnetohydrodynamic oscillations in the magnetosphere-ionosphere system: Hall current effect
p 3360 N94-29242

MAGNETOSTATICS
Toward milli-Newton electro- and magneto-static microactuators p 3238 N94-29784

MAGNETOSTRICTION
Research on the improvement of shape-memory and magnetostrictive materials
[AD-A275397] p 3203 N94-29056

MAIN SEQUENCE STARS
Globular cluster photometry near the turnoff: Blue stragglers, relative ages, and the horizontal branch
p 3538 N94-29732
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827

MAINTENANCE
Towards an information model and mechanisms for design rationale capture and use
[AD-A275060] p 3530 N94-29138
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Teleoperated systems for nuclear reactors: Inspection and maintenance
[AIAA PAPER 94-1176-CP] p 3439 N94-30528

MALFUNCTIONS
Lock-up failure of a four-bar linkage deployment mechanism p 3163 N94-29646

MAN MACHINE SYSTEMS
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
Engineering of systems for application of scientific computing in industry p 3123 N94-28947
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
Future manned systems advanced avionics study
[NASA-CR-188277] p 3150 N94-29377
Cognitive approach to specifications on air traffic controllers' decision assistance systems
p 3139 N94-29571
Elements of supervisory control for military robotic applications p 3309 N94-30303
Supervised autonomous control for Space Station Special Purpose Dextrous Manipulator (SPDM) robot
p 3309 N94-30305
Aiding the operator in the manual control of a space manipulator
[PB94-125549] p 3402 N94-30390
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
Task automation in a successful industrial telerobot
[AIAA PAPER 94-1189-CP] p 3441 N94-30539

MANAGEMENT INFORMATION SYSTEMS
Software systems reengineering process model, version 1.0
[AD-A275711] p 3407 N94-28691
Environmental Compliance Assessment And Management System Program (ECAMP). US Air Force European Economic Community (EEC)
[AD-A275593] p 3346 N94-28727
An evaluation of techniques for ranking academic information systems journals
[AD-A275179] p 3529 N94-29066
Software engineering and software management in a distributed UNIX environment
[NLR-TP-92233-U] p 3422 N94-30314
MANAGEMENT METHODS
Risk-based prioritization: A comparison of approaches
[DE94-003368] p 3526 N94-28474
The development and demonstration of the metric assessment tool
[AD-A275788] p 3230 N94-28742
A generalization of the software engineering maturity model p 3416 N94-29341
Application of information management methodologies for project quality improvement in a changing environment p 3416 N94-29342
Information engineering implementation and acceptance p 3530 N94-29533
Report on NATO PTTI p 3469 N94-30645
Why TQM fails (and what you can do about it)
[DE93-018945] p 3527 N94-30698
MANAGEMENT PLANNING
Financial resource review model user's guide
[AD-A274979] p 3410 N94-29088
Software Management Environment (SME) concepts and architecture, revision 1
[NASA-CR-189293] p 3419 N94-29727
Triple Diagonal modeling: A mechanism to focus productivity improvement for business success
[DE94-004309] p 3527 N94-30041
Graphical simulation for aerospace manufacturing
[AIAA PAPER 94-1224-CP] p 3446 N94-30573
MANAGEMENT SYSTEMS
Environmental Compliance Assessment And Management System Program (ECAMP). US Air Force European Economic Community (EEC)
[AD-A275593] p 3346 N94-28727
Object oriented design of the autonomous fixtaking management system p 3143 N94-29323
A common Ada run-time system for avionics software p 3150 N94-29331
DLR's ATM demonstration programme p 3140 N94-29575
ARC2000: Automatic radar control p 3141 N94-29583
Software Management Environment (SME) concepts and architecture, revision 1
[NASA-CR-189293] p 3419 N94-29727
Analysis of EDP performance
[NASA-CR-195726] p 3420 N94-29945
MANDRELS
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528
Composite hot drape forming p 3240 N94-30448
MANEUVERABILITY
Exploring QDES as a tool for determining limits of achievable performance in aircraft design
[AD-A275359] p 3146 N94-28998
MANGANESE COMPOUNDS
Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films p 3500 N94-29759
MANIFOLDS (MATHEMATICS)
Symplectic topology of integrable Hamiltonian systems
[DE94-608120] p 3467 N94-30166
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-006] p 3396 N94-30978
MANIPULATORS
Design and construction of the Aerobot Robotic Manipulator (ARM)
[AD-A275362] p 3298 N94-28894
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
Feedback control of a three-link planar under-actuated manipulator using a surge velocity
[AD-A275159] p 3435 N94-29044
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Simplified and symmetrical five-bar linkage driver for manipulating a six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-2] p 3301 N94-29556
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-1] p 3288 N94-29726
Collision avoidance and control of multiple revolute manipulators p 3302 N94-29884
A study of the flexible space platform based deployable manipulator
[ISBN-0-315-85410-3] p 3303 N94-30135
Experimental sliding mode control of a flexible single link manipulator
[ISBN-0-315-85466-9] p 3304 N94-30238
Coordinated control of multiple robot manipulators p 3306 N94-30289
Force control techniques for robot manipulators and their military applications p 3307 N94-30291
An inverse kinematics algorithm for the DREP/Philips real-time radiographic manipulator system p 3307 N94-30292
Simulation of lightweight robots and their controllers p 3307 N94-30294
The response of flexible manipulators to a new computed torque control strategy: Simulation results p 3308 N94-30295
Symbolic generation of dynamics equations for manipulators mounted on moving bases p 3308 N94-30296
Supervised autonomous control for Space Station Special Purpose Dextrous Manipulator (SPDM) robot p 3309 N94-30305
A testbed for the development of ground-based control of space-based manipulators p 3309 N94-30306
Aiding the operator in the manual control of a space manipulator
[PB94-125549] p 3402 N94-30390
Development and validation of a linear recursive order-N algorithm for the simulation of flexible space manipulators dynamics
[AD-B173557] p 3311 N94-30391
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
Programmable Automated Welding System (PAWS): Control of welding through software and hardware p 3314 N94-30443
Space flight manipulator technologies and requirements for the NASA Flight Telerobotic Servicer (FTS)
[AIAA PAPER 94-1191-CP] p 3441 N94-30542
A highly redundant robot system for inspection
[AIAA PAPER 94-1194-CP] p 3442 N94-30545
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
An intelligent robotic aid system for human services
[AIAA PAPER 94-1232-CP] p 3447 N94-30580
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793
Robust adaptive control of a mechanical manipulator p 3449 N94-30806
Kinematics and force analysis of a robot hand based on an artificial biological control scheme p 3313 N94-30957
MANNED LUNAR SURFACE VEHICLES
Lunar surface operations. Volume 1: Lunar surface emergency shelter
[NASA-CR-195551] p 3299 N94-29354
MANNED MARS MISSIONS
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833
MANNED SPACE FLIGHT
Start of space tourism p 3164 N94-29714
MANNED SPACECRAFT
ESTEC wiring test programme materials related properties p 3165 N94-28698
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161
MANUAL CONTROL
Tactility as a function of grasp force: Effects of glove, orientation, pressure, load, and handle
[NASA-TP-3474] p 3402 N94-30210
Aiding the operator in the manual control of a space manipulator
[PB94-125549] p 3402 N94-30390
MANUALS
Defense Technical Information Center cataloging guidelines
[AD-A275100] p 3529 N94-28911
Fundamentals of printing technology
[PB94-132602] p 3530 N94-29141
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
MANUFACTURING
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
NEMA wire and cable standards development programs p 3166 N94-28706
Electroset Technology: On the forefront of manufacturing
[AD-A275166] p 3263 N94-29045
Application of high-speed milling to the Finnish manufacturing industry
[PB94-135548] p 3230 N94-29187
Realizing the productivity potential of expeditious operations
[PB94-135555] p 3230 N94-29188
Technology transfer initiatives
[NASA-CR-195151] p 3537 N94-29410
Micromanufacturing: Recent developments in this country and abroad p 3235 N94-29769
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
The 1992 report on the next generation ultra clean technology for advanced microfabrication
[DE94-744171] p 3157 N94-30268
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
Agile manufacturing: The factory of the future
[AIAA PAPER 94-1184-CP] p 3440 N94-30534
Confessions of a robot lobotomist
[AIAA PAPER 94-1185-CP] p 3440 N94-30535
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603
Large-area triple-junction a-Si alloy production scale up
[DE94-000249] p 3339 N94-30604
Thin EFG octagons
[DE94-000257] p 3339 N94-30605
MANY BODY PROBLEM
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
The stability of perfect elliptic disks p 3545 N94-29834
Periodic orbits of n-body type problems: The fixed period case
[DE94-608096] p 3453 N94-30091
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
MAPPING
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958
A monotonicity conjecture for real cubic maps
[DE94-003969] p 3335 N94-30610
MARANGONI CONVECTION
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
MARINE CHEMISTRY
The carbon cycle revisited p 3350 N94-30622
MARINE ENVIRONMENTS
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Oceanic survey utilizing satellites p 3328 N94-29040
Tohoku district observed by artificial satellites p 3328 N94-29041
The effects of altimeter sampling characteristics: Some Geosat examples
[AD-A275225] p 3357 N94-29062
Research report on the potential of ocean development suitable for area characteristics
[JTN-94-80587] p 3377 N94-29595

MARINE METEOROLOGY
Studies of marine aerosols and their evolution in the eastern North Atlantic
[AD-A275011] p 3377 N94-29128
MARINE RESOURCES
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel
p 3188 N94-28683
Research report on the potential of ocean development suitable for area characteristics
[JTN-94-80587] p 3377 N94-29595
Reproduction in the Japanese anchovy (Engraulis japonica) as related to population fluctuation
p 3235 N94-29708
MARINE TECHNOLOGY
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Research report on the potential of ocean development suitable for area characteristics
[JTN-94-80587] p 3377 N94-29595
Development of the breakwater with submerged mound for interchanging sea water p 3234 N94-29703
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
MARKARIAN GALAXIES
Finnish astronomy days, 1992-1993. Proceedings of the Finnish Astronomical Society
[PB94-136892] p 3538 N94-29170
MARKET RESEARCH
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934
MARKETING
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934
MARKOV CHAINS
Markov chains for random urinalysis 3: Daily model and drug kinetics
[AD-A275540] p 3389 N94-28797
MARKOV PROCESSES
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions
[AD-A275018] p 3464 N94-29129
Hierarchical structures and asymmetric stochastic processes on p-adics and adeles
[PB94-138203] p 3464 N94-29178
Subphonetic acoustic modeling for speaker-independent continuous speech recognition
[AD-A275217] p 3244 N94-29303
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
MARS (PLANET)
MUADEE: Mars Upper Atmosphere Dynamics, Energetics, and Evolution discovery mission. Executive summary volume
[NASA-CR-195732] p 3549 N94-28418
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
MARS ATMOSPHERE
MUADEE: Mars Upper Atmosphere Dynamics, Energetics, and Evolution discovery mission. Executive summary volume
[NASA-CR-195732] p 3549 N94-28418
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196
MARS ENVIRONMENT
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196
MARS LANDING
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
MARS OBSERVER
Optical Chopper Assembly for the Mars Observer
p 3162 N94-29639
MARS PROBES
Parachute Swivel Mechanism for planetary entry
p 3162 N94-29643
MARS SURFACE
Mars rover mechanisms designed for Rocky 4
p 3161 N94-29630
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774
A broad-band microseismometer for planetary operations p 3237 N94-29778
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196
MARS SURFACE SAMPLES
Thermal imaging for a mobile robot
p 3308 N94-30300
MARTENSITE
Computer simulation of martensitic transformations
[DE94-005213] p 3201 N94-28479
Research on the improvement of shape-memory and magnetostrictive materials
[AD-A275397] p 3203 N94-29056
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
MARTENSITIC STAINLESS STEELS
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
MARTENSITIC TRANSFORMATION
Computer simulation of martensitic transformations
[DE94-005213] p 3201 N94-28479
MASERS
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
X-band ultralow-noise maser amplifier performance
p 3251 N94-29672
MASKS
RF vacuum microelectronics
[AD-A275221] p 3263 N94-28915
MASS
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
A non-contacting vertical alignment system for mass properties measuring instruments
[DE94-004680] p 3289 N94-29927
MASS FLOW RATE
Advanced diagnostics for reacting flows
[AD-A275057] p 3272 N94-29136
MASS RATIOS
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
MASS SPECTRA
Measurement of the W mass in the D0 detector
[DE94-006002] p 3490 N94-30103
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183
MASS SPECTROMETERS
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879
Adaption of the bubble detector for use as a LET spectrometer p 3291 N94-30216
MASS SPECTROSCOPY
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458
Measurement of elemental speciation by liquid chromatography: Inductively coupled plasma mass spectrometry (LC-ICP-MS) with the Direct Injection Nebulizer (DIN)
[DE94-005261] p 3187 N94-28483
Matrix isolation studies of the interactions of BF3 with water and substituted diethyl ethers. Chemical ionization mass spectrometric determination of the proton affinity of (CF3CH2)2O
[NASA-TM-106422] p 3189 N94-28832
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry
[DE94-006208] p 3207 N94-30024
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
MASS TRANSFER
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954
MASSIVE STARS
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
MASSIVELY PARALLEL PROCESSORS
Rome Laboratory software engineering technology program p 3414 N94-29330
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
MATCHED FILTERS
Output statistics of the SALFAS FM normalizer Smoothing/Prediction function
[AD-A275758] p 3463 N94-28759
MATCHING
Variable-resolution stereo matching
p 3308 N94-30298
On the unification free PROLOG programs
[CWI-CS-R9331] p 3427 N94-30733
MATERIALS SCIENCE
Report on smart materials
[PB94-137528] p 3203 N94-29015
Journal of NIRE, vol. 2, no. 3
[JTN-94-80553] p 3553 N94-29512
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440
MATHEMATICAL LOGIC
Parallel quantification
[LP-93-01] p 3422 N94-30318
Dynamic generalized quantifiers and monotonicity
[LP-93-02] p 3454 N94-30319
A smart child of Peano's
[ML-92-10] p 3455 N94-30325
Completeness of the Lambek calculus with respect to relativized relational semantics
[LP-93-03] p 3455 N94-30326
Identity: Quarrelling with an unproblematic notion
[LP-93-04] p 3455 N94-30327
A note on schema equivalence
[TR-92-30] p 3535 N94-30362
Logic of transition systems
[CT-93-03] p 3424 N94-30371
Bounded contraction and many-valued semantics
[ML-93-04] p 3456 N94-30380
Models of the untyped lambda-calculus in semi Cartesian closed categories
[ML-93-05] p 3456 N94-30381
Categorial generalization of algebraic recursion theory
[ML-93-06] p 3456 N94-30382
Algorithmic problems concerning first-order definability of modal formulas on the class of all finite frames
[ML-93-07] p 3456 N94-30383
Remarks on the theory of semi-functors
[ML-93-08] p 3457 N94-30384
Natural deduction for intuitionistic linear logic
[ML-93-09] p 3457 N94-30385
The conjoinability relation in Lambek calculus in linear logic
[ML-93-03] p 3457 N94-30397
Termination of term rewriting by semantic labelling
[RUU-CS-93-24] p 3459 N94-30424
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
Perpetual reductions and strong normalization in orthogonal term rewriting systems
[CWI-CS-R9345] p 3426 N94-30437
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
Design and analysis of dynamic leader election protocols in broadcast networks
[MEMO-INF-93-43] p 3260 N94-30520
A monotonicity conjecture for real cubic maps
[DE94-003969] p 3335 N94-30610
Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749
Termination of term rewriting by semantic labelling
[RUU-CS-92-38] p 3462 N94-30859
The structure of exponentials: Uncovering the dynamics of linear logic proofs
[ML-93-10] p 3430 N94-30973
Inventory of fragments and exact models in intuitionistic proportional logic
[ML-93-11] p 3463 N94-30974
Remarks on uniformly finitely precomplete positive equivalences
[ML-93-12] p 3463 N94-30975
MATHEMATICAL MODELS
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28528
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
Dissipative quantum dynamics and nonlinear sigma-model
[DE94-606295] p 3523 N94-28617
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670

Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686
On the linear stability of Verkley's modons
p 3324 N94-28695
Similarity solutions and numerical modeling in buoyancy controlled turbulent diffusion flames
[AD-A275820] p 3188 N94-28777
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
The lectures in complex systems, volume 5
[AD-A275458] p 3466 N94-28807
Approximation of solutions of the cubic NLSE by finite dimensional equations and non-squeezing properties
[PB94-138294] p 3452 N94-29148
Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241
Flowfield prediction of NO(x) and smoke production in aircraft engines p 3191 N94-29252
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Numerical modelling of turbine combustion chambers
p 3154 N94-29254
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor
p 3152 N94-29300
Attenuation of outdoor sound propagation levels by a snow cover
[AD-A275387] p 3478 N94-29314
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
On-line search for optimal controller parameters using interconnected learning automata
[MATHS-REPT-A-196] p 3436 N94-29526
Development and verification of a model to predict impingement currents for ion thrusters
[NASA-CR-195322] p 3173 N94-29546
Introduction to the design of ventilation systems
p 3231 N94-29599
Ventilation models p 3232 N94-29603
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675
Spherical model for turbulence p 3274 N94-29730
Control of micromachined deformable mirrors
p 3239 N94-29787
On fatigue crack closure: Analysis and measurement
[ISBN-0-315-74873-7] p 3321 N94-29812
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight
p 3131 N94-29826
Radiation and scattering from cylindrically conformal printed antennas
[NASA-CR-195546] p 3253 N94-29873
Acceptance sampling methods for sample results verification
[DE94-002882] p 3465 N94-29925
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008
Triple Diagonal modeling: A mechanism to focus productivity improvement for business success
[DE94-004309] p 3527 N94-30041
Boundary-induced phase transitions in equilibrium and non-equilibrium systems
[DE94-608137] p 3199 N94-30111
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
Generalized augmented space theorem for correlated disorder and cluster coherent potential approximation
[DE94-608110] p 3208 N94-30118
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
A framework for comparing conceptual modelling languages
[TR-92-29] p 3535 N94-30361
Logic of transition systems
[CT-93-03] p 3424 N94-30371
Bounded contraction and many-valued semantics
[ML-93-04] p 3456 N94-30380
Models of the untyped lambda-calculus in semi Cartesian closed categories
[ML-93-05] p 3456 N94-30381
The secrets of causality
[RUU-CS-93-29] p 3426 N94-30490
Free-floating dual-arm robots for space assembly
[AIAA PAPER 94-1195-CP] p 3442 N94-30546
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
Simulation of composite material response under dynamic compressive loading
[DE94-005272] p 3184 N94-30589
An evaluation of explicit pseudo-steady-state approximation schemes for stiff ODE systems from chemical kinetics
[CWI-NM-R9312] p 3353 N94-30729
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772
Formulae for the calculation of the magnetic field strength in a Helmholtz system with circular coils
[NPL-DES-130] p 3260 N94-30785
Using the log-normal distribution in analyzing aerosols: The mathematical reasoning underlying the various diameters used and the plotting procedure
[DE94-006459] p 3461 N94-30817
Selecting model complexity in learning problems
[DE94-000764] p 3461 N94-30821
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855
A solid-on-solid invasion percolation model for self-affine interfaces
[DE94-608102] p 3521 N94-30888
Mathematical models of hysteresis
[DE94-005681] p 3260 N94-30902
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922
Optimization techniques for a dial-a-ride transportation system in urban environment
[REPT-93-051] p 3537 N94-30926
Identification of the damping ratio relationship of an autovehicle suspension
[REPT-93-063] p 3313 N94-30937
Application of the extended Kalman filter to the estimation of the char mass in a fluidized bed combustor
[REPT-93-065] p 3200 N94-30938
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-006] p 3396 N94-30978

MATHEMATICAL PROGRAMMING
North American jumelage 'type systems'
[AD-A275342] p 3411 N94-29214
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753

MATRICES (MATHEMATICS)
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
Integer cosine transform for image compression
p 3247 N94-29619
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971

MATRIX MATERIALS
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
3-D braided, continuous fiber ceramic composites produced by chemical vapor infiltration
[AD-A275192] p 3178 N94-29024
Microwave assisted chemical vapor infiltration
[DE94-005005] p 3185 N94-30771

MATRIX METHODS
Compound matrix method for multi-point boundary-value problems
[PB94-137791] p 3453 N94-29476

MATTER (PHYSICS)
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838

MAXIMUM ENTROPY METHOD
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481
Procedures for basic inverse problems: Black body radiation problem and phonon density of states problem
[ISBN-0-315-85757-9] p 3525 N94-30244

MAXIMUM LIKELIHOOD ESTIMATES
Digital combining-weight estimation for broadband sources using maximum-likelihood estimates
p 3250 N94-29661

MAXIMUM PRINCIPLE
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758

MAXWELL EQUATION
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169

MEASURE AND INTEGRATION
On invariant measures for some infinite-dimensional dynamical systems
[DE94-606342] p 3522 N94-28609

MEASUREMENT
The development and demonstration of the metric assessment tool
[AD-A275788] p 3230 N94-28742

MEASURING INSTRUMENTS
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Improved in-flow acoustic sensor
[NASA-CASE-ARC-12001-1] p 3478 N94-29363
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
A non-contacting vertical alignment system for mass properties measuring instruments
[DE94-004680] p 3289 N94-29927
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
Monitor for status epilepticus seizures
p 3397 N94-30460
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522
Guidance notes for use with NPL low permeability reference materials
[NPL-DES-121] p 3476 N94-30780
Report on the development of low magnetic permeability reference materials
[NPL-DES-119] p 3476 N94-30783
Guidance on eliminating interference from sensitive electrical circuits
[PB94-139300] p 3268 N94-30784

MECHANICAL DEVICES
An Earth observation telescope refocusing mechanism
[REPT-932-440-103] p 3332 N94-29417
Rotary actuator
[NASA-CASE-MFS-28581-1] p 3205 N94-29447
Metal band drives in spacecraft mechanisms
p 3162 N94-29637
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
[NASA-CR-195688] p 3235 N94-29767

MECHANICAL DRIVES
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
Mars rover mechanisms designed for Rocky 4
p 3161 N94-29630
SP-100 control drive assembly development
p 3163 N94-29651
Microgravity compatible drive system-rider. New technologies
[PB94-138583] p 3229 N94-29996

MECHANICAL ENGINEERING
Filament to mandrel gap analysis: Resulting gap from filament winding over a cone-cylinder transition mandrel (reference NMTP no. 93838)
[DE94-004225] p 3175 N94-28526
MECHANICAL MEASUREMENT
Shape from diameter: Negative results
[RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results
[RUU-CS-93-17] p 3458 N94-30408
MECHANICAL PROPERTIES
Joining silicon carbide to austenitic stainless steel through diffusion welding
[PB94-126331] p 3297 N94-28399
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons
[DE94-605337] p 3202 N94-28551
Robust 300 C wire insulation system
p 3165 N94-28699
Electrical and mechanical testing of wire insulation for space applications p 3166 N94-28710
Innovative processing of composites for ultra-high temperature applications, book 1
[AD-A275597] p 3176 N94-28729
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840
On the dynamic mechanical behavior of 3-D integrated fabric reinforced composites
[AD-A275424] p 3177 N94-28865
Electronic structure and mechanical properties of grain boundaries
[AD-A275198] p 3512 N94-28890
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
Characterisation and processing of SiC/MAS-L glass ceramic matrix composite
[REPT-932-430-111] p 3179 N94-29412
Glass-ceramic matrix composites
[REPT-932-430-112] p 3179 N94-29413
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
High elongation elastomers p 3223 N94-30477
Simulation of composite material response under dynamic compressive loading
[DE94-005272] p 3184 N94-30589
Effect of fiber coating on mechanical properties of Nicalon fibers and Nicalon-fiber/SiC matrix composites
[DE94-005477] p 3185 N94-30593
Studies on the optimization of deformation processed metal-metal matrix composites
[DE94-006033] p 3185 N94-30704
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956
MECHANICAL SHOCK
Minutes: Accredited Standards Committee on Mechanical Vibration and Shock, S2. US TAG for ISO/TC 108 Mechanical Vibration and Shock
[AD-A275591] p 3316 N94-28726
MEDIA
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
MEDICAL EQUIPMENT
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
[NASA-CP-3249] p 3555 N94-30440
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
Composite redesign of obstetrical forceps
p 3397 N94-30457
A fuzzy logic controller for hormone administration using an implantable pump p 3397 N94-30459
MEDICAL PERSONNEL
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
MEDICAL SCIENCE
Clinical investigation program
[AD-A275025] p 3391 N94-29116
MEDICAL SERVICES
Clinical investigation program
[AD-A275025] p 3391 N94-29116
Potential hazards of magnetic resonance imagers to emergency medical service helicopter operations
[DOT/FAA/RD-92/15] p 3135 N94-29862
MEDIUM SCALE INTEGRATION
Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511
MELTING
Laser-material interactions: A study of laser energy coupling with solids
[DE94-005212] p 3292 N94-28478
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997
A toy model of sea ice growth p 3351 N94-30626
MELTING POINTS
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288
MELTS (CRYSTAL GROWTH)
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073
Process modelling for materials preparation experiments
[NASA-CR-195782] p 3175 N94-30242
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691
MEMBRANES
Polyaniline membranes for gas and liquid separation
[AD-A275851] p 3408 N94-28790
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
Inorganic polymer-derived ceramic membranes
[DE94-000082] p 3216 N94-29830
MEMORY (COMPUTERS)
Performance analysis of memory hierachies in high performance systems
[DE94-005549] p 3404 N94-28517
A common Ada run-time system for avionics software
p 3150 N94-29331
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372
MENTAL PERFORMANCE
Toward a model of expert knowledge structure and their role in cognitive task performance
[AD-A275641] p 3529 N94-28645
Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface
[AD-A275187] p 3399 N94-28861
Temporal and qualitative decomposition of plausible reasoning
[AD-A275073] p 3398 N94-29154
Spectral analysis of heart rate and psychological state: A review of its validity as a workload index
[AD-B179387] p 3399 N94-30969
MERCURY (METAL)
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
MERCURY CADMIUM TELLURIDES
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators
[AD-A275235] p 3263 N94-29028
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
MERCURY COMPOUNDS
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
Measurement of elemental speciation by liquid chromatography: Inductively coupled plasma mass spectrometry (LC-ICP-MS) with the Direct Injection Nebulizer (DIN)
[DE94-005261] p 3187 N94-28483
MERCURY TELLURIDES
Vibrational properties of homopolar and heteropolar surfaces and interfaces of the CdTe/HgTe system
[DE94-608105] p 3516 N94-30069
MERRITT ISLAND (FL)
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099
MESOMETEOROLOGY
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744
An observational and numerical study of sea/land-breeze circulations in an area of complex coastal heating p 3372 N94-29813
MESON RESONANCE
Issues in light hadron spectroscopy
[PB94-138229] p 3486 N94-29112
MESON-NUCLEON INTERACTIONS
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory
[DE94-606442] p 3484 N94-28610
Possible explanation of the interaction cross-section growth at high energies
[DE94-606457] p 3494 N94-28612
MESONS
B production and B(0)(bar B)(0) mixing at DO
[DE94-004664] p 3484 N94-28574
Glueball and meson dispersion and diffusion relations in compact U(1)(2+1) gauge theory
[ISBN-0-315-85577-0] p 3490 N94-30234
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
MESOPAUSE
Mesopause winds and OH intensities at Mid-Latitudes-Fabry-Perot interferometer observations of the OH emission at 8430 A from bear lake observatory
[AD-A275246] p 3361 N94-29430
MESOSCALE PHENOMENA
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Prototype terminal aerodrome forecasts using a mesoscale model
[AD-A275308] p 3369 N94-29194
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744
Four-dimensional data assimilation using the adjoint method p 3455 N94-30353
MESSAGE PROCESSING
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411
MESSAGES
Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640
METABOLISM
Prediction of survival times on land in a cold climate
p 3379 N94-28423
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
METAL BONDING
Joining silicon carbide to austenitic stainless steel through diffusion welding
[PB94-126331] p 3297 N94-28399
METAL CLUSTERS
Realtime structural electrochemistry of platinum clusters using dispersive XAFS
[DE94-005093] p 3208 N94-30101
Generalized augmented space theorem for correlated disorder and cluster coherent potential approximation
[DE94-608110] p 3208 N94-30118
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183
METAL COATINGS
Electrodeposition of bismuth alloys by the controlled potential method
[DE94-605318] p 3212 N94-28550
Anodization of copper in chloride media
[AD-A275565] p 3202 N94-28793
Thick thermal barrier coatings for diesel components
[NASA-CR-187111] p 3537 N94-29350
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446
METAL CRYSTALS
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
METAL CUTTING
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
METAL DRAWING
Plane strain finite element analysis of sheet forming operations including bending effects
p 3322 N94-30354

METAL FATIGUE
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
Role of microstructure on the fatigue durability of aluminum aircraft alloys
[AD-A275814] p 3202 N94-28830
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
The effect of mechanical paint stripping on the fatigue and fracture of thin aluminum airplane skin
p 3205 N94-29900
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914

METAL FILMS
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
Sweep rate and concentration effects on metastable structures formed in the underpotential deposition of silver on Pt(111)
[AD-A275369] p 3189 N94-29010
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446
Microstructure and mechanical properties of nitrided molybdenum silicide coatings
[DE94-006249] p 3217 N94-30025
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707

METAL IONS
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry
[DE94-006208] p 3207 N94-30024
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Rotator phases in narrow-gap semiconductors
[DE94-005472] p 3521 N94-30897

METAL JOINTS
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091
Automation of the NDT diagnostic using neural nets. Application: Inspection of Airbus longitudinal joints during maintenance
[REPT-932-600-104] p 3315 N94-29474

METAL MATRIX COMPOSITES
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688
Innovative processing of composites for ultra-high temperature applications, book 1
[AD-A275597] p 3176 N94-28729
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730
An anisotropic extension of Bodner's model of viscoplasticity: Model development
[NASA-CR-195289] p 3318 N94-28821
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite
[PB94-138310] p 3263 N94-29120
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
Properties of graphite fiber reinforced copper matrix composites for space power applications
[NASA-CR-191026] p 3178 N94-29208
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
Multiple Concentric Cylinder Model (MCCM) user's guide
[NASA-CR-195299] p 3183 N94-30125
The machining of fiber metal laminates. Part 1: An inventory of forming processes
[LR-710-PT-1] p 3184 N94-30343
Particulate metal matrix composites: Draft procedure for tensile tests at ambient temperature
[NPL-DMM(A)-100] p 3184 N94-30419
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts
p 3186 N94-30482
Studies on the optimization of deformation processed metal-metal matrix composites
[DE94-006033] p 3185 N94-30704
A class of inclusion problems for the strengthening of brittle and ductile composites p 3186 N94-30959

METAL NITRIDES
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043

METAL OXIDE SEMICONDUCTORS
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
Charge collection spectroscopy applied to MOS RAM's p 3201 N94-30220

METAL OXIDES
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
Bench-scale synthesis of nanoscale materials
p 3240 N94-30473
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901

METAL PARTICLES
Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape
[AD-A275378] p 3197 N94-29312
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma
p 3211 N94-29516
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042

METAL PLATES
Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite
[PB94-138310] p 3263 N94-29120

METAL POWDER
Mechanical alloying processing with application to structural materials: ASSERT supplement
[AD-A275400] p 3204 N94-29205
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337

METAL SHEETS
Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite
[PB94-138310] p 3263 N94-29120
Delamination growth in composites under cyclic loads
p 3183 N94-30256
Plane strain finite element analysis of sheet forming operations including bending effects
p 3322 N94-30354
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819

METAL SURFACES
Sweep rate and concentration effects on metastable structures formed in the underpotential deposition of silver on Pt(111)
[AD-A275369] p 3189 N94-29010
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521

METAL VAPORS
Studies of interfaces and vapors with Optical Second Harmonic Generation
[DE94-006295] p 3476 N94-30841

METAL WORKING
Plane strain finite element analysis of sheet forming operations including bending effects
p 3322 N94-30354
Application of ALE techniques to metal forming simulations
[DE94-005358] p 3211 N94-30892

METALLICITY
Globular cluster photometry near the turnoff: Blue stragglers, relative ages, and the horizontal branch
p 3538 N94-29732
Study of the stellar populations of the Fornax dwarf spheroidal galaxy
[ISBN-0-315-85526-6] p 3541 N94-30231

METALLIZING
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007

METALLOGRAPHY
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776
Method of test for cleanness assessment of metal alloys: The preparation of button specimens by electron beam melting and the characterisation of recovered inclusions
[NPL-DMM(A)-130] p 3210 N94-30796

METALLURGY
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446

METALORGANIC CHEMICAL VAPOR DEPOSITION
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A275079] p 3512 N94-28872

METALS
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Study of activation data of metal samples from LDEF-1 and Spacelab-2
[NASA-CR-195802] p 3205 N94-29736
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals
p 3321 N94-29808
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
A new material for removing heavy metals from water
p 3354 N94-30471
A comparison of the evolution of cold and hot deformation microstructures and textures in fcc metals
[DE94-005103] p 3210 N94-30777

METAMORPHISM (GEOLOGY)
Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle
p 3367 N94-30917

METASTABLE STATE
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549

METEOROLOGICAL INSTRUMENTS
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817

METEOROLOGICAL PARAMETERS
A global forecast model comparison study - year 1
[AD-A275674] p 3369 N94-28663
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties
[AD-A275321] p 3377 N94-28877
Oceanic survey utilizing satellites
p 3328 N94-29040
Antarctic Record, volume 36, no. 1
[REPT-106-VOL-36-NO-1] p 3357 N94-29078
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777
The incorporation and initialization of cloud water/ice in an operational forecast model p 3373 N94-29814
Atmospheric Propagation Effects Through Natural and Man-Made Obscurants for Visible to MM-Wave Radiation
[AGARD-CP-542] p 3256 N94-30495
Propagation modeling of moist air and suspended water/ice particles at frequencies below 1000 GHz
p 3256 N94-30497
Tropospheric corrections to GPS measurements using locally measured meteorological parameters compared with general tropospheric corrections
p 3144 N94-30655

METEOROLOGICAL RADAR
Numerical simulations of a mountain thunderstorm. A comparison with Doppler radar observations
[AD-A275296] p 3369 N94-28873
A study of precipitation in the coastal area of Antarctica as observed at Syowa Station using a vertical pointing radar p 3363 N94-29979
Evaluation of dual polarization attenuation of millimeter frequencies through a meteorological radar
p 3256 N94-30496

METEOROLOGICAL SATELLITES
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350

METEOROLOGICAL SERVICES
AFGWC Dial-In Subsystem (AFDIS) software users manual, version 2.2
[AD-A275844] p 3371 N94-29747

METEOROLOGY
The active titration method for measuring local hydroxyl radical concentration p 3345 N94-28602
Catalog of Air Force weather technical publications 1992-1993
[AD-A275635] p 3368 N94-28638
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
Activities report of the International Meteorological Institute
[ETN-94-95524] p 3370 N94-29423
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
The suitability of low-cost urban airshed modeling in the Chicago area
[DE94-005114] p 3349 N94-30023
Multiple weather regimes and baroclinically forced spherical resonance
[DM-65] p 3376 N94-30966

METHANE
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
Prediction of prompt NO(x) in hydrocarbon air flames
p 3190 N94-29250
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD
p 3223 N94-29518
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
The development and evaluation of a tunable diode laser trace gas sensor for the measurement of N2O and CH4 fluxes using micrometeorological techniques
[ISBN-0-315-78975-1] p 3296 N94-30801
Transient studies of low temperature catalysts for methane conversion
[DE94-005767] p 3200 N94-30877
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911

METHOD OF CHARACTERISTICS
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985

METHOD OF MOMENTS
Integral equation analysis of composite bodies of revolution and arbitrary surfaces with application to cavity-backed antennas p 3253 N94-29883

METHYL ALCOHOL
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
Methanol-mediated continuous extraction of phenolic compounds from coal liquid p 3188 N94-28679
Technical analysis of alternative fueled vehicles
[DE94-744238] p 3304 N94-30269
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE94-006100] p 3226 N94-30885

METHYL COMPOUNDS
Tris(trimethylsily)arsine and lithium bis(trimethylsily)arsenide
[AD-A275075] p 3189 N94-29140
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
Combustion and heat transfer in a high speed diesel engine operating with rape seed oil methyl ester fuel
[PB94-137536] p 3301 N94-29679
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770

METHYL POLYSILOXANES
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

METHYLATION
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770

METRIC SPACE
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753

METRICATION
SI (Metric) handbook
[NASA-TM-109197] p 3231 N94-29376

METROLOGY
SI (Metric) handbook
[NASA-TM-109197] p 3231 N94-29376
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
Solid state laser systems for space application
[NASA-CR-195777] p 3294 N94-29914
European PTTI report p 3468 N94-30642
Russian national time scale long-term stability
p 3475 N94-30679

MEXICO
Field guide to Cretaceous-tertiary boundary sections in northeastern Mexico
[NASA-CR-195719] p 3354 N94-28416

MICHELSON INTERFEROMETERS
On the importance of the Michelson-Morley experiment
[DE94-606298] p 3523 N94-28620
Three high duty cycle, space-qualified mechanisms
p 3162 N94-29642
Solid state laser systems for space application
[NASA-CR-195777] p 3294 N94-29914
Microwave Michelson interferometer system report of first use on a railgun, Green Farm, San Diego, CA
[DE94-005294] p 3289 N94-30059

MICROANALYSIS
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879
Electron microscopy: Metal alloy x ray microanalysis
[REPT-932-600-101] p 3205 N94-29525
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064

MICROBIOLOGY
Physiology and molecular-genetics of thermus and bacillus
[PB94-135571] p 3385 N94-29190

MICROCLIMATOLOGY
The use of liquid and air microclimate conditioning systems to alleviate heat stress in helicopter NBC operations p 3384 N94-28453

MICROCOMPUTERS
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159

MICROCRACKS
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975

MICROELECTRONICS
RF vacuum microelectronics
[AD-A275221] p 3263 N94-28915
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
[NASA-CR-195688] p 3235 N94-29767
Micromanufacturing: Recent developments in this country and abroad p 3235 N94-29769
Overview of microoptics: Past, present, and future
p 3235 N94-29771
Micro guidance and control technology overview
p 3144 N94-29772
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082
Proceedings of the 1991 Single Event Upset Symposium
[DSIS-92-00652] p 3495 N94-30211
Advanced development of the Spectrum Sciences Model 5005-TF, single event test fixture
p 3291 N94-30218
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445

MICROGRAVITY
Microgravity science and applications. Program tasks and bibliography for FY 1993
[NASA-TM-4569] p 3227 N94-28415
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Some issues on Japan's space food development and relating preliminary experimental study
p 3388 N94-28498
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Image technology and information analysis of bone change with gravitational exposure
p 3389 N94-28851
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Combustion studies under microgravity
p 3228 N94-28940
Glass studies under microgravity
p 3228 N94-28941
Fabrication of electronic materials in space
p 3228 N94-28942
Protein crystal growth in microgravity
p 3228 N94-28943
Cell culture in space p 3228 N94-28944
Cosmic energy equipment p 3229 N94-28945
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Microgravity by parabolic flight with MU-300 aircraft
p 3392 N94-29710
Space movement of Trichinella spiralis under microgravity p 3387 N94-29711
Posture control of goldfishes under microgravity
p 3387 N94-29712
Behavior and visual control of cyprinodonts under microgravity p 3387 N94-29713
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715

Analysis of various biological activity parameters during parabolic flight p 3393 N94-29716
Hemodynamic measurement during parabolic flight p 3393 N94-29717
Motion sickness in parabolic flight: Possibility of electrogastrography as an objective index p 3393 N94-29718
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993 [NASA-TM-106514] p 3168 N94-29757
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2 [JTN-94-80599] p 3394 N94-29863
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction p 3394 N94-29865
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866
Microgravity compatible drive system-rider. New technologies [PB94-138583] p 3229 N94-29996
Laser beam welding of AISI 316 stainless steel in microgravity environment: Experiments aboard a KC-135 flight [ISBN-0-315-86095-2] p 3229 N94-30145
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions [ISBN-0-315-86108-8] p 3209 N94-30146
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session [JTN-94-80582] p 3159 N94-30162
Microgravity fluid science research in Europe [AD-B179178] p 3229 N94-30409
Control system design for A and R supported microgravity experiments: An experiment payload control development [AD-B179107] p 3229 N94-30421
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session [JTN-94-80583] p 3159 N94-30794

MICROGRAVITY APPLICATIONS
Microgravity science and applications. Program tasks and bibliography for FY 1993 [NASA-TM-4569] p 3227 N94-28415
Plasma heating for containerless and microgravity materials processing [NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993 [NASA-TM-106514] p 3168 N94-29757
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session [JTN-94-80582] p 3159 N94-30162

MICROHARDNESS
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites [DE94-004982] p 3175 N94-28579

MICROINSTRUMENTATION
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780
Microfabricated silicon biosensors for microphysiometry p 3238 N94-29783

MICROMACHINING
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems [NASA-CR-195688] p 3235 N94-29767
Micromanufacturing: Recent developments in this country and abroad p 3235 N94-29769
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology p 3235 N94-29770
Micro guidance and control technology overview p 3144 N94-29772
A broad-band microseismometer for planetary operations p 3237 N94-29778
Macro, mini, micro and nano (M(sup 3)N) technologies for the future p 3238 N94-29786
Emerging technologies in microguidance and control p 3144 N94-29788
The application of micromachined sensors to manned space systems p 3171 N94-29791

MICROMECHANICS
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile [NASA-TM-109026] p 3177 N94-28823
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems [NASA-CR-195688] p 3235 N94-29767
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology p 3235 N94-29770
Toward milli-Newton electro- and magneto-static microactuators p 3238 N94-29784
Macro, mini, micro and nano (M(sup 3)N) technologies for the future p 3238 N94-29786
Integrated microgyroscope p 3239 N94-29789
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975
Multiple Concentric Cylinder Model (MCCM) user's guide [NASA-CR-195299] p 3183 N94-30125
Micromechanical analysis of thermo-inelastic multiphase short-fiber composites [NASA-CR-195290] p 3183 N94-30178
Simulation of composite material response under dynamic compressive loading [DE94-005272] p 3184 N94-30589
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956
A class of inclusion problems for the strengthening of brittle and ductile composites p 3186 N94-30959

MICROMETEOROIDS
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment [NASA-TM-106528] p 3167 N94-28814

MICROMETEOROLOGY
On the temperature distribution near a cold surface [AD-A275162] p 3332 N94-29288

MICROMINIATURIZATION
Toward milli-Newton electro- and magneto-static microactuators p 3238 N94-29784
Macro, mini, micro and nano (M(sup 3)N) technologies for the future p 3238 N94-29786
Emerging technologies in microguidance and control p 3144 N94-29788
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
The universal applications of microtubes and microtube composites p 3186 N94-30452

MICROMINIATURIZED ELECTRONIC DEVICES
Microfabricated silicon biosensors for microphysiometry p 3238 N94-29783
Macro, mini, micro and nano (M(sup 3)N) technologies for the future p 3238 N94-29786
Control of micromachined deformable mirrors p 3239 N94-29787
Emerging technologies in microguidance and control p 3144 N94-29788
The application of micromachined sensors to manned space systems p 3171 N94-29791
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
Single event upset and latchup measurements at Brookhaven National Laboratory p 3495 N94-30212

MICROMOTORS
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology p 3235 N94-29770

MICROORGANISMS
Researches on bioconversion of coal into liquid product p 3187 N94-28677
Fundamental studies on the corrosion behavior of weldments in marine microbial environments [AD-A275247] p 3203 N94-28900
Stable RNA sequences as a tool for DNA probes and phylogenetic studies [PB94-135423] p 3385 N94-29156
Growth of hydrocarbon-rich microalga Botryococcus braunii in secondarily treated sewage and its consumption of nitrate ion and phosphate ion p 3387 N94-29519
Microfabricated silicon biosensors for microphysiometry p 3238 N94-29783
Biodiesel from aquatic species [DE94-000275] p 3225 N94-30038

MICROPARTICLES
The impact of electrically charged microspheres with planar surfaces under vacuum conditions p 3320 N94-29765
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453

MICROPHONES
Improved in-flow acoustic sensor [NASA-CASE-ARC-12001-1] p 3478 N94-29363

MICROPROCESSORS
Data fusion and correlation techniques testbed development audio processing study [SKD-1600-73-014] p 3241 N94-28532
NSC 800, 8-bit CMOS microprocessor [NASA-CR-195736] p 3405 N94-28845
Microcomputer-based protective functions in industrial production systems: Assessment method [PB94-137817] p 3411 N94-29159
On ground system integration and testing: A modern approach p 3150 N94-29334
Communications technology for unattended sensors [DE94-005685] p 3254 N94-30043
Maestro: An open system architecture for multi-robot control p 3306 N94-30288

MICROSTRIP ANTENNAS
Printed circuit elements with applications to antennas, scattering, and circuits [AD-A275512] p 3262 N94-28669
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media [AD-A274995] p 3263 N94-28995
Theoretical and experimental study of a cylindrical microstrip antenna [REPT-932-440-109] p 3245 N94-29456
A 32 GHz microstrip array antenna for microspacecraft application p 3251 N94-29668
Radiation and scattering from cylindrically conformal printed antennas [NASA-CR-195546] p 3253 N94-29873
Radial microstrip slotline feed network for circular mobile communications array [NASA-TM-106540] p 3267 N94-30198

MICROSTRIP TRANSMISSION LINES
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media [AD-A274995] p 3263 N94-28995

MICROSTRUCTURE
Computer simulation of martensitic transformations [DE94-005213] p 3201 N94-28479
Directional solidification studies in Ni-Al alloys [DE94-005562] p 3201 N94-28527
On the prediction of HAZ grain size using Monte Carlo simulation [DE94-005465] p 3511 N94-28535
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys [DE94-005013] p 3201 N94-28544
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites [DE94-004982] p 3175 N94-28579
Role of microstructure on the fatigue durability of aluminum aircraft alloys [AD-A275814] p 3202 N94-28830
Toughening mechanisms in ultrahigh-strength steels [AD-A275439] p 3202 N94-28867
Research on the improvement of shape-memory and magnetostrictive materials [AD-A275397] p 3203 N94-29056
Effect of microstructure on the strength and fracture energy of bimaterial interfaces [AD-A274987] p 3178 N94-29126
Microstructure/property relationships for SCS6/Timetal 21-S composite [AD-A275056] p 3178 N94-29135
Low temperature behavior of virgin martensite [PB94-132925] p 3204 N94-29142
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite [AD-A275050] p 3178 N94-29166
Mechanical alloying processing with application to structural materials: ASSERT supplement [AD-A275400] p 3204 N94-29205
Characterisation and processing of SiC/MAS-L glass ceramic matrix composite [REPT-932-430-111] p 3179 N94-29412
Assessment of the fibre volume distribution around optical fibres [FFA-TN-1993-12] p 3179 N94-29425
Microstructure and mechanical properties of nitrided molybdenum silicide coatings [DE94-006249] p 3217 N94-30025
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys [DE94-607999] p 3207 N94-30076
Plasma enhanced chemical vapor deposition of ZrO2 thin films [DE94-006031] p 3218 N94-30104
On the structure and atomic motions in liquid sodium [DE94-608386] p 3490 N94-30182
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants [DE94-005083] p 3517 N94-30201
Studies on the optimization of deformation processed metal-metal matrix composites [DE94-006033] p 3185 N94-30704

Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710
A comparison of the evolution of cold and hot deformation microstructures and textures in fcc metals
[DE94-005103] p 3210 N94-30777
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914

MICROWAVE AMPLIFIERS
Towards experimental verification and device applications of current driven plasma instabilities in solid state systems
[AD-A275395] p 3504 N94-29055
X-band ultralow-noise maser amplifier performance p 3251 N94-29672

MICROWAVE ANTENNAS
A digital combining-weight estimation algorithm for broadband sources with the array feed compensation system p 3250 N94-29660
Digital combining-weight estimation for broadband sources using maximum-likelihood estimates p 3250 N94-29661
A 32 GHz microstrip array antenna for microspacecraft application p 3251 N94-29668

MICROWAVE ATTENUATION
Evaluation of dual polarization attenuation of millimeter frequencies through a meteorological radar p 3256 N94-30496

MICROWAVE CIRCUITS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995
Towards experimental verification and device applications of current driven plasma instabilities in solid state systems
[AD-A275395] p 3504 N94-29055
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
Precision frequency synthesizing sources with excellent time/frequency performances p 3473 N94-30671

MICROWAVE EQUIPMENT
Photoconductive switching for high power microwave generation
[PB94-137460] p 3244 N94-29177
Hydrogen maser clocks in space for solid-Earth research and time-transfer applications: Experiment overview and evaluation of Russian miniature sapphire loaded cavity p 3474 N94-30676

MICROWAVE FILTERS
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616

MICROWAVE FREQUENCIES
Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000
RF and microwave dielectric measurements upon layered materials using reflectometric coaxial sensor
[NPL-DES-125] p 3476 N94-30781

MICROWAVE HOLOGRAPHY
Automated inspection of turbine blades: Challenges and opportunities
[AIAA PAPER 94-1226-CP] p 3446 N94-30575

MICROWAVE IMAGERY
Model for the simulation of atmospheric effects on targets to background passive signatures p 3258 N94-30507
Polarimetric backscatter measurements of natural surfaces at millimeter wavelengths p 3259 N94-30509

MICROWAVE INTERFEROMETERS
Microwave Michelson interferometer system report of first use on a railgun, Green Farm, San Diego, CA
[DE94-005294] p 3289 N94-30059

MICROWAVE LANDING SYSTEMS
Ground independent landing system p 3137 N94-29564
Flight simulator evaluation of advanced MLS procedures
[AD-B174270] p 3143 N94-30915

MICROWAVE OSCILLATORS
Synchronization of microwave oscillators by direct optical injection
[ISBN-0-315-85546-0] p 3500 N94-30233

MICROWAVE POWER BEAMING
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355

MICROWAVE RADIOMETERS
Conceptual radiometer design studies for Earth observations from low Earth orbit
[NASA-CR-4588] p 3329 N94-29098
On the relation between SMMR 37-GHz polarization difference and the rainfall over Africa and Australia
[NASA-TM-104598] p 3370 N94-29408
Model for the simulation of atmospheric effects on targets to background passive signatures p 3258 N94-30507
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions
[PB94-142106] p 3136 N94-30890

MICROWAVE SCATTERING
A hybrid electromagnetic-statistical approach for characterizing MMW scattering by terrain p 3259 N94-30510

MICROWAVE SENSORS
Conceptual radiometer design studies for Earth observations from low Earth orbit
[NASA-CR-4588] p 3329 N94-29098

MICROWAVE SIGNATURES
Model for the simulation of atmospheric effects on targets to background passive signatures p 3258 N94-30507

MICROWAVE SPECTRA
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064

MICROWAVE SWITCHING
Photoconductive switching for high power microwave generation
[PB94-137460] p 3244 N94-29177

MICROWAVE TRANSMISSION
Preliminary analysis of Asynchronous Transfer Mode (ATM) over microwave channels
[AD-A275214] p 3243 N94-29069
Propagation modeling of moist air and suspended water/ice particles at frequencies below 1000 GHz p 3256 N94-30497
The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498

MICROWAVES
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360
Energetic events in the early universe p 3547 N94-30012
Microwave vision for robots
[AIAA PAPER 94-0687-CP] p 3443 N94-30550
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

MIDAIR COLLISIONS
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report p 3381 N94-28435

MIDDLE ATMOSPHERE
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802

MIE SCATTERING
Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape
[AD-A275378] p 3197 N94-29312
Optical modeling of visibility and visibility instrumentation using stratified Mie theory p 3348 N94-29750

MILITARY OPERATIONS
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
The concept of Royal Navy air operations under extreme environmental conditions p 3379 N94-28424
The Environmental Symptoms Questionnaire: Assessing reactions to environmental extremes in military operations p 3383 N94-28447
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905
Clinical investigation program
[AD-A275025] p 3391 N94-29116
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350
Report on NATO PTTI p 3469 N94-30645

MILITARY SPACECRAFT
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350

MILITARY TECHNOLOGY
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system
[AD-A275076] p 3329 N94-29095
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
Software testing practices and their evolution for the 1990's p 3415 N94-29335
A disciplined approach to software test and evaluation p 3416 N94-29339
Proceedings of the 3rd Conference on Military Robotic Applications
[DRES-SP-149] p 3304 N94-30275
Autonomous intelligent military robots: Army ants, killer bees, and cybernetic soldiers p 3304 N94-30276
Robotics and the battlefield of the future p 3304 N94-30277
DREV activities related to military vehicles robotization p 3305 N94-30278
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279
Force control techniques for robot manipulators and their military applications p 3307 N94-30291
Elements of supervisory control for military robotic applications p 3309 N94-30303
Aspects of the operator interface for military robotic applications in unstructured environments p 3309 N94-30304
Cubanes: Super explosives and potential pharmaceutical intermediates p 3227 N94-30454

MILLIMETER WAVES
Characterization of a diffraction grating as a simulant of a selective frequency antenna for radiometric applications
[AD-A275793] p 3241 N94-28745
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
Evaluation of dual polarization attenuation of millimeter frequencies through a meteorological radar p 3256 N94-30496
Propagation modeling of moist air and suspended water/ice particles at frequencies below 1000 GHz p 3256 N94-30497
Model for the simulation of atmospheric effects on targets to background passive signatures p 3258 N94-30507
Polarimetric backscatter measurements of natural surfaces at millimeter wavelengths p 3259 N94-30509
A hybrid electromagnetic-statistical approach for characterizing MMW scattering by terrain p 3259 N94-30510

MILLING (MACHINING)
Application of high-speed milling to the Finnish manufacturing industry
[PB94-135548] p 3230 N94-29187

MILNE METHOD
Miln equation for the calculation of the phases and amplitudes of wave functions for continuum spectrum of Coulomb two-center problem
[DE94-606292] p 3522 N94-28616

MIMD (COMPUTERS)
Building brains for bodies
[AIAA PAPER 94-1208-CP] p 3444 N94-30559

MIMO (CONTROL SYSTEMS)
Integrated active and passive control design methodology for the LaRC CSI evolutionary model
[NASA-CR-4580] p 3164 N94-28417

MINERAL DEPOSITS
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel p 3188 N94-28683

MINERALS
Image processing for hyperspectral data p 3326 N94-28930
JERS-1 data and information system for resources exploration p 3327 N94-28932

MINES (EXCAVATIONS)
Joint research activities with CCMRI (China) p 3240 N94-29521

MINIATURE ELECTRONIC EQUIPMENT
Micromachined electron tunneling infrared sensors p 3238 N94-29785
Integrated microgyroscope p 3239 N94-29789

MINIATURIZATION
Miniaturization in x ray and gamma ray spectroscopy p 3236 N94-29773
A sub-cm micromachined electron microscope p 3236 N94-29775
Micromachined electron tunneling infrared sensors p 3238 N94-29785
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794

MINIMA
Modifications of the Griesmer bound
p 3247 N94-29618
MINIMAL SURFACES
The Klein-Fock equation, minimal surfaces and gravitational fields
[DE94-606340] p 3356 N94-28803
MINIMAX TECHNIQUE
The transient period of a cyclic process: An horizon theorem
[MEMO-1149] p 3427 N94-30585
MINING
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel
p 3188 N94-28683
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551
MINORITIES
The Seventh Annual National Conference of Black Physics Students
[NASA-CR-195735] p 3526 N94-28746
MIRRORS
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633
Determining noise temperatures in beam waveguide systems p 3249 N94-29657
Control of micromachined deformable mirrors
p 3239 N94-29787
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598
Characterization of defect geometries in multilayer optical coatings
[DE94-005820] p 3501 N94-30599
MISSILE DEFENSE
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
MISSILE DESIGN
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473
MISSILE DETECTION
Missile launch detection electric field perturbation experiment
[DE94-004224] p 3466 N94-30586
MISSILES
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
MISSION PLANNING
MUADEE: Mars Upper Atmosphere Dynamics, Energetics, and Evolution discovery mission. Executive summary volume
[NASA-CR-195732] p 3549 N94-28418
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
A capacity planning model for Canadian military airlift requests
[ISBN-0-315-86079-0] p 3136 N94-30144
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
MIXED OXIDES
Synthesis and characterization of novel ternary and quaternary reduced molybdenum oxides
[DE94-005563] p 3510 N94-28529
Nonaqueous slip casting of YBa2Cu3O(7-x) superconductive ceramics
[NASA-CR-4575] p 3512 N94-29101
MIXERS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
MIXING
Methods of testing parameterizations: Vertical ocean mixing p 3352 N94-30633
MIXING LAYERS (FLUIDS)
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Large eddy simulation of subsonic mixing layers
p 3276 N94-29851
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958
MOBILE COMMUNICATION SYSTEMS
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Radial microstrip slotline feed network for circular mobile communications array
[NASA-TM-106540] p 3267 N94-30198
MOBILITY
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899
MODAL RESPONSE
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
Pulse response based minimum time control of flexible structures p 3436 N94-29720
Modal analysis of solar panels using boundary integral equations
[NLT-TP-92218-U] p 3338 N94-30328
Second-order structural identification via state space-based system realizations p 3323 N94-30815
MODEL REFERENCE ADAPTIVE CONTROL
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565
MODELS
Molecular structure of coal studied by solvent extraction p 3187 N94-28676
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068
MODEMS
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646
MODES (STANDING WAVES)
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
MODULATION
Tropospheric HO2 determination by FAGE
p 3345 N94-28606
MODULATORS
Spatial light modulators with arbitrary quantum wells profiles
[AD-A275023] p 3499 N94-29114
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Optical Chopper Assembly for the Mars Observer
p 3162 N94-29639
MODULES
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464
MODULUS OF ELASTICITY
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
Creep and physical aging of PVC: Dependence on stress and temperature
[NPL-DMM(A)-115] p 3217 N94-29886
Resonant ultrasound spectroscopy for elastic constant measurements
[DE94-005016] p 3480 N94-30098
A class of inclusion problems for the strengthening of brittle and ductile composites p 3186 N94-30959
MOIRE EFFECTS
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
MOIRE INTERFEROMETRY
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Fracture process zone of brittle composites
p 3182 N94-29876
MOISTURE CONTENT
Global patterns of cloud optical thickness variation with temperature and the implications for climate change
p 3374 N94-29972
MOISTURE RESISTANCE
Polyimides containing pendent siloxane groups
[NASA-CASE-LAR-14638-1] p 3215 N94-29555
MOLECULAR BEAM EPITAXY
Exploratory research for a high temperature superconducting integrated circuit
[AD-A275798] p 3262 N94-28767
Spatial light modulators with arbitrary quantum wells profiles
[AD-A275023] p 3499 N94-29114
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
MOLECULAR BEAMS
Surface structure and stereochemical properties of self-assembled monolayer materials
[DE94-004960] p 3484 N94-28578
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899
MOLECULAR BIOLOGY
Biodiesel from aquatic species
[DE94-000275] p 3225 N94-30038
Lattice gas simulations of replicating domains
[DE94-005008] p 3200 N94-30748
MOLECULAR CLOUDS
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
MOLECULAR DIFFUSION
Molecular aspects of transport in thin films of controlled architecture
[DE94-004552] p 3211 N94-28457
Effects of diffusion and inertia on chaotic mixing: A computational and experimental study
p 3488 N94-29903
Lattice gas simulations of replicating domains
[DE94-005008] p 3200 N94-30748
MOLECULAR DYNAMICS
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
Nanodislocation structures generated in shocked crystals p 3514 N94-29915
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
Theoretical studies of solid-fluid phase equilibria
[DE94-006406] p 3226 N94-30708
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752
MOLECULAR ENERGY LEVELS
Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton
[NASA-CR-195727] p 3549 N94-28816
MOLECULAR EXCITATION
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE94-006509] p 3489 N94-30061
MOLECULAR GASES
The kinematics of molecular gas and dust in the nearby galaxies Centaurus A and M82 p 3544 N94-29738
MOLECULAR INTERACTIONS
Low energy ion-molecule reactions and chemiionization kinetics
[DE94-005414] p 3481 N94-28491
Monte Carlo simulation or normal shock wave. Part 2: VHS model and VSS model p 3123 N94-28948
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
Theoretical studies of solid-fluid phase equilibria
[DE94-006406] p 3226 N94-30708
MOLECULAR IONS
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
MOLECULAR ORBITALS
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation
p 3188 N94-28681
MOLECULAR SPECTRA
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation
p 3188 N94-28681
MOLECULAR STRUCTURE
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
Molecular structure of coal studied by solvent extraction p 3187 N94-28676
Structural changes during carbonization and oxidation of coal p 3187 N94-28678
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation
p 3188 N94-28681
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021
Synthesis and molecular structures of R(Me3CCH2)2In-E(SiMe3) (R = Me3CCH2, E = P or As; R = Me, E = P)
[AD-A275020] p 3486 N94-29131

Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
Organic materials that respond to molecules
[AD-A275392] p 3174 N94-29307
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378

MOLECULES
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901

MOLNIYA SATELLITES
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216

MOLTEN SALT ELECTROLYTES
Fundamental stack and system issues in molten carbonate fuel cell development
[DE94-005960] p 3338 N94-30048

MOLYBDENUM
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933
Microstructure and mechanical properties of nitrided molybdenum silicide coatings
[DE94-006249] p 3217 N94-30025
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253
Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693
Studies of supported molybdenum and tungsten
[DE94-006207] p 3210 N94-30839

MOLYBDENUM ALLOYS
Innovative processing of composites for ultra-high temperature applications, book 2
[AD-A275598] p 3177 N94-28730

MOLYBDENUM COMPOUNDS
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites
[DE94-004982] p 3175 N94-28579
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581

MOLYBDENUM OXIDES
Synthesis and characterization of novel ternary and quaternary reduced molybdenum oxides
[DE94-005563] p 3510 N94-28529

MOMENTS OF INERTIA
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169

MOMENTUM
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836

MOMENTUM TRANSFER
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182

MONITORS
Monitor for status epilepticus seizures
p 3397 N94-30460
A transmission-loss monitor using current transformers
[DE94-003974] p 3267 N94-30716

MONOCULAR VISION
Motion and structure from planar motion in noisy monocular image sequences p 3308 N94-30299

MONOMOLECULAR FILMS
Surface structure and stereochemical properties of self-assembled monolayer materials
[DE94-004960] p 3484 N94-28578

MONOPULSE RADAR
Radar cross sections of ground clutter at 95 GHz for summer and fall conditions p 3259 N94-30512

MONSOONS
Study of dynamic characteristics of a monsoon circulation tube
[AD-A275238] p 3370 N94-29394

MONTE CARLO METHOD
A measurement of the LMP effect
[DE94-005225] p 3482 N94-28493
On the prediction of HAZ grain size using Monte Carlo simulation
[DE94-005465] p 3511 N94-28535
Energy losses of fast charged particles in thin silicon detectors
[DE94-606065] p 3483 N94-28552
Solution of charged particle transport equation by Monte-Carlo method in the BRANDZ code system
[DE94-606270] p 3484 N94-28614
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics
[NAL-SP-19] p 3123 N94-28946
Monte Carlo simulation or normal shock wave. Part 2: VHS model and VSS model p 3123 N94-28948
Variable soft sphere molecular model in the Monte Carlo simulation of air species p 3123 N94-28949
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
Focused ion beam fabrication of microelectronic structures
[AD-A275384] p 3264 N94-29305
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Measurement of the W mass in the D0 detector
[DE94-006002] p 3490 N94-30103
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
Ten new checks to assess the statistical quality of Monte Carlo solutions in MCNP
[DE94-006137] p 3465 N94-30366
Systematic error estimation in multisensor fusion systems
[AD-B179298] p 3428 N94-30764

MOON
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212

MORALE
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034

MORNING
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869

MORPHOLOGY
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-006] p 3396 N94-30978

MOSAICS
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540

MOSSBAUER EFFECT
Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774

MOTION PERCEPTION
Motion and structure from planar motion in noisy monocular image sequences p 3308 N94-30299
Obstacle detection for an autonomous vehicle
p 3309 N94-30302
Aspects of vision and planning in a dynamic, uncertain environment p 3448 N94-30803

MOTION PICTURES
Animation techniques in BRL-CAD
[AD-A275232] p 3417 N94-29392

MOTION SICKNESS
Effect of seasickness on aircrew student survivor ability after ditching in cold water p 3379 N94-28425
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Disturbance of equilibrium on JAL flight crew
p 3390 N94-28856
Space and vertigo: In relation to space motion sickness p 3390 N94-28857
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Motion sickness in parabolic flight: Possibility of electrogastrography as an objective index
p 3393 N94-29718

MOTION STABILITY
Some remarks about pseudo-Hamiltonian
[DE94-003273] p 3487 N94-29700

MOTOR VEHICLES
TCM exemptions to promote alternative-fuel vehicles: The good, the bad, and the ugly
[DE94-005924] p 3311 N94-30703

MOUNTAINS
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080

MOUNTING
RF vacuum microelectronics
[AD-A275221] p 3263 N94-28915

MTBF
Algorithms for treating redundancy in repairable and non-repairable systems
[DE94-005289] p 3315 N94-29020

MULTIGRID METHODS
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains
p 3124 N94-28956
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
RNS optimization procedure for three-dimensional composite velocity multi-block applications
p 3273 N94-29534
Computational methods for the shape shading problem
[ISBN-0-315-85430-8] p 3421 N94-30136
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208

MULTIMEDIA
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910
HYPER-NPSNET: Embedded multimedia in a 3D virtual world
[AD-A275063] p 3410 N94-29152
End-to-end delay reduction in narrow bandwidth real-time multimedia tele-education applications
[AD-B179614] p 3260 N94-30518

MULTIPATH TRANSMISSION
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions
p 3253 N94-29882

MULTIPLE ACCESS
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912
Information-seeking in hypertext: Multiple access methods in a full-text hypertext database
p 3536 N94-30918

MULTIPLEXING
A multiplexed two-way solid communications link for teleoperated robots p 3310 N94-30310

MULTIPROCESSING (COMPUTERS)
Design and packaging of fault tolerant optoelectronic multiprocessor computing system
[AD-A275896] p 3405 N94-28798
Model-oriented analysis of a communications protocol
[PB94-138146] p 3244 N94-29109
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
Design of a thinwire real-time multiprocessor operating system p 3415 N94-29333
High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Computational balance in real-time cyclic spectral analysis
[DE94-005091] p 3432 N94-30100

A locally synchronous globally asynchronous Vertex-8 processing element for image reconstruction on a mesh
[ISBN-0-315-86005-7] p 3432 N94-30143
Common spaceborne multicomputer operating system and development environment
[NASA-TM-109092] p 3422 N94-30197
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
Improving the execution speed of robot control computations: An allocation scheme for heterogeneous multiprocessors p 3310 N94-30308

MULTISENSOR APPLICATIONS
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Multi-sensor data fusion and the use of artificial intelligence
[PB94-126216] p 3448 N94-30741
Systematic error estimation in multisensor fusion systems
[AD-B179298] p 3428 N94-30764

MULTISTATIC RADAR
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
Synchronization in multistatic radar
[PB94-136975] p 3242 N94-28885
Synchronization, positioning, and communication in multistatic radar systems for air defence
[PB94-137478] p 3243 N94-28908
Simulator for multistatic radar
[PB94-135506] p 3245 N94-29311

MULTIVARIATE STATISTICAL ANALYSIS
Noise and drift analysis of non-equally spaced timing data p 3472 N94-30667

MUON SPIN ROTATION
On the (mu)SR activity at LNP JINR phasotron
[DE94-608385] p 3517 N94-30195
MuSR measurement of the magnetic penetration depth and coherence length in the high-Tc superconductor YBa2Cu3O(6.95)
[ISBN-0-315-85385-9] p 3517 N94-30203

MUONS
Simulation of experiments on deep inelastic scattering of muons on superconducting magnetic toroidal spectrometer STORS
[DE94-606267] p 3483 N94-28554
B production and B(0)(bar B)(0) mixing at DO
[DE94-004664] p 3484 N94-28574
Project of the experiment to test the hypothesis on existence of white and black p(mu)-atoms
[DE94-606751] p 3485 N94-28625
A study of the ultrahigh-energy cosmic ray mass composition with the MACRO and EAS-TOP experiments p 3552 N94-29687
On the (mu)SR activity at LNP JINR phasotron
[DE94-608385] p 3517 N94-30195
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779
Inclusive single muon production in D0
[DE94-006175] p 3493 N94-30887

MUSCLES
Leg muscle volume during 30-day 6-degree head-down bed rest with isotonic and isokinetic exercise training
[NASA-TM-4580] p 3385 N94-29401
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction p 3394 N94-29865
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866

MUSCULAR FUNCTION
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866

MUSCULOSKELETAL SYSTEM
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866

MUSIC
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979

N

NAKHLITES
Cosmogenic C-14 in Antarctic and non-Antarctic meteorites and lunar samples
[NASA-CR-195795] p 3546 N94-29905

NAPHTHALENE
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087

NASA PROGRAMS
NASA space and Earth science data on CD-ROM
[NASA-TM-109709] p 3528 N94-28414
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
NASA Parts Program Office responsibilities p 3165 N94-28702
NASA Parts Project Office: Basic goals p 3166 N94-28703
Research and technology, 1992
[NASA-TM-103996] p 3555 N94-29891
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
Terrestrial applications of NASA space telerobotics technologies
[AIAA PAPER 94-1235-CP] p 3448 N94-30582

NASA SPACE PROGRAMS
Status of frequency and time support for NASA systems p 3468 N94-30640

NASTRAN
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469

NATIONAL AIRSPACE SYSTEM
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
Loran-C time management p 3144 N94-30644

NATURAL GAS
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
Technical analysis of alternative fueled vehicles
[DE94-744238] p 3304 N94-30269
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831
Compressed natural gas fueled vehicles: The Houston experience
[DE94-005804] p 3312 N94-30878
Assessment of costs and benefits of flexible and alternative fuel use in the US transportation sector
[DE94-006100] p 3226 N94-30885

NATURAL LANGUAGE (COMPUTERS)
Engineering specification editing tools
[AD-A275116] p 3419 N94-29746

NATURAL LANGUAGE PROCESSING
An architecturally-based theory of human sentence comprehension
[AD-A275380] p 3398 N94-29313
Generalized left-corner parsing
[TR-92-21] p 3432 N94-30356
Interrogatives and adverbs of quantification
[LP-92-14] p 3456 N94-30372

NAVIER-STOKES EQUATION
Large eddy simulations using lattice Boltzmann algorithms
[DE94-005666] p 3270 N94-28549
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains p 3124 N94-28956
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957
Unsteady aerodynamic computations around NACA0012 at high angles of attack p 3126 N94-28969
Study of modeling of turbulence of renormalization group analysis p 3126 N94-28970
The upsilon-q method and the psi-q method for incompressible flows p 3126 N94-28971
Theoretical study of the incompressible Navier-Stokes equations by the least-squares method
[NASA-TM-106535] p 3272 N94-29096
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall
[AD-A275416] p 3129 N94-29197
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
RNS optimization procedure for three-dimensional composite velocity multi-block applications p 3273 N94-29534
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612
Spherical model for turbulence p 3274 N94-29730
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Numerical solution of 3-D Navier-Stokes equations in vorticity-velocity form for incompressible flows p 3276 N94-29843
Algorithm and code development for unsteady three-dimensional Navier-Stokes equations
[NASA-CR-195774] p 3277 N94-29942
High-resolution algorithms for the Navier-Stokes equations for generalized discretizations p 3278 N94-29965
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Euler results of the ISNaS compressible multi-block flow solver
[AD-B179299] p 3281 N94-30756
Information system for flow simulation based on the Navier-Stokes equations vectorization
[AD-B179293] p 3281 N94-30763

NAVIGATION
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
ARK: Autonomous mobile robot in an industrial environment
[AIAA PAPER 94-1177-CP] p 3439 N94-30529
Meeting the challenges of installing a mobile robotic system
[AIAA PAPER 94-1187-CP] p 3440 N94-30537

NAVIGATION AIDS
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Ground independent landing system p 3137 N94-29564
GPS/GNSS for ATM p 3138 N94-29565

NAVIGATION INSTRUMENTS
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551

NAVIGATION SATELLITES
GPS/GNSS for ATM p 3138 N94-29565
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639

NAVSTAR SATELLITES
Cesium and rubidium frequency standards status and performance on the GPS program p 3145 N94-30663
A review of the status and capabilities of Navstar GPS
[AD-B174629] p 3143 N94-30854

NAVY
Communications subsystem for the Petite Amateur Navy Satellite (PANSAT)
[AD-A275532] p 3242 N94-28812

NEAR FIELDS
Measurement basis of near fields in spherical coordinates in the 100 MHz to 6 GHz band
[REPT-932-430-107] p 3255 N94-30153

NEAR INFRARED RADIATION
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779

Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892
A near-infrared survey of the star forming region NGC 2264 p 3540 N94-29971

NEAR ULTRAVIOLET RADIATION
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states p 3294 N94-29531

NEAR WAKES
An experimental study of wing tip vortex in the near wake of a rectangular wing
[AD-A275389] p 3129 N94-29306
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764

NEGATIVE ELECTRON AFFINITY
Electron beam analysis for cyclotron harmonic and free-electron laser devices
[AD-A275070] p 3293 N94-29179

NEGATIVE IONS
A future, intense source of negative hydrogen ions p 3494 N94-30485

NEODYMIUM
Solubility of Nd in brine
[DE94-005099] p 3187 N94-28567

NEON
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3466 N94-29087
Optical field ionization of atoms and ions using ultrashort laser pulses
[DE94-006643] p 3488 N94-29845

NEPTUNE (PLANET)
Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623

NERVOUS SYSTEM
Effect of food intake on skin vasomotor responses to head-up tilt in humans p 3390 N94-28854

NETS
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378

NETWORK ANALYSIS
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
Digitally programmable composite operational amplifier applications
[AD-A275081] p 3262 N94-28842
High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
Customer creation and combination in queueing networks
[MEMO-INF-93-35] p 3438 N94-30375
An intrinsic Hamiltonian formulation of the dynamics of LC-circuits
[MEMO-1154] p 3462 N94-30964

NETWORK CONTROL
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
Remote observatory access via the advanced communications technology satellite p 3253 N94-29894
Performance evaluation of intelligent network services
[MEMO-INF-93-20] p 3438 N94-30373
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411

NETWORKS
Bayesian belief networks and conditional independencies
[RUU-CS-92-36] p 3465 N94-30376

NEURAL NETS
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
Track filtering by robust neural network
[DE94-606067] p 3434 N94-28613
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
Non-intrusive gaze tracking using artificial neural networks
[AD-A275186] p 3397 N94-28860
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137
Neural network solutions to logic programs with geometric constraints
[AD-A275419] p 3435 N94-29198
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
Automation of the NDT diagnostic using neural nets. Application: Inspection of Airbus longitudinal joints during maintenance
[REPT-932-600-104] p 3315 N94-29474
A neural network with modular hierarchical learning
[NASA-CASE-NPO-19077-1-CU] p 3435 N94-29492
Nonlinear PCA: Algorithms and applications
[PB94-137544] p 3419 N94-29680
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Neural network with dynamically adaptable neurons
[NASA-CASE-NPO-17803-1-CU] p 3436 N94-29756
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798
Robotic hand-eye motor learning p 3436 N94-29835
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Reinforcement learning for robots using neural networks p 3437 N94-29853
Genetic algorithms at UC Davis/LLNL
[DE94-006625] p 3421 N94-30117
Unsupervised learning in analog networks
[ISBN-0-315-85959-8] p 3432 N94-30140
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250
A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334
A multiscale approach to image segmentation using Kohonen networks
[RUU-CS-93-06] p 3438 N94-30349
Microwave vision for robots
[AIAA PAPER 94-0887-CP] p 3443 N94-30550
A neural network-based technique for structural identification of SISO systems
[REPT-93-076] p 3449 N94-30941

NEUROLOGY
Monitor for status epilepticus seizures p 3397 N94-30460

NEURONS
Synaptogenesis, selective stabilization, and free association
[AD-A275250] p 3392 N94-29431
A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334

NEUTRAL ATMOSPHERES
The Pluto fast flyby mission: Completing the reconnaissance of the solar system p 3235 N94-29768

NEUTRINOS
Emission of supersymmetric neutron pair by charged lepton in magnetic field
[DE93-634365] p 3481 N94-28468
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Proceedings of the workshop on quark and lepton mass matrices
[DE94-707692] p 3485 N94-28624
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
On possibility to create the scintillation trigger for liquid-argon neutrino detector
[DE94-607844] p 3489 N94-30050
Search for heavy neutrinos at the IHEP-JINR neutrino detector
[DE94-608175] p 3489 N94-30095
Research in elementary particle physics
[DE94-001657] p 3491 N94-30762

NEUTRON COUNTERS
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695

NEUTRON DIFFRACTION
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field
[DE94-606851] p 3511 N94-28626
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043

NEUTRON IRRADIATION
Relationship between swelling and irradiation creep in cold-worked PCA stainless steel irradiated to approximately 178 dpa at approximately 400 C
[DE94-004368] p 3201 N94-28456
Radiation effects in beryllium used for plasma protection
[DE94-004599] p 3201 N94-28460
Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites
[DE94-006046] p 3508 N94-30365

NEUTRON SCATTERING
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field
[DE94-606851] p 3511 N94-28626
Double-crystal analyser system for the PRISMA spectrometer: Test of a prototype
[PB94-138245] p 3286 N94-29113
Incommensurate magnetic order in UNi2Al3
[DE94-005449] p 3209 N94-30246

NEUTRON SOURCES
Double-crystal analyser system for the PRISMA spectrometer: Test of a prototype
[PB94-138245] p 3286 N94-29113
Neutronics of a D-Li neutron source: An overview
[DE94-005372] p 3493 N94-30893

NEUTRON SPECTROMETERS
Double-crystal analyser system for the PRISMA spectrometer: Test of a prototype
[PB94-138245] p 3286 N94-29113
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052

NEUTRON STARS
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
On observing neutron star oscillations p 3538 N94-29795
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991

NEUTRONS
Results on structure functions from fixed-target experiments
[DE94-005233] p 3482 N94-28541
Determination of the neutron spin-structure function
[DE94-005234] p 3483 N94-28542
The effects of relativistic neutrons on nonthermal models of active galactic nuclei p 3547 N94-29993
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology
[DE94-002642] p 3497 N94-30825

NEWTON METHODS
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859

NICKEL
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138

NICKEL ALLOYS
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Incommensurate magnetic order in UNi2Al3
[DE94-005449] p 3209 N94-30246

NICKEL COATINGS
Adhesion of electrolessly deposited Ni(P) on alumina ceramic
[ETN-94-95358] p 3212 N94-28539

NICKEL COMPOUNDS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
NICKEL OXIDES
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
Transient studies of low temperature catalysts for methane conversion
[DE94-005767] p 3200 N94-30877
NIGHT VISION
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
NIOBIUM ALLOYS
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850
NITRAMINE PROPELLANTS
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308
NITRATES
Growth of hydrocarbon-rich microalga Botryococcus braunii in secondarily treated sewage and its consumption of nitrate ion and phosphate ion p 3387 N94-29519
NITRIC OXIDE
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign
[DE94-003989] p 3342 N94-28523
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model
p 3190 N94-29251
Flowfield prediction of NO(x) and smoke production in aircraft engines p 3191 N94-29252
NITRIDING
Microstructure and mechanical properties of nitrided molybdenum silicide coatings
[DE94-006249] p 3217 N94-30025
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
NITRO COMPOUNDS
Superior energetic materials that contain carbocations and anions. Energetic materials restricted in composition to C, H, N, and O atoms
[AD-A275449] p 3225 N94-29310
NITROGEN
Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603
Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton
[NASA-CR-195727] p 3549 N94-28816
Microstructure and mechanical properties of nitrided molybdenum silicide coatings
[DE94-006249] p 3217 N94-30025
NITROGEN DIOXIDE
The radical amplifier p 3345 N94-28604
NITROGEN OXIDES
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463
The radical amplifier p 3345 N94-28604
Fuels and Combustion Technology for Advanced Aircraft Engines
[AGARD-CP-536] p 3189 N94-29246
On the effect of emissions from aircraft engines on the state of the atmosphere p 3189 N94-29247
Prediction of prompt NO(x) in hydrocarbon air flames
p 3190 N94-29250
Ultra low NO(x) ultra lean gas turbine primary zones with liquid fuels p 3154 N94-29267
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future
p 3194 N94-29272
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
The influence of air distribution on homogeneity and pollutant formation in the primary zone of a tubular combustor p 3194 N94-29274
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
NITROGEN PLASMA
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
NITROGEN POLYMERS
Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets
[AD-A275462] p 3177 N94-28735
NITROUS OXIDES
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign
[DE94-003989] p 3342 N94-28523
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
A toy model for estimating N2O emissions from natural soils p 3351 N94-30627
The development and evaluation of a tunable diode laser trace gas sensor for the measurement of N2O and CH4 fluxes using micrometeorological techniques
[ISBN-0-315-78975-1] p 3296 N94-30801
NOISE (SOUND)
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
Evaluation of monitoring audiometry in the United States Air Force Hearing Conservation Program
[AD-A275309] p 3391 N94-29211
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings
p 3311 N94-30792
NOISE GENERATORS
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
NOISE INTENSITY
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464
NOISE MEASUREMENT
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717
NOISE PREDICTION
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
NOISE PREDICTION (AIRCRAFT)
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552
NOISE PROPAGATION
Attenuation of outdoor sound propagation levels by a snow cover
[AD-A275387] p 3478 N94-29314
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
NOISE REDUCTION
Removal of coherent Extremely Low Frequency (ELF) background noise by adaptive noise cancellation
[AD-A275016] p 3243 N94-28898
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Boundary layer control device for duct silencers
[NASA-CASE-ARC-12030-1] p 3478 N94-29362
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979
NOISE SPECTRA
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings
p 3311 N94-30792
NOISE TEMPERATURE
Determining noise temperatures in beam waveguide systems p 3249 N94-29657
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
X-band ultralow-noise maser amplifier performance
p 3251 N94-29672
NONADIABATIC CONDITIONS
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903
NONDESTRUCTIVE TESTS
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057
Automation of the NDT diagnostic using neural nets. Application: Inspection of Airbus longitudinal joints during maintenance
[REPT-932-600-104] p 3315 N94-29474
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538
Method and apparatus for indicating disbonds in joint regions
[NASA-CASE-LAR-14626-1] p 3315 N94-29548
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929
Vacuum chamber and adaptors for shearography and holography
[NASA-CR-192467] p 3157 N94-29956
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
Resonant ultrasound spectroscopy for elastic constant measurements
[DE94-005016] p 3480 N94-30098
Radar jet engine health monitoring project
[ASSGI-301] p 3153 N94-30130
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Automation for nondestructive inspection of aircraft
[AIAA PAPER 94-1223-CP] p 3446 N94-30572
NONEQUILIBRIUM CONDITIONS
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675
NONEQUILIBRIUM FLOW
Numerical analysis of two dimensional/axisymmetric non-equilibrium hypersonic flow p 3125 N94-28963
On approximate Riemann solvers: Improvement of HLLEM scheme and its generalization for chemically reacting flows p 3126 N94-28973
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675
NONINTRUSIVE MEASUREMENT
Non-intrusive gaze tracking using artificial neural networks
[AD-A275186] p 3397 N94-28860
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824
Non-invasive temperature measurements using electron paramagnetic resonance spectroscopy
p 3198 N94-29881
NONLINEAR EQUATIONS
Numerical analysis and computation of nonlinear partial differential equations from applied mathematics
[AD-A275582] p 3451 N94-28723
Approximation of solutions of the cubic NLSE by finite dimensional equations and non-squeezing properties
[PB94-138294] p 3452 N94-29148
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities
p 3506 N94-29822
Approximation methods for nonlinear operator equations of the m-accretive type
[DE94-608099] p 3467 N94-30065
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
NONLINEAR FILTERS
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204

NONLINEAR OPTICS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835

NONLINEAR PROGRAMMING
Center for Parallel Optimization
[AD-A274988] p 3431 N94-29127
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527

NONLINEAR SYSTEMS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Nonlinear magnetohydrodynamics
[DE94-005654] p 3503 N94-28547
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
On the nonlinear dynamics of ocean wave systems p 3378 N94-30790
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953

NONLINEARITY
Dissipative quantum dynamics and nonlinear sigma-model
[DE94-606295] p 3523 N94-28617
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities p 3506 N94-29822
Robotic hand-eye motor learning p 3436 N94-29835
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit p 3142 N94-29837
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787

NORMALIZING
Comparing curried and uncurried rewriting
[CWI-CS-R9350] p 3425 N94-30415
Perpetual reductions and strong normalization in orthogonal term rewriting systems
[CWI-CS-R9345] p 3426 N94-30437

NORMALIZING (STATISTICS)
Output statistics of the SALFAS FM normalizer Smoothing/Prediction function
[AD-A275758] p 3463 N94-28759
Perpetual reductions in orthogonal combinatory reduction systems
[CWI-CS-R9349] p 3459 N94-30413
Higher order recursive program schemes are Turing incomplete
[CWI-CS-R9348] p 3425 N94-30414
Comparing curried and uncurried rewriting
[CWI-CS-R9350] p 3425 N94-30415

NORTH ATLANTIC TREATY ORGANIZATION (NATO)
Report on NATO PTTI p 3469 N94-30645

NORWAY
The Norwegian seismic array (NORSAR), phase 3
[AD-A275440] p 3356 N94-28868

NOSES (FOREBODIES)
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes p 3155 N94-29728

NOTCHES
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals p 3321 N94-29808

NOZZLE DESIGN
Fuel injector design for high temperature aircraft engine p 3154 N94-29263

NOZZLE FLOW
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments
[NASA-TM-106532] p 3271 N94-28835
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
Scramjet CFD methods and analysis. Part 1: Scramjet CFD methods. Numerical simulation of the flow in scramjet duct p 3152 N94-29296
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-125722-U] p 3281 N94-30743
Evaluation of flip-flop jet nozzles for use as practical excitation devices
[NASA-TM-106377] p 3135 N94-30949

NUCLEAR BINDING ENERGY
The bond diluted spin-1 Blume-Emery-Griffiths model in a transverse field
[DE94-608121] p 3525 N94-30167

NUCLEAR DEFORMATION
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183

NUCLEAR ELECTRIC POWER GENERATION
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168

NUCLEAR ELECTRIC PROPULSION
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833

NUCLEAR EMULSIONS
Meso-optical Fourier transform microscope with double focusing
[DE94-607851] p 3290 N94-30148

NUCLEAR ENERGY
Cosmic energy equipment p 3229 N94-28945

NUCLEAR FUSION
Broadband EUV survey spectrometer for short-timescale experiments
[DE94-005459] p 3498 N94-28534
Project of the experiment to test the hypothesis on existence of white and black p(mu)-atoms
[DE94-606751] p 3485 N94-28625
Transient internal probe
[AD-A275054] p 3505 N94-29134
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339

NUCLEAR INTERACTIONS
Experimental setup for study of hadron and hard photon production in nucleus-nucleus collisions
[DE94-607849] p 3489 N94-30051
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei
[DE94-004178] p 3491 N94-30686

NUCLEAR MAGNETIC RESONANCE
Fundamental studies of hydrogen interaction with supported meta and bimetallic catalysts
[DE94-004887] p 3202 N94-28562
Structural changes during carbonization and oxidation of coal p 3187 N94-28678
Nuclear magnetic relaxation studies of semiconductor nanocrystals and solids
[DE94-006301] p 3520 N94-30842

NUCLEAR MODELS
Nucleon and nuclei at finite temperature, as a phenomenological test of the entropy bound
[DE94-608094] p 3489 N94-30097

NUCLEAR PHYSICS
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838

NUCLEAR POWER PLANTS
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928
Risk measures in living probabilistic safety assessment
[VTT-PUBS-146] p 3465 N94-30154
Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830

NUCLEAR PROPULSION
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588

NUCLEAR PUMPING
Reactor-pumped laser experimental results
[DE94-005247] p 3292 N94-28482
Reactor-pumped laser facility at DOE's Nevada Test Site
[DE94-006371] p 3295 N94-30265
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

NUCLEAR RADIATION
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832

NUCLEAR REACTIONS
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology
[DE94-002642] p 3497 N94-30825
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
Neutronics of a D-Li neutron source: An overview
[DE94-005372] p 3493 N94-30893

NUCLEAR REACTOR CONTROL
SP-100 control drive assembly development p 3163 N94-29651

NUCLEAR REACTORS
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Teleoperated systems for nuclear reactors: Inspection and maintenance
[AIAA PAPER 94-1176-CP] p 3439 N94-30528
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588

NUCLEAR STRUCTURE
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183

NUCLEATION
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Study of nucleation and growth in Al-Zn alloys using TEM
[DE94-006312] p 3211 N94-30852
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899

NUCLEI (NUCLEAR PHYSICS)
Nucleon and nuclei at finite temperature, as a phenomenological test of the entropy bound
[DE94-608094] p 3489 N94-30097

NUCLEONS
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
Nucleon and nuclei at finite temperature, as a phenomenological test of the entropy bound
[DE94-608094] p 3489 N94-30097
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838

NUCLIDES
Production rates of terrestrial in-situ-produced cosmogenic nuclides
[DE94-005156] p 3543 N94-28545

NUMERICAL ANALYSIS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400

Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
On the linear stability of Verkley's modons
p 3324 N94-28695
Numerical analysis and computation of nonlinear partial differential equations from applied mathematics
[AD-A275582] p 3451 N94-28723
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
A numerical solver for initial and boundary value problems in differential-algebraic systems
[AD-A275447] p 3452 N94-28883
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code
p 3124 N94-28958
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators
[AD-A275235] p 3263 N94-29028
Scale-length dependence of the ratio between the magnetic and electric field perturbations in the ionospheric field-aligned current region p 3360 N94-29243
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705
Investigations of dispersion characteristics of microwave/optical guided wave structures by using transmission line matrix method
[ISBN-0-315-85856-7] p 3254 N94-30034

NUMERICAL CONTROL
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
Reactive system software concept with automation using the LDS language p 3414 N94-29327
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
[NASA-TM-109105] p 3157 N94-30200
Generation of gear tooth surfaces by application of CNC machines
[NASA-CR-195306] p 3303 N94-30205
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
An inverse kinematics algorithm for the DREP/Philips real-time radiographic manipulator system
p 3307 N94-30292
Simulation of lightweight robots and their controllers
p 3307 N94-30294
Elements of supervisory control for military robotic applications p 3309 N94-30303
Supervised autonomous control for Space Station Special Purpose Dextrous Manipulator (SPDM) robot
p 3309 N94-30305
A testbed for the development of ground-based control of space-based manipulators p 3309 N94-30306
Achieving robot autonomy p 3310 N94-30307
Improving the execution speed of robot control computations: An allocation scheme for heterogeneous multiprocessors p 3310 N94-30308
Programmable Automated Welding System (PAWS): Control of welding through software and hardware
p 3314 N94-30443
Confessions of a robot lobotomist
[AIAA PAPER 94-1185-CP] p 3440 N94-30535
Controlling multiple security robots in a warehouse environment
[AIAA PAPER 94-1300-CP] p 3441 N94-30540
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
[AIAA PAPER 94-1209-CP] p 3444 N94-30560

NUMERICAL FLOW VISUALIZATION
Analytic rendering of curvilinear volume data
[DE94-004934] p 3407 N94-28506

NUMERICAL STABILITY
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Numerical precision and roundoff considerations concerning computer code migration
[DE94-005421] p 3427 N94-30590

NUMERICAL WEATHER FORECASTING
A global forecast model comparison study - year 1
[AD-A275674] p 3369 N94-28663
Error growth in poor ECMWF forecasts over the contiguous United States
[AD-A275297] p 3369 N94-29183
Prototype terminal aerodrome forecasts using a mesoscale model
[AD-A275308] p 3369 N94-29194
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744
Physical processes associated with variability in successive operational model forecasts of cyclogenesis
[ISBN-0-315-74753-6] p 3371 N94-29751
An observational and numerical study of sea/land-breeze circulations in an area of complex coastal heating p 3372 N94-29813
The incorporation and initialization of cloud water/ice in an operational forecast model p 3373 N94-29814

NUSSELT NUMBER
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849

NUTRITION
Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429

NUTRITIONAL REQUIREMENTS
Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429

NUTS (FASTENERS)
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538

NYLON (TRADEMARK)
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility
[NASA-CR-4586] p 3175 N94-29458

NYSTAGMUS
Disturbance of equilibrium on JAL flight crew
p 3390 N94-28856

O

OBJECT PROGRAMS
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
The Vanilla meta-interpreter for definite logic programs and ambivalent syntax
[CT-93-01] p 3424 N94-30386

OBJECT-ORIENTED PROGRAMMING
Object-based design of embedded software
[PB94-132073] p 3407 N94-28403
Object-oriented CAD tool implementations for the construction industry
[PB94-132370] p 3407 N94-28411
A concurrent, object-based implementation for the tactical level of the rational behavior model
[AD-A275024] p 3410 N94-29115
The covering property of the object-oriented data model: Design and implementation issues
[AD-A275048] p 3530 N94-29165
Basic research in computer science
[AD-A275184] p 3405 N94-29181
Aerospace Software Engineering for Advanced Systems Architectures
[AGARD-CP-545] p 3412 N94-29315
Object versus functional oriented design
p 3413 N94-29321
Hierarchical Object Oriented Design (HOOD): Possibilities, limitations, and challenges
p 3413 N94-29322
Object oriented design of the autonomous fixtaking management system p 3143 N94-29323
A distributed object-based environment in Ada
p 3417 N94-29347
Constrained objects
[AD-A275273] p 3418 N94-29434
The effects of inheritance on the properties of physical storage models in object-oriented databases
p 3531 N94-29537
Object-oriented database support for scientific data management: A system for experimentation
p 3531 N94-29677
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
DTL: A deductive and typed object-oriented language
[MEMO-INF-93-41] p 3425 N94-30417
Mapping objects to files: A UNIX file system interface to an object management system
[RUU-CS-93-08] p 3428 N94-30746

OBLATE SPHEROIDS
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216

OBLIQUE SHOCK WAVES
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899

OBSERVATORIES
Site comparison for optical visibility statistics in southern California p 3247 N94-29617

OBSTACLE AVOIDANCE
Collision avoidance and control of multiple revolute manipulators p 3302 N94-29884
Extended occupancy grid method for modelling unknown dynamic environments p 3144 N94-30281
Navigation of military and space unmanned ground vehicles in unstructured terrains p 3144 N94-30282
An optimal obstacle avoidance path planning algorithm for the Excalibur robot p 3306 N94-30287
Sonar sensing and obstable detection
p 3309 N94-30301
Obstacle detection for an autonomous vehicle
p 3309 N94-30302
Motion control of mobile robots p 3310 N94-30309
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
A robotic wheelchair
[AIAA PAPER 94-1229-CP] p 3447 N94-30578
Piecewise linear paths among convex obstacles
[RUU-CS-93-20] p 3460 N94-30721
Iterative removal of boundary minima of harmonic potential function for mobile robot navigation
[REPT-93-059] p 3449 N94-30962

OCEAN BOTTOM
Updated deep-tow acoustics/geophysics system compressional velocity database
[AD-A275477] p 3355 N94-28685
Seafloor characterization using texture
[AD-A275399] p 3377 N94-29204
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206

OCEAN CURRENTS
Global atmospheric and ocean modeling on the connection machine
[DE94-003930] p 3342 N94-28521
The velocity field in the Northeast Atlantic from satellite-tracked drifting buoys
[AD-A275704] p 3376 N94-28690
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
The Japan Sea proper water and water circulation in the Japan Sea p 3324 N94-28694
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A275275] p 3377 N94-29436
Modeling deep equatorial circulation
p 3378 N94-29815
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
Cryosphere and climate p 3352 N94-30632
Methods of testing parameterizations: Vertical ocean mixing p 3352 N94-30633
Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes
[PB94-147550] p 3378 N94-30714

OCEAN DATA ACQUISITIONS SYSTEMS
Global Acoustic Mapping of Ocean Temperatures (GAMOT)
[AD-A275777] p 3376 N94-28740

OCEAN DYNAMICS
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
The dynamics of tropical intraseasonal variability
p 3371 N94-29741
Modeling deep equatorial circulation
p 3378 N94-29815
Modeling the Earth System, volume 3
[NASA-CR-194256] p 3350 N94-30616
Towards coupled physical-biogeochemical models of the ocean carbon cycle p 3350 N94-30618
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619
The role of sea ice dynamics in global climate change
p 3350 N94-30620
On the nonlinear dynamics of ocean wave systems
p 3378 N94-30790

OCEAN MODELS
Global atmospheric and ocean modeling on the connection machine
[DE94-003930] p 3342 N94-28521
Global Acoustic Mapping of Ocean Temperatures (GAMOT)
[AD-A275777] p 3376 N94-28740
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
The dynamics of tropical intraseasonal variability
p 3371 N94-29741
On the annual cycle of the tropical Pacific atmosphere and ocean p 3371 N94-29763

Modeling deep equatorial circulation p 3378 N94-29815
Splines and ocean wave modelling [PB94-139409] p 3378 N94-30002
Modeling the Earth System, volume 3 [NASA-CR-194256] p 3350 N94-30616
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
Towards coupled physical-biogeochemical models of the ocean carbon cycle p 3350 N94-30618
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619
The role of sea ice dynamics in global climate change p 3350 N94-30620
Four simple ocean carbon models p 3351 N94-30625
Methods of testing parameterizations: Vertical ocean mixing p 3352 N94-30633
Comprehensive system models: Strategies for evaluation p 3353 N94-30638

OCEAN SURFACE
Sea ice and oceans applications of SAR p 3327 N94-28934
Tohoku district observed by artificial satellites p 3328 N94-29041
A model analysis of potential vorticity on isopycnal surfaces for the global ocean [AD-A275047] p 3377 N94-29164
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL) [AD-A275275] p 3377 N94-29436
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions p 3253 N94-29882
Splines and ocean wave modelling [PB94-139409] p 3378 N94-30002
The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498
Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes [PB94-147550] p 3378 N94-30714
The validation of ocean surface heat fluxes in AMIP [DE94-001539] p 3378 N94-30823

OCEAN TEMPERATURE
Global Acoustic Mapping of Ocean Temperatures (GAMOT) [AD-A275777] p 3376 N94-28740

OCEANOGRAPHIC PARAMETERS
Proceedings of the 15th Earth Observation Symposium [JTN-94-80607] p 3328 N94-29036
Oceanic survey utilizing satellites p 3328 N94-29040
The effects of altimeter sampling characteristics: Some Geosat examples [AD-A275225] p 3357 N94-29062
Tidal atlas software development [AD-A275251] p 3377 N94-29432

OCEANOGRAPHY
Global change research: Summaries of research in FY 1993 [DE94-003150] p 3341 N94-28473
Papers in meteorology and geophysics, vol. 44, no.1 [JTN-94-80585] p 3324 N94-28693
A model analysis of potential vorticity on isopycnal surfaces for the global ocean [AD-A275047] p 3377 N94-29164
Modeling the Earth System, volume 3 [NASA-CR-194256] p 3350 N94-30616
Towards coupled physical-biogeochemical models of the ocean carbon cycle p 3350 N94-30618

OCEANS
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean [AD-A275121] p 3477 N94-29003
Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617
The carbon cycle revisited p 3350 N94-30622
Ocean-atmospheric linkages p 3350 N94-30623
Four simple ocean carbon models p 3351 N94-30625

OCULOMOTOR NERVES
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1 [JTN-94-80598] p 3389 N94-28850
Basic understanding of vertigo p 3390 N94-28855
Equilibrium dysfunction in the clinical field p 3390 N94-28858

ODORS
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709

OFFGASSING
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709

OIL EXPLORATION
Application of remote sensing techniques in petroleum exploration: The Indonesian experience p 3331 N94-29225

OILS
Biodiesel from aquatic species [DE94-000275] p 3225 N94-30038

OKAZAKI-LEVY-RUDENKO COMET
Infrared observations of cometary dust by COBE p 3541 N94-29994

OLIGOMERS
Synthesis and characterization of novel ternary and quaternary reduced molybdenum oxides [DE94-005563] p 3510 N94-28529
Solventless, curable fluid oligomeric systems for high performance microwave, acoustical and mechanical applications p 3223 N94-30478

ON-LINE SYSTEMS
Defense Technical Information Center cataloging guidelines [AD-A275100] p 3529 N94-28911
Decision Making Aids (DMA) in on-line ATC systems p 3139 N94-29570
AFGWC Dial-In Subsystem (AFDIS) software users manual, version 2.2 [AD-A275844] p 3371 N94-29747
Pausing behavior of end-users in online searching p 3533 N94-29960

ONBOARD DATA PROCESSING
Software engineering methods in the Hermes on-board software p 3414 N94-29326
GPS/GNSS for ATM p 3138 N94-29565
Unmanned vehicle mobility: Limits of autonomous navigation p 3310 N94-30311

ONE DIMENSIONAL FLOW
Eigenvalue analysis of the convergence behaviour of an Euler method [PB94-1255722-U] p 3281 N94-30743

OPEN CLUSTERS
A near-infrared survey of the star forming region NGC 2264 p 3540 N94-29971

OPERATING COSTS
Aircraft age impacts on maintenance requirements [AD-A275701] p 3121 N94-28666
Aircraft age impact on individual operating and support cost elements [AD-A275739] p 3121 N94-28732
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
Ventilation cost and air cleaning p 3232 N94-29605

OPERATING SYSTEMS (COMPUTERS)
Object-based design of embedded software [PB94-132073] p 3407 N94-28403
Reference model for project support environments, version 2.0 [AD-A275191] p 3410 N94-29068
Design of a thinwire real-time multiprocessor operating system p 3415 N94-29333

OPERATING TEMPERATURE
The influence of temperature on microelectronic device failure mechanisms, phase 2 [AD-A275029] p 3265 N94-29511

OPERATIONAL AMPLIFIERS
Digitally programmable composite operational amplifier applications [AD-A275081] p 3262 N94-28842
A magnetically coupled quench detector for superconducting magnets [DE94-006040] p 3268 N94-30904

OPERATIONS RESEARCH
Realizing the productivity potential of expeditious operations [PB94-135555] p 3230 N94-29188
A capacity planning model for Canadian military airlift requests [ISBN-0-315-86079-0] p 3136 N94-30144

OPERATOR PERFORMANCE
Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface [AD-A275187] p 3399 N94-28861
Aiding the operator in the manual control of a space manipulator [PB94-125549] p 3402 N94-30390
Sampling behaviour in a four instrument monitoring task: Effects of signal bandwidth and number of events per signal [AD-B179613] p 3402 N94-30422

OPERATORS (MATHEMATICS)
Calculation of eigenvalues of Schroedinger operators for arbitrary coupling [DE94-606302] p 3522 N94-28582
A note on the Poisson brackets associated with Lax operators [MATHS-REPT-A-195] p 3464 N94-29482
Approximation methods for nonlinear operator equations of the m-accretive type [DE94-608099] p 3467 N94-30065
Graded Froelicher-Nijenhuis brackets and the theory of recursion operators for super differential equations [MEMO-1147] p 3460 N94-30736

OPHTHALMOLOGY
Digital tracking and control of retinal images [AD-A275469] p 3389 N94-28810

OPTICAL COMMUNICATION
Lasercom system architecture with reduced complexity [NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
Site comparison for optical visibility statistics in southern California p 3247 N94-29617
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment p 3250 N94-29659
Overview of microoptics: Past, present, and future p 3235 N94-29771
Photonics at Sandia National Laboratories: From research to applications [DE94-006463] p 3501 N94-30828
Standard testing procedures for optical fiber and unshielded twisted pair at Sandia National Laboratories [DE94-005315] p 3501 N94-30910

OPTICAL COMPUTERS
Photorefractive adaptive antenna array processor [AD-A275762] p 3241 N94-28762
A/GATECH DOSP fabrication --- optical programmable logic array [AD-A275848] p 3430 N94-28781
Overview of microoptics: Past, present, and future p 3235 N94-29771

OPTICAL COUNTERMEASURES
Atmospheric Propagation Effects Through Natural and Man-Made Obscurants for Visible to MM-Wave Radiation [AGARD-CP-542] p 3256 N94-30495
Experimental evaluation of camouflage effectiveness in the thermal infrared p 3257 N94-30502
NATO SOCMET trials p 3258 N94-30503
Global approach towards the evaluation of thermal infrared countermeasures p 3258 N94-30504
The effects of man-made smokes and battlefield-induced smokes on the propagation of electromagnetic radiation p 3258 N94-30505

OPTICAL COUPLING
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529

OPTICAL DATA PROCESSING
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture [AD-A275847] p 3498 N94-28780
Photonic devices and systems for optical signal processing [AD-A275818] p 3498 N94-28804
Gordon research conference on optical signal processing and holography [AD-A275092] p 3499 N94-28848
Overview of microoptics: Past, present, and future p 3235 N94-29771

OPTICAL DENSITY
Temperature depencence of the far infrared optical constants of polyethylene [PB94-124336] p 3213 N94-28795

OPTICAL EQUIPMENT
Aberrated point-spread functions and beam quality for optical systems with annular pupils [AD-A275311] p 3499 N94-28875
Lasercom system architecture with reduced complexity [NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633
Optical Chopper Assembly for the Mars Observer p 3162 N94-29639
Overview of microoptics: Past, present, and future p 3235 N94-29771
Hybrid optics for space applications [ESA-CP-1158] p 3501 N94-30418
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449

OPTICAL FIBERS
Optical flameout detector [NASA-CASE-LAR-14997-1] p 3287 N94-29368
Assessment of the fibre volume distribution around optical fibres [FFA-TN-1993-12] p 3179 N94-29425
Intelligent material systems and structures. Part 7: Debonding and pull-out of two optical fibers from two epoxies [PB94-137767] p 3180 N94-29475

A sub-cm micromachined electron microscope
p 3236 N94-29775
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928
Optical studies of dynamical processes in disordered systems
[DE94-006751] p 3501 N94-30252
Standard testing procedures for optical fiber and unshielded twisted pair at Sandia National Laboratories
[DE94-005315] p 3501 N94-30910

OPTICAL FILTERS
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment
p 3250 N94-29659

OPTICAL MATERIALS
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598
Characterization of defect geometries in multilayer optical coatings
[DE94-005820] p 3501 N94-30599
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

OPTICAL MEASUREMENT
Optical flameout detector
[NASA-CASE-LAR-14997-1] p 3287 N94-29368
An experimental and comprehensive method to measure emission characteristics p 3257 N94-30501

OPTICAL MEASURING INSTRUMENTS
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses
p 3188 N94-28682
Three-axis fiber optic vector magnetometer
[AD-D016016] p 3288 N94-29699
Overview of microoptics: Past, present, and future
p 3235 N94-29771
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms
p 3502 N94-30462

OPTICAL MEMORY (DATA STORAGE)
Photonic devices and systems for optical signal processing
[AD-A275818] p 3498 N94-28804
Gordon research conference on optical signal processing and holography
[AD-A275092] p 3499 N94-28848

OPTICAL MICROSCOPES
Meso-optical Fourier transform microscope with double focusing
[DE94-607851] p 3290 N94-30148

OPTICAL POLARIZATION
Dust in the Small Magellanic Cloud
[NASA-CR-195764] p 3543 N94-29696

OPTICAL PROPERTIES
High damage threshold anti-reflectors by physical vapor deposited amorphous fluoropolymer
[DE94-004865] p 3212 N94-28560
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
WINDOW 4.0: Documentation of calculation procedures
[DE94-004935] p 3410 N94-29019
Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape
[AD-A275378] p 3197 N94-29312
Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films
p 3500 N94-29759
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Optical studies of dynamical processes in disordered systems
[DE94-006751] p 3501 N94-30252
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835

OPTICAL PUMPING
Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919

OPTICAL RADAR
Innovative direct detection range-Doppler laser radar
[AD-A275619] p 3292 N94-28635
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633
Automated inspection of turbine blades: Challenges and opportunities
[AIAA PAPER 94-1226-CP] p 3446 N94-30575
Cloud and aerosol characterization for the ARM central facility: Multiple remote sensor techniques development
[DE94-003523] p 3365 N94-30608
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions
[PB94-142106] p 3136 N94-30890

OPTICAL REFLECTION
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522

OPTICAL SWITCHING
Advanced optical A/D converter
[AD-A275663] p 3498 N94-28656
Photonic devices and systems for optical signal processing
[AD-A275818] p 3498 N94-28804
Photoconductive switching for high power microwave generation
[PB94-137460] p 3244 N94-29177

OPTICAL THICKNESS
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
Global patterns of cloud optical thickness variation with temperature and the implications for climate change
p 3374 N94-29972
Optical depth effects in cluster cooling flows
p 3541 N94-30800

OPTICAL TRACKING
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639

OPTICAL TRANSFER FUNCTION
Calculation of turbulence degraded point spread function of an imaging system p 3260 N94-30514

OPTICAL WAVEGUIDES
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
A new guided wave lens structure and its application
[AD-A275541] p 3499 N94-28813
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807

OPTIMAL CONTROL
Application of digital control theory to adaptive grid generation p 3127 N94-28980
On-line search for optimal controller parameters using interconnected learning automata
[MATHS-REPT-A-196] p 3436 N94-29526
Reinforcement learning for robots using neural networks p 3437 N94-29853
Second order necessary conditions in optimal control
[ISBN-0-315-85443-X] p 3437 N94-30255
An optimal obstacle avoidance path planning algorithm for the Excalibur robot p 3306 N94-30287
Coordinated control of multiple robot manipulators
p 3306 N94-30289
Calculus of variations applied to 2D multi-point airfoil design
[PB94-125457] p 3133 N94-30401
A stochastic control approach to flight path monitoring
[AD-B174630] p 3143 N94-30853
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
Optimal low-thrust, Earth-Moon trajectories
p 3159 N94-30961

OPTIMIZATION
Aerodynamic design using parallel processors
[AD-A275470] p 3122 N94-28674
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual
[NASA-CR-194462] p 3317 N94-28815
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805
Complicated problem solution techniques in optimal parameter searching
[DE94-608007] p 3421 N94-30077
A note on the complexity of local search problems
[CT-93-02] p 3456 N94-30370
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418
Optimization techniques for a dial-a-ride transportation system in urban environment
[REPT-93-051] p 3537 N94-30926

OPTOELECTRONIC DEVICES
Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805
Gordon research conference on optical signal processing and holography
[AD-A275092] p 3499 N94-28848
Carrier collection and scattering in quantum well and superlattice devices
[AD-A275443] p 3512 N94-28880
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529
Overview of microoptics: Past, present, and future
p 3235 N94-29771
Micro guidance and control technology overview
p 3144 N94-29772
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793
Synchronization of microwave oscillators by direct optical injection
[ISBN-0-315-85546-0] p 3500 N94-30233
Optoelectronic packaging activities at Sandia National Laboratories
[DE94-005287] p 3501 N94-30261

ORBIT CALCULATION
Enhanced orbit determination filter sensitivity analysis: Error budget development p 3159 N94-29655
Enhanced orbit determination filter: Inclusion of ground system errors as filter parameters p 3159 N94-29656
TOPEX/POSEIDON operational orbit determination results using global positioning satellites
p 3160 N94-29666
Application of extended Lagrange series to the precise determination of Global Positioning Satellite orbits
[ISBN-0-315-85724-2] p 3159 N94-30237
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

ORBIT TRANSFER VEHICLES
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355

ORBITAL ASSEMBLY
Free-floating dual-arm robots for space assembly
[AIAA PAPER 94-1195-CP] p 3442 N94-30546

ORBITAL ELEMENTS
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

ORBITAL MANEUVERS
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216

ORBITAL MECHANICS
Symplectic topology of integrable Hamiltonian systems
[DE94-608120] p 3467 N94-30166

ORBITAL POSITION ESTIMATION
TOPEX/POSEIDON operational orbit determination results using global positioning satellites
p 3160 N94-29666
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

ORBITAL RENDEZVOUS
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216

ORBITAL RESONANCES (CELESTIAL MECHANICS)
Binary-single star scattering: An investigation of a realistic chaotic scattering system p 3543 N94-29719

ORBITAL SERVICING
System for the installation and replacement of components in hostile environments
[NASA-CASE-LEW-14906-1-SB] p 3300 N94-29427
Development and testing of the Automated Fluid Interface System p 3161 N94-29636
Technology transfer and evaluation for Space Station telerobotics
[AIAA PAPER 94-1190-CP] p 3441 N94-30541
Space flight manipulator technologies and requirements for the NASA Flight Telerobotic Servicer (FTS)
[AIAA PAPER 94-1191-CP] p 3441 N94-30542
A Space Station robot walker and its shared control software
[AIAA PAPER 94-1192-CP] p 3442 N94-30543
Technology for robotic surface inspection in space
[AIAA PAPER 94-1193-CP] p 3442 N94-30544
On-orbit spacecraft servicing: An element in the evolution of space robotics applications
[AIAA PAPER 94-1236-CP] p 3448 N94-30583

ORBITS
A semiclassical study of quantum maps
p 3524 N94-29987

Periodic orbits of n-body type problems: The fixed period case
[DE94-608096] p 3453 N94-30091

ORDER-DISORDER TRANSFORMATIONS
First principles pseudopotential calculations on aluminum and aluminum alloys
[DE94-004890] p 3206 N94-29931
Structural analysis of amorphous phosphates using high performance liquid chromatography
[DE94-004791] p 3199 N94-30723

ORGANIC COMPOUNDS
Surface structure and stereochemical properties of self-assembled monolayer materials
[DE94-004960] p 3484 N94-28578
Advanced fuel properties: A computer program for estimating property values
[AD-A275248] p 3224 N94-28901
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047

ORGANIC MATERIALS
Organic materials that respond to molecules
[AD-A275392] p 3174 N94-29307

ORGANIC SULFUR COMPOUNDS
Nuclear magnetic relaxation studies of semiconductor nanocrystals and solids
[DE94-006301] p 3520 N94-30842

ORGANIZATIONS
Measuring the impact of investments in information technologies on business performance
[REPT-93-056] p 3536 N94-30929

ORGANOMETALLIC COMPOUNDS
Alkylene-bridged polygerm- and polygermsilsesqui-oxanes: New hybrid organic-inorganic materials
[DE94-005096] p 3174 N94-28557
Gas phase thermochemistry of organogermanium compounds
[DE94-004885] p 3187 N94-28561
Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Plasma enhanced chemical vapor deposition of ZrO2 thin films
[DE94-006031] p 3218 N94-30104
Group transfer and electron transfer reactions of organometallic complexes: Summary of research accomplished in 1993
[DE94-004963] p 3200 N94-30770

ORIFICE FLOW
Transonic expanding flow through axially symmetric orifices p 3128 N94-28985

ORTHOGONAL FUNCTIONS
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971

ORTHOGONALITY
Event structures and orthogonal term graph rewriting
[CWI-CS-R9347] p 3459 N94-30412
Perpetual reductions in orthogonal combinatory reduction systems
[CWI-CS-R9349] p 3459 N94-30413
Perpetual reductions and strong normalization in orthogonal term rewriting systems
[CWI-CS-R9345] p 3426 N94-30437
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494

ORTHONORMAL FUNCTIONS
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971

ORTHOTROPISM
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
Approximate estimation of the effects of asymmetry on the testing of tensile specimens
[NPL-DMM(A)-117] p 3322 N94-30523

OSCILLATION DAMPERS
Tuned mass damper for integrally bladed turbine rotor
[NASA-CASE-MFS-28697-1] p 3298 N94-29353

OSCILLATIONS
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705

OSCILLATORS
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics
[DE94-004955] p 3483 N94-28566
Time and frequency technology at NIST p 3468 N94-30641
Accuracy metrics for judging time scale algorithms p 3471 N94-30656
Noise and drift analysis of non-equally spaced timing data p 3472 N94-30667
Frequency standards from industry over the next 25 years p 3475 N94-30683

OUTCROPS
Field guide to Cretaceous-tertiary boundary sections in northeastern Mexico
[NASA-CR-195719] p 3354 N94-28416

OUTGASSING
ESTEC wiring test programme materials related properties p 3165 N94-28698

OVERPRESSURE
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150

OXIDATION
Structural changes during carbonization and oxidation of coal p 3187 N94-28678
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model p 3190 N94-29251
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
Studies of supported molybdenum and tungsten
[DE94-006207] p 3210 N94-30839
Transient studies of low temperature catalysts for methane conversion
[DE94-005767] p 3200 N94-30877

OXIDATION RESISTANCE
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097
Polyimides containing pendent siloxane groups
[NASA-CASE-LAR-14638-1] p 3215 N94-29555
Development of radiation resistant electrical cable insulations p 3223 N94-30480
Four advances in carbon-carbon materials technology p 3186 N94-30481

OXIDATION-REDUCTION REACTIONS
Quenching of the excited state of hydrated Europium(3) ions by electron transfer
[DE94-005553] p 3482 N94-28518
Realtime structural electrochemistry of platinum clusters using dispersive XAFS
[DE94-005093] p 3208 N94-30101

OXIDE FILMS
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
Distribution functions of electrons within aluminium oxide thin films
[DE94-608418] p 3490 N94-30184
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773

OXIDES
The radical amplifier p 3345 N94-28604
Effects of oxide charge and surface recombination velocity on the excess base current of BJT's
[DE94-003711] p 3263 N94-29025
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

OXYGEN
Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Arterial oxygen saturation during +Gz acceleration by short-radius centrifuge p 3389 N94-28852
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033
High resistivity buffer layers by oxygen doping
[AD-A274986] p 3513 N94-29125
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718

OXYGEN ATOMS
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999

OXYGEN BREATHING
Decompression sickness risk versus time and altitude
[AD-A275261] p 3391 N94-29071

OXYGEN IONS
Low energy ion-molecule reactions and chemiionization kinetics
[DE94-005414] p 3481 N94-28491

OXYGEN MASKS
Portable ventilatory resuscitation systems
[AD-A274984] p 3401 N94-29093

OXYGEN PRODUCTION
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409

OXYGENATION
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021

OXYNITRIDES
The synthesis and structural characterization of Na3WO3N
[AD-A275243] p 3204 N94-29395

OZONE
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign
[DE94-003989] p 3342 N94-28523
Harvard ER-2 OH laser-induced fluorescence instrument p 3343 N94-28592
Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene
[NASA-TM-106460] p 3213 N94-28922
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083
GOME: Global Ozone Monitoring Experiment
[ESA-SP-1151] p 3347 N94-29452
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549
The suitability of low-cost urban airshed modeling in the Chicago area
[DE94-005114] p 3349 N94-30023
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468
Radiative flux calculations at UV and visible wavelengths
[DE94-004278] p 3350 N94-30613
Tropospheric radiative forcing of O3 for the 1994 IPCC report
[DE94-005698] p 3367 N94-30876

OZONE DEPLETION
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023

OZONOMETRY
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083

OZONOSPHERE
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023
Radiative flux calculations at UV and visible wavelengths
[DE94-004278] p 3350 N94-30613

P

P WAVES
Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137

P-N JUNCTIONS
Analysis of microwave induced interference in pn-diodes
[PB94-136983] p 3243 N94-28906

The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249

PACIFIC OCEAN
Global Acoustic Mapping of Ocean Temperatures (GAMOT)
[AD-A275777] p 3376 N94-28740
On the annual cycle of the tropical Pacific atmosphere and ocean p 3371 N94-29763
On interannual variability and climate change in the North Pacific p 3374 N94-29963
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970

PACKAGING
Codes on the unit sphere
[PB94-136991] p 3453 N94-29174

PACKET TRANSMISSION
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106

PAINTS
Rules and definition of the range of paints applied on aeronautical structrural composites
[REPT-932-600-106] p 3215 N94-29459
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864
The effect of mechanical paint stripping on the fatigue and fracture of thin aluminum airplane skin p 3205 N94-29900
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
Development of a unique polyurethane primer/topcoat p 3223 N94-30476

PAIR PRODUCTION
Emission of supersymmetric neutron pair by charged lepton in magnetic field
[DE93-634365] p 3481 N94-28468

PALEOCLIMATOLOGY
Impact of biomass burning on the atmosphere
[DE94-004333] p 3349 N94-29954
Modeling Earth system changes of the past p 3353 N94-30635

PALEOMAGNETISM
Motion and development of the Pacific Plate from the Middle Jurassic to the Late Cretaceous p 3362 N94-29939

PALLADIUM
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530

PANEL METHOD (FLUID DYNAMICS)
Aircraft aerodynamics with deflected jets in ground effect p 3132 N94-29973
Computation of wind tunnel wall effects for complex models using a low-order panel method
[NASA-TM-104019] p 3132 N94-30151
Aerodynamic analysis of slipstream/wing/nacelle interference for preliminary design of aircraft configurations
[AD-B173651] p 3135 N94-30916

PANELS
Development of Alternating Current Potential Drop (ACPD) procedures for crack detection in aluminum aircraft panels
[AD-A275755] p 3315 N94-28646
Composite panel failure analysis and improvement plan
[AD-A275655] p 3176 N94-28653
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360
Free vibration of thermally loaded panels including initial imperfections and post-buckling effects
[NASA-TM-109097] p 3479 N94-29461
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257

PAPERS
Index of NPL acoustics publications 1981-1990
[NPL-RSA(EXT)-0044] p 3480 N94-30786

PARABOLIC DIFFERENTIAL EQUATIONS
Unstructured space-time finite element method of heat conduction p 3279 N94-30224
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758

PARABOLIC FLIGHT
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Microgravity by parabolic flight with MU-300 aircraft p 3392 N94-29710
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715
Determination of acceleration field parameters with linear accelerometers
[PB94-125606] p 3290 N94-30742

PARABOLIC REFLECTORS
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018

PARACHUTE DESCENT
Parachute Swivel Mechanism for planetary entry p 3162 N94-29643

PARACHUTES
Parachute Swivel Mechanism for planetary entry p 3162 N94-29643

PARALLEL COMPUTERS
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Rome Laboratory software engineering technology program p 3414 N94-29330
Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
PCCM2: A GCM adapted for scalable parallel computers
[DE94-005113] p 3350 N94-30116
Early experiences with the IBM SP1 and the high-performance switch
[DE94-006261] p 3429 N94-30840

PARALLEL PROCESSING (COMPUTERS)
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Performance analysis of memory hierachies in high performance systems
[DE94-005549] p 3404 N94-28517
Design of parallel systems for signal processing
[AD-A275490] p 3430 N94-28659
Aerodynamic design using parallel processors
[AD-A275470] p 3122 N94-28674
Parallelization techniques for highly parallel vector computer p 3129 N94-28990
Parallel Fortran programming for NWT p 3129 N94-28991
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
A method of user interface for NWT p 3129 N94-28993
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
Center for Parallel Optimization
[AD-A274988] p 3431 N94-29127
Rome Laboratory software engineering technology program p 3414 N94-29330
Distributed applications and failure tolerance programs using a reconfigurable parallel architecture p 3417 N94-29345
ECSU home-institution support program (1993)
[AD-A275244] p 3431 N94-29396
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Checkpoint-based forward recovery using lookahead execution and rollback validation in parallel and distributed systems
[NASA-CR-195760] p 3431 N94-29869
First principles pseudopotential calculations on aluminum and aluminum alloys
[DE94-004890] p 3206 N94-29931
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Computational fluid and combustion dynamics
[DE94-006596] p 3279 N94-30003
Computational balance in real-time cyclic spectral analysis
[DE94-005091] p 3432 N94-30100
PCCM2: A GCM adapted for scalable parallel computers
[DE94-005113] p 3350 N94-30116
A locally synchronous globally asynchronous Vertex-8 processing element for image reconstruction on a mesh
[ISBN-0-315-86005-7] p 3432 N94-30143
Common spaceborne multicomputer operating system and development environment
[NASA-TM-109092] p 3422 N94-30197
Large-scale 3-D solutions of the time-dependent Dirac equation
[DE94-005591] p 3454 N94-30317
Manray: A replicated workers program in MANIFOLD
[CWI-CS-R9337] p 3433 N94-30429
Parallel iteration across the steps of high order Runge-Kutta methods for nonstiff initial value problems
[CWI-NM-R9313] p 3433 N94-30730
Parallel language constructs for paradigm integration and deterministic computations
[DE94-005119] p 3428 N94-30754
Early experiences with the IBM SP1 and the high-performance switch
[DE94-006261] p 3429 N94-30840
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844

PARALLEL PROGRAMMING
Global atmospheric and ocean modeling on the connection machine
[DE94-003930] p 3342 N94-28521
Reasoning about programs by exploiting the environment
[AD-A275852] p 3408 N94-28794
Investigation into formalization of domain-oriented parallel software development
[AD-A275177] p 3430 N94-29050
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
MANIFOLD version 1.0 programming: Programs and problems
[CWI-CS-R9334] p 3425 N94-30428
Manray: A replicated workers program in MANIFOLD
[CWI-CS-R9337] p 3433 N94-30429
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
On the relation between Unity properties and sequences of states
[RUU-CS-93-07] p 3433 N94-30720
Parallel iteration across the steps of high order Runge-Kutta methods for nonstiff initial value problems
[CWI-NM-R9313] p 3433 N94-30730
Parallel language constructs for paradigm integration and deterministic computations
[DE94-005119] p 3428 N94-30754

PARAMECIA
Space movement of Trichinella spiralis under microgravity p 3387 N94-29711

PARAMETER IDENTIFICATION
A variable selection heuristic for solid rocket motor design p 3173 N94-29544
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings p 3311 N94-30792

PARAMETERIZATION
An observational and numerical study of sea/land-breeze circulations in an area of complex coastal heating p 3372 N94-29813
The incorporation and initialization of cloud water/ice in an operational forecast model p 3373 N94-29814
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
Methods of testing parameterizations: Vertical ocean mixing p 3352 N94-30633

PARITY
Space-time symmetries: P and CP violation
[DE94-005012] p 3526 N94-30750

PARKING ORBITS
Optimal low-thrust, Earth-Moon trajectories p 3159 N94-30961

PARSING ALGORITHMS
Engineering specification editing tools
[AD-A275116] p 3419 N94-29746
Maintaining presentation invariants in the Views system
[CWI-CS-R9262] p 3423 N94-30324
Increasing the applicability of LR parsing
[TR-93-06] p 3423 N94-30332
Generalized left-corner parsing
[TR-92-21] p 3432 N94-30356
Parsing in ISBES
[TR-92-32] p 3432 N94-30363

PARTIAL DIFFERENTIAL EQUATIONS
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
Numerical analysis and computation of nonlinear partial differential equations from applied mathematics
[AD-A275582] p 3451 N94-28723

On approximate Riemann solvers: Improvement of HLLEM scheme and its generalization for chemically reacting flows p 3126 N94-28973
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870

PARTICLE ACCELERATION
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352

PARTICLE ACCELERATOR TARGETS
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719

PARTICLE ACCELERATORS
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930

PARTICLE BEAMS
Third-order beam optics of real solenoid magnetic lens
[DE94-608014] p 3500 N94-30084

PARTICLE COLLISIONS
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-005596] p 3482 N94-28531
Search for excited quarks in p(bar p) collisions at the square root of s = 1.8 TeV
[DE94-004658] p 3484 N94-28573
B production and B(0)(bar B)(0) mixing at DO
[DE94-004664] p 3484 N94-28574
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
Inclusive jet and direct photon production at the D0 experiment
[DE94-006001] p 3488 N94-30049
Direct anti-b b production in anti-pp collisions at the square root of s = 1.8 TeV
[DE94-006167] p 3491 N94-30369
A search for rapidity gap events in p(bar p) collisions at D(0)
[DE94-004654] p 3491 N94-30722
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

PARTICLE DENSITY (CONCENTRATION)
A study of the ultrahigh-energy cosmic ray mass composition with the MACRO and EAS-TOP experiments p 3552 N94-29687

PARTICLE DIFFUSION
Boundary-induced phase transitions in equilibrium and non-equilibrium systems
[DE94-608137] p 3199 N94-30111
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
Glueball and meson dispersion and diffusion relations in compact U(1)(2+1) gauge theory
[ISBN-0-315-85577-0] p 3490 N94-30234

PARTICLE IMAGE VELOCIMETRY
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791

PARTICLE INTERACTIONS
Energy distribution of the leptons in top decay to charged Higgs
[DE94-005231] p 3482 N94-28494
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Atomic physics with highly charged ions
[DE94-003397] p 3492 N94-30837

PARTICLE MASS
Operator analysis for quark and lepton masses in SO(10)
[DE94-005201] p 3491 N94-30709

PARTICLE MOTION
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398

PARTICLE PRODUCTION
Report of the subgroup on the top quark
[DE94-004624] p 3481 N94-28462
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-005596] p 3482 N94-28531
B production and B(0)(bar B)(0) mixing at DO
[DE94-004664] p 3484 N94-28574
Experimental setup for study of hadron and hard photon production in nucleus-nucleus collisions
[DE94-607849] p 3489 N94-30051
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052
Search for heavy neutrinos at the IHEP-JINR neutrino detector
[DE94-608175] p 3489 N94-30095
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
Direct anti-b b production in anti-pp collisions at the square root of s = 1.8 TeV
[DE94-006167] p 3491 N94-30369
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779
Charmonium and bottomonium in (-p)p interactions
[DE94-006173] p 3493 N94-30886
Inclusive single muon production in D0
[DE94-006175] p 3493 N94-30887

PARTICLE SIZE DISTRIBUTION
Using the log-normal distribution in analyzing aerosols: The mathematical reasoning underlying the various diameters used and the plotting procedure
[DE94-006459] p 3461 N94-30817

PARTICLE SPIN
Determination of the neutron spin-structure function
[DE94-005234] p 3483 N94-28542
On relativity principle violation in local measurements of spin precession of moving particles
[DE94-608067] p 3489 N94-30085
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109

PARTICLE THEORY
Twistor-like type 2 superstring and bosonic string
[DE94-606339] p 3523 N94-28802
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
Problems in particle theory
[DE94-003665] p 3491 N94-30685

PARTICLE TRACKS
Track filtering by robust neural network
[DE94-606067] p 3434 N94-28613
Meso-optical Fourier transform microscope with double focusing
[DE94-607851] p 3290 N94-30148

PARTICLE TRAJECTORIES
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
Some remarks about pseudo-Hamiltonian
[DE94-003273] p 3487 N94-29700
The impact of electrically charged microspheres with planar surfaces under vacuum conditions p 3320 N94-29765

PARTICULATES
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337
Particulate metal matrix composites: Draft procedure for tensile tests at ambient temperature
[NPL-DMM(A)-100] p 3184 N94-30419

PARTITIONS (MATHEMATICS)
Codes on the unit sphere
[PB94-136991] p 3453 N94-29174
Rectilinear decompositions with low stabbing number
[RUU-CS-93-25] p 3459 N94-30425
Dynamic microsets for RAMs
[RUU-CS-93-22] p 3406 N94-30727
Perfect binary space partitions
[RUU-CS-93-23] p 3460 N94-30728

PARTONS
The small-x behaviour of parton distribution functions
[DE94-606414] p 3485 N94-28758
Inclusive jet and direct photon production at the D0 experiment
[DE94-006001] p 3488 N94-30049

PASSIVITY
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521

PATIENTS
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443

PATTERN RECOGNITION
A new method for recognizing quadric surfaces from range data and its application to telerobotics and automation, final phase
[NASA-CR-195733] p 3408 N94-28825
Animators and error reporters for generated programming environments
[CWI-CS-R9253] p 3418 N94-29503
A locally synchronous globally asynchronous Vertex-8 processing element for image reconstruction on a mesh
[ISBN-0-315-86005-7] p 3432 N94-30143
Shape from diameter: Negative results
[RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results
[RUU-CS-93-17] p 3458 N94-30408
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
Unsupervised texture image segmentation by improved neural network ART2
[AIAA PAPER 94-1199-CP] p 3442 N94-30549
Use of bad training data for better predictions
[DE94-006233] p 3427 N94-30705
Placing registration marks
[RUU-CS-93-21] p 3427 N94-30725
Elements for the recognition of three dimensional deformable shapes: Application to biomedical imagery
[TELECOM-93-E-008] p 3396 N94-30978

PATTERN REGISTRATION
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536
Pre- and intra-radiotherapy multimodal image registration: Principles and first experiments p 3395 N94-30030

PAVEMENTS
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151

PAYLOAD CONTROL
Control system design for A and R supported microgravity experiments: An experiment payload control development
[AD-B179107] p 3229 N94-30421

PAYLOAD TRANSFER
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355

PAYLOADS
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358
GOME: Global Ozone Monitoring Experiment
[ESA-SP-1151] p 3347 N94-29452
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206

PENETRATION
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688

PERFORATED PLATES
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616

PERFORMANCE PREDICTION
Development of the integrated environmental control model: Performance models of selective catalytic reduction NO(x) control systems
[DE94-002151] p 3341 N94-28465
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Simulation Networking/Training Requirements Relational Database: User's guide
[AD-A275634] p 3528 N94-28637
Effects of workload on communication processes in decision making teams
[AD-A275894] p 3527 N94-28796

Role of microstructure on the fatigue durability of aluminum aircraft alloys
[AD-A275814] p 3202 N94-28830
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
Performance evaluation of intelligent network services
[MEMO-INF-93-20] p 3438 N94-30373

PERFORMANCE TESTS
Thermal protective performance and instrumented mannequin evaluation of multi-layer garment systems
p 3381 N94-28433
Rewarming methodologies in the field
p 3382 N94-28441
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Software testing practices and their evolution for the 1990's p 3415 N94-29335
A disciplined approach to software test and evaluation
p 3416 N94-29339
Development of electromagnetic compatibility tests
[REPT-932-430-110] p 3245 N94-29421
A portable X-band front-end test package for beam-waveguide antenna performance evaluation. Part 2: Tests on the antenna p 3247 N94-29620
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
A study of the relationship between the performance and dependability of a fault-tolerant computer
[NASA-CR-195758] p 3406 N94-29695
Remote observatory access via the advanced communications technology satellite
p 3253 N94-29894
Scanning and monitoring performance: Effects of the reinforcement values of the events being monitored
[DOT/FAA/AM-94/8] p 3398 N94-29918
A newly developed snow vehicle (SM100S) for Antarctica. Part 5: Result of general performance tests
p 3314 N94-29985
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435
NATO SOCMET trials p 3258 N94-30503
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
[AIAA PAPER 94-1212-CP] p 3445 N94-30563
Status of frequency and time support for NASA systems p 3468 N94-30640

PERIDOTITE
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940
Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle
p 3367 N94-30917

PERIODIC VARIATIONS
Long term variations of radio auroral activity
p 3359 N94-29237
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels
[NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495
On observing neutron star oscillations
p 3538 N94-29795
Interannual-decadal variability in tropical climate systems: Stable isotope records and general circulation model experiments p 3373 N94-29962
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970

PERIODICALS
TRADOC library and information network (TRALINET). Union list of periodicals (TULIP)
[AD-A275263] p 3529 N94-28903

PERMAFROST
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment
[AD-A275215] p 3357 N94-29070
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288

PERMEABILITY
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997

PEROXIDES
In situ detection of tropospheric OH and HO2 by laser-induced fluorescence in a detection chamber at low pressure p 3342 N94-28589
Detection of tropospheric OH and HO2 by laser-induced fluorescence at low pressure using the 308nm excitation of OH p 3343 N94-28591
Harvard ER-2 OH laser-induced fluorescence instrument p 3343 N94-28592
Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
Tropospheric HO2 determination by FAGE
p 3345 N94-28606
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608

PERSONAL COMPUTERS
Evaluation of access/navigational features of a graphical-user interface installed on a portable maintenance aid
[AD-A275791] p 3136 N94-28744

PERSONALITY
An evaluation of personality testing and the five-factor model in the selection of landing craft air cushion vehicle crew members
[AD-A275869] p 3397 N94-28754

PERSONALITY TESTS
An evaluation of personality testing and the five-factor model in the selection of landing craft air cushion vehicle crew members
[AD-A275869] p 3397 N94-28754

PERSONNEL
Recent Canadian advances in active thermal protection p 3384 N94-28451
Effects of workload on communication processes in decision making teams
[AD-A275894] p 3527 N94-28796

PERSONNEL DEVELOPMENT
Development centres: Assessing or developing people
[PB94-138070] p 3536 N94-29144

PERSONNEL MANAGEMENT
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905

PERSONNEL SELECTION
An evaluation of personality testing and the five-factor model in the selection of landing craft air cushion vehicle crew members
[AD-A275869] p 3397 N94-28754
Naval aviation vision standards research at the naval aerospace medical research laboratory: The long view
[AD-A275885] p 3388 N94-28756
Scanning and monitoring performance: Effects of the reinforcement values of the events being monitored
[DOT/FAA/AM-94/8] p 3398 N94-29918

PERSPIRATION
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406

PERTURBATION
Missile launch detection electric field perturbation experiment
[DE94-004224] p 3466 N94-30586

PERTURBATION THEORY
Quasipotential in the fourth order of perturbation theory
[DE94-606299] p 3484 N94-28584
Decoupled flight control system design using the singular perturbation method p 3155 N94-29850
Physics, astronomy, and astrophysics: A numerical study of the black hole plus Brill wave spacetime
p 3540 N94-29990
Reconstruction of spectra in the discrete quantum mechanics (new elements of the lattice quantum engineering)
[DE94-608075] p 3524 N94-30087
Dissipation in Hamiltonian systems: Decaying cnoidal waves
[MEMO-1151] p 3460 N94-30738

PETRI NETS
On conceptual design of active databases
p 3531 N94-29535

PHARMACOLOGY
Cubanes: Super explosives and potential pharmaceutical intermediates p 3227 N94-30454

PHASE COHERENCE
Dynamics of a coupled solid state laser array
p 3294 N94-29551

PHASE CONJUGATION
Estimation of geomagnetic conjugate points by using Pc5 pulsations p 3357 N94-29079

PHASE DETECTORS
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880

PHASE DEVIATION
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625

PHASE DIAGRAMS
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021
Some results on the phase diagram of the antiferromagnetic Potts model in an external magnetic field
[DE94-608115] p 3468 N94-30110
Boundary-induced phase transitions in equilibrium and non-equilibrium systems
[DE94-608137] p 3199 N94-30111
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690
Theoretical studies of solid-fluid phase equilibria
[DE94-006406] p 3226 N94-30708

PHASE ERROR
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536
Effects of low sampling rate in the digital data-transition tracking loop p 3251 N94-29669
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880

PHASE LOCKED SYSTEMS
Method of implementing digital phase-locked loops
[NASA-CASE-NPO-18757-1-CU] p 3265 N94-29374
Dynamics of a coupled solid state laser array
p 3294 N94-29551
Design and implementation of a hybrid digital phase-locked loop with a TMS320C25: An application to a transponder receiver breadboard
p 3251 N94-29667
Precision frequency synthesizing sources with excellent time/frequency performances p 3473 N94-30671

PHASE MODULATION
Longitudinal effects and intensity-phase coupling in distributed feedback semiconductor lasers
p 3294 N94-29590
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646

PHASE SHIFT
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096

PHASE SHIFT KEYING
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880
Partially coherent detection of PSK signals in Rician channels
[ISBN-0-315-85799-4] p 3254 N94-30031

PHASE STABILITY (MATERIALS)
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525

PHASE TRANSFORMATIONS
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021
Differential Scanning Calorimetry (DSC) for planetary surface exploration p 3236 N94-29776
Boundary-induced phase transitions in equilibrium and non-equilibrium systems
[DE94-608137] p 3199 N94-30111
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691

PHASED ARRAYS
Solid-state, active-phased arrays: Some aspects of receiver design
[AD-A275893] p 3527 N94-28779

Pointing mechanisms for the Shuttle Radar Laboratory p 3162 N94-29638
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445

PHENOLIC RESINS
Measurement and modelling of bolted joint stress relaxation in plastics [PB94-124849] p 3318 N94-28841

PHENOLS
Journal of NIRE, Vol. 2, No. 2 [JTN-94-80552] p 3187 N94-28675
Methanol-mediated continuous extraction of phenolic compounds from coal liquid p 3188 N94-28679

PHENOMENOLOGY
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics [DE94-004955] p 3483 N94-28566

PHILOSOPHY
Identity: Quarrelling with an unproblematic notion [LP-93-04] p 3455 N94-30327

PHONETICS
Subphonetic acoustic modeling for speaker-independent continuous speech recognition [AD-A275217] p 3244 N94-29303

PHONONS
Effect of phonon dispersion on properties of exciton in magnetic field [DE93-634756] p 3481 N94-28469
Vibrational properties of homopolar and heteropolar surfaces and interfaces of the CdTe/HgTe system [DE94-608105] p 3516 N94-30069
Interband optical absorption in the Wannier-Stark ladder under the electron-LO-phonon resonance condition [DE94-608097] p 3267 N94-30092
Procedures for basic inverse problems: Black body radiation problem and phonon density of states problem [ISBN-0-315-85757-9] p 3525 N94-30244

PHOSPHATES
Growth of hydrocarbon-rich microalga Botryococcus braunii in secondarily treated sewage and its consumption of nitrate ion and phosphate ion p 3387 N94-29519
Structural analysis of amorphous phosphates using high performance liquid chromatography [DE94-004791] p 3199 N94-30723

PHOSPHIDES
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems [DE94-006034] p 3209 N94-30336

PHOSPHORUS COMPOUNDS
Synthesis and molecular structures of R(Me3CCH2)2In-E(SiMe3) (R = Me3CCH2, E = P or As; R = Me, E = P) [AD-A275020] p 3486 N94-29131

PHOTOCHEMICAL REACTIONS
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign [DE94-003989] p 3342 N94-28523
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone [NASA-CR-195779] p 3347 N94-29549
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides [DE94-004958] p 3200 N94-30769

PHOTOCONDUCTIVITY
Transport properties of epitaxial lift off films [NASA-TM-106156] p 3264 N94-29209
Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures [ISBN-0-315-85923-7] p 3218 N94-30036

PHOTOCONDUCTORS
InTlSb for long-wavelength infrared photodetectors and arrays [AD-A275079] p 3512 N94-28872
Photoconductive switching for high power microwave generation [PB94-137460] p 3244 N94-29177

PHOTODIODES
The automated rotating shadowband spectroradiometer [DE94-001878] p 3269 N94-28464
Broadband EUV survey spectrometer for short-timescale experiments [DE94-005459] p 3498 N94-28534
UV laser long-path absorption spectroscopy p 3343 N94-28595
Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators [AD-A275235] p 3263 N94-29028
Miniaturization in x ray and gamma ray spectroscopy p 3236 N94-29773

PHOTODISSOCIATION
Radiation transport in cloudy and aerosol loaded atmospheres p 3365 N94-30805

PHOTOELECTRIC EFFECT
Photoelectron diffraction and holography: Some new directions [DE94-006297] p 3289 N94-30027

PHOTOELECTRIC EMISSION
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states p 3294 N94-29531
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Characteristics of secondary electron emission from CsI induced by x rays with energies up to 100 keV [DE94-608422] p 3395 N94-30185
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces [DE94-005680] p 3522 N94-30901

PHOTOELECTROMAGNETIC EFFECTS
Photoelectronic study of GaAs epilayers and In(x)Ga(1-x)As/GaAs quantum wells [ISBN-0-315-85756-0] p 3518 N94-30239

PHOTOELECTRON SPECTROSCOPY
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice [AD-A275149] p 3486 N94-29021
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum [NASA-TM-106548] p 3218 N94-30177

PHOTOELECTRONS
Photoelectron diffraction and holography: Some new directions [DE94-006297] p 3289 N94-30027
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides [DE94-004958] p 3200 N94-30769

PHOTOEXCITATION
Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton [NASA-CR-195727] p 3549 N94-28816

PHOTOGRAMMETRY
Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations [AD-A275459] p 3325 N94-28808
Feature mapping in a photogrammetric GIS [AD-A275418] p 3325 N94-28863
The use of digital stereo photogrammetric methods in historical photo analysis [AD-A275287] p 3288 N94-29437
Calibration of charge coupled device digital cameras [ISBN-0-315-85539-8] p 3290 N94-30232

PHOTOINTERPRETATION
The use of digital stereo photogrammetric methods in historical photo analysis [AD-A275287] p 3288 N94-29437

PHOTOIONIZATION
Optical field ionization of atoms and ions using ultrashort laser pulses [DE94-006643] p 3488 N94-29845
Optical depth effects in cluster cooling flows p 3541 N94-30800

PHOTOLITHOGRAPHY
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system [DE94-005288] p 3266 N94-30055
Neural network based time-optimal control of a magnetically levitated precision positioning system [DE94-006573] p 3437 N94-30250

PHOTOLUMINESCENCE
ECR plasma synthesis of silicon nitride films on GaAs and InSb [DE94-005575] p 3515 N94-30006

PHOTOMETERS
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems [AD-A275745] p 3511 N94-28734
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications [AD-A275078] p 3512 N94-28871
InTlSb for long-wavelength infrared photodetectors and arrays [AD-A275079] p 3512 N94-28872
Remote sensing of inner heliospheric plasmas [AD-A275021] p 3550 N94-29132
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants [DE94-004743] p 3500 N94-29928

PHOTOMETRY
Multicolor photometry of barred spiral galaxies p 3541 N94-30270

PHOTOMULTIPLIER TUBES
Photon counting spectroscopy as done with a Thomson scattering diagnostic [DE94-005543] p 3503 N94-28515
On possibility to create the scintillation trigger for liquid-argon neutrino detector [DE94-607844] p 3489 N94-30050

PHOTON BEAMS
Activity report of Synchrotron Radiation Laboratory 1992 [JTN-94-80600] p 3495 N94-29596

PHOTON-ELECTRON INTERACTION
Quantum-mechanical suppression of bremsstrahlung [DE94-005223] p 3497 N94-30712

PHOTONICS
Photonic devices and systems for optical signal processing [AD-A275818] p 3498 N94-28804
Optoelectronic packaging activities at Sandia National Laboratories [DE94-005287] p 3501 N94-30261
Photonics at Sandia National Laboratories: From research to applications [DE94-006463] p 3501 N94-30828

PHOTONS
Photon counting spectroscopy as done with a Thomson scattering diagnostic [DE94-005543] p 3503 N94-28515
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV [DE94-005596] p 3482 N94-28531
Advanced diagnostics for reacting flows [AD-A275057] p 3272 N94-29136
Physical conditions in classical H2 regions in the Magellanic Clouds p 3543 N94-29722
Inclusive jet and direct photon production at the D0 experiment [DE94-006001] p 3488 N94-30049
Experimental setup for study of hadron and hard photon production in nucleus-nucleus collisions [DE94-607849] p 3489 N94-30051
Experimental setups and methods to obtain new nuclear data at intermediate and high energies [DE94-607850] p 3489 N94-30052
Quantum-mechanical suppression of bremsstrahlung [DE94-005223] p 3497 N94-30712

PHOTONUCLEAR REACTIONS
Heavy flavor production at fixed target photo- and hadroproduction [DE94-004651] p 3491 N94-30719

PHOTOPRODUCTION
A measurement of the LMP effect [DE94-005225] p 3482 N94-28493
Elementary particle interactions [DE94-004238] p 3482 N94-28504
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV [DE94-005596] p 3482 N94-28531
Inclusive jet and direct photon production at the D0 experiment [DE94-006001] p 3488 N94-30049
Heavy flavor production at fixed target photo- and hadroproduction [DE94-004651] p 3491 N94-30719

PHOTOSPHERE
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723

PHOTOSYNTHESIS
Estimation of the net production of moss community at Langhovde, East Antarctica p 3358 N94-29081
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970

PHOTOTHERMAL CONVERSION
Quality and efficiency of solar collectors in Sweden [PB94-137486] p 3337 N94-28909

PHOTOVOLTAIC CELLS
The viability of photovoltaics on the Martian surface [NASA-TM-106478] p 3338 N94-30196
Large-area triple-junction a-Si alloy production scale up [DE94-000249] p 3339 N94-30604
Solar photovoltaics for development applications [DE94-006116] p 3340 N94-30843

PHOTOVOLTAIC CONVERSION
Advanced development of PV encapsulents [DE94-000219] p 3336 N94-28500
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
Photovoltaic performance and reliability workshop [DE94-000236] p 3339 N94-30601

Large-area triple-junction a-Si alloy production scale up
[DE94-000249] p 3339 N94-30604
NREL Photovoltaic Program FY 1993 bibliography
[DE94-000272] p 3340 N94-30820
Solar photovoltaics for development applications
[DE94-006116] p 3340 N94-30843

PHYSICAL EXERCISE
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049
Leg muscle volume during 30-day 6-degree head-down bed rest with isotonic and isokinetic exercise training
[NASA-TM-4580] p 3385 N94-29401

PHYSICAL FACTORS
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772

PHYSICAL OPTICS
Gaussian beam and physical optics iteration technique for wideband beam waveguide feed design p 3248 N94-29624
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106

PHYSICAL SCIENCES
The Seventh Annual National Conference of Black Physics Students
[NASA-CR-195735] p 3526 N94-28746

PHYSIOLOGICAL ACCELERATION
Portable Linear Sled (PLS) for biomedical research p 3163 N94-29648

PHYSIOLOGICAL EFFECTS
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Studies on water electrolyte metabolism and endocrine responses at rest and during submaximal exercise at 6,000 m simulated altitude p 3388 N94-28496
Effects of training at simulated altitude of 6,000 m on endocrine responses at rest and during exercise at the same altitude p 3388 N94-28497
Some issues on Japan's space food development and relating preliminary experimental study p 3388 N94-28498
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Image technology and information analysis of bone change with gravitational exposure p 3389 N94-28851
Arterial oxygen saturation during +Gz acceleration by short-radius centrifuge p 3389 N94-28852
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova p 3386 N94-28853
Disturbance of equilibrium on JAL flight crew p 3390 N94-28856
Equilibrium dysfunction in the clinical field p 3390 N94-28858
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Space movement of Trichinella spiralis under microgravity p 3387 N94-29711
Posture control of goldfishes under microgravity p 3387 N94-29712
Behavior and visual control of cyprinodonts under microgravity p 3387 N94-29713
A discussion of eye-head coordinative movement under microgravity during parabolic flight p 3393 N94-29715
Analysis of various biological activity parameters during parabolic flight p 3393 N94-29716
Hemodynamic measurement during parabolic flight p 3393 N94-29717
Motion sickness in parabolic flight: Possibility of electrogastrography as an objective index p 3393 N94-29718
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction p 3394 N94-29865
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats p 3387 N94-29866
Toxicity of carbon monoxide-hydrogen cyanide gas mixtures: Exposure concentration, time-to-incapacitation, carboxyhemoglobin, and blood cyanide parameters
[DOT/FAA/AM-94/7] p 3395 N94-29919
Physiological Anatomical Rodent Experiment (PARE).04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968

PHYSIOLOGICAL FACTORS
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867

PHYSIOLOGICAL RESPONSES
Prediction of survival times on land in a cold climate p 3379 N94-28423
Treatment of mild immersion hypothermia by body-to-body and forced-air warming p 3380 N94-28428
Thermoregulation in the extreme cold environment p 3381 N94-28438
Rewarming methodologies in the field p 3382 N94-28441
A comparison of four methods of rewarming individuals cooled by immersion in cold water p 3382 N94-28442
Work conditions assessment in pilots and ground personnel under high weather temperatures p 3382 N94-28444
Effects of three hydration beverages on exercise performance during 60 hours of simulated desert exposure p 3383 N94-28448
Alleviation of thermal strain in the CF: Keeping our cool during the Gulf conflict p 3383 N94-28449
Relaxed tolerance following HSG, high sustained +Gz
[AD-A275204] p 3391 N94-28892
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction p 3394 N94-29865

PHYSIOLOGY
Thermoregulation in the extreme cold environment p 3381 N94-28438
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
Physiological Anatomical Rodent Experiment (PARE).04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968
A fuzzy logic controller for hormone administration using an implantable pump p 3397 N94-30459

PHYTOTRONS
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461

PIEZOELECTRIC CERAMICS
GEC Ferranti piezo vibratory gyroscope p 3239 N94-29790
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355

PIEZOELECTRIC GAGES
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355

PILOT PERFORMANCE
Disturbance of equilibrium on JAL flight crew p 3390 N94-28856
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Aircraft accident/incident summary report: In-flight loss of control, leading to forced landing and runway overrun, Continental Express, Inc., N24706 Embraer EMB-120 RT, Pine Bluff, Arkansas, 29 April 1993
[PB94-910404] p 3135 N94-29402
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867
Flight simulator evaluation of advanced MLS procedures
[AD-B174270] p 3143 N94-30915

PILOTLESS AIRCRAFT
Payload central control for unmanned aircraft p 3155 N94-30284

PILOTS (PERSONNEL)
Work conditions assessment in pilots and ground personnel under high weather temperatures p 3382 N94-28444
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887

PIONEER VENUS SPACECRAFT
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248

PIPE FLOW
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils p 3221 N94-30797

PIPES (TUBES)
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
The influence of wall conductivity of film condensation with integral fin tubes
[AD-A275503] p 3523 N94-28662
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
The universal applications of microtubes and microtube composites p 3186 N94-30452

PITCHING MOMENTS
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473

PITTING
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138

PIVOTS
Mars rover mechanisms designed for Rocky 4 p 3161 N94-29630

PIXELS
A multiscale approach to image segmentation using Kohonen networks
[RUU-CS-93-06] p 3438 N94-30349

PLANAR STRUCTURES
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669

PLANE STRAIN
Plane strain finite element analysis of sheet forming operations including bending effects p 3322 N94-30354
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814

PLANE STRESS
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811
Approximate estimation of the effects of asymmetry on the testing of tensile specimens
[NPL-DMM(A)-117] p 3322 N94-30523
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814

PLANETARY ATMOSPHERES
The Pluto fast flyby mission: Completing the reconnaissance of the solar system p 3235 N94-29768
The far-infrared absorption spectrum of low temperature hydrogen gas
[ISBN-0-315-85432-4] p 3199 N94-30137

PLANETARY EVOLUTION
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698

PLANETARY GEOLOGY
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102
The Pluto fast flyby mission: Completing the reconnaissance of the solar system p 3235 N94-29768

PLANETARY GRAVITATION
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737
PLANETARY IONOSPHERES
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102
PLANETARY MAGNETOSPHERES
Observation of Jovian auroral Ly-alpha line profile and emission variability with a sounding rocket and the IUE archives p 3550 N94-30798
PLANETARY MAGNETOTAILS
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128
PLANETARY MAPPING
The Pluto fast flyby mission: Completing the reconnaissance of the solar system
p 3235 N94-29768
PLANETARY NEBULAE
Spatially resolved spectroscopy of AG Carinae, and direct evidence for stellar evolution: The central star of NGC 2392
[NASA-CR-189291] p 3545 N94-29871
PLANETARY SURFACES
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
Differential Scanning Calorimetry (DSC) for planetary surface exploration p 3236 N94-29776
PLANETARY WAVES
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
On the linear stability of Verkley's modons
p 3324 N94-28695
Generation mechanisms of quasi-stationary waves in the Southern Hemisphere p 3365 N94-30789
PLANFORMS
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
PLANNING
A time reasoning system based on the event calculus for scheduling in aeronautic maintenance
[REPT-932-710-101] p 3122 N94-29463
Interactive analysis and planning tools for air traffic and airspace management p 3139 N94-29573
PLASMA ANTENNAS
Waves in space plasma dipole antenna subsystem
p 3161 N94-29632
PLASMA ARC WELDING
Plasma arc welding torch having means for vortexing plasma for exiting the welding torch
[NASA-CASE-MFS-28828-1] p 3298 N94-29351
Metal inert gas welding system for use in vacuum
[NASA-CASE-MFS-28808-1] p 3298 N94-29352
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380
Ternary arc gas plasma welding torch
[NASA-CASE-MFS-28857-1] p 3303 N94-30173
PLASMA BUBBLES
Interaction of multiple spark-generated bubbles in a compressible liquid
[AD-A275037] p 3272 N94-29149
PLASMA CHEMISTRY
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
PLASMA CLOUDS
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
PLASMA COMPOSITION
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data
[NASA-CR-195119] p 3507 N94-30126
PLASMA CONDUCTIVITY
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
PLASMA CONTROL
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832
PLASMA COOLING
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
PLASMA CURRENTS
Theoretical reversed field pinch and tokamak studies
[DE94-005409] p 3503 N94-28490
Fluctuation and transport reduction in a reversed field pinch by inductive poloidal current drive
[DE94-005542] p 3503 N94-28514
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832
PLASMA DENSITY
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites
[DE94-607323] p 3365 N94-30223
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832
PLASMA DIAGNOSTICS
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-004564] p 3503 N94-28458
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515
Broadband EUV survey spectrometer for short-timescale experiments
[DE94-005459] p 3498 N94-28534
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses
p 3188 N94-28682
Transient internal probe
[AD-A275054] p 3505 N94-29134
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Inertial confinement fusion
[DE94-005957] p 3510 N94-30875
Magnetic flux reconstruction methods for shaped tokamaks
[DE94-005827] p 3510 N94-30882
PLASMA DIODES
Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686
PLASMA DRIFT
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869
PLASMA DYNAMICS
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752
PLASMA FREQUENCIES
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
PLASMA GUNS
Modelling erosion damage from low-energy plasma gun simulations of disruptions
[DE94-005196] p 3509 N94-30697
PLASMA HEATING
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
PLASMA INTERACTIONS
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
PLASMA JETS
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
PLASMA LAYERS
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys
[NASA-CASE-LEW-15535-1] p 3205 N94-29507
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data
[NASA-CR-195119] p 3507 N94-30126
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127
PLASMA OSCILLATIONS
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
PLASMA PHYSICS
Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities
p 3506 N94-29822
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
The investigation of electron-ion radiative and dielectronic recombination in high-temperature plasmas
[DE94-005150] p 3509 N94-30755
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760
Self-similar variables and the problem of nonlocal electron heat conductivity
[DE94-005826] p 3493 N94-30881
PLASMA PRESSURE
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
PLASMA SPECTRA
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29881
PLASMA SPRAYING
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys
[NASA-CASE-LEW-15535-1] p 3205 N94-29507

PLASMA TEMPERATURE
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
PLASMA TORCHES
Plasma arc welding torch having means for vortexing plasma for exiting the welding torch
[NASA-CASE-MFS-28828-1] p 3298 N94-29351
Metal inert gas welding system for use in vacuum
[NASA-CASE-MFS-28808-1] p 3298 N94-29352
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371
Ternary arc gas plasma welding torch
[NASA-CASE-MFS-28857-1] p 3303 N94-30173
PLASMA TURBULENCE
Plasma turbulent bremsstrahlung
[PPL-144] p 3507 N94-30157
PLASMA WAVES
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564
Towards experimental verification and device applications of current driven plasma instabilities in solid state systems
[AD-A275395] p 3504 N94-29055
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
Plasma turbulent bremsstrahlung
[PPL-144] p 3507 N94-30157
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
PLASMA-PARTICLE INTERACTIONS
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
PLASMAS (PHYSICS)
Nonlinear magnetohydrodynamics
[DE94-005654] p 3503 N94-28547
Experimental and analytical studies of high heat flux components for fusion experimental reactor
[DE94-707671] p 3504 N94-28556
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses
p 3188 N94-28682
Development of large area RF induction plasma for cost effective diamond
[AD-A275886] p 3504 N94-28776
Advanced diagnostics for reacting flows
[AD-A275057] p 3272 N94-29136
Plasma arc welding torch having means for vortexing plasma for exiting the welding torch
[NASA-CASE-MFS-28828-1] p 3298 N94-29351
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD
p 3223 N94-29518
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities
p 3506 N94-29822
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Magnetic field generation by circularly polarized laser light and inertial plasma confinement in a miniature magnetic bottle induced by circularly polarized laser light
[DE94-608353] p 3508 N94-30192
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
Deexcitation processes in nuclear reactions: The study of hot hadronic matter
[DE94-003396] p 3492 N94-30836
Self-similar variables and the problem of nonlocal electron heat conductivity
[DE94-005826] p 3493 N94-30881
PLASMASPHERE
Electron beams at geosynchronous orbit
[AD-A275471] p 3355 N94-28684
PLASTIC DEFORMATION
Superplasticity in fine-grained ceramics
[AD-A275461] p 3212 N94-28733
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
Nanodislocation structures generated in shocked crystals p 3514 N94-29915
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226
PLASTIC PROPERTIES
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
PLASTICIZERS
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
High elongation elastomers p 3223 N94-30477
PLASTICS
Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets
[AD-A275462] p 3177 N94-28735
PLATENS
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250
PLATING
An improved plating process p 3223 N94-30451
PLATINUM
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
Realtime structural electrochemistry of platinum clusters using dispersive XAFS
[DE94-005093] p 3208 N94-30101
PLAYBACKS
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979
PLUMES
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
A laboratory simulation of urban heat-island-induced circulation in a stratified environment
p 3367 N94-30921
PLUTO (PLANET)
The Pluto fast flyby mission: Completing the reconnaissance of the solar system
p 3235 N94-29768
PLUTONIUM
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776
PLY ORIENTATION
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole
p 3181 N94-29735
POINT SOURCES
A study of the convergence of spherical harmonic expansions of gravity using distributed point-mass Earth models p 3362 N94-29909
POINT SPREAD FUNCTIONS
Aberrated point-spread functions and beam quality for optical systems with annular pupils
[AD-A275311] p 3499 N94-28875
Calculation of turbulence degraded point spread function of an imaging system p 3260 N94-30514
POINTING CONTROL SYSTEMS
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
Design and control of active vision based mechanisms for intelligent robots
[AIAA PAPER 94-1196-CP] p 3442 N94-30547
POISSON DENSITY FUNCTIONS
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
An intrinsic Hamiltonian formulation of the dynamics of LC-circuits
[MEMO-1154] p 3462 N94-30964
POISSON EQUATION
The upsilon-q method and the psi-q method for incompressible flows p 3126 N94-28971
A note on the Poisson brackets associated with Lax operators
[MATHS-REPT-A-195] p 3464 N94-29482
POISSON RATIO
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
POLAR CAPS
On observing neutron star oscillations
p 3538 N94-29795
POLAR CUSPS
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
POLAR METEOROLOGY
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549
POLAR REGIONS
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Signatures of dayside solar wind/magnetosphere/ionosphere coupling as revealed by the pace HF radars and associated experiments
p 3359 N94-29236
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549
A study of the thermospheric dynamics of the high-latitude E region using a spectral thermospheric general circulation model p 3362 N94-29743
Cryosphere and climate p 3352 N94-30632
POLARIMETRY
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system
[AD-A275076] p 3329 N94-29095
Transient internal probe
[AD-A275054] p 3505 N94-29134
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
Polarimetric backscatter measurements of natural surfaces at millimeter wavelengths p 3259 N94-30509
POLARIZATION (SPIN ALIGNMENT)
One-loop QCD mass effects in the production of polarized bottom and top quarks
[PB94-138104] p 3487 N94-29145
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
POLARIZATION (WAVES)
Evaluation of dual polarization attenuation of millimeter frequencies through a meteorological radar
p 3256 N94-30496
POLARIZATION CHARACTERISTICS
On the relation between SMMR 37-GHz polarization difference and the rainfall over Africa and Australia
[NASA-TM-104598] p 3370 N94-29408
POLARIZED ELECTROMAGNETIC RADIATION
On the relation between SMMR 37-GHz polarization difference and the rainfall over Africa and Australia
[NASA-TM-104598] p 3370 N94-29408
Radar cross sections of ground clutter at 95 GHz for summer and fall conditions p 3259 N94-30512
POLARIZED LIGHT
One-loop QCD mass effects in the production of polarized bottom and top quarks
[PB94-138104] p 3487 N94-29145
POLARONS
Interband optical absorption in the Wannier-Stark ladder under the electron-LO-phonon resonance condition
[DE94-608097] p 3267 N94-30092
POLICIES
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818
POLISHING
Analysis of cost: CVD diamond deposition and finishing --- Quarterly report
[AD-A275586] p 3212 N94-28725
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
POLLUTION CONTROL
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Reduction of NO(x) by fuel-staging in gas turbine engines: A commitment to the future
p 3194 N94-29272

Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
Ventilation cost and air cleaning p 3232 N94-29605
A study of low emissions gas turbine combustions [NASA-CR-195763] p 3152 N94-29860
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1 [NASA-CP-3249] p 3555 N94-30440
International Energy and Environmental Congress: Proceedings [DE93-040609] p 3353 N94-30715
Biological conversion of synthesis gas [DE94-005815] p 3340 N94-30879

POLLUTION MONITORING
Intermedia transfer factors for fifteen toxic pollutants released to air basins in California [DE94-005699] p 3349 N94-30044
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring [DE94-005896] p 3349 N94-30047
Computerized in vitro test for chemical toxicity based on tetrahymena swimming patterns p 3354 N94-30463
Granulometry in environments with very small particle concentrations p 3259 N94-30511

POLLUTION TRANSPORT
Intermedia transfer factors for fifteen toxic pollutants released to air basins in California [DE94-005699] p 3349 N94-30044
Evaluation of discretization schemes for advection-diffusion equations [CWI-NM-R9311] p 3461 N94-30751

POLYACRYLONITRILE
Preparation of graphite fibers from polyimide p 3223 N94-29517

POLYATOMIC MOLECULES
Chemical dynamics studies of reactions in energetic materials [AD-A275607] p 3224 N94-28769
Theoretical investigation of gas-surface interactions [NASA-CR-195755] p 3272 N94-29378
Spectroscopic and dynamical studies of highly energized small polyatomic molecules [DE94-006509] p 3489 N94-30061

POLYBUTADIENE
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties [AD-A274983] p 3224 N94-29092
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984
Solventless, curable fluid oligomeric systems for high performance microwave, acoustical and mechanical applications p 3223 N94-30478

POLYCARBONATES
Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets [AD-A275462] p 3177 N94-28735
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene [NASA-TM-106460] p 3213 N94-28922
Ablation of polymers by ultraviolet pulsed laser [DE94-608100] p 3218 N94-30066
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483

POLYCRYSTALS
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition [NASA-TM-106534] p 3205 N94-29758
The bases for the development of high-temperature integrated SQUID-systems [DE94-607901] p 3267 N94-30073
Plasma enhanced chemical vapor deposition of ZrO2 thin films [DE94-006031] p 3218 N94-30104
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry [DE94-006374] p 3518 N94-30247

POLYESTERS
The polymerization of epsilon-caprolactone with stannous catalyst and lactide/epsilon-caprolactone (LA/epsilon-CL) and lactide/glycolide (LA/GA) copolymers. Polymer technology publication series no. 15 [PB94-137551] p 3220 N94-30713

POLYETHYLENE TEREPHTHALATE
Ablation of polymers by ultraviolet pulsed laser [DE94-608100] p 3218 N94-30066

POLYETHYLENES
Temperature depencence of the far infrared optical constants of polyethylene [PB94-124336] p 3213 N94-28795
Analysis of infrared radiation heating process considering chemical reaction of material to be heated [DE94-744116] p 3199 N94-30267
Development of radiation resistant electrical cable insulations p 3223 N94-30480
Development of radiation resistant electrical cable insulations [DE94-005189] p 3222 N94-30906

POLYGONS
Shape from diameter: Negative results [RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results [RUU-CS-93-17] p 3458 N94-30408
Rectilinear decompositions with low stabbing number [RUU-CS-93-25] p 3459 N94-30425

POLYHEDRONS
Representations of dynamical systems described by behavioral inequalities [AD-B173649] p 3458 N94-30402

POLYIMIDE RESINS
Low dielectric polyimide fibers [NASA-CASE-LAR-14526-1] p 3214 N94-29359
Irradiation polymerization of bismaleimide resins [REPT-932-430-105] p 3215 N94-29441

POLYIMIDES
Breakdown testing of wiring insulation p 3166 N94-28713
High temperature polymer dielectric film insulation p 3167 N94-28715
Low dielectric polyimide fibers [NASA-CASE-LAR-14526-1] p 3214 N94-29359
Composite flexible blanket insulation [NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Preparation of graphite fibers from polyimide p 3223 N94-29517
Polyimides containing the penta fluoro sulfanyl benzene moiety [NASA-CASE-LAR-15082-1] p 3175 N94-29554
Polyimides containing pendent siloxane groups [NASA-CASE-LAR-14638-1] p 3215 N94-29555
Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures [ISBN-0-315-85923-7] p 3218 N94-30036

POLYISOPRENES
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984

POLYMER BLENDS
Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets [AD-A275462] p 3177 N94-28735

POLYMER CHEMISTRY
Cellular and molecular approaches to polymer synthesis by bacteria [AD-A275501] p 3212 N94-28661
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
Polymer Technology Seminar, 1993. Kem-100.600 [PB94-137593] p 3213 N94-29031
Polymer technology publication series no. 16 [PB94-135522] p 3214 N94-29157
Polyimides containing the penta fluoro sulfanyl benzene moiety [NASA-CASE-LAR-15082-1] p 3175 N94-29554
Polyimides containing pendent siloxane groups [NASA-CASE-LAR-14638-1] p 3215 N94-29555
Solventless, curable fluid oligomeric systems for high performance microwave, acoustical and mechanical applications p 3223 N94-30478
The polymerization of epsilon-caprolactone with stannous catalyst and lactide/epsilon-caprolactone (LA/epsilon-CL) and lactide/glycolide (LA/GA) copolymers. Polymer technology publication series no. 15 [PB94-137551] p 3220 N94-30713
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

POLYMER MATRIX COMPOSITES
Apparatus for providing a uniform, consolidated, unidirectional, continuous, fiber-reinforced polymeric material and method relating thereto [NASA-CASE-LAR-15173-1-CU] p 3180 N94-29496
Effects of physical aging on long-term creep of polymers and polymer matrix composites [NASA-TM-109081] p 3181 N94-29541
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment [PB94-139318] p 3184 N94-30438
High elongation elastomers p 3223 N94-30477
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955

POLYMER PHYSICS
Organic materials that respond to molecules [AD-A275392] p 3174 N94-29307

POLYMERIC FILMS
Molecular aspects of transport in thin films of controlled architecture [DE94-004552] p 3211 N94-28457
High temperature polymer dielectric film insulation p 3167 N94-28715
A 3M high temperature dielectric film p 3167 N94-28717
Polyaniline membranes for gas and liquid separation [AD-A275851] p 3408 N94-28790
Corrosion inhibition by electrodeposited conductive-polymer film [AD-A275456] p 3213 N94-28806
Composite flexible blanket insulation [NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Study of nonlinear optical polymers and their applications in optical waveguides p 3216 N94-29807
Ablation of polymers by ultraviolet pulsed laser [DE94-608100] p 3218 N94-30066
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

POLYMERIZATION
Alkylene-bridged polygerm- and polygermsilsesqui-oxanes: New hybrid organic-inorganic materials [DE94-005096] p 3174 N94-28557
Cellular and molecular approaches to polymer synthesis by bacteria [AD-A275501] p 3212 N94-28661
Polymer Technology Seminar, 1993. Kem-100.600 [PB94-137593] p 3213 N94-29031
Polymer technology publication series no. 16 [PB94-135522] p 3214 N94-29157
Irradiation polymerization of bismaleimide resins [REPT-932-430-105] p 3215 N94-29441
Polyimides containing the penta fluoro sulfanyl benzene moiety [NASA-CASE-LAR-15082-1] p 3175 N94-29554
Polyimides containing pendent siloxane groups [NASA-CASE-LAR-14638-1] p 3215 N94-29555

POLYMERS
Alkylene-bridged polygerm- and polygermsilsesqui-oxanes: New hybrid organic-inorganic materials [DE94-005096] p 3174 N94-28557
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
Polymer Technology Seminar, 1993. Kem-100.600 [PB94-137593] p 3213 N94-29031
Measurement of bulk longitudinal modulus and correction for edge effects [DE94-005581] p 3222 N94-30900

POLYMETHYL METHACRYLATE
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene [NASA-TM-106460] p 3213 N94-28922
Ablation of polymers by ultraviolet pulsed laser [DE94-608100] p 3218 N94-30066

POLYNOMIALS
Upwind method using local interpolation p 3128 N94-28982
Splines and ocean wave modelling [PB94-139409] p 3378 N94-30002
Polynomial modeling of analog-to-digital converters [DE94-005579] p 3406 N94-30008
Homogeneous Poisson structures [DE94-608112] p 3453 N94-30119
Derivation lengths in term rewriting from interpretations in the naturals [RUU-CS-92-43] p 3455 N94-30346
A note on the complexity of local search problems [CT-93-02] p 3456 N94-30370

POLYPROPYLENE
Dendrite preventing separator for secondary lithium batteries [NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411

POLYSTYRENE
Ablation of polymers by ultraviolet pulsed laser [DE94-608100] p 3218 N94-30066
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483

POLYTETRAFLUOROETHYLENE
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene [NASA-TM-106460] p 3213 N94-28922

POLYURETHANE RESINS
Development of a unique polyurethane primer/topcoat p 3223 N94-30476

POLYVINYL ALCOHOL
A new material for removing heavy metals from water p 3354 N94-30471
POLYVINYL CHLORIDE
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885
Creep and physical aging of PVC: Dependence on stress and temperature
[NPL-DMM(A)-115] p 3217 N94-29886
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483
POPULATIONS
Reproduction in the Japanese anchovy (Engraulis japonica) as related to population fluctuation p 3235 N94-29708
POROSITY
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053
POROUS BOUNDARY LAYER CONTROL
Boundary layer control device for duct silencers
[NASA-CASE-ARC-12030-1] p 3478 N94-29362
POROUS PLATES
Boundary layer control device for duct silencers
[NASA-CASE-ARC-12030-1] p 3478 N94-29362
POROUS WALLS
A method for the modelling of porous and solid wind tunnel walls in computational fluid dynamics codes
[NASA-CR-195699] p 3270 N94-28724
PORPHYRINS
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE94-004958] p 3200 N94-30769
PORTABLE EQUIPMENT
Evaluation of access/navigational features of a graphical-user interface installed on a portable maintenance aid
[AD-A275791] p 3136 N94-28744
Radiation transport and focusing systems for power industrial lasers
[DE94-606817] p 3293 N94-28786
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057
Portable Linear Sled (PLS) for biomedical research p 3163 N94-29648
PORTABLE LIFE SUPPORT SYSTEMS
Portable ventilatory resuscitation systems
[AD-A274984] p 3401 N94-29093
Lunar surface operations. Volume 1: Lunar surface emergency shelter
[NASA-CR-195551] p 3299 N94-29354
POSEIDON SATELLITE
TOPEX/POSEIDON operational orbit determination results using global positioning satellites p 3160 N94-29666
POSITION (LOCATION)
Testing for a signal with unknown location and scale in a stationary Gaussian random field
[AD-A275320] p 3464 N94-28876
Stability properties of inclusive connectivity for graphs
[AD-A275360] p 3452 N94-29016
Development of an accurate transmission line fault locator using the global positioning system satellites p 3144 N94-30652
Placing registration marks
[RUU-CS-93-21] p 3427 N94-30725
POSITION ERRORS
Time and position accuracy using codeless GPS p 3144 N94-30650
POSITION SENSING
Stripline monitor electronics for the bundle position determination in AmPS
[DIGEL-1993-8] p 3495 N94-29888
Computer Assisted Medical Interventions: Application to Conformal Radiotherapy
[RR-912-I] p 3395 N94-30028
Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results p 3395 N94-30029
Pre- and intra-radiotherapy multimodal image registration: Principles and first experiments p 3395 N94-30030
Encoding technique for automated guided vehicle POSE recovery in a structured environment p 3144 N94-30286
POSITIONING
Synchronization, positioning, and communication in multistatic radar systems for air defence
[PB94-137478] p 3243 N94-28908
Position control of a flexible beam with active damping of vibrations
[ISBN-0-315-85841-9] p 3321 N94-30033
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250
POSITIONING DEVICES (MACHINERY)
Three methods to improve the accuracy of a PUMA 560 robot p 3307 N94-30290
POSITIVE FEEDBACK
Sensitivity and feedbacks associated with vegetation-related land surface parameters in a general circulation model p 3348 N94-29800
Modeling studies of frontogenesis in the upper and middle troposphere p 3375 N94-30868
POSITRON ANNIHILATION
Influence of doping on the electronic structure of (La, Sr)2CuO4
[DE94-006383] p 3516 N94-30054
Experiment studies of electron-positron interactions at the Stanford Linear Accelerator Center
[DE94-005877] p 3491 N94-30702
POSITRONS
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
POTASSIUM ALLOYS
Thermodynamics of molten K-TE alloys
[DE94-608095] p 3208 N94-30090
POTASSIUM COMPOUNDS
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
POTENTIAL FLOW
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design
[NLR-TP-92524-U] p 3134 N94-30493
POTENTIAL THEORY
Quasipotential in the fourth order of perturbation theory
[DE94-606299] p 3484 N94-28584
POWDER (PARTICLES)
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043
Bench-scale synthesis of nanoscale materials p 3240 N94-30473
Properties of chemical vapor infiltration diamond deposited in a diamond powder matrix
[DE94-005429] p 3220 N94-30591
POWER AMPLIFIERS
Miniaturization in x ray and gamma ray spectroscopy p 3236 N94-29773
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
POWER CONDITIONING
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444
POWER EFFICIENCY
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527
POWER LINES
Electric power lines: Questions and answers on research into health effects
[DE94-005637] p 3353 N94-30757
POWER REACTORS
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
POWER SERIES
Method of Chabauty-Coleman and the second case of Fermat's last theorem for regular primes
[PB94-138187] p 3467 N94-29162
POWER SPECTRA
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings p 3311 N94-30792
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802
POWER SUPPLIES
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527
POWER SUPPLY CIRCUITS
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
PREAMPLIFIERS
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717
A low noise silicon detector preamplifier system for room temperature x ray spectroscopy
[REPT-93-058] p 3291 N94-30930
PRECESSION
On relativity principle violation in local measurements of spin precession of moving particles
[DE94-608067] p 3489 N94-30085
PRECIPITATION (METEOROLOGY)
Sensitivity and feedbacks associated with vegetation-related land surface parameters in a general circulation model p 3348 N94-29800
The incorporation and initialization of cloud water/ice in an operational forecast model p 3373 N94-29814
A study of precipitation in the coastal area of Antarctica as observed at Syowa Station using a vertical pointing radar p 3363 N94-29979
PRECIPITATION HARDENING
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
PRECISION
An Earth observation telescope refocusing mechanism
[REPT-932-440-103] p 3332 N94-29417
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449
Time and position accuracy using codeless GPS p 3144 N94-30650
PREDICATE CALCULUS
Commutative Lambek categorial grammars
[ML-93-01] p 3457 N94-30395
Modal quantification over structured domains
[ML-93-02] p 3457 N94-30396
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431
PREDICATE LOGIC
Interrogatives and adverbs of quantification
[LP-92-14] p 3456 N94-30372
The Vanilla meta-interpreter for definite logic programs and ambivalent syntax
[CT-93-01] p 3424 N94-30386
Commutative Lambek categorial grammars
[ML-93-01] p 3457 N94-30395
Modal quantification over structured domains
[ML-93-02] p 3457 N94-30396
Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431
Bisimulations and predicate logic
[CWI-CS-R9333] p 3460 N94-30735
PREDICTION ANALYSIS TECHNIQUES
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Role of microstructure on the fatigue durability of aluminum aircraft alloys
[AD-A275814] p 3202 N94-28830
Decompression sickness risk versus time and altitude
[AD-A275261] p 3391 N94-29071
Spray combustion experiments and numerical predictions p 3195 N94-29277
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole p 3181 N94-29735
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
Comparison of RCS prediction techniques, computations and measurements
[PB94-125515] p 3256 N94-30392
Predictive sufficiency and the use of stored internal state
[AIAA PAPER 94-1213-CP] p 3445 N94-30564
A real-time prediction of UTC p 3470 N94-30654
Numerical simulation and prediction of implosion phenomena
[GKSS-92/E/99] p 3284 N94-30968
PREDICTIONS
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits p 3467 N94-29910

A real-time prediction of UTC p 3470 N94-30654
PREFORMS
3-D braided, continuous fiber ceramic composites produced by chemical vapor infiltration
[AD-A275192] p 3178 N94-29024
Microwave assisted chemical vapor infiltration
[DE94-005005] p 3185 N94-30771
PREGNANCY
Physiological Anatomical Rodent Experiment (PARE) .04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968
PRELAUNCH TESTS
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
PREMIXED FLAMES
Prediction of prompt NO(x) in hydrocarbon air flames p 3190 N94-29250
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model p 3190 N94-29251
Ducted kerosene spray flames p 3195 N94-29276
PREMIXING
The effect of incomplete fuel-air mixing on the lean limit and emissions characteristics of a Lean Prevaporized Premixed (LPP) combustor p 3193 N94-29265
Effects of hydrogen addition on pollutant emissions in a gas turbine combustor p 3195 N94-29275
Numerical prediction of mixing process in a methane-fueled engine p 3304 N94-30230
PREPREGS
Polymer infiltration studies
[NASA-CR-195729] p 3213 N94-28748
Non-rectangular towpreg architectures
[NASA-CASE-LAR-14863-1-CU] p 3180 N94-29485
Apparatus for providing a uniform, consolidated, unidirectional, continuous, fiber-reinforced polymeric material and method relating thereto
[NASA-CASE-LAR-15173-1-CU] p 3180 N94-29496
PRESSING (FORMING)
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955
PRESSURE
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775
PRESSURE BREATHING
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996
PRESSURE CHAMBERS
Numerical simulation and prediction of implosion phenomena
[GKSS-92/E/99] p 3284 N94-30968
PRESSURE DEPENDENCE
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Crystal structure of La(2-x)Ba(x)CuO4
[DE94-707688] p 3511 N94-28750
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775
Studies of interfaces and vapors with Optical Second Harmonic Generation
[DE94-006295] p 3476 N94-30841
PRESSURE DISTRIBUTION
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
Computation of wind tunnel wall effects for complex models using a low-order panel method
[NASA-TM-104019] p 3132 N94-30151
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
Calculus of variations applied to 2D multi-point airfoil design
[PB94-125457] p 3133 N94-30401
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819
PRESSURE EFFECTS
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures p 3194 N94-29271
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer p 3282 N94-30807
PRESSURE GRADIENTS
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer p 3282 N94-30807
Atmospheric turbulence within and above a coniferous forest
[ISBN-0-315-75468-0] p 3375 N94-30870
PRESSURE MEASUREMENT
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3288 N94-29484
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
PRESSURE MODULATOR RADIOMETERS
Optical Chopper Assembly for the Mars Observer p 3162 N94-29639
PRESSURE OSCILLATIONS
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
PRESSURE RATIO
Evaluation of flip-flop jet nozzles for use as practical excitation devices
[NASA-TM-106377] p 3135 N94-30949
PRESSURE REGULATORS
Determination of pressure response times for gaseous flow in a tube
[AD-A275274] p 3272 N94-29435
Measurand transient signal suppressor
[NASA-CASE-MSC-22027-1] p 3435 N94-29466
PRESSURE SENSORS
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3288 N94-29484
PRESSURE SUITS
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996
Procedures and metrics for anti-G suit evaluations
[AD-A275349] p 3400 N94-28997
Decompression sickness risk versus time and altitude
[AD-A275261] p 3391 N94-29071
EVA glove evaluation methodology and test protocol p 3401 N94-29729
PRESSURE VESSELS
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689
PREVENTION
Application of remote sensing in prevention of disasters p 3332 N94-29230
PRIMERS (COATINGS)
Development of a unique polyurethane primer/topcoat p 3223 N94-30476
PRIMITIVE EQUATIONS
Modeling studies of frontogenesis in the upper and middle troposphere p 3375 N94-30868
PRINCIPAL COMPONENTS ANALYSIS
Nonlinear PCA: Algorithms and applications
[PB94-137544] p 3419 N94-29680
PRINTED CIRCUITS
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics
[NASA-CR-189338] p 3287 N94-29400
PRINTING
Fundamentals of printing technology
[PB94-132602] p 3530 N94-29141
PRIORITIES
Risk-based prioritization: A comparison of approaches
[DE94-003368] p 3526 N94-28474
PRIVACY
Management of PEM public key certificates using X.500 directory service: Some problems and solutions
[DE94-004200] p 3431 N94-29952
PROBABILITY DENSITY FUNCTIONS
Ten new checks to assess the statistical quality of Monte Carlo solutions in MCNP
[DE94-006137] p 3465 N94-30366
PROBABILITY DISTRIBUTION FUNCTIONS
A moment plotting method for characterizing aircraft fatigue data population distributions
[AD-A275500] p 3145 N94-28660
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378
PROBABILITY THEORY
Risk-based prioritization: A comparison of approaches
[DE94-003368] p 3526 N94-28474
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670
Markov chains for random urinalysis 3: Daily model and drug kinetics
[AD-A275540] p 3389 N94-28797
The effects of molecular orientation geometry and surface anisotropy upon etching
[AD-A275154] p 3486 N94-29032
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Boundary layer coherent structures
[AD-A275007] p 3272 N94-29195
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
Risk measures in living probabilistic safety assessment
[VTT-PUBS-146] p 3465 N94-30154
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161
Bayesian belief networks and conditional independencies
[RUU-CS-92-36] p 3465 N94-30376
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
PROBLEM SOLVING
A cognitive model of decision making: Chunking and the radar detection device
[AD-A275185] p 3242 N94-28859
Incorporating geometric constraints into rule-based systems using nonlinear optimization
[AD-A275093] p 3452 N94-29063
Propagation of evidence through fuzzy rules
[AD-A275071] p 3411 N94-29180
Neural network solutions to logic programs with geometric constraints
[AD-A275419] p 3435 N94-29198

More problems on rewriting
[CWI-CS-R9332] p 3428 N94-30734
The (n squared)-hard problems in computational geometry
[RUU-CS-93-15] p 3461 N94-30747

PROCEDURES
Environmental Compliance Assessment System (ECAS) --- Japan supplement
[AD-A275549] p 3346 N94-28722
Cleanroom engineering handbook. Volume 4. Specification team practices
[AD-A275861] p 3156 N94-28753
Tuning of AmPS
[NIKHEF-K-AMPS-93-01] p 3494 N94-29422

PROCESS CONTROL (INDUSTRY)
The development and demonstration of the metric assessment tool
[AD-A275788] p 3230 N94-28742
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805

PROCUREMENT
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068

PRODUCT DEVELOPMENT
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
A conceptual framework for software technology transition
[AD-A275637] p 3407 N94-28639
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996
The UNICON approach to through-life support and evolution of software-intensive systems
p 3416 N94-29340
The discipline of defining the software product
p 3416 N94-29343
A common approach for an aerospace software environment p 3417 N94-29346

PRODUCTION COSTS
Large-area triple-junction a-Si alloy production scale up
[DE94-000249] p 3339 N94-30604

PRODUCTION ENGINEERING
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159

PRODUCTION MANAGEMENT
Technology transfer initiatives
[NASA-CR-195151] p 3537 N94-29410

PRODUCTIVITY
Realizing the productivity potential of expeditious operations
[PB94-135555] p 3230 N94-29188
Triple Diagonal modeling: A mechanism to focus productivity improvement for business success
[DE94-004309] p 3527 N94-30041

PROGRAM VERIFICATION (COMPUTERS)
Software Technology for Adaptable, Reliable Systems (STARS) program
[AD-A275675] p 3407 N94-28664
Reasoning about programs by exploiting the environment
[AD-A275852] p 3408 N94-28794
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
Object versus functional oriented design
p 3413 N94-29321
Software testing practices and their evolution for the 1990's p 3415 N94-29335
Validation and test of complex weapon systems
p 3150 N94-29336
Integrated formal verification and validation of safety critical software p 3416 N94-29338
Animators and error reporters for generated programming environments
[CWI-CS-R9253] p 3418 N94-29503
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
GNU debugger internal architecture
[DE94-006665] p 3422 N94-30251
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857

PROGRAMMABLE LOGIC DEVICES
A/GATECH DOSP fabrication --- optical programmable logic array
[AD-A275848] p 3430 N94-28781

PROGRAMMING ENVIRONMENTS
Guide to the Environmental-Language
[AD-A275849] p 3408 N94-28784
SDE's for the year 2000 and beyond: An EF perspective p 3417 N94-29344
A common approach for an aerospace software environment p 3417 N94-29346
A distributed object-based environment in Ada
p 3417 N94-29347
DSSA-ADAGE: An environment for architecture-based avionics development p 3150 N94-29348
Entreprise 2: A PCTE integrated project support environment p 3417 N94-29349
The ABC structure editor: Structure-based editing for the ABC programming environment
[CWI-CS-R9256] p 3418 N94-29487
Animators and error reporters for generated programming environments
[CWI-CS-R9253] p 3418 N94-29503
Considerations on graphical user interfaces for intelligent ATM support systems p 3139 N94-29572
Programming aspects of Views: An open-architecture application environment
[CWI-CS-R9259] p 3422 N94-30321
Modelling interaction tools in the Views architecture
[CWI-CS-R9261] p 3423 N94-30323
Maintaining presentation invariants in the Views system
[CWI-CS-R9262] p 3423 N94-30324

PROGRAMMING LANGUAGES
Guide to the Environmental-Language
[AD-A275849] p 3408 N94-28784
Summer intern program
[AD-A275194] p 3466 N94-28888
Tinkertoy(tm) transactions
[AD-A275271] p 3410 N94-29006
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
North American jumelage 'type systems'
[AD-A275342] p 3411 N94-29214
Constrained objects
[AD-A275273] p 3418 N94-29434
Graphics for ABC
[CWI-CS-R9255] p 3418 N94-29449
The ABC structure editor: Structure-based editing for the ABC programming environment
[CWI-CS-R9256] p 3418 N94-29487
Proceedings: SISAL 1993
[DE94-006641] p 3420 N94-30056
Programming aspects of Views: An open-architecture application environment
[CWI-CS-R9259] p 3422 N94-30321
A conceptual language for the description and manipulation of complex information models
[TR-92-34] p 3423 N94-30344
On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347
A note on the Smyth powerdomain construction
[RUU-CS-93-02] p 3457 N94-30393
Algebraic domains, chain completion, and the Plotkin powerdomain construction
[RUU-CS-93-03] p 3457 N94-30394
Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
MANIFOLD version 1.0 programming: Programs and problems
[CWI-CS-R9334] p 3425 N94-30428
Manray: A replicated workers program in MANIFOLD
[CWI-CS-R9337] p 3433 N94-30429
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
A streamlined software environment for situated skills
[AIAA PAPER 94-1205-CP] p 3444 N94-30556
On the relation between Unity properties and sequences of states
[RUU-CS-93-07] p 3433 N94-30720
Parallel language constructs for paradigm integration and deterministic computations
[DE94-005119] p 3428 N94-30754
A new programming methodology for lazy functional languages
[MEMO-INF-93-44] p 3429 N94-30765
Federal grammars and modular compilers
[REPT-93-054] p 3429 N94-30928

PROJECT MANAGEMENT
NASA Parts Program Office responsibilities
p 3165 N94-28702
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
Application of information management methodologies for project quality improvement in a changing environment p 3416 N94-29342
SDE's for the year 2000 and beyond: An EF perspective p 3417 N94-29344
The 1993 Federal Aviation Administration Aviation System Capital Investment Plan p 3136 N94-29445
Crystalline-silicon solar cell development sponsored by the US Department of Energy
[DE94-003783] p 3340 N94-30609
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824

PROJECT PLANNING
Intelligent automated process planning and code generation for computer-controlled inspection
[AD-A275346] p 3409 N94-28920
EOS project and ASTER (ITIR) p 3331 N94-29226
Earth-observation plan in Europe
p 3331 N94-29227
Japan's Earth observation satellite programs
p 3332 N94-29232
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
An Operational Control Segment (OCS) update on GPS constellation status and future program directions
p 3144 N94-30643
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811

PROJECT SETI
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613

PROLOG (PROGRAMMING LANGUAGE)
On the unification free PROLOG programs
[CWI-CS-R9331] p 3427 N94-30733

PROP-FAN TECHNOLOGY
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438

PROPANE
Measurements and predictions of the combustion characteristics of enclosed swirl-stabilized propane flames
[IECE-CFE-TR-001] p 3198 N94-30017

PROPELLANT ADDITIVES
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860

PROPELLANT CHEMISTRY
Fuels combustion research
[AD-A275122] p 3189 N94-29004
Superior energetic materials that contain carbocations and anions. Energetic materials restricted in composition to C, H, N, and O atoms
[AD-A275449] p 3225 N94-29310

PROPELLANT COMBUSTION
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
Liquid-oxygen droplet vaporization and combustion: Analysis of transcritical behavior and application to liquid-rocket combustion instability p 3197 N94-29592

PROPELLANT PROPERTIES
Advanced fuel properties: A computer program for estimating property values
[AD-A275248] p 3224 N94-28901
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092

PROPELLANT SENSITIVITY
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308

PROPELLANT STORAGE
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904

PROPELLANT TANKS
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904
PROPELLANT TESTS
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092
PROPELLANT TRANSFER
Development and testing of the Automated Fluid Interface System p 3161 N94-29636
PROPELLANTS
Superior energetic materials that contain carbocations and anions. Energetic materials restricted in composition to C, H, N, and O atoms
[AD-A275449] p 3225 N94-29310
PROPELLER SLIPSTREAMS
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
Aerodynamic analysis of slipstream/wing/nacelle interference for preliminary design of aircraft configurations
[AD-B173651] p 3135 N94-30916
PROPELLERS
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
PROPOSALS
Advanced gas turbine systems research
[DE94-005303] p 3297 N94-28485
PROPULSION SYSTEM CONFIGURATIONS
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Turboramjet engines: Types and performances p 3151 N94-29293
Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367
PROPULSION SYSTEM PERFORMANCE
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833
Fuels combustion research
[AD-A275122] p 3189 N94-29004
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216
Combustion for future supersonic transport propulsion p 3190 N94-29249
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Turboramjet engines: Types and performances p 3151 N94-29293
Some problems of scramjet propulsion for aerospace planes. Part 1: Scramjet: Aims and features p 3151 N94-29295
CIAM experimental turboramjets p 3152 N94-29299
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848
PROPYLENE
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
PROSTATE GLAND
Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results p 3395 N94-30029
PROTEASE
Studies on bacterial spore ultraviolet light resistance and regulation of the activity of a spore protease
[AD-A275448] p 3384 N94-28884
PROTECTION
Development of a new chemical warfare agent protective material p 3381 N94-28432
PROTECTIVE CLOTHING
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
Evaluation of life support equipment during an unsupported North Pole expedition p 3379 N94-28422
The potential of new textiles in improving survival prospects p 3380 N94-28430
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Thermal protective performance and instrumented mannequin evaluation of multi-layer garment systems p 3381 N94-28433
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report p 3381 N94-28435
Advanced integrated cold protection for aircrew p 3381 N94-28436
Thermal strain generated by an enhanced anti-G protection system in a hot climate p 3383 N94-28445
Implications of climatic extremes in aircrew NBC operations p 3383 N94-28446
Test of a new protection suit in a climatic chamber p 3384 N94-28452
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996
Procedures and metrics for anti-G suit evaluations
[AD-A275349] p 3400 N94-28997
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
PROTECTIVE COATINGS
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Heat flux instrumentation for Hyflite thermal protection system
[NASA-CR-195731] p 3286 N94-28824
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097
Electrochemical behavior and surface chemistry of nonequilibrium aluminum alloys: Passivity mechanism and fabrication methods
[AD-A275401] p 3204 N94-29196
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
Thick thermal barrier coatings for diesel components
[NASA-CR-187111] p 3537 N94-29350
Rules and definition of the range of paints applied on aeronautical structrural composites
[REPT-932-600-106] p 3215 N94-29459
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys
[NASA-CASE-LEW-15535-1] p 3205 N94-29507
Polyimides containing pendent siloxane groups
[NASA-CASE-LAR-14638-1] p 3215 N94-29555
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
Deposition of tantalum carbide coatings on graphite by laser interactions p 3223 N94-30475
Development of a unique polyurethane primer/topcoat p 3223 N94-30476
Four advances in carbon-carbon materials technology p 3186 N94-30481
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522
PROTEIN CRYSTAL GROWTH
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session
[JTN-94-80584] p 3158 N94-28583
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Protein crystal growth in microgravity p 3228 N94-28943
Thermal enclosure system functional simulation user's manual
[NASA-TM-109094] p 3466 N94-29489
Convective flow effects on protein crystal growth
[NASA-CR-195785] p 3515 N94-30015
PROTEINS
Barley cell culture as a producer of heterologous protein
[PB94-132339] p 3379 N94-28408
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session
[JTN-94-80584] p 3158 N94-28583
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Protein crystal growth in microgravity p 3228 N94-28943
PROTOCOL (COMPUTERS)
Design of parallel systems for signal processing
[AD-A275490] p 3430 N94-28659
Preliminary analysis of Asynchronous Transfer Mode (ATM) over microwave channels
[AD-A275214] p 3243 N94-29069
Model-oriented analysis of a communications protocol
[PB94-138146] p 3244 N94-29109
Invariants, frames and postconditions: A comparison of two formal specification notations
[PB94-138153] p 3405 N94-29110
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
Space reclamation for uncoordinated checkpointing in message-passing systems
[NASA-CR-195761] p 3420 N94-29906
Performance issues of signalling protocols for broadband ISDN
[MEMO-INF-93-30] p 3255 N94-30374
End-to-end delay reduction in narrow bandwidth real-time multimedia tele-education applications
[AD-B179614] p 3260 N94-30518
Design and analysis of dynamic leader election protocols in broadcast networks
[MEMO-INF-93-43] p 3260 N94-30520
The NIST Internet time service p 3475 N94-30678
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912
An UIO-based method for protocol conformance testing
[REPT-93-060] p 3429 N94-30931
PROTON BEAMS
Physics at HERA
[DE94-005117] p 3483 N94-28569
Search for heavy neutrinos at the IHEP-JINR neutrino detector
[DE94-608175] p 3489 N94-30095
PROTON DENSITY (CONCENTRATION)
Variations of electron fluxes, low-frequency radiations and plasma density during the geomagnetic storm on 9-12 March, 1979 according to data of the Interkosmos-19 satellites
[DE94-607323] p 3365 N94-30223
PROTON ENERGY
Proton switches
[AD-A275150] p 3167 N94-29022
PROTONS
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Results on structure functions from fixed-target experiments
[DE94-005233] p 3482 N94-28541
Proton switches
[AD-A275150] p 3167 N94-29022
Inclusive jet and direct photon production at the D0 experiment
[DE94-006001] p 3488 N94-30049
A search for rapidity gap events in p(bar p) collisions at D(0)
[DE94-004654] p 3491 N94-30722
PROTOTYPES
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28896
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Mars rover mechanisms designed for Rocky 4 p 3161 N94-29630
Test of prototype liquid-water-content meter for aircraft use
[NASA-CR-189304] p 3374 N94-30187
PSEUDONOISE
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
PSEUDOPOTENTIALS
First principles pseudopotential calculations on aluminum and aluminum alloys
[DE94-004890] p 3206 N94-29931
PSYCHOACOUSTICS
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464

PSYCHOLOGICAL EFFECTS
Some issues on Japan's space food development and relating preliminary experimental study
p 3388 N94-28498
PSYCHOLOGICAL FACTORS
The management issues of implementing telecommuting: A case study
[AD-A275267] p 3527 N94-28905
PSYCHOMOTOR PERFORMANCE
Experimental evaluation of two systems of individual air-conditioning p 3384 N94-28450
An evaluation of personality testing and the five-factor model in the selection of landing craft air cushion vehicle crew members
[AD-A275869] p 3397 N94-28754
PSYCHOPHYSIOLOGY
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867
PUBLIC LAW
Loran-C time management p 3144 N94-30644
PULSARS
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
A study of recycled pulsars in globular clusters
p 3539 N94-29825
PULSE AMPLITUDE
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Pulse height response of Si surface barrier detectors
p 3497 N94-30221
PULSE COMMUNICATION
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
PULSE COMPRESSION
Digital pulse compression and its application in reducing radar interference
[ISBN-0-315-85767-6] p 3255 N94-30240
PULSE DOPPLER RADAR
Theory and application of a Radio-Acoustic Sounding System (RASS) p 3367 N94-30869
PULSE MODULATION
Measurement of the frequency stability of responders in aircraft p 3261 N94-30673
PULSE RADAR
Digital pulse compression and its application in reducing radar interference
[ISBN-0-315-85767-6] p 3255 N94-30240
PULSED LASERS
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633
Optical field ionization of atoms and ions using ultrashort laser pulses
[DE94-006643] p 3488 N94-29845
Optical techniques for time and frequency transfer
p 3469 N94-30647
PULSED RADIATION
Tuning of AmPS
[NIKHEF-K-AMPS-93-01] p 3494 N94-29422
PUMP IMPELLERS
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
PUMPS
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
PUPILS
Analysis of various biological activity parameters during parabolic flight p 3393 N94-29716
PURGING
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380
PURIFICATION
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Fossil energy biotechnology: A research needs assessment
[DE94-004239] p 3338 N94-29953
Gas stream purifier p 3354 N94-30469
A new material for removing heavy metals from water
p 3354 N94-30471
PURITY
Method of test for cleanness assessment of metal alloys: The preparation of button specimens by electron beam melting and the characterisation of recovered inclusions
[NPL-DMM(A)-130] p 3210 N94-30796
PYRENES
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE94-004958] p 3200 N94-30769
PYROLYSIS
Gas phase thermochemistry of organogermanium compounds
[DE94-004885] p 3187 N94-28561
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications
p 3166 N94-28711
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879
Endothermic fuels for hypersonic aviation
p 3197 N94-29285
PYROTECHNICS
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
Integration of pyrotechnics into aerospace systems
p 3161 N94-29634

Q

Q SWITCHED LASERS
Development of high time-resolution laser flash equipment for thermal diffusivity measurements using miniature-size specimens
[NIFS-268] p 3295 N94-30186
QUADRATIC EQUATIONS
Convolutional encoding of self-dual codes
p 3250 N94-29662
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406
QUADRUPOLES
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model
[DE94-608114] p 3517 N94-30109
QUALIFICATIONS
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Organized wiring systems p 3166 N94-28705
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429
Fire behavior of aeronautical materials
[REPT-932-600-105] p 3197 N94-29457
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
QUALITATIVE ANALYSIS
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
QUALITY CONTROL
Testing laboratories as notified bodies
[PB94-132396] p 3160 N94-28413
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Organized wiring systems p 3166 N94-28705
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
[AD-A275860] p 3156 N94-28752
A reliable and repeatable method for volume calculation of pressurized garments
[AD-A275600] p 3399 N94-28766
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
Application of information management methodologies for project quality improvement in a changing environment p 3416 N94-29342
The discipline of defining the software product
p 3416 N94-29343
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
The 1992 report on the next generation ultra clean technology for advanced microfabrication
[DE94-744171] p 3157 N94-30268
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435
QUANTUM CHROMODYNAMICS
Report of the subgroup on the top quark
[DE94-004624] p 3481 N94-28462
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Properties of events containing a photon and several jets seen in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-005596] p 3482 N94-28531
Proceedings of the workshop on quark and lepton mass matrices
[DE94-707692] p 3485 N94-28624
One-loop QCD mass effects in the production of polarized bottom and top quarks
[PB94-138104] p 3487 N94-29145
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
A pot-pourri of results in QCD from large lattice simulations on the CM5
[DE94-005084] p 3514 N94-29818
Inclusive jet and direct photon production at the D0 experiment
[DE94-006001] p 3488 N94-30049
Gluon and fermion damping in hot QCD
[ISBN-0-315-85982-2] p 3490 N94-30141
Direct anti-b b production in anti-pp collisions at the square root of s = 1.8 TeV
[DE94-006167] p 3491 N94-30369
Problems in particle theory
[DE94-003665] p 3491 N94-30685
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei
[DE94-004178] p 3491 N94-30686
Heavy flavor production at fixed target photo- and hadroproduction
[DE94-004651] p 3491 N94-30719
Research in elementary particle physics
[DE94-001657] p 3491 N94-30762
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844
QUANTUM ELECTRODYNAMICS
The proper field of charges and gauge-invariant variables in electrodynamics
[DE94-606405] p 3523 N94-28751
Curved-space quantization, and Dirac versus reduced quantization of Poincare gauge theories
[ISBN-0-315-85990-3] p 3525 N94-30142
QUANTUM ELECTRONICS
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035
Electronic structure of Zn-based quantum wells
[DE94-608104] p 3516 N94-30068
QUANTUM MECHANICS
Miln equation for the calculation of the phases and amplitudes of wave functions for continuum spectrum of Coulomb two-center problem
[DE94-606292] p 3522 N94-28616
Dissipative quantum dynamics and nonlinear sigma-model
[DE94-606295] p 3523 N94-28617
Classical interpretation of quantum mechanics
[DE94-606304] p 3523 N94-28719
Electronic structure and mechanical properties of grain boundaries
[AD-A275198] p 3512 N94-28890
Existence of quantum characteristic exponents
[PB94-138161] p 3523 N94-29146
Coherent states of SU(l,1) groups
[DE94-603654] p 3524 N94-29498
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
Quantum interference phenomena and novel switching in split gate high electron mobility transistors
p 3266 N94-29734
A semiclassical study of quantum maps
p 3524 N94-29987
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE94-006428] p 3514 N94-30001
On chaos in quantum mechanics: The two meanings of sensitive dependence
[DE94-608069] p 3524 N94-30086
Reconstruction of spectra in the discrete quantum mechanics (new elements of the lattice quantum engineering)
[DE94-608075] p 3524 N94-30087
Quantum-mechanical suppression of bremsstrahlung
[DE94-005223] p 3497 N94-30712
Molecular dynamics simulations of dense plasmas
[DE94-005082] p 3509 N94-30752
Non-Markovian quantum Brownian motion of a harmonic oscillator
[DE94-005922] p 3477 N94-30873
Non-commutative geometry
[PB94-139342] p 3462 N94-30889

QUANTUM STATISTICS
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
QUANTUM THEORY
The (j,0) + (0,j) representation space: Dirac-like construct
[DE94-005011] p 3522 N94-28572
On invariant measures for some infinite-dimensional dynamical systems
[DE94-606342] p 3522 N94-28609
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
Discrete symmetries, strong CP problem and gravity
[DE94-608091] p 3524 N94-30089
Modelling of multiparticle production by dynamical semigroup method
[DE94-608132] p 3490 N94-30120
A theory approach for creation of the matter of universe
[DE94-608109] p 3548 N94-30163
GL(sub q)(N)-covariant quantum algebras and covariant differential calculus
[DE94-608072] p 3460 N94-30726
Space-time symmetries: P and CP violation
[DE94-005012] p 3526 N94-30750
Non-commutative geometry
[PB94-139342] p 3462 N94-30889
QUANTUM WELLS
Development of ultra-low noise, high performance 3 -5 quantum well infrared photodetectors (QWIPs) for focal plane array staring image sensor systems
[AD-A275745] p 3511 N94-28734
Photonic devices and systems for optical signal processing
[AD-A275818] p 3498 N94-28804
Carrier collection and scattering in quantum well and superlattice devices
[AD-A275443] p 3512 N94-28880
Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919
Spatial light modulators with arbitrary quantum wells profiles
[AD-A275023] p 3499 N94-29114
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035
Electronic structure of Zn-based quantum wells
[DE94-608104] p 3516 N94-30068
Photoelectronic study of GaAs epilayers and In(x)Ga(1-x)As/GaAs quantum wells
[ISBN-0-315-85756-0] p 3518 N94-30239
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835
QUARK MODELS
Search for excited quarks in p(bar p) collisions at the square root of s = 1.8 TeV
[DE94-004658] p 3484 N94-28573
Semileptonic heavy-to-light decays of baryons
[DE94-606481] p 3487 N94-29502
QUARK PARTON MODEL
Determination of the neutron spin-structure function
[DE94-005234] p 3483 N94-28542
QUARKS
Report of the subgroup on the top quark
[DE94-004624] p 3481 N94-28462
Discrete quark-lepton symmetry need not pose a cosmological domain wall problem
[DE94-601606] p 3481 N94-28471
Properties of W + jet events in proton-antiproton collisions at 1.8 TeV
[DE94-004002] p 3482 N94-28524
Research on elementary particle physics. Task P: Studies in theory and phenomenology of elementary physics
[DE94-004955] p 3483 N94-28566
Search for excited quarks in p(bar p) collisions at the square root of s = 1.8 TeV
[DE94-004658] p 3484 N94-28573
Masses and mixing of leptons and quarks (Dirac particles)
[DE94-606446] p 3484 N94-28611
Proceedings of the workshop on quark and lepton mass matrices
[DE94-707692] p 3485 N94-28624
The small-x behaviour of parton distribution functions
[DE94-606414] p 3485 N94-28758
One-loop QCD mass effects in the production of polarized bottom and top quarks
[PB94-136104] p 3487 N94-29145
Semileptonic heavy-to-light decays of baryons
[DE94-606481] p 3487 N94-29502
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Direct anti-b b production in anti-pp collisions at the square root of s = 1.8 TeV
[DE94-006167] p 3491 N94-30369
Operator analysis for quark and lepton masses in SO(10)
[DE94-005201] p 3491 N94-30709
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
Charmonium and bottomonium in (-p)p interactions
[DE94-006173] p 3493 N94-30886
QUASARS
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832
High redshift QSOs and the x ray background
[NASA-CR-195112] p 3540 N94-29957
Broad H alpha profiles of radio-loud active galactic nuclei and rapid profile variability in Seyfert and radio galaxies p 3552 N94-29989
QUENCHING (ATOMIC PHYSICS)
Quenching of the excited state of hydrated Europium(3) ions by electron transfer
[DE94-005553] p 3482 N94-28518
QUERY LANGUAGES
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28696
DTL: A deductive and typed object-oriented language
[MEMO-INF-93-41] p 3425 N94-30417
QUEUEING THEORY
M-interference queue analysis by decomposition method
[ISBN-0-315-85795-1] p 3453 N94-30139
Performance evaluation of intelligent network services
[MEMO-INF-93-20] p 3438 N94-30373
Customer creation and combination in queueing networks
[MEMO-INF-93-35] p 3438 N94-30375

R

RACKS (GEARS)
Metal band drives in spacecraft mechanisms p 3162 N94-29637
RADAR ANTENNAS
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Orbital debris radar instrumentation p 3248 N94-29626
Radar estimations of atmospheric winds in the troposphere and lower stratosphere p 3370 N94-29697
RADAR APPROACH CONTROL
Design of Center-TRACON Automation System p 3138 N94-29568
Development of precision runway monitor system for increasing capacity of parallel runway operations p 3142 N94-29587
RADAR ASTRONOMY
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613
RADAR CROSS SECTIONS
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
Comparison of RCS prediction techniques, computations and measurements
[PB94-125515] p 3256 N94-30392
The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498
Polarimetric backscatter measurements of natural surfaces at millimeter wavelengths p 3259 N94-30509
Radar cross sections of ground clutter at 95 GHz for summer and fall conditions p 3259 N94-30512
RADAR DETECTION
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions p 3253 N94-29882
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551
RADAR ECHOES
Long term variations of radio auroral activity p 3359 N94-29237
New-type echoes observed with the 50 MHz auroral Doppler radar at Showa Station p 3360 N94-29238
RADAR EQUIPMENT
Orbital debris radar instrumentation p 3248 N94-29626
RADAR IMAGERY
Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A275275] p 3377 N94-29436
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536
Pointing mechanisms for the Shuttle Radar Laboratory p 3162 N94-29638
Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
RADAR MEASUREMENT
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
New-type echoes observed with the 50 MHz auroral Doppler radar at Showa Station p 3360 N94-29238
Radar estimations of atmospheric winds in the troposphere and lower stratosphere p 3370 N94-29697
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
RADAR NAVIGATION
Ground independent landing system p 3137 N94-29564
ARC2000: Automatic radar control p 3141 N94-29583
RADAR NETWORKS
A novel near-range radar network for airport surface control p 3142 N94-29586
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
RADAR RANGE
Retarded distances and the Doppler effect
[DE94-606296] p 3523 N94-28618
Orbital debris radar instrumentation p 3248 N94-29626
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739
RADAR RECEIVERS
Synchronization in multistatic radar
[PB94-136975] p 3242 N94-28885
Ground independent landing system p 3137 N94-29564
RADAR SCATTERING
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions p 3253 N94-29882
RADAR SIGNATURES
Radar jet engine health monitoring project
[ASSGI-301] p 3153 N94-30130
RADAR TARGETS
RL/ERCT automated swept-angle bistatic measurement system
[AD-A275763] p 3241 N94-28763
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739
RADAR TRACKING
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
Numerical simulations of a mountain thunderstorm. A comparison with Doppler radar observations
[AD-A275296] p 3369 N94-28873
Synchronization, positioning, and communication in multistatic radar systems for air defence
[PB94-137478] p 3243 N94-28908
Simulation of fully automated air traffic control concepts p 3139 N94-29569
Orbital debris radar instrumentation p 3248 N94-29626
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
Systematic error estimation in multisensor fusion systems
[AD-B179298] p 3428 N94-30764
RADAR TRANSMISSION
Atmospheric Propagation Effects Through Natural and Man-Made Obscurants for Visible to MM-Wave Radiation
[AGARD-CP-542] p 3256 N94-30495

The influence of the evaporation duct on the angle of arrival and amplitude of the backscattered signal from targets low above the sea p 3256 N94-30498

RADAR TRANSMITTERS

Ground independent landing system p 3137 N94-29564

RADARSCOPES

Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface [AD-A275187] p 3399 N94-28861

RADIAL FLOW

Fluid dynamic noise in a centrifugal pump [AD-A275264] p 3477 N94-28904

Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991

RADIAL VELOCITY

Convective turbulence and transport in stars p 3546 N94-29913

Pushing the limit: Precision radial velocities, techniques, and applications p 3542 N94-30861

RADIANCE

CBSD: The celestial background scene descriptor [AD-A275521] p 3538 N94-28671

SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions [AD-A275207] p 3357 N94-28893

RADIANT COOLING

Numerical simulation of radiative heat loss in an experimental burner [DE94-002016] p 3277 N94-29923

Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K [DE94-004796] p 3520 N94-30724

RADIANT HEATING

Analysis of infrared radiation heating process considering chemical reaction of material to be heated [DE94-744116] p 3199 N94-30267

RADIATION ABSORPTION

TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration [DE94-004699] p 3504 N94-28575

RADIATION BELTS

Identification of an unexpected space radiation hazard [AD-A275170] p 3552 N94-29046

RADIATION COUNTERS

Elementary particle interactions [DE94-004238] p 3482 N94-28504

Adaption of the bubble detector for use as a LET spectrometer p 3291 N94-30216

A bipolar analog front-end integrated circuit for the SDC silicon tracker [DE94-005203] p 3267 N94-30711

Research in elementary particle physics [DE94-001657] p 3491 N94-30762

RADIATION DAMAGE

Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices [DE94-701164] p 3503 N94-28513

Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons [DE94-605337] p 3202 N94-28551

Electron beam irradiation experiments of monoblock divertor mock-up [DE94-707497] p 3503 N94-28555

Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants [DE94-005083] p 3517 N94-30201

Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites [DE94-006046] p 3508 N94-30365

Ion damage studies in GaAs/Al(0.6)Ga(0.4)As/GaAs heterostructures [DE94-005384] p 3521 N94-30894

RADIATION DETECTORS

Proton switches [AD-A275150] p 3167 N94-29022

Backscatter haze device for measurement of haze in aircraft transparencies [AD-A275127] p 3146 N94-29042

A Tevatron collider beauty factory [DE94-004879] p 3488 N94-29930

Deexcitation processes in nuclear reactions: The study of hot hadronic matter [DE94-003396] p 3492 N94-30836

RADIATION DISTRIBUTION

Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior [PB94-137809] p 3347 N94-29158

RADIATION DOSAGE

Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators [AD-A275235] p 3263 N94-29028

Recent results from testing fast ADCs [DE94-005565] p 3406 N94-30004

RADIATION EFFECTS

Relationship between swelling and irradiation creep in cold-worked PCA stainless steel irradiated to approximately 178 dpa at approximately 400 C [DE94-004368] p 3201 N94-28456

Radiation effects in beryllium used for plasma protection [DE94-004599] p 3201 N94-28460

Response of GaAs charge storage devices to transient ionizing radiation [DE94-005273] p 3510 N94-28484

Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices [DE94-701164] p 3503 N94-28513

Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons [DE94-605337] p 3202 N94-28551

Modeling the total dose radiation effects of Hg(1-x)Cd(x)Te photodiodes using numerical device simulators [AD-A275235] p 3263 N94-29028

Identification of an unexpected space radiation hazard [AD-A275170] p 3552 N94-29046

Charge trapping and breakdown in N2O oxides [DE94-003775] p 3266 N94-30040

Research laboratories annual report 1992 [DE94-608124] p 3555 N94-30168

Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants [DE94-005083] p 3517 N94-30201

Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen [DE94-608419] p 3209 N94-30253

Role of x ray-induced transcripts in adaptive responses following x rays [DE94-005412] p 3386 N94-30895

Development of radiation resistant electrical cable insulations [DE94-005189] p 3222 N94-30906

Investigations into ultraviolet matrix-assisted laser desorption [DE94-005265] p 3296 N94-30908

RADIATION HARDENING

Elementary particle interactions [DE94-004238] p 3482 N94-28504

Recent results from testing fast ADCs [DE94-005565] p 3406 N94-30004

Development of radiation resistant electrical cable insulations p 3223 N94-30480

Silica scintillating materials prepared by sol-gel methods [DE94-005123] p 3220 N94-30778

Development of radiation resistant electrical cable insulations [DE94-005189] p 3222 N94-30906

RADIATION HAZARDS

Identification of an unexpected space radiation hazard [AD-A275170] p 3552 N94-29046

Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior [PB94-137809] p 3347 N94-29158

RADIATION MEASUREMENT

The automated rotating shadowband spectroradiometer [DE94-001878] p 3269 N94-28464

Measurement basis of near fields in spherical coordinates in the 100 MHz to 6 GHz band [REPT-932-430-107] p 3255 N94-30153

Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit [NPL-RSA(EXT)-46] p 3492 N94-30795

Solar neutrino experiments: An update [DE94-006061] p 3551 N94-30884

RADIATION MEASURING INSTRUMENTS

Solar neutrino experiments: An update [DE94-006061] p 3551 N94-30884

RADIATION PRESSURE

Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832

RADIATION PROTECTION

Nuclear energy related research [DE94-606286] p 3494 N94-28623

Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701

RADIATION SOURCES

Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit [NPL-RSA(EXT)-46] p 3492 N94-30795

RADIATION SPECTRA

Remote pumping of solid state lasers with nuclear driven fluorescers [DE94-004846] p 3296 N94-30614

Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit [NPL-RSA(EXT)-46] p 3492 N94-30795

RADIATION THERAPY

Computer Assisted Medical Interventions: Application to Conformal Radiotherapy. [RR-912-I] p 3395 N94-30028

Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results p 3395 N94-30029

Pre- and intra-radiotherapy multimodal image registration: Principles and first experiments p 3395 N94-30030

RADIATION TOLERANCE

Studies on bacterial spore ultraviolet light resistance and regulation of the activity of a spore protease [AD-A275448] p 3384 N94-28884

Development of radiation resistant electrical cable insulations [DE94-005189] p 3222 N94-30906

RADIATION TRANSPORT

Performance of MCNP4A on seven computing platforms [DE93-040101] p 3419 N94-29816

Radiative flux calculations at UV and visible wavelengths [DE94-004278] p 3350 N94-30613

Modelling erosion damage from low-energy plasma gun simulations of disruptions [DE94-005196] p 3509 N94-30697

Radiation transport in cloudy and aerosol loaded atmospheres p 3366 N94-30805

RADIATIVE HEAT TRANSFER

Numerical simulation of radiative heat loss in an experimental burner [DE94-002016] p 3277 N94-29923

Measurements and predictions of the combustion characteristics of enclosed swirl-stabilized propane flames [IECE-CFE-TR-001] p 3198 N94-30017

Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K [DE94-004796] p 3520 N94-30724

RADIATIVE RECOMBINATION

The investigation of electron-ion radiative and dielectronic recombination in high-temperature plasmas [DE94-005150] p 3509 N94-30755

RADIATIVE TRANSFER

Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties [AD-A275321] p 3377 N94-28877

Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832

Radiative flux calculations at UV and visible wavelengths [DE94-004278] p 3350 N94-30613

Optical depth effects in cluster cooling flows p 3541 N94-30800

Tropospheric radiative forcing of O3 for the 1994 IPCC report [DE94-005698] p 3367 N94-30876

RADICALS

Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603

The radical amplifier p 3345 N94-28604

An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605

HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608

Direct measurement of the reactivity of NH and OH on a silicon nitride surface [DE94-005286] p 3199 N94-30260

RADIO ALTIMETERS

Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes [PB94-147550] p 3378 N94-30714

RADIO ANTENNAS

Active antennas, a review [PB94-137445] p 3243 N94-28907

Three-dimensional effects for radio frequency antenna modeling [DE94-006102] p 3255 N94-30105

RADIO ASTRONOMY

The Telecommunications and Data Acquisition Report [NASA-CR-195694] p 3246 N94-29613

Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623

A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821

A study of recycled pulsars in globular clusters p 3539 N94-29825

RADIO ATTENUATION
Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29897
RADIO COMMUNICATION
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
Optimizing the Galileo space communication link p 3250 N94-29663
Simulation of interference between Earth stations and Earth-orbiting satellites p 3252 N94-29673
RADIO EMISSION
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621
On observing neutron star oscillations p 3538 N94-29795
RADIO EQUIPMENT
1.8 gigahertz (GHz) digital Low Density Radio Communications Link (LDRCL) Operational Test and Evaluation (OT&E) integration and OT&E operational final test report
[AD-A275800] p 3241 N94-28771
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
RADIO FREQUENCIES
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses p 3188 N94-28682
Development of large area RF induction plasma for cost effective diamond
[AD-A275888] p 3504 N94-28776
RF vacuum microelectronics
[AD-A275221] p 3263 N94-28915
Preliminary analysis of Asynchronous Transfer Mode (ATM) over microwave channels
[AD-A275214] p 3243 N94-29069
Waves in space plasma dipole antenna subsystem p 3161 N94-29632
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
RF and microwave dielectric measurements upon layered materials using reflectometric coaxial sensor
[NPL-DES-125] p 3476 N94-30781
RADIO FREQUENCY HEATING
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
RADIO FREQUENCY INTERFERENCE
Simulation of interference between Earth stations and Earth-orbiting satellites p 3252 N94-29673
RADIO GALAXIES
The kinematics of molecular gas and dust in the nearby galaxies Centaurus A and M82 p 3544 N94-29738
Broad H alpha profiles of radio-loud active galactic nuclei and rapid profile variability in Seyfert and radio galaxies p 3552 N94-29989
RADIO NAVIGATION
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613
The Telecommunications and Data Acquisition Report
[NASA-CR-195689] p 3249 N94-29652
The use of low cost differential mode GPS receivers in unmanned vehicles p 3144 N94-30285
An Operational Control Segment (OCS) update on GPS constellation status and future program directions p 3144 N94-30643
RADIO PROBING
Theory and application of a Radio-Acoustic Sounding System (RASS) p 3367 N94-30869
RADIO RECEIVERS
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
Design and implementation of a hybrid digital phase-locked loop with a TMS320C25: An application to a transponder receiver breadboard p 3251 N94-29667
Effects of low sampling rate in the digital data-transition tracking loop p 3251 N94-29669
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-195768] p 3142 N94-30243
The use of low cost differential mode GPS receivers in unmanned vehicles p 3144 N94-30285
RADIO SIGNALS
Spurs in digital radio frequency memory and applications of DRFM
[AD-A275013] p 3243 N94-28897
Detection methods for stealth radio signals: A literature survey
[PB94-137452] p 3244 N94-29176
RADIO TELESCOPES
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670
RADIO TRACKING
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896
RADIO TRANSMISSION
Data transfer system using a multi-ID ARGOS transmitter for the Antarctic polar patrol balloon experiment p 3363 N94-29980
RADIO WAVES
Correlation analysis on optical and radio light curves for a large sample of active galactic nuclei p 3546 N94-29992
RADIOACTIVE DECAY
Report of the subgroup on the top quark
[DE94-004624] p 3481 N94-28462
Weak decays of charged K-mesons and charm particles
[PB94-138062] p 3486 N94-29143
Search for heavy neutrinos at the IHEP-JINR neutrino detector
[DE94-608175] p 3489 N94-30095
Measurement of the W mass in the D0 detector
[DE94-006002] p 3490 N94-30103
RADIOACTIVE ISOTOPES
Production rates of terrestrial in-situ-produced cosmogenic nuclides
[DE94-005156] p 3543 N94-28545
Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior
[PB94-137809] p 3347 N94-29158
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology
[DE94-002642] p 3497 N94-30825
The long-range transport of aerosol particles over the North Atlantic Ocean p 3366 N94-30867
RADIOACTIVE WASTES
Nuclear energy related research
[DE94-606286] p 3494 N94-28623
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464
Design reuse experience of space and hazardous operations robots
[AIAA PAPER 94-1220-CP] p 3445 N94-30568
RADIOACTIVITY
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
Complex source rate estimation for atmospheric transport and dispersion models
[DE94-000958] p 3354 N94-30822
RADIOCHEMISTRY
Research laboratories annual report 1992
[DE94-608124] p 3555 N94-30168
Recent results from SAGE
[DE94-006229] p 3551 N94-30845
RADIOGRAPHY
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454
Characteristics of secondary electron emission from CsI induced by x rays with energies up to 100 keV
[DE94-608422] p 3395 N94-30185
An inverse kinematics algorithm for the DREP/Philips real-time radiographic manipulator system p 3307 N94-30292
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461
RADIOMETERS
Observations by ERS-1 start p 3327 N94-28933
Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037
Observatory system of Earth Resources Satellite-1 p 3330 N94-29221
Application of JERS-1 data to geologic analyses p 3330 N94-29222
EOS project and ASTER (ITIR) p 3331 N94-29226
An absolute measurement of the cosmic background radiation temperature at 1.4 GHz p 3553 N94-30351
RADON
Brief summary of accomplishments since our DOE-sponsored radon project commenced
[DE94-004643] p 3348 N94-29926
The long-range transport of aerosol particles over the North Atlantic Ocean p 3366 N94-30867
RAIL TRANSPORTATION
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
RAILGUN ACCELERATORS
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
Microwave Michelson interferometer system report of first use on a railgun, Green Farm, San Diego, CA
[DE94-005294] p 3289 N94-30059
Design of an electromagnetic accelerator for turbulent hydrodynamic mix studies
[DE94-005821] p 3281 N94-30600
RAIN
Physical processes in snowpacks during rain or melt events
[AD-A275445] p 3325 N94-28881
On the relation between SMMR 37-GHz polarization difference and the rainfall over Africa and Australia
[NASA-TM-104598] p 3370 N94-29408
GCM studies of the influence of vegetation on the general circulation: The role of albedo in modulating climate change p 3348 N94-29749
Evaluation of dual polarization attenuation of millimeter frequencies through a meteorological radar p 3256 N94-30496
RAINDROPS
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
RAMAN SPECTROSCOPY
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
RAMJET ENGINES
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets p 3151 N94-29294
Research and development of ramjets/ramrockets. Part 2: Integral liquid fuel ramjets p 3152 N94-29297
Research and development of ramjets/ramrockets. Part 3: The study of gaseous hydrogen ram combustors p 3152 N94-29298
CIAM experimental turboramjets p 3152 N94-29299
Potential of the ramjet engine for hypersonic flight speeds p 3153 N94-30935
RAMPS (STRUCTURES)
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
RANDOM ACCESS
Dynamic microsets for RAMs
[RUU-CS-93-22] p 3406 N94-30727
RANDOM ACCESS MEMORY
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Multiple single event upsets in CMOS static rams p 3496 N94-30215
Using Cf-252 for single event upset testing p 3496 N94-30219
Charge collection spectroscopy applied to MOS RAM's p 3201 N94-30220
RANDOM ERRORS
A comparative study of clock rate and drift estimation p 3473 N94-30669
RANDOM NOISE
Testing for a signal with unknown location and scale in a stationary Gaussian random field
[AD-A275320] p 3464 N94-28876
RANDOM PROCESSES
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433

The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434

RANDOM SAMPLING
U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions
[AD-A275018] p 3464 N94-29129

RANDOM VARIABLES
U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions
[AD-A275018] p 3464 N94-29129

RANDOM VIBRATION
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206

RANDOM WALK
Accuracy metrics for judging time scale algorithms
p 3471 N94-30656

RANGEFINDING
Simulation of fully automated air traffic control concepts p 3139 N94-29569
Orbital debris radar instrumentation
p 3248 N94-29626
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739

RANKING
Evaluating the analytic hierarchy process and recommended modifications for its use in multi-attribute decision making
[AD-A275065] p 3527 N94-29153

RAPID QUENCHING (METALLURGY)
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447

RAPID TRANSIT SYSTEMS
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523

RARE EARTH COMPOUNDS
Normal state resistivity of MBa2Cu3O(7-x) ceramics
[DE94-608456] p 3220 N94-30745

RARE EARTH ELEMENTS
Preparation of monodispersed fine particles containing rare metals and rare earths p 3201 N94-29514

RARE GASES
Metal inert gas welding system for use in vacuum
[NASA-CASE-MFS-28808-1] p 3298 N94-29352
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380

RAREFIED GASES
Monte Carlo simulation or normal shock wave. Part 2: VHS model and VSS model p 3123 N94-28948
The maximum entropy approach applied to energy exchange, chemical reactions and ionisation in the direct simulation Monte Carlo method for rarefied hypersonic flows
[IC-AERO-93-01] p 3524 N94-29481

RATES (PER TIME)
Complex source rate estimation for atmospheric transport and dispersion models
[DE94-000958] p 3354 N94-30822

RATIONAL FUNCTIONS
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Trace formulas and dynamical zeta functions in the Nielsen theory
[PB94-138195] p 3467 N94-29163

RATIONS
Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429

RATS
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
Shortening velocity and calcium sensitivity of single fibers from hindlimb suspended muscle in rats
p 3387 N94-29866

RAY TRACING
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009
Optimizing ray tracing with visual coherence
[AD-A275218] p 3499 N94-29059

RAYLEIGH SCATTERING
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206

RDX
Chemical dynamics studies of reactions in energetic materials
[AD-A275607] p 3224 N94-28769
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308

REACTING FLOW
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
On approximate Riemann solvers: Improvement of HLLEM scheme and its generalization for chemically reacting flows p 3126 N94-28973
Advanced diagnostics for reacting flows
[AD-A275057] p 3272 N94-29136
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
An evaluation of explicit pseudo-steady-state approximation schemes for stiff ODE systems from chemical kinetics
[CWI-NM-R9312] p 3353 N94-30729

REACTION KINETICS
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Ozone production at a rural site in Georgia during the summer 1992 SOS campaign
[DE94-003989] p 3342 N94-28523
Ion-assisted tropospheric OH measurement technique
p 3344 N94-28601
Chemical dynamics studies of reactions in energetic materials
[AD-A275607] p 3224 N94-28769
High temperature resistant jet fuels
p 3192 N94-29260
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262
Application of semiclassical methods to reaction rate theory
[DE94-007041] p 3199 N94-30266
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials
[DE94-005072] p 3226 N94-30615
An evaluation of explicit pseudo-steady-state approximation schemes for stiff ODE systems from chemical kinetics
[CWI-NM-R9312] p 3353 N94-30729
Lattice gas simulations of replicating domains
[DE94-005008] p 3200 N94-30748
Theory for electron-transfer reactions involving two Marcus surfaces with a different force constant
[DE94-005925] p 3493 N94-30874
Reinterpretation of rate data for the reaction of ClF and F2
[DE94-005819] p 3200 N94-30880
Role of x ray-induced transcripts in adaptive responses following x rays
[DE94-005412] p 3386 N94-30895
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron
[DE94-005428] p 3221 N94-30896
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901

REACTION PRODUCTS
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203

REACTION TIME
Strategies to sustain and enhance performance in stressful environments
[AD-A275223] p 3398 N94-29027

REACTION WHEELS
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358
A gimbaled low noise momentum wheel
p 3162 N94-29640

REACTIVITY
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials
[DE94-005072] p 3226 N94-30615

REACTOR DESIGN
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588

REACTOR MATERIALS
Relationship between swelling and irradiation creep in cold-worked PCA stainless steel irradiated to approximately 178 dpa at approximately 400 C
[DE94-004368] p 3201 N94-28456
Radiation effects in beryllium used for plasma protection
[DE94-004599] p 3201 N94-28460
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons
[DE94-605337] p 3202 N94-28551
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites
[DE94-006046] p 3508 N94-30365
Development of radiation resistant electrical cable insulations p 3223 N94-30480
Modelling erosion damage from low-energy plasma gun simulations of disruptions
[DE94-005196] p 3509 N94-30697
Neutronics of a D-Li neutron source: An overview
[DE94-005372] p 3493 N94-30893

REACTOR SAFETY
Single specimen fracture toughness determination procedure using instrumented impact test
[PB94-132040] p 3316 N94-28402
Nuclear energy related research
[DE94-606286] p 3494 N94-28623
Risk measures in living probabilistic safety assessment
[VTT-PUBS-146] p 3465 N94-30154
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847

REACTOR TECHNOLOGY
Nuclear energy related research
[DE94-606286] p 3494 N94-28623
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology
[DE94-002642] p 3497 N94-30825

REAGENTS
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms
p 3502 N94-30462

REAL TIME OPERATION
Technology transition push. Part 1: A case study of rate monotonic analysis
[AD-A275616] p 3407 N94-28633
The bootstrapped algorithm: A fast algorithm for blind signal separation
[AD-A275759] p 3408 N94-28760
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
NPSNET: Integration of Distributed Interactive Simulation (DIS) protocol for communication architecture and information interchange
[AD-A275061] p 3530 N94-29139
A common Ada run-time system for avionics software
p 3150 N94-29331
Design of a thinwire real-time multiprocessor operating system p 3415 N94-29333
Validation and test of complex weapon systems
p 3150 N94-29336
GPS/GNSS for ATM p 3138 N94-29565
ACCS Surveillance Exploratory Prototype (ASEP)
p 3138 N94-29566
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
[PB94-141264] p 3533 N94-29921
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
Computational balance in real-time cyclic spectral analysis
[DE94-005091] p 3432 N94-30100

Common spaceborne multicomputer operating system and development environment
[NASA-TM-109092] p 3422 N94-30197
Sensing the gas metal arc welding process
p 3314 N94-30444
ARK: Autonomous mobile robot in an industrial environment
[AIAA PAPER 94-1177-CP] p 3439 N94-30529
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
[AIAA PAPER 94-1212-CP] p 3445 N94-30563
Predictive sufficiency and the use of stored internal state
[AIAA PAPER 94-1213-CP] p 3445 N94-30564
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time
p 3144 N94-30651
A real-time prediction of UTC p 3470 N94-30654
'Real time' and the NLR aerodynamic facilities
[AD-B173626] p 3158 N94-30856

REATTACHED FLOW
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
p 3130 N94-29674

RECEIVERS
Output statistics of the SALFAS FM normalizer Smoothing/Prediction function
[AD-A275758] p 3463 N94-28759
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880
An absolute measurement of the cosmic background radiation temperature at 1.4 GHz p 3553 N94-30351
Time and position accuracy using codeless GPS
p 3144 N94-30650
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time
p 3144 N94-30651

RECEPTORS (PHYSIOLOGY)
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829

RECESSES
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057

RECHARGING
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505

RECIRCULATIVE FLUID FLOW
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
p 3130 N94-29674

RECOMBINATION REACTIONS
Reinterpretation of rate data for the reaction of ClF and F2
[DE94-005819] p 3200 N94-30880

RECONNAISSANCE
The Pluto fast flyby mission: Completing the reconnaissance of the solar system
p 3235 N94-29768

RECORDING
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979

RECORDS MANAGEMENT
The evolution of information management
[DE94-004173] p 3535 N94-30179

RECRYSTALLIZATION
On the prediction of HAZ grain size using Monte Carlo simulation
[DE94-005465] p 3511 N94-28535
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys
[DE94-005013] p 3201 N94-28544

RECTANGLES
Rectilinear decompositions with low stabbing number
[RUU-CS-93-25] p 3459 N94-30425

RECTANGULAR PLATES
Further investigation of curve veering phenomena
p 3460 N94-30515

RECTANGULAR WINGS
An experimental study of wing tip vortex in the near wake of a rectangular wing
[AD-A275389] p 3129 N94-29306
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
p 3130 N94-29674

RECURSIVE FUNCTIONS
Categorial generalization of algebraic recursion theory
[ML-93-06] p 3456 N94-30382
Development and validation of a linear recursive order-N algorithm for the simulation of flexible space manipulators dynamics
[AD-B173557] p 3311 N94-30391
Higher order recursive program schemes are Turing incomplete
[CWI-CS-R9348] p 3425 N94-30414

RED GIANT STARS
Abundance patterns in red-giant CH stars
p 3539 N94-29820

RED SHIFT
High redshift QSOs and the x ray background
[NASA-CR-195112] p 3540 N94-29957
Broad H alpha profiles of radio-loud active galactic nuclei and rapid profile variability in Seyfert and radio galaxies
p 3552 N94-29989

REDUCED ORDER FILTERS
Enhanced orbit determination filter sensitivity analysis: Error budget development p 3159 N94-29655
Enhanced orbit determination filter: Inclusion of ground system errors as filter parameters p 3159 N94-29656

REDUCTION
Perpetual reductions and strong normalization in orthogonal term rewriting systems
[CWI-CS-R9345] p 3426 N94-30437

REDUNDANCY
Algorithms for treating redundancy in repairable and non-repairable systems
[DE94-005289] p 3315 N94-29020
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504

REDUNDANCY ENCODING
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Checkpoint-based forward recovery using lookahead execution and rollback validation in parallel and distributed systems
[NASA-CR-195760] p 3431 N94-29869

REDUNDANT COMPONENTS
Redundant disk arrays in transaction processing systems
[NASA-CR-195759] p 3418 N94-29404
An algorithm for the Italian atomic time scale
p 3473 N94-30668

REED-SOLOMON CODES
Optimizing the Galileo space communication link
p 3250 N94-29663
Decoder synchronization for deep space missions
p 3250 N94-29664

REFINING
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447

REFLECTANCE
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522

REFLECTED WAVES
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740

REFLECTION
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418

REFLECTOMETERS
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115
RF and microwave dielectric measurements upon layered materials using reflectometric coaxial sensor
[NPL-DES-125] p 3476 N94-30781

REFLECTOR ANTENNAS
Defocussing characteristics of the ACTS, T1-VSAT Earth terminal antennas
[NASA-TM-106420] p 3242 N94-28826
Beam scanning offset Cassegrain reflector antennas by subreflector movement
[NASA-CR-191604] p 3160 N94-28836
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542

REFLECTORS
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360
Optical Chopper Assembly for the Mars Observer
p 3162 N94-29639
Overview of shielding analyses for the MHTGR from 1986 to 1991
[DE94-002448] p 3495 N94-29924
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598

REFRACTION
Hybrid optics for space applications
[ESA-CP-1158] p 3501 N94-30418

REFRACTIVITY
High damage threshold anti-reflectors by physical vapor deposited amorphous fluoropolymer
[DE94-004865] p 3212 N94-28560
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335

REFRACTORY COATINGS
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073

REFRACTORY MATERIALS
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite
[NASA-CASE-LEW-15264-2] p 3180 N94-29508
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227

REFRIGERANTS
ARTI Refrigerant Database
[DE94-004906] p 3230 N94-28563
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator
p 3277 N94-29899
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977
Large heat pumps using CO2 refrigerant
[PB94-138773] p 3279 N94-29999
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-004905] p 3220 N94-30692

REFRIGERATING
ARTI Refrigerant Database
[DE94-004906] p 3230 N94-28563

REFRIGERATORS
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644

REFUELING
Development and testing of the Automated Fluid Interface System p 3161 N94-29636
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279

REGRESSION ANALYSIS
Least-squares determination of burst-point coordinates
[AD-A275423] p 3452 N94-28864
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
p 3375 N94-30863

REGRESSION COEFFICIENTS
Estimation of the net production of moss community at Langhovde, East Antarctica p 3358 N94-29081

REGULATIONS
Effects of repair on structural integrity
[AD-A275756] p 3145 N94-28647
Environmental Compliance Assessment System (ECAS) --- Japan supplement
[AD-A275549] p 3346 N94-28722
Environmental Compliance Assessment And Management System Program (ECAMP). US Air Force European Economic Community (EEC)
[AD-A275593] p 3346 N94-28727
Environmental Review Guide for Operations (ERGO)
[AD-A275611] p 3346 N94-28774
Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799
Evaluation of monitoring audiometry in the United States Air Force Hearing Conservation Program
[AD-A275309] p 3391 N94-29211
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution
p 3354 N94-30466

TCM exemptions to promote alternative-fuel vehicles: The good, the bad, and the ugly
[DE94-005924] p 3311 N94-30703
REGULATORS
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444
REGULATORY MECHANISMS (BIOLOGY)
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864
REINFORCING FIBERS
Innovative processing of composites for ultra-high temperature applications, book 1
[AD-A275597] p 3176 N94-28729
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite
[NASA-CASE-LEW-15264-2] p 3180 N94-29508
REINFORCING MATERIALS
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics
[NASA-CR-189338] p 3287 N94-29400
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
A review of mechanical test methods for ceramic matrix composites
[PB94-147576] p 3184 N94-30524
RELATIVISTIC EFFECTS
Apparent unambiguousness of relativistic time dilation
[DE94-606328] p 3522 N94-28586
On a direct experimental verification of the elongation formula
[DE94-606329] p 3523 N94-28721
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
RELATIVISTIC ELECTRON BEAMS
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
RELATIVISTIC PARTICLES
The effects of relativistic neutrons on nonthermal models of active galactic nuclei p 3547 N94-29993
On relativity principle violation in local measurements of spin precession of moving particles
[DE94-608067] p 3489 N94-30085
RELATIVISTIC PLASMAS
Large amplitude Langmuir and ion-acoustic waves in a relativistic two-fluid plasma
[NIFS-271] p 3506 N94-29547
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
RELATIVISTIC THEORY
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653
RELATIVITY
Apparent unambiguousness of relativistic time dilation
[DE94-606328] p 3522 N94-28586
Retarded distances and the Doppler effect
[DE94-606296] p 3523 N94-28618
On the importance of the Michelson-Morley experiment
[DE94-606298] p 3523 N94-28620
Three forms of relativity
[DE94-606338] p 3523 N94-28782
On dyonic black holes and cosmic censorship p 3546 N94-29912
On relativity principle violation in local measurements of spin precession of moving particles
[DE94-608067] p 3489 N94-30085
RELAXATION (MECHANICS)
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592
RELAXATION METHOD (MATHEMATICS)
Numerical analysis of two dimensional/axisymmetric non-equilibrium hypersonic flow p 3125 N94-28963
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
RELIABILITY
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928
RELIABILITY ANALYSIS
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3
[AD-A275390] p 3411 N94-29202
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) library access guide, revision 3
[AD-A275405] p 3411 N94-29207
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
TOTAL user manual
[NASA-TM-109101] p 3432 N94-30160
Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
Photovoltaic performance and reliability workshop
[DE94-000236] p 3339 N94-30601
RELIABILITY ENGINEERING
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Satellites: Reliability and operation security
[REPT-932-440-108] p 3168 N94-29419
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
RELIEF MAPS
The Image Digitizing System (IDS)
[AD-A275341] p 3329 N94-29213
REMOTE CONTROL
Remote control of transcranial Doppler (TCD) probe during centrifuge exposures up to 9 +Gz
[AD-A275253] p 3400 N94-29029
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
Simplified and symmetrical five-bar linkage driver for manipulating a six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-2] p 3301 N94-29556
Remote observatory access via the advanced communications technology satellite p 3253 N94-29894
Aspects of the operator interface for military robotic applications in unstructured environments p 3309 N94-30304
A multiplexed two-way solid communications link for teleoperated robots p 3310 N94-30310
Task automation in a successful industrial telerobot
[AIAA PAPER 94-1189-CP] p 3441 N94-30539
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
[AIAA PAPER 94-1209-CP] p 3444 N94-30560
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
[AIAA PAPER 94-1212-CP] p 3445 N94-30563
A multi-mode manipulator display system for controlling remote robotic systems
[AIAA PAPER 94-0888-CP] p 3446 N94-30569
REMOTE HANDLING
A multiplexed two-way solid communications link for teleoperated robots p 3310 N94-30310
Aiding the operator in the manual control of a space manipulator
[PB94-125549] p 3402 N94-30390
REMOTE MANIPULATOR SYSTEM
A multi-mode manipulator display system for controlling remote robotic systems
[AIAA PAPER 94-0888-CP] p 3446 N94-30569
REMOTE SENSING
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects p 3326 N94-28926
Synthetic aperture radar applications: Now and in the future p 3260 N94-28927
Research trends on remote sensing at research facilities in Japan: The priority area programme on better understanding of earth environment via satellite p 3326 N94-28928
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929
Image processing for hyperspectral data p 3326 N94-28930
JERS-1 data and information system for resources exploration p 3327 N94-28932
Observations by ERS-1 start p 3327 N94-28933
Sea ice and oceans applications of SAR p 3327 N94-28934
Amazonia: Remote sensing test site and survey p 3327 N94-28935
Utilization of remote sensing data in Southeast Asia p 3327 N94-28936
Remote sensing and global management p 3328 N94-28937
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037
Status and tendency of earth observation system p 3328 N94-29038
Perspectives of earth observing techniques: Expectation of earth observation in space development history p 3328 N94-29039
Oceanic survey utilizing satellites p 3328 N94-29040
Tohoku district observed by artificial satellites p 3328 N94-29041
Portable electronically based method for the nondestructive remote sensing of crevice corrosion
[AD-A275403] p 3318 N94-29057
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990 p 3358 N94-29083
Role of satellite observations of sea-surface temperature in the detection of global change
[PB94-138120] p 3329 N94-29107
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
Remote sensing and the Earth p 3329 N94-29218
A new information system: Satellite observation p 3330 N94-29219
Application of optical sensor data to resource survey p 3330 N94-29223
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
Earth-observation plan in Europe p 3331 N94-29227
Rock identification using thermal infrared data p 3331 N94-29228
JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems p 3331 N94-29229
Application of remote sensing in prevention of disasters p 3332 N94-29230
Future expectation of remote sensing technology p 3332 N94-29231

Japan's Earth observation satellite programs
p 3332 N94-29232
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
The extraction and representation of forest inventory information using continuous density surfaces
[ISBN-0-315-85658-0] p 3334 N94-30236
Cloud and aerosol characterization for the ARM central facility: Multiple remote sensor techniques development
[DE94-003523] p 3365 N94-30608
FAME: A Forest Assessment and Monitoring Environment scenario
[AD-B179106] p 3335 N94-30759
Multitemporal analysis of a braiding river: The advanced study of 1992
[NLR-TP-93100-U] p 3335 N94-30942

REMOTE SENSORS
Beam scanning offset Cassegrain reflector antennas by subreflector movement
[NASA-CR-191604] p 3160 N94-28836
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Conceptual radiometer design studies for Earth observations from low Earth orbit
[NASA-CR-4588] p 3329 N94-29098
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
Outline of JERS-1 system p 3330 N94-29220
Observatory system of Earth Resources Satellite-1
p 3330 N94-29221
Application of JERS-1 data to geologic analyses
p 3330 N94-29222
Rock identification using thermal infrared data
p 3331 N94-29228
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions
[PB94-142106] p 3136 N94-30890

REMOTELY PILOTED VEHICLES
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837
A non-linear simulation for an autonomous unmanned air vehicle
[AD-A275062] p 3146 N94-29200
Navigation of military and space unmanned ground vehicles in unstructured terrains p 3144 N94-30282
A generic semi-autonomous ground vehicle control system p 3306 N94-30283
The use of low cost differential mode GPS receivers in unmanned vehicles p 3144 N94-30285
HATT-X: A high performance flying laboratory for autonomous unmanned aircraft research and development p 3149 N94-30293

RENDEZVOUS SPACECRAFT
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
p 3142 N94-29837

RENORMALIZATION GROUP METHODS
Study of modeling of turbulence of renormalization group analysis p 3126 N94-28970

REPLACING
Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings
[AD-A275640] p 3212 N94-28641
Technology transfer initiatives
[NASA-CR-195151] p 3537 N94-29410

REPRODUCTION (BIOLOGY)
Reproduction in the Japanese anchovy (Engraulis japonica) as related to population fluctuation
p 3235 N94-29708

REPRODUCTION (COPYING)
Fundamentals of printing technology
[PB94-132602] p 3530 N94-29141

REQUIREMENTS
Development of electromagnetic compatibility tests
[REPT-932-430-110] p 3245 N94-29421

RESCUE OPERATIONS
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report
p 3381 N94-28435

RESEARCH
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102
Basic research in computer science
[AD-A275184] p 3405 N94-29181
Activities report of the International Meteorological Institute
[ETN-94-95524] p 3370 N94-29423
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
Activities of the wintering party at Syowa Station by the 32nd Japanese Antarctic Research Expedition in 1991
p 3364 N94-29986

RESEARCH AIRCRAFT
The radiocarbon hydroxyl technique
p 3344 N94-28600
Design and construction of the Aerobot Robotic Manipulator (ARM)
[AD-A275362] p 3298 N94-28894
HATT-X: A high performance flying laboratory for autonomous unmanned aircraft research and development p 3149 N94-30293

RESEARCH AND DEVELOPMENT
Glass-ceramic matrix composites
[REPT-932-430-112] p 3179 N94-29413
Journal of NIRE, vol. 2, no. 3
[JTN-94-80553] p 3553 N94-29512
Activity report of Synchrotron Radiation Laboratory 1992
[JTN-94-80600] p 3495 N94-29596
Proceedings: SISAL 1993
[DE94-006641] p 3420 N94-30056
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 23: The communications practices of US aerospace engineering faculty and students: Results of the phase 3 survey
[NASA-TM-109085] p 3534 N94-30149
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 22: US academic librarians and technical information specialists as information intermediaries: Results of the phase 3 survey
[NASA-TM-109067] p 3534 N94-30150
Proceedings of the 3rd Conference on Military Robotic Applications
[DRES-SP-149] p 3304 N94-30275
Intelligent robotics can boost America's economic growth
[AIAA PAPER 94-1301-CP] p 3439 N94-30527
Geothermal direct-heat utilization assistance
[DE94-005831] p 3340 N94-30700
Photonics at Sandia National Laboratories: From research to applications
[DE94-006463] p 3501 N94-30828

RESEARCH FACILITIES
Physics at HERA
[DE94-005117] p 3483 N94-28569
Antarctic Record, volume 36, no. 1
[REPT-106-VOL-36-NO-1] p 3357 N94-29078
Fishermans Bend: A centre of Australian aviation
[AD-A274981] p 3121 N94-29090
Joint research activities with CCMRI (China)
p 3240 N94-29521
Portable Linear Sled (PLS) for biomedical research
p 3163 N94-29648
Research and technology, 1992
[NASA-TM-103996] p 3555 N94-29891
Energy and Technology Review
[DE94-004472] p 3338 N94-29955
On the (mu)SR activity at LNP JINR phasotron
[DE94-608385] p 3517 N94-30195
Microgravity fluid science research in Europe
[AD-B179178] p 3229 N94-30409

RESEARCH MANAGEMENT
Spin-off companies as agents of technology transfer: An empirical study of the spin-off companies of the Technical Research Centre of Finland
[PB94-132248] p 3537 N94-28405
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Basic research in computer science
[AD-A275222] p 3405 N94-28916

RESEARCH PROJECTS
Advanced gas turbine systems research
[DE94-005303] p 3297 N94-28485
US/Japan cooperation in high energy physics
[DE94-005376] p 3494 N94-28486
Summaries of FY 1993 geosciences research
[DE94-004710] p 3355 N94-28558
Relativistic heavy ion research
[DE94-004701] p 3484 N94-28576
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
The Norwegian seismic array (NORSAR), phase 3
[AD-A275440] p 3356 N94-28868
Annual report and summaries of FY 1993 activities: Division of Energy Biosciences
[DE94-001723] p 3386 N94-30607
Crystalline-silicon solar cell development sponsored by the US Department of Energy
[DE94-003783] p 3340 N94-30609

RESERVOIRS
Fiscal 1990 geothermal development promotion survey
[DE94-732333] p 3337 N94-28628

RESIDUAL STRENGTH
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657

RESIDUAL STRESS
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Multiple Concentric Cylinder Model (MCCM) user's guide
[NASA-CR-195299] p 3183 N94-30125

RESIN MATRIX COMPOSITES
Polymer infiltration studies
[NASA-CR-195729] p 3213 N94-28748
On the dynamic mechanical behavior of 3-D integrated fabric reinforced composites
[AD-A275424] p 3177 N94-28865

RESINS
Chemically modified polymeric resins for separation of cations, organic acids, and small polar molecules by high performance liquid chromatography
[DE94-005548] p 3211 N94-28516
Electroset Technology: On the forefront of manufacturing
[AD-A275166] p 3263 N94-29045

RESOLUTION
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739

RESOLVERS
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372

RESONANCE
A measurement of the tau polarization at the resonance with the DELPHI detector at LEP
[DE94-005557] p 3482 N94-28520
Overlap of metal clusters and nuclear structure physics
[DE94-608387] p 3517 N94-30183
Multiple weather regimes and baroclinically forced spherical resonance
[DM-65] p 3376 N94-30966

RESONANCE FLUORESCENCE
Activity report of Synchrotron Radiation Laboratory 1992
[JTN-94-80600] p 3495 N94-29596

RESONANCE LINES
The investigation of electron-ion radiative and dielectronic recombination in high-temperature plasmas
[DE94-005150] p 3509 N94-30755

RESONANT FREQUENCIES
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809

RESONANT TUNNELING
Strong overlap and transmission in triple barrier resonant structures
[DE94-608103] p 3516 N94-30067

RESOURCES MANAGEMENT
On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel
p 3188 N94-28683
Remote sensing and global management
p 3328 N94-28937
Remote sensing and the Earth p 3329 N94-29218
Future expectation of remote sensing technology
p 3332 N94-29231
Research report on the potential of ocean development suitable for area characteristics
[JTN-94-80587] p 3377 N94-29595

RESPIRATORS
Portable ventilatory resuscitation systems
[AD-A274984] p 3401 N94-29093

RESPIRATORY RATE
Estimation of the net production of moss community at Langhovde, East Antarctica p 3358 N94-29081

RESPIRATORY SYSTEM
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150

RESTORATION
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824

RESUSCITATION
Portable ventilatory resuscitation systems
[AD-A274984] p 3401 N94-29093
RETENTION (PSYCHOLOGY)
Key cognitive issues in the design of electronic displays of instrument approach procedure charts
[AD-A275647] p 3399 N94-28649
RETINA
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
RETINAL IMAGES
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
RETROREFLECTION
Transient internal probe
[AD-A275054] p 3505 N94-29134
New perspectives for high accuracy SLR with second generation geodesic satellites
[REPT-932-440-105] p 3336 N94-30965
REVERSE ENGINEERING
The UNICON approach to through-life support and evolution of software-intensive systems
p 3416 N94-29340
REVERSE FIELD PINCH
Theoretical reversed field pinch and tokamak studies
[DE94-005409] p 3503 N94-28490
Fluctuation and transport reduction in a reversed field pinch by inductive poloidal current drive
[DE94-005542] p 3503 N94-28514
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
REVERSING
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
REYNOLDS NUMBER
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849
A modernised HST of NLR
[AD-B179220] p 3158 N94-30423
REYNOLDS STRESS
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450
RHENIUM
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097
RHEOLOGY
Lubricant rheology at high shear rates
p 3217 N94-29967
The role of sea ice dynamics in global climate change
p 3350 N94-30620
RHEOMETERS
Lubricant rheology at high shear rates
p 3217 N94-29967
RIBBONS
Non-rectangular towpreg architectures
[NASA-CASE-LAR-14863-1-CU] p 3180 N94-29485
RIBONUCLEIC ACIDS
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156
RIGID ROTOR HELICOPTERS
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code
p 3124 N94-28958
RIGID STRUCTURES
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Determination of acceleration field parameters with linear accelerometers
[PB94-125606] p 3290 N94-30742
RING GALAXIES
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
Stellar and gas dynamics of interacting ring galaxies
p 3548 N94-30340
RINGS (MATHEMATICS)
Remarks on Galois symmetry in RCFT
[PB94-138179] p 3467 N94-29147
Hierarchical structures and asymmetric stochastic processes on p-adics and adeles
[PB94-138203] p 3464 N94-29178
RIOMETERS
Initial observation results with imaging riometer at NY-Alesund (L is equal to 16) p 3360 N94-29239
RISK
Risk-based prioritization: A comparison of approaches
[DE94-003368] p 3526 N94-28474
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
Risk measures in living probabilistic safety assessment
[VTT-PUBS-146] p 3465 N94-30154
Fuzzy-algebra uncertainty analysis for abnormal-environment safety assessment
[DE94-006257] p 3462 N94-30849
RIVERS
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286
Dewatering of contaminated river sediments
p 3354 N94-30472
Multitemporal analysis of a braiding river: The advanced study of 1992
[NLR-TP-93100-U] p 3335 N94-30942
RIVETS
Full-scale testing and analysis of curved aircraft fuselage panels
[AD-A275666] p 3145 N94-28657
ROADS
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
ROBOT ARMS
Design and construction of the Aerobot Robotic Manipulator (ARM)
[AD-A275362] p 3298 N94-28894
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
Feedback control of a three-link planar under-actuated manipulator using a surge velocity
[AD-A275159] p 3435 N94-29044
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
Simplified and symmetrical five-bar linkage driver for manipulating a six-degree-of-freedom parallel minimanipulator with three inextensible limbs
[NASA-CASE-GSC-13485-2] p 3301 N94-29556
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands
p 3301 N94-29847
Three methods to improve the accuracy of a PUMA 560 robot p 3307 N94-30290
Aiding the operator in the manual control of a space manipulator
[PB94-125549] p 3402 N94-30390
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety
p 3314 N94-30442
ODYSSEUS autonomous walking robot: The leg/arm design
[AIAA PAPER 94-1180-CP] p 3439 N94-30531
A highly redundant robot system for inspection
[AIAA PAPER 94-1194-CP] p 3442 N94-30545
An intelligent robotic aid system for human services
[AIAA PAPER 94-1232-CP] p 3447 N94-30580
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793
Robust adaptive control of a mechanical manipulator
p 3449 N94-30806
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
Kinematics and force analysis of a robot hand based on an artificial biological control scheme
p 3313 N94-30957
ROBOT CONTROL
The state transition diagram with path priority and it's applications
[AD-A275524] p 3434 N94-28672
Experimental evaluation of fuzzy logic control of a flexible arm manipulator
[AD-A275375] p 3434 N94-29013
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480
Robotic hand-eye motor learning
p 3436 N94-29835
Collision avoidance and control of multiple revolute manipulators p 3302 N94-29884
A study of the flexible space platform based deployable manipulator
[ISBN-0-315-85410-3] p 3303 N94-30135
DREV activities related to military vehicles robotization
p 3305 N94-30278
The NRC mobile robot project p 3305 N94-30280
A generic semi-autonomous ground vehicle control system p 3306 N94-30283
An optimal obstacle avoidance path planning algorithm for the Excalibur robot p 3306 N94-30287
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
Coordinated control of multiple robot manipulators
p 3306 N94-30289
An inverse kinematics algorithm for the DREP/Philips real-time radiographic manipulator system
p 3307 N94-30292
Simulation of lightweight robots and their controllers
p 3307 N94-30294
Elements of supervisory control for military robotic applications p 3309 N94-30303
Supervised autonomous control for Space Station Special Purpose Dextrous Manipulator (SPDM) robot
p 3309 N94-30305
A testbed for the development of ground-based control of space-based manipulators p 3309 N94-30306
Achieving robot autonomy p 3310 N94-30307
Improving the execution speed of robot control computations: An allocation scheme for heterogeneous multiprocessors p 3310 N94-30308
Motion control of mobile robots p 3310 N94-30309
Control system design for A and R supported microgravity experiments: An experiment payload control development
[AD-B179107] p 3229 N94-30421
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety
p 3314 N94-30442
Programmable Automated Welding System (PAWS): Control of welding through software and hardware
p 3314 N94-30443
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
ARK: Autonomous mobile robot in an industrial environment
[AIAA PAPER 94-1177-CP] p 3439 N94-30529
Integration of vision and robotic workcell
[AIAA PAPER 94-1186-CP] p 3440 N94-30536
Meeting the challenges of installing a mobile robotic system
[AIAA PAPER 94-1187-CP] p 3440 N94-30537
Controlling multiple security robots in a warehouse environment
[AIAA PAPER 94-1300-CP] p 3441 N94-30540
A Space Station robot walker and its shared control software
[AIAA PAPER 94-1192-CP] p 3442 N94-30543
Perception system and functions for autonomous navigation in a natural environment
[AIAA PAPER 94-1201-CP] p 3443 N94-30552
A streamlined software environment for situated skills
[AIAA PAPER 94-1205-CP] p 3444 N94-30556
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
[AIAA PAPER 94-1209-CP] p 3444 N94-30560
Task-level control for autonomous robots
[AIAA PAPER 94-1210-CP] p 3444 N94-30561
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
[AIAA PAPER 94-1212-CP] p 3445 N94-30563
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565
A reactive system for open terrain navigation: Performance and limitations
[AIAA PAPER 94-1218-CP] p 3445 N94-30566
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Piecewise linear paths among convex obstacles
[RUU-CS-93-20] p 3460 N94-30721
Robust adaptive control of a mechanical manipulator
p 3449 N94-30806
ELF: Learning incomplete fuzzy rule sets for an autonomous robot
[REPT-93-043] p 3449 N94-30923
Kinematics and force analysis of a robot hand based on an artificial biological control scheme
p 3313 N94-30957

Iterative removal of boundary minima of harmonic potential function for mobile robot navigation
[REPT-93-059] p 3449 N94-30962
Robust control of robots via linear estimated state-feedback
[MEMO-1153] p 3449 N94-30963

ROBOT DYNAMICS
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands
p 3301 N94-29847
Motion control of mobile robots p 3310 N94-30309
Development and validation of a linear recursive order-N algorithm for the simulation of flexible space manipulators dynamics
[AD-B173557] p 3311 N94-30391
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
Biologically-inspired hexapod robot design and simulation
[AIAA PAPER 94-1178-CP] p 3439 N94-30530
ODYSSEUS autonomous walking robot: The leg/arm design
[AIAA PAPER 94-1180-CP] p 3439 N94-30531
Free-floating dual-arm robots for space assembly
[AIAA PAPER 94-1195-CP] p 3442 N94-30546
Aspects of vision and planning in a dynamic, uncertain environment p 3448 N94-30803
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
Kinematics and force analysis of a robot hand based on an artificial biological control scheme
p 3313 N94-30957

ROBOT SENSORS
DREV activities related to military vehicles robotization
p 3305 N94-30278
The NRC mobile robot project p 3305 N94-30280
Thermal imaging for a mobile robot
p 3308 N94-30300
Sonar sensing and obstable detection
p 3309 N94-30301
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
TRC research products: Components for service robots
[AIAA PAPER 94-1227-CP] p 3447 N94-30576

ROBOTICS
Design and construction of the Aerobot Robotic Manipulator (ARM)
[AD-A275362] p 3298 N94-28894
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Kinematic representations, workspace analysis, and grasp stability in robot arms and multi-fingered hands
p 3301 N94-29847
Collision avoidance and control of multiple revolute manipulators p 3302 N94-29884
Robotics and the battlefield of the future
p 3304 N94-30277
DREV activities related to military vehicles robotization
p 3305 N94-30278
A generic semi-autonomous ground vehicle control system p 3306 N94-30283
An inverse kinematics algorithm for the DREP/Philips real-time radiographic manipulator system
p 3307 N94-30292
Sonar sensing and obstable detection
p 3309 N94-30301
Shape from diameter: Negative results
[RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results
[RUU-CS-93-17] p 3458 N94-30408
Control system design for A and R supported microgravity experiments: An experiment payload control development
[AD-B179107] p 3229 N94-30421
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety
p 3314 N94-30442
Programmable Automated Welding System (PAWS): Control of welding through software and hardware
p 3314 N94-30443
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
Intelligent robotics can boost America's economic growth
[AIAA PAPER 94-1301-CP] p 3439 N94-30527
Teleoperated systems for nuclear reactors: Inspection and maintenance
[AIAA PAPER 94-1176-CP] p 3439 N94-30528
A highly redundant robot system for inspection
[AIAA PAPER 94-1194-CP] p 3442 N94-30545
Microwave vision for robots
[AIAA PAPER 94-0887-CP] p 3443 N94-30550
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
The real-world navigator
[AIAA PAPER 94-1204-CP] p 3443 N94-30555
Autonomous mobile robot teams
[AIAA PAPER 94-1207-CP] p 3444 N94-30558
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
Design reuse experience of space and hazardous operations robots
[AIAA PAPER 94-1220-CP] p 3445 N94-30568
A multi-mode manipulator display system for controlling remote robotic systems
[AIAA PAPER 94-0888-CP] p 3446 N94-30569
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
Automation for nondestructive inspection of aircraft
[AIAA PAPER 94-1223-CP] p 3446 N94-30572
The Automated Aircraft Rework System (AARS): A system integration approach
[AIAA PAPER 94-1225-CP] p 3446 N94-30574
A robotic wheelchair
[AIAA PAPER 94-1229-CP] p 3447 N94-30578
An intelligent robotic aid system for human services
[AIAA PAPER 94-1232-CP] p 3447 N94-30580
On-orbit spacecraft servicing: An element in the evolution of space robotics applications
[AIAA PAPER 94-1236-CP] p 3448 N94-30583
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
Kinematics and force analysis of a robot hand based on an artificial biological control scheme
p 3313 N94-30957

ROBOTS
Feedback control of a three-link planar under-actuated manipulator using a surge velocity
[AD-A275159] p 3435 N94-29044
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
Robotic hand-eye motor learning
p 3436 N94-29835
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896
Proceedings of the 3rd Conference on Military Robotic Applications
[DRES-SP-149] p 3304 N94-30275
Autonomous intelligent military robots: Army ants, killer bees, and cybernetic soldiers p 3304 N94-30276
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279
The NRC mobile robot project p 3305 N94-30280
An optimal obstacle avoidance path planning algorithm for the Excalibur robot p 3306 N94-30287
Maestro: An open system architecture for multi-robot control p 3306 N94-30288
Coordinated control of multiple robot manipulators
p 3306 N94-30289
Three methods to improve the accuracy of a PUMA 560 robot p 3307 N94-30290
Force control techniques for robot manipulators and their military applications p 3307 N94-30291
Simulation of lightweight robots and their controllers
p 3307 N94-30294
Thermal imaging for a mobile robot
p 3308 N94-30300
Aspects of the operator interface for military robotic applications in unstructured environments
p 3309 N94-30304
Achieving robot autonomy p 3310 N94-30307
Improving the execution speed of robot control computations: An allocation scheme for heterogeneous multiprocessors p 3310 N94-30308
Motion control of mobile robots p 3310 N94-30309
Electrochemical Power Source (EPS) selection for Energetically Independent Robots (EIR): A systematic approach p 3269 N94-30312
Conference on Intelligent Robotics in Field, Factory, Service, and Space (CIRFFSS 1994), volume 1
[NASA-CP-3251] p 3439 N94-30526
ARK: Autonomous mobile robot in an industrial environment
[AIAA PAPER 94-1177-CP] p 3439 N94-30529
Biologically-inspired hexapod robot design and simulation
[AIAA PAPER 94-1178-CP] p 3439 N94-30530
ODYSSEUS autonomous walking robot: The leg/arm design
[AIAA PAPER 94-1180-CP] p 3439 N94-30531
VAS: A Vision Advisor System combining agents and object-oriented databases
[AIAA PAPER 94-1181-CP] p 3440 N94-30532
Application of the Modular Automated Reconfigurable Assembly System (MARAS) concept to adaptable vision gauging and parts feeding
[AIAA PAPER 94-1182-CP] p 3440 N94-30533
Confessions of a robot lobotomist
[AIAA PAPER 94-1185-CP] p 3440 N94-30535
Integration of vision and robotic workcell
[AIAA PAPER 94-1186-CP] p 3440 N94-30536
Meeting the challenges of installing a mobile robotic system
[AIAA PAPER 94-1187-CP] p 3440 N94-30537
Design of an autonomous exterior security robot
[AIAA PAPER 94-1188-CP] p 3441 N94-30538
Task automation in a successful industrial telerobot
[AIAA PAPER 94-1189-CP] p 3441 N94-30539
Free-floating dual-arm robots for space assembly
[AIAA PAPER 94-1195-CP] p 3442 N94-30546
Vision based object pose estimation for mobile robots
[AIAA PAPER 94-1197-CP] p 3442 N94-30548
Microwave vision for robots
[AIAA PAPER 94-0887-CP] p 3443 N94-30550
Perception system and functions for autonomous navigation in a natural environment
[AIAA PAPER 94-1201-CP] p 3443 N94-30552
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
The real-world navigator
[AIAA PAPER 94-1204-CP] p 3443 N94-30555
A streamlined software environment for situated skills
[AIAA PAPER 94-1205-CP] p 3444 N94-30556
Situational reaction and planning
[AIAA PAPER 94-1206-CP] p 3444 N94-30557
Autonomous mobile robot teams
[AIAA PAPER 94-1207-CP] p 3444 N94-30558
Building brains for bodies
[AIAA PAPER 94-1208-CP] p 3444 N94-30559
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
[AIAA PAPER 94-1209-CP] p 3444 N94-30560
Task-level control for autonomous robots
[AIAA PAPER 94-1210-CP] p 3444 N94-30561
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565
The road plan model: Information model for planning road building activities
[AIAA PAPER 94-1219-CP] p 3445 N94-30567
Design reuse experience of space and hazardous operations robots
[AIAA PAPER 94-1220-CP] p 3445 N94-30568
Automation for nondestructive inspection of aircraft
[AIAA PAPER 94-1223-CP] p 3446 N94-30572
Graphical simulation for aerospace manufacturing
[AIAA PAPER 94-1224-CP] p 3446 N94-30573
TRC research products: Components for service robots
[AIAA PAPER 94-1227-CP] p 3447 N94-30576
An update on Lab Rover: A hospital material transporter
[AIAA PAPER 94-1228-CP] p 3447 N94-30577
An intelligent robot for helping astronauts
[AIAA PAPER 94-1233-CP] p 3447 N94-30581
On-orbit spacecraft servicing: An element in the evolution of space robotics applications
[AIAA PAPER 94-1236-CP] p 3448 N94-30583
Aspects of vision and planning in a dynamic, uncertain environment p 3448 N94-30803
ELF: Learning incomplete fuzzy rule sets for an autonomous robot
[REPT-93-043] p 3449 N94-30923
Iterative removal of boundary minima of harmonic potential function for mobile robot navigation
[REPT-93-059] p 3449 N94-30962

ROBUSTNESS (MATHEMATICS)
Track filtering by robust neural network
[DE94-606067] p 3434 N94-28613
A design methodology for synthesizing low-order robust controllers for flexible structures p 3302 N94-29870
Robust adaptive control and filtering
p 3437 N94-29895
Robust adaptive control of a mechanical manipulator
p 3449 N94-30806

ROCK INTRUSIONS
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940
ROCKET ENGINES
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
Method of reducing hydraulic instability
[NASA-CASE-LEW-15463-1] p 3273 N94-29539
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848
ROCKET EXHAUST
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
ROCKET SOUNDING
Time series comparisons of satellite and rocketsonde temperatures in 1978-1979
[NASA-TP-3409] p 3370 N94-29455
A sounding rocket program in extreme and far ultraviolet interferometry
[NASA-CR-195114] p 3289 N94-29907
ROCKS
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
ROOFS
Rooftop emergency heliports
[DOT/FAA/RD-93/2] p 3157 N94-29754
ROOM TEMPERATURE
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505
ROOT-MEAN-SQUARE ERRORS
Error growth in poor ECMWF forecasts over the contiguous United States
[AD-A275297] p 3369 N94-29183
ROSAT MISSION
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
ROTARY GYROSCOPES
Emerging technologies in microguidance and control p 3144 N94-29788
ROTARY STABILITY
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809
ROTARY WING AIRCRAFT
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787
ROTARY WINGS
Boundary layers induced by three-dimensional vortex loops
[AD-A275678] p 3270 N94-28665
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall
[AD-A275416] p 3129 N94-29197
Helicopter mission and rotor performance optimization with quasi-linear inflow theory p 3147 N94-29594
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274
Nonlinear multibody formulation for rotorcraft analysis p 3149 N94-30787
ROTATING BODIES
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984
ROTATING DISKS
Local heat transfer in an enclosed corotating disk with axial throughflow p 3276 N94-29849
ROTATING FLUIDS
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Acoustic and optical investigations of superfluid (3)He
[PB94-135415] p 3477 N94-29186
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
ROTATING SHAFTS
Rotary actuator
[NASA-CASE-MFS-28581-1] p 3205 N94-29447
ROTATION
Spin-up in a rectangular cylinder
[AD-A275465] p 3271 N94-28738
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
Mutual similarity of developing laminar flows with secondary streams in ducts: Curved pipe flow and orthogonal rotating pipe flow p 3129 N94-28989
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358
Dynamic modeling of multibody flexible structures p 3323 N94-30813
ROTOR AERODYNAMICS
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code p 3124 N94-28958
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
International collaborative research in wind turbine rotor aerodynamics
[DE94-000244] p 3339 N94-30602
ROTOR BLADES
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
ROTOR BLADES (TURBOMACHINERY)
Fluid dynamic noise in a centrifugal pump
[AD-A275264] p 3477 N94-28904
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
Tuned mass damper for integrally bladed turbine rotor
[NASA-CASE-MFS-28697-1] p 3298 N94-29353
ROTOR BODY INTERACTIONS
An analytical study of unsteady rotor/fuselage interaction in hover and forward flight p 3131 N94-29826
ROTOR DYNAMICS
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings p 3311 N94-30792
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809
ROTOR LIFT
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957
ROTORS
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740
Theoretical prediction of the influence coefficients on damped simple flexible rotors using the transfer matrix method
[IMR-TM-TR-002] p 3321 N94-30018
Use of magnetic compression to support turbine engine rotors p 3314 N94-30484
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809
ROVING VEHICLES
Mars rover mechanisms designed for Rocky 4 p 3161 N94-29630
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780
Navigation of military and space unmanned ground vehicles in unstructured terrains p 3144 N94-30282
RUBBER
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984
Novel techniques applied to polymer lifetime predictions
[DE94-005095] p 3218 N94-30102
RUBIDIUM
Time and frequency technology at NIST p 3468 N94-30641
RUBY
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
RULES
ELF: Learning incomplete fuzzy rule sets for an autonomous robot
[REPT-93-043] p 3449 N94-30923
RUNGE-KUTTA METHOD
Formulas of the Runge-Kutta-Nystroem type
[ISBN-0-315-85774-9] p 3454 N94-30241
Parallel iteration across the steps of high order Runge-Kutta methods for nonstiff initial value problems
[CWI-NM-R9313] p 3433 N94-30730
Eigenvalue analysis of the convergence behaviour of an Euler method
[PB94-1255722-U] p 3281 N94-30743
RUNWAYS
Contributions of DLR to air traffic capacity enhancement within a terminal area p 3138 N94-29567
RURAL AREAS
Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631
RUSSIAN FEDERATION
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Russian national time scale long-term stability p 3475 N94-30679

S

S WAVES
Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137
SABOT PROJECTILES
Transient internal probe
[AD-A275054] p 3505 N94-29134
SAFETY
Safety enhancement of composites via periodic proof testing
[AD-A275662] p 3176 N94-28655
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution p 3354 N94-30466
Fuzzy-algebra uncertainty analysis for abnormal-environment safety assessment
[DE94-006257] p 3462 N94-30849
SAFETY DEVICES
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159
The use of interactive computer vision and robot hand controllers for enhancing manufacturing safety p 3314 N94-30442
SAFETY FACTORS
Systematic safety consideration in product design
[PB94-132354] p 3229 N94-28410
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
SAFETY MANAGEMENT
Evaluation of monitoring audiometry in the United States Air Force Hearing Conservation Program
[AD-A275309] p 3391 N94-29211
Joint research activities with CCMRI (China) p 3240 N94-29521
Risk measures in living probabilistic safety assessment
[VTT-PUBS-146] p 3465 N94-30154
SALINITY
Cryosphere and climate p 3352 N94-30632
SAMARIUM
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma p 3211 N94-29516
SAMARIUM COMPOUNDS
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma p 3211 N94-29516
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848
SAMPLING
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627
Acceptance sampling methods for sample results verification
[DE94-002882] p 3465 N94-29925
Sampling behaviour in a four instrument monitoring task: Effects of signal bandwidth and number of events per signal
[AD-B179613] p 3402 N94-30422
Prediction and standard error estimation for a finite universe total when a stratum is not sampled
[DE94-004929] p 3465 N94-30696

SAPPHIRE
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
SATELLITE ALTIMETRY
The effects of altimeter sampling characteristics: Some Geosat examples
[AD-A275225] p 3357 N94-29062
SATELLITE ANTENNAS
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
SATELLITE ATMOSPHERES
Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton
[NASA-CR-195727] p 3549 N94-28816
SATELLITE ATTITUDE CONTROL
The development procedures and tools applied for the attitude control software of the Italian satellite SAX
p 3170 N94-29324
The influence of appendage vibration on the attitude dynamics of a dual-spin satellite p 3168 N94-29828
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857
SATELLITE COMMUNICATION
Communications subsystem for the Petite Amateur Navy Satellite (PANSAT)
[AD-A275532] p 3242 N94-28812
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415
Simulation of interference between Earth stations and Earth-orbiting satellites p 3252 N94-29673
Remote observatory access via the advanced communications technology satellite
p 3253 N94-29894
Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29897
Communications technology for unattended sensors
[DE94-005685] p 3254 N94-30043
Radial microstrip slotline feed network for circular mobile communications array
[NASA-TM-106540] p 3267 N94-30198
The two-way time synchronization system via a satellite voice channel p 3471 N94-30658
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670
SATELLITE CONSTELLATIONS
An Operational Control Segment (OCS) update on GPS constellation status and future program directions
p 3144 N94-30643
SATELLITE CONTROL
Dynamics and control of tethered satellite systems
p 3170 N94-30864
SATELLITE DESIGN
Outline of JERS-1 system p 3330 N94-29220
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions
[JTN-94-80544] p 3170 N94-30932
New perspectives for high accuracy SLR with second generation geodesic satellites
[REPT-932-440-105] p 3336 N94-30965
SATELLITE GROUND SUPPORT
Site comparison for optical visibility statistics in southern California p 3247 N94-29617
SATELLITE IMAGERY
Far ultraviolet images of the nighttime ionosphere
[AD-A275083] p 3356 N94-28843
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties
[AD-A275321] p 3377 N94-28877
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Synthetic aperture radar applications: Now and in the future p 3260 N94-28927
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies
p 3326 N94-28929
Image processing for hyperspectral data
p 3326 N94-28930
JERS-1 data acquisition and distribution
p 3326 N94-28931
JERS-1 data and information system for resources exploration p 3327 N94-28932
Observations by ERS-1 start p 3327 N94-28933
Sea ice and oceans applications of SAR
p 3327 N94-28934
Amazonia: Remote sensing test site and survey
p 3327 N94-28935
Utilization of remote sensing data in Southeast Asia
p 3327 N94-28936
Remote sensing and global management
p 3328 N94-28937
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Principles and application tendency of remote sensing: Its principle, function and utilization
p 3328 N94-29037
Oceanic survey utilizing satellites
p 3328 N94-29040
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
A new information system: Satellite observation
p 3330 N94-29219
Observatory system of Earth Resources Satellite-1
p 3330 N94-29221
Application of JERS-1 data to geologic analyses
p 3330 N94-29222
Application of optical sensor data to resource survey
p 3330 N94-29223
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
Application of remote sensing techniques in petroleum exploration: The Indonesian experience
p 3331 N94-29225
JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems
p 3331 N94-29229
Application of remote sensing in prevention of disasters p 3332 N94-29230
Future expectation of remote sensing technology
p 3332 N94-29231
Japan's Earth observation satellite programs
p 3332 N94-29232
Extrapolation of point data for resource mapping
p 3334 N94-29959
Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037
Estimation of transmittance from satellite imagery
p 3257 N94-30500
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919
Multitemporal analysis of a braiding river: The advanced study of 1992
[NLR-TP-93100-U] p 3335 N94-30942
SATELLITE INSTRUMENTS
EOS project and ASTER (ITIR) p 3331 N94-29226
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
SATELLITE NAVIGATION SYSTEMS
Use of GPS in automated air traffic control
p 3137 N94-29563
An Operational Control Segment (OCS) update on GPS constellation status and future program directions
p 3144 N94-30643
A review of the status and capabilities of Navstar GPS
[AD-B174629] p 3143 N94-30854
SATELLITE OBSERVATION
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties
[AD-A275321] p 3377 N94-28877
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects
p 3326 N94-28926
Synthetic aperture radar applications: Now and in the future p 3260 N94-28927
Research trends on remote sensing at research facilities in Japan: The priority area programme on better understanding of earth environment via satellite
p 3326 N94-28928
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies
p 3326 N94-28929
JERS-1 data acquisition and distribution
p 3326 N94-28931
Observations by ERS-1 start p 3327 N94-28933
Sea ice and oceans applications of SAR
p 3327 N94-28934
Amazonia: Remote sensing test site and survey
p 3327 N94-28935
Utilization of remote sensing data in Southeast Asia
p 3327 N94-28936
Remote sensing and global management
p 3328 N94-28937
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Principles and application tendency of remote sensing: Its principle, function and utilization
p 3328 N94-29037
Status and tendency of earth observation system
p 3328 N94-29038
Perspectives of earth observing techniques: Expectation of earth observation in space development history
p 3328 N94-29039
Oceanic survey utilizing satellites
p 3328 N94-29040
Tohoku district observed by artificial satellites
p 3328 N94-29041
Antarctic Record, volume 36, no. 1
[REPT-106-VOL-36-NO-1] p 3357 N94-29078
Activities of the wintering party at Showa Station by the 31st Japanese Antarctic Research Expedition in 1990
p 3358 N94-29083
Conceptual radiometer design studies for Earth observations from low Earth orbit
[NASA-CR-4588] p 3329 N94-29098
Role of satellite observations of sea-surface temperature in the detection of global change
[PB94-138120] p 3329 N94-29107
Proceedings of the 3rd International Symposium: JERS-1 and Remote Sensing in the Future
[JTN-94-80597] p 3329 N94-29217
Remote sensing and the Earth p 3329 N94-29218
A new information system: Satellite observation
p 3330 N94-29219
Outline of JERS-1 system p 3330 N94-29220
Application of JERS-1 data to geologic analyses
p 3330 N94-29222
Application of optical sensor data to resource survey
p 3330 N94-29223
Radar applications at the Canada Centre for Remote Sensing p 3331 N94-29224
Application of remote sensing techniques in petroleum exploration: The Indonesian experience
p 3331 N94-29225
EOS project and ASTER (ITIR) p 3331 N94-29226
Earth-observation plan in Europe
p 3331 N94-29227
Rock identification using thermal infrared data
p 3331 N94-29228
JERS-1 and future remote sensing: Application of remote sensing data to agroecological problems
p 3331 N94-29229
Application of remote sensing in prevention of disasters p 3332 N94-29230
Future expectation of remote sensing technology
p 3332 N94-29231
Japan's Earth observation satellite programs
p 3332 N94-29232
On the relation between SMMR 37-GHz polarization difference and the rainfall over Africa and Australia
[NASA-TM-104598] p 3370 N94-29408
A simulation study of high degree and order geopotential determination using satellite gravity gradiometry
p 3333 N94-29762
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970
Estimation of transmittance from satellite imagery
p 3257 N94-30500
Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes
[PB94-147550] p 3378 N94-30714
FAME: A Forest Assessment and Monitoring Environment scenario
[AD-B179106] p 3335 N94-30759
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
p 3375 N94-30863
Multitemporal analysis of a braiding river: The advanced study of 1992
[NLR-TP-93100-U] p 3335 N94-30942
SATELLITE ORBITS
TOPEX/POSEIDON operational orbit determination results using global positioning satellites
p 3160 N94-29666
Application of extended Lagrange series to the precise determination of Global Positioning Satellite orbits
[ISBN-0-315-85724-2] p 3159 N94-30237

Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-195768] p 3142 N94-30243

SATELLITE ORIENTATION
Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-195768] p 3142 N94-30243
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

SATELLITE PERTURBATION
The influence of appendage vibration on the attitude dynamics of a dual-spin satellite p 3168 N94-29828
Application of extended Lagrange series to the precise determination of Global Positioning Satellite orbits
[ISBN-0-315-85724-2] p 3159 N94-30237

SATELLITE POWER TRANSMISSION
Reactor-pumped laser facility at DOE's Nevada Test Site
[DE94-006371] p 3295 N94-30265

SATELLITE ROTATION
The Solar Anomalous and Magnetospheric Particle Explorer (SAMPEX) yo-yo despin and solar array deployment mechanism p 3163 N94-29645

SATELLITE SOUNDING
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Far ultraviolet images of the nighttime ionosphere
[AD-A275083] p 3356 N94-28843
Proceedings of the 15th Earth Observation Symposium
[JTN-94-80607] p 3328 N94-29036
Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037
Status and tendency of earth observation system p 3328 N94-29038

SATELLITE TRACKING
The velocity field in the Northeast Atlantic from satellite-tracked drifting buoys
[AD-A275704] p 3376 N94-28690
Towards 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-195768] p 3142 N94-30243
A comparison of GPS broadcast and DMA precise ephemerides p 3145 N94-30660

SATELLITE TRANSMISSION
A new information system: Satellite observation p 3330 N94-29219
Data transfer system using a multi-ID ARGOS transmitter for the Antarctic polar patrol balloon experiment p 3363 N94-29980

SATELLITE-BORNE PHOTOGRAPHY
Far ultraviolet images of the nighttime ionosphere
[AD-A275083] p 3356 N94-28843

SATURATION (CHEMISTRY)
Arterial oxygen saturation during +Gz acceleration by short-radius centrifuge p 3389 N94-28852

SAUDI ARABIA
Scientific and technical information transfer: Promoting information acquisition in the Saudi Arabian industrial sector p 3532 N94-29803

SCALARS
Numerical modelling of turbine combustion chambers p 3154 N94-29254

SCALE MODELS
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463

SCALING LAWS
Butterfly and scaling law in YBa2Cu4O8
[DE94-006037] p 3519 N94-30338
Experiments and theoretical considerations regarding the allowable roughness height in laminar flow
[PB94-125556] p 3133 N94-30389
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775

SCANNERS
Beam scanning offset Cassegrain reflector antennas by subreflector movement
[NASA-CR-191604] p 3160 N94-28836
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358
MODIS technical report series. Volume 3: MODIS airborne simulator level 1B data user's guide
[NASA-TM-104594] p 3231 N94-29385

SCANNING
Three methods to improve the accuracy of a PUMA 560 robot p 3307 N94-30290
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment
[PB94-139318] p 3184 N94-30438

SCANNING ELECTRON MICROSCOPY
Electron microscopy: Metal alloy x ray microanalysis
[REPT-932-600-101] p 3205 N94-29525
A sub-cm micromachined electron microscope p 3236 N94-29775
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064

SCANNING TUNNELING MICROSCOPY
Halogen chemisorption on silver(111): Scanning tunneling microscopy of coadsorbed halogen atoms
[AD-A275219] p 3486 N94-29060

SCATTERING
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Carrier collection and scattering in quantum well and superlattice devices
[AD-A275443] p 3512 N94-28880
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106

SCATTERING CROSS SECTIONS
Radiation transport in cloudy and aerosol loaded atmospheres p 3366 N94-30805

SCATTEROMETERS
Observations by ERS-1 start p 3327 N94-28933

SCAVENGING
In-cylinder gas velocity measurements comparing crankcase and blower scavenging in a fired two-stroke cycle engine
[DE94-005752] p 3311 N94-30596

SCENE ANALYSIS
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009
Unmanned vehicle mobility: Limits of autonomous navigation p 3310 N94-30311
Vision based object pose estimation for mobile robots
[AIAA PAPER 94-1197-CP] p 3442 N94-30548
Multi-sensor data fusion and the use of artificial intelligence
[PB94-126216] p 3448 N94-30741

SCHEDULES
A family of joint probability models for cost and schedule uncertainties
[AD-A275513] p 3463 N94-28670
Circadian countermeasures for shiftworkers during USMP-2: A report to mission management
[NASA-CR-195260] p 3402 N94-30188

SCHEDULING
Technology transition push. Part 1: A case study of rate monotonic analysis
[AD-A275616] p 3407 N94-28633
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
A time reasoning system based on the event calculus for scheduling in aeronautic maintenance
[REPT-932-710-101] p 3122 N94-29463

SCHMIDT NUMBER
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet p 3278 N94-29976

SCHOOLS
An evaluation of techniques for ranking academic information systems journals
[AD-A275179] p 3529 N94-29066

SCHROEDINGER EQUATION
Calculation of eigenvalues of Schroedinger operators for arbitrary coupling
[DE94-606302] p 3522 N94-28582
Miln equation for the calculation of the phases and amplitudes of wave functions for continuum spectrum of Coulomb two-center problem
[DE94-606292] p 3522 N94-28616
Dissipative quantum dynamics and nonlinear sigma-model
[DE94-606295] p 3523 N94-28617
Numerical solution of the multichannel scattering problem
[DE94-606297] p 3484 N94-28619
Variational calculation of the eigenpotential for H(sup -)-system
[DE94-606269] p 3407 N94-28622
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
Reconstruction of spectra in the discrete quantum mechanics (new elements of the lattice quantum engineering)
[DE94-608075] p 3524 N94-30087
Graded Froelicher-Nijenhuis brackets and the theory of recursion operators for super differential equations
[MEMO-1147] p 3460 N94-30736

SCHWARZSCHILD METRIC
Physics, astronomy, and astrophysics: A numerical study of the black hole plus Brill wave spacetime p 3540 N94-29990

SCHWASSMANN-WACHMANN COMET
Infrared observations of cometary dust by COBE p 3541 N94-29994

SCIENTIFIC SATELLITES
The development procedures and tools applied for the attitude control software of the Italian satellite SAX p 3170 N94-29324

SCIENTIFIC VISUALIZATION
Analytic rendering of curvilinear volume data
[DE94-004934] p 3407 N94-28506
Using stereoscopic imaging for visualization applications
[DE94-006247] p 3536 N94-30706

SCINTILLATION
On possibility to create the scintillation trigger for liquid-argon neutrino detector
[DE94-607844] p 3489 N94-30050
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695
Silica scintillating materials prepared by sol-gel methods
[DE94-005123] p 3220 N94-30778

SCINTILLATION COUNTERS
On possibility to create the scintillation trigger for liquid-argon neutrino detector
[DE94-607844] p 3489 N94-30050
Preliminary detector design ST862-prototype neutron detector
[DE94-004714] p 3491 N94-30695
Silica scintillating materials prepared by sol-gel methods
[DE94-005123] p 3220 N94-30778

SCREWS
Kinematic analysis of platform-type robotic manipulators
[ISBN-0-315-78703-1] p 3311 N94-30793

SCRUBBERS
Gas stream purifier p 3354 N94-30469

SEA BREEZE
An observational and numerical study of sea/land-breeze circulations in an area of complex coastal heating p 3372 N94-29813

SEA ICE
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties
[AD-A275321] p 3377 N94-28877
Sea ice and oceans applications of SAR p 3327 N94-28934
Dynamic constraints on CO2 uptake by an iron-fertilized Antarctic p 3350 N94-30619
The role of sea ice dynamics in global climate change p 3350 N94-30620
A toy model of sea ice growth p 3351 N94-30626
Cryosphere and climate p 3352 N94-30632

SEA LEVEL
Altimeter data processing from sea surface topography to horizontal eddy momentum fluxes
[PB94-147550] p 3378 N94-30714

SEA OF JAPAN
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
The Japan Sea proper water and water circulation in the Japan Sea p 3324 N94-28694

SEA SURFACE TEMPERATURE
Role of satellite observations of sea-surface temperature in the detection of global change
[PB94-138120] p 3329 N94-29107
On the annual cycle of the tropical Pacific atmosphere and ocean p 3371 N94-29763
On interannual variability and climate change in the North Pacific p 3374 N94-29963
The validation of ocean surface heat fluxes in AMIP
[DE94-001539] p 3378 N94-30823

SEALERS
Mechanical flexible joint design document
[NASA-CR-193941] p 3297 N94-28419

SEALS (STOPPERS)
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916

SEAMS (JOINTS)
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380

SEARCH PROFILES
A unified framework for retrieval in image databases p 3533 N94-29811

Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513

SEARCHING

Using multiple searchers to locate a randomly moving target
[AD-A275602] p 3463 N94-28768

Enhancing performance of full-text retrieval systems using relevance feedback p 3532 N94-29806

A note on the complexity of local search problems
[CT-93-02] p 3456 N94-30370

SEAS

The validation of ocean surface heat fluxes in AMIP
[DE94-001539] p 3378 N94-30823

SEAT BELTS

Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799

SEATS

Crashworthiness analysis of commuter aircraft seats
[AD-A275889] p 3135 N94-28799

SECONDARY EMISSION

Characteristics of secondary electron emission from CsI induced by x rays with energies up to 100 keV
[DE94-608422] p 3395 N94-30185

SECONDARY FLOW

Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984

SECULAR VARIATIONS

Electromagnetic core-mantle coupling
p 3366 N94-30808

SECURITY

Security aspects of computer supported collaborative work
[AD-A275638] p 3528 N94-28640

Design of an autonomous exterior security robot
[AIAA PAPER 94-1188-CP] p 3441 N94-30538

Controlling multiple security robots in a warehouse environment
[AIAA PAPER 94-1300-CP] p 3441 N94-30540

SEDIMENT TRANSPORT

Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

SEDIMENTARY ROCKS

Field guide to Cretaceous-tertiary boundary sections in northeastern Mexico
[NASA-CR-195719] p 3354 N94-28416

SEDIMENTS

Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

The undrained shear strength characteristics of undisturbed soil from fishing port areas
p 3234 N94-29704

Dewatering of contaminated river sediments
p 3354 N94-30472

SEEBECK EFFECT

Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724

SEEDS

Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461

SEISMIC WAVES

Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137

Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393

Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion
p 3363 N94-29941

The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969

Extension of love wave transformation theory to laterally heterogeneous structures
[DE94-608098] p 3365 N94-30093

SEISMOGRAMS

A program for rapid computation of multioffset vertical seismic profile synthetic seismograms for layered media
[AD-A275464] p 3355 N94-28737

Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion
p 3363 N94-29941

SEISMOGRAPHS

A broad-band microseismometer for planetary operations p 3237 N94-29778

Air-deployable geophysics package
[DE94-005651] p 3335 N94-30594

SEISMOLOGY

A program for rapid computation of multioffset vertical seismic profile synthetic seismograms for layered media
[AD-A275464] p 3355 N94-28737

The Norwegian seismic array (NORSAR), phase 3
[AD-A275440] p 3356 N94-28868

Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137

Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393

A broad-band microseismometer for planetary operations p 3237 N94-29778

The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969

Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011

Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037

SEIZURES

Monitor for status epilepticus seizures
p 3397 N94-30460

SELECTION

Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749

SELENIDES

Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336

SELENIUM

The long-range transport of aerosol particles over the North Atlantic Ocean p 3366 N94-30867

SELENIUM OXIDES

Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668

SELF FOCUSING

Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536

SELF ORGANIZING SYSTEMS

Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248

A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334

SEMANTICS

Operation semantics with read and write frames
[PB94-138138] p 3529 N94-29108

North American jumelage 'type systems'
[AD-A275342] p 3411 N94-29214

Second-order algebraic specification of state semantics
[CWI-CS-R9254] p 3453 N94-29889

A^c smart child of Peano's
[ML-92-10] p 3455 N94-30325

Completeness of the Lambek calculus with respect to relativized relational semantics
[LP-93-03] p 3455 N94-30326

Identity: Quarrelling with an unproblematic notion
[LP-93-04] p 3455 N94-30327

On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347

Index expression belief networks for information disclosure
[TR-92-23] p 3465 N94-30358

Parsing in ISBES
[TR-92-32] p 3432 N94-30363

Interrogatives and adverbs of quantification
[LP-92-14] p 3456 N94-30372

Bounded contraction and many-valued semantics
[ML-93-04] p 3456 N94-30380

Models of the untyped lambda-calculus in semi Cartesian closed categories
[ML-93-05] p 3456 N94-30381

Algorithmic problems concerning first-order definability of modal formulas on the class of all finite frames
[ML-93-07] p 3456 N94-30383

The Vanilla meta-interpreter for definite logic programs and ambivalent syntax
[CT-93-01] p 3424 N94-30386

A note on the Smyth powerdomain construction
[RUU-CS-93-02] p 3457 N94-30393

Algebraic domains, chain completion, and the Plotkin powerdomain construction
[RUU-CS-93-03] p 3457 N94-30394

Modal quantification over structured domains
[ML-93-02] p 3457 N94-30396

Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403

Modeling systems by probabilistic process algebra: An event structures approach
[MEMO-INF-93-29-REV] p 3425 N94-30416

Termination of term rewriting by semantic labelling
[RUU-CS-93-24] p 3459 N94-30424

Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427

Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430

Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431

Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432

Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491

On the relation between Unity properties and sequences of states
[RUU-CS-93-07] p 3433 N94-30720

Bisimulations and predicate logic
[CWI-CS-R9333] p 3460 N94-30735

Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749

A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753

Termination of term rewriting by semantic labelling
[RUU-CS-92-38] p 3462 N94-30859

Inventory of fragments and exact models in intuitionistic proportional logic
[ML-93-11] p 3463 N94-30974

SEMICIRCULAR CANALS

Basic understanding of vertigo p 3390 N94-28855

SEMICONDUCTING FILMS

Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films
p 3500 N94-29759

SEMICONDUCTOR DEVICES

Investigation of advanced fault insertion and simulator methods
[NASA-CR-195241] p 3261 N94-28511

Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773

Optoelectronic integrated circuits fabricated using atomic layer epitaxy
[AD-A275454] p 3262 N94-28805

Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000

Effects of oxide charge and surface recombination velocity on the excess base current of BJT's
[DE94-003711] p 3263 N94-29025

Towards experimental verification and device applications of current driven plasma instabilities in solid state systems
[AD-A275395] p 3504 N94-29055

Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
[NASA-CR-195688] p 3235 N94-29767

Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793

Photonics at Sandia National Laboratories: From research to applications
[DE94-006463] p 3501 N94-30828

SEMICONDUCTOR JUNCTIONS

Strong overlap and transmission in triple barrier resonant structures
[DE94-608103] p 3516 N94-30067

SEMICONDUCTOR LASERS

Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607

HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608

Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919

High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309

Dynamics of a coupled solid state laser array
p 3294 N94-29551

Longitudinal effects and intensity-phase coupling in distributed feedback semiconductor lasers
p 3294 N94-29590

Time and frequency technology at NIST
p 3468 N94-30641

Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830

SEMICONDUCTORS (MATERIALS)

Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765

Innovative optoelectronic materials and structures using OMVPE
[AD-A275811] p 3511 N94-28773
Electroset Technology: On the forefront of manufacturing
[AD-A275166] p 3263 N94-29045
High resistivity buffer layers by oxygen doping
[AD-A274986] p 3513 N94-29125
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide
[AD-A275019] p 3513 N94-29130
Monolithic in-based III-V compound semiconductor focal plane array cell with single stage CCD output
[NASA-CASE-NPO-18978-1-CU] p 3265 N94-29488
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states p 3294 N94-29531
Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films p 3500 N94-29759
Overview of microoptics: Past, present, and future p 3235 N94-29771
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Vibrational properties of homopolar and heteropolar surfaces and interfaces of the CdTe/HgTe system
[DE94-608105] p 3516 N94-30069
II-VI wide band gap semiconductors under hydrostatic pressure
[DE94-608106] p 3516 N94-30070
Band structure of superlattice with (delta)-like potential
[DE94-608108] p 3516 N94-30072
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162
The 1992 report on the next generation ultra clean technology for advanced microfabrication
[DE94-744171] p 3157 N94-30268
Nonlinear optics response of semiconductor quantum wells under high magnetic fields
[DE94-003244] p 3520 N94-30835
Nuclear magnetic relaxation studies of semiconductor nanocrystals and solids
[DE94-006301] p 3520 N94-30842
Rotator phases in narrow-gap semiconductors
[DE94-005472] p 3521 N94-30897

SENSITIVITY
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525

SENSORIMOTOR PERFORMANCE
Deterioration of manual performance in cold and windy climates p 3381 N94-28434
Human pilot response during single- and multi-axis tracking tasks
[AD-A275080] p 3398 N94-28887

SENSORS
The application of micromachined sensors to manned space systems p 3171 N94-29791
Micro guidance and control synthesis: New components, architectures, and capabilities p 3144 N94-29792
Air-deployable geophysics package
[DE94-005651] p 3335 N94-30594

SENSORY PERCEPTION
Basic understanding of vertigo p 3390 N94-28855
Disturbance of equilibrium on JAL flight crew p 3390 N94-28856
Space and vertigo: In relation to space motion sickness p 3390 N94-28857

SENTENCES
An architecturally-based theory of human sentence comprehension
[AD-A275380] p 3398 N94-29313

SEPARATED FLOW
Role of computational fluid dynamics in aeronautical engineering. Part 10: Numerical analysis of flow around 2-D multi-element HLD p 3125 N94-28964
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871

SEPARATORS
Specialized data base management system for data processing in the experiments at low energies
[DE94-606268] p 3485 N94-28621
Polyaniline membranes for gas and liquid separation
[AD-A275851] p 3408 N94-28790
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411

SEQUENCING
Stable RNA sequences as a tool for DNA probes and phylogenetic studies
[PB94-135423] p 3385 N94-29156
A time reasoning system based on the event calculus for scheduling in aeronautic maintenance
[REPT-932-710-101] p 3122 N94-29463

SEQUENTIAL ANALYSIS
North American jumelage 'type systems'
[AD-A275342] p 3411 N94-29214

SEQUENTIAL CONTROL
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432

SERIES EXPANSION
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829

SERUMS
Strategies to sustain and enhance performance in stressful environments
[AD-A275223] p 3398 N94-29027

SERVICE LIFE
Advanced development of PV encapsulents
[DE94-000219] p 3336 N94-28500
Service life prediction of composite structures through fiber testing
[AD-A275661] p 3176 N94-28654
Aircraft age impacts on maintenance requirements
[AD-A275701] p 3121 N94-28666
Aircraft age impact on individual operating and support cost elements
[AD-A275739] p 3121 N94-28732
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834
Measurement and modelling of bolted joint stress relaxation in plastics
[PB94-124849] p 3318 N94-28841
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799
Space flight manipulator technologies and requirements for the NASA Flight Telerobotic Servicer (FTS)
[AIAA PAPER 94-1191-CP] p 3441 N94-30542

SET THEORY
On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347
A note on the Smyth powerdomain construction
[RUU-CS-93-02] p 3457 N94-30393
Algebraic domains, chain completion, and the Plotkin powerdomain construction
[RUU-CS-93-03] p 3457 N94-30394
Commutative Lambek categorial grammars
[ML-93-01] p 3457 N94-30395
Representations of dynamical systems described by behavioral inequalities
[AD-B173649] p 3458 N94-30402
Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430
Dynamic microsets for RAMs
[RUU-CS-93-22] p 3406 N94-30727
Set games
[MEMO-1148] p 3466 N94-30737
Total termination of term rewriting
[RUU-CS-92-42] p 3460 N94-30744
A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753
Non-commutative geometry
[PB94-139342] p 3462 N94-30889
Remarks on uniformly finitely precomplete positive equivalences
[ML-93-12] p 3463 N94-30975

SEWAGE TREATMENT
Growth of hydrocarbon-rich microalga Botryococcus braunii in secondarily treated sewage and its consumption of nitrate ion and phosphate ion p 3387 N94-29519

SEYFERT GALAXIES
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832
Broad H alpha profiles of radio-loud active galactic nuclei and rapid profile variability in Seyfert and radio galaxies p 3552 N94-29989

SHAFTS (MACHINE ELEMENTS)
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372

SHAKERS
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206

SHAKING
Monitor for status epilepticus seizures p 3397 N94-30460

SHALLOW WATER
Broad geoacoustic assessment of some regional areas
[AD-A275504] p 3356 N94-28791

SHAPE CONTROL
Control of micromachined deformable mirrors p 3239 N94-29787

SHAPE MEMORY ALLOYS
Report on smart materials
[PB94-137528] p 3203 N94-29015
Research on the improvement of shape-memory and magnetostrictive materials
[AD-A275397] p 3203 N94-29056
Rotary actuator
[NASA-CASE-MFS-28581-1] p 3205 N94-29447

SHARP LEADING EDGES
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871

SHEAR FLOW
On the numerical analysis of shear flows p 3126 N94-28972
An alternative assessment of second-order closure models in turbulent shear flows
[NASA-CR-194881] p 3272 N94-29381
Lubricant rheology at high shear rates p 3217 N94-29967
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450
Evaluation of flip-flop jet nozzles for use as practical excitation devices
[NASA-TM-106377] p 3135 N94-30949

SHEAR LAYERS
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
The effect of a wavy boundary on turbulent flow p 3280 N94-30272
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953

SHEAR PROPERTIES
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
Performance of a higher-order triangular finite element for composite laminated structures p 3181 N94-29810
Lubricant rheology at high shear rates p 3217 N94-29967

SHEAR STRAIN
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964
Thin-walled orthotropic laminated beam theory p 3324 N94-30920

SHEAR STRENGTH
The undrained shear strength characteristics of undisturbed soil from fishing port areas p 3234 N94-29704
Delamination growth in composites under cyclic loads p 3183 N94-30256
Four advances in carbon-carbon materials technology p 3186 N94-30481

SHEAR STRESS
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921

Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Performance of a higher-order triangular finite element for composite laminated structures
p 3181 N94-29810
Nanodislocation structures generated in shocked crystals p 3514 N94-29915
Vacuum chamber and adaptors for shearography and holography
[NASA-CR-192467] p 3157 N94-29956
On interannual variability and climate change in the North Pacific p 3374 N94-29963

SHEEP
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150

SHELL THEORY
Plane strain finite element analysis of sheet forming operations including bending effects
p 3322 N94-30354

SHERGOTTITES
Cosmogenic C-14 in Antarctic and non-Antarctic meteorites and lunar samples
[NASA-CR-195795] p 3546 N94-29905

SHIELDING
Overview of shielding analyses for the MHTGR from 1986 to 1991
[DE94-002448] p 3495 N94-29924

SHIP HULLS
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705

SHIP TERMINALS
Orbital applications of electrodynamic propulsion
[AD-A275413] p 3173 N94-29216

SHIPS
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705

SHIVERING
Fuelling shivering in humans during cold water immersion p 3379 N94-28426

SHOCK ABSORBERS
Landing gear energy absorption system
[NASA-CASE-MSC-22277-1] p 3300 N94-29448
Identification of the damping ratio relationship of an autovehicle suspension
[REPT-93-063] p 3313 N94-30937

SHOCK FRONTS
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
Nanodislocation structures generated in shocked crystals p 3514 N94-29915

SHOCK HEATING
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860

SHOCK LOADS
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429

SHOCK WAVE INTERACTION
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920

SHOCK WAVE PROFILES
Numerical simulation of unsteady aerodynamic heating induced by shock reflections p 3123 N94-28952
Numerical simulation of steady Mach reflection by shock capturing schemes p 3123 N94-28953

SHOCK WAVE PROPAGATION
Numerical simulation of steady Mach reflection by shock capturing schemes p 3123 N94-28953

SHOCK WAVES
Dislocation theory of melting for iron, revisited
[DE94-002715] p 3355 N94-28538
Acceleration in astrophysics
[DE94-004986] p 3552 N94-28580
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174

SHORT CIRCUITS
A new test method for the assessment of the arc tracking properties of wire insulation in air, oxygen enriched atmospheres and vacuum p 3167 N94-28714

SHORT WAVE RADIATION
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106

SHRINKAGE
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
Measurement and modelling of bolted joint stress relaxation in plastics
[PB94-124849] p 3318 N94-28841

SHUTTLE IMAGING RADAR
Pointing mechanisms for the Shuttle Radar Laboratory
p 3162 N94-29638

SIDELOBES
A new guided wave lens structure and its application
[AD-A275541] p 3499 N94-28813

SIEVES
Methane challenge of high performance molecular sieve oxygen concentrator
[AD-A275155] p 3337 N94-29033

SIGNAL ANALYSIS
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971

SIGNAL DETECTION
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
Detection methods for stealth radio signals: A literature survey
[PB94-137452] p 3244 N94-29176
A review of signal detection using the bispectrum with applications in underwater acoustics
[AD-A275227] p 3478 N94-29388
Partially coherent detection of PSK signals in Rician channels
[ISBN-0-315-85799-4] p 3254 N94-30031
Sampling behaviour in a four instrument monitoring task: Effects of signal bandwidth and number of events per signal
[AD-B179613] p 3402 N94-30422
Some applications of GPS timing information
p 3145 N94-30661

SIGNAL DETECTORS
A magnetically coupled quench detector for superconducting magnets
[DE94-006040] p 3268 N94-30904

SIGNAL DISTORTION
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995

SIGNAL ENCODING
Non-orthogonal subband/transform coder
[NASA-CASE-LEW-15310-1] p 3246 N94-29589

SIGNAL FADING
Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29897

SIGNAL MIXING
Multi-channel spatialization systems for audio signals
[NASA-CASE-ARC-12013-1-CU] p 3245 N94-29364

SIGNAL PROCESSING
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
Data fusion and correlation techniques testbed development audio processing study
[SKD-1600-73-014] p 3241 N94-28532
Data fusion and correlation techniques testbed development. Phase 1: Interim report
[SKD-1600-73-015] p 3405 N94-28533
SPC toolbox: An interactive MATLAB (tm) package for signal modeling, analysis, and communications
[AD-A275617] p 3241 N94-28634
Advanced optical A/D converter
[AD-A275663] p 3498 N94-28656
Design of parallel systems for signal processing
[AD-A275490] p 3430 N94-28659
The bootstrapped algorithm: A fast algorithm for blind signal separation
[AD-A275759] p 3408 N94-28760
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
Testing for a signal with unknown location and scale in a stationary Gaussian random field
[AD-A275320] p 3464 N94-28876
Spurs in digital radio frequency memory and applications of DRFM
[AD-A275013] p 3243 N94-28897
Removal of coherent Extremely Low Frequency (ELF) background noise by adaptive noise cancellation
[AD-A275016] p 3243 N94-28898
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042
Multi-channel spatialization systems for audio signals
[NASA-CASE-ARC-12013-1-CU] p 3245 N94-29364
Measurand transient signal suppressor
[NASA-CASE-MSC-22027-1] p 3435 N94-29466
Orbital debris radar instrumentation
p 3248 N94-29626
A comparison of full-spectrum and complex-symbol combining techniques for the Galileo S-band mission
p 3250 N94-29665
A complex symbol signal-to-noise ratio estimator and its performance p 3251 N94-29671
Method for ambiguity resolution in range-Doppler measurements
[NASA-CASE-GSC-13542-1] p 3252 N94-29739
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551
Noise and drift analysis of non-equally spaced timing data p 3472 N94-30667
A bipolar analog front-end integrated circuit for the SDC silicon tracker
[DE94-005203] p 3267 N94-30711
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979

SIGNAL RECEPTION
Solid-state, active-phased arrays: Some aspects of receiver design
[AD-A275893] p 3527 N94-28779
A comparison of full-spectrum and complex-symbol combining techniques for the Galileo S-band mission
p 3250 N94-29665
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445
Remote clocks linked by a fully calibrated two-way timing link p 3471 N94-30659
Some applications of GPS timing information
p 3145 N94-30661

SIGNAL REFLECTION
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995

SIGNAL TO NOISE RATIOS
Decoder synchronization for deep space missions
p 3250 N94-29664
A comparison of full-spectrum and complex-symbol combining techniques for the Galileo S-band mission
p 3250 N94-29665
A complex symbol signal-to-noise ratio estimator and its performance p 3251 N94-29671
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073

SIGNAL TRANSMISSION
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment
p 3250 N94-29659
Performance issues of signalling protocols for broadband ISDN
[MEMO-INF-93-30] p 3255 N94-30374
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Optical techniques for time and frequency transfer
p 3469 N94-30647
Some applications of GPS timing information
p 3145 N94-30661

SIGNATURES
Energy distribution of the leptons in top decay to charged Higgs
[DE94-005231] p 3482 N94-28494
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373

SIGNS AND SYMPTOMS
The Environmental Symptoms Questionnaire: Assessing reactions to environmental extremes in military operations p 3383 N94-28447

SILANES
Silica scintillating materials prepared by sol-gel methods
[DE94-005123] p 3220 N94-30778
SILENCERS
Boundary layer control device for duct silencers
[NASA-CASE-ARC-12030-1] p 3478 N94-29362
SILICA GLASS
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
Characterisation and processing of SiC/MAS-L glass ceramic matrix composite
[REPT-932-430-111] p 3179 N94-29412
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335
SILICATES
Layered polysilicate: Properties and perspectives in applications p 3223 N94-29513
SILICIDES
Fabrication and testing of plasma-spray formed MoSi2 and MoSi2 composite tubes
[DE94-004995] p 3175 N94-28581
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933
Microstructure and mechanical properties of nitrided molybdenum silicide coatings
[DE94-006249] p 3217 N94-30025
Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848
SILICON
NSC 800, 8-bit CMOS microprocessor
[NASA-CR-195736] p 3405 N94-28845
Silicon germanium carbon heteroepitaxial growth on silicon
[AD-A275197] p 3512 N94-28889
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD p 3223 N94-29518
A sub-cm micromachined electron microscope p 3236 N94-29775
A broad-band microseismometer for planetary operations p 3237 N94-29778
Aggregation equilibria in arsenic doped silicon
[DE94-607269] p 3515 N94-30005
The role of plastic deformation in brittle and near-brittle cracking behavior p 3322 N94-30226
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
Thin EFG octagons
[DE94-000257] p 3339 N94-30605
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717
SILICON ALLOYS
Large-area triple-junction a-Si alloy production scale up
[DE94-000249] p 3339 N94-30604
SILICON CARBIDES
Joining silicon carbide to austenitic stainless steel through diffusion welding
[PB94-126331] p 3297 N94-28399
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Characterization of structure and mechanical properties of MoSi2-SiC nanolayer composites
[DE94-004982] p 3175 N94-28579
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
Electrical conductivity measurements on a SiCp/Al alloy metal matrix composite
[PB94-138310] p 3263 N94-29120
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite
[NASA-CASE-LEW-15264-2] p 3180 N94-29508
Composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Effect of fiber coating on mechanical properties of Nicalon fibers and Nicalon-fiber/SiC matrix composites
[DE94-005477] p 3185 N94-30593
Creep behavior of MoSi2-SiC composites
[DE94-004980] p 3185 N94-30693
Synthesis of (SiC)3N4 thin films by ion implantation
[DE94-006311] p 3521 N94-30851
SILICON COMPOUNDS
Alkylene-bridged polygerm- and polygermsilsesqui-oxanes: New hybrid organic-inorganic materials
[DE94-005096] p 3174 N94-28557
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
Thermochemical data for CVD modeling from ab initio calculations
[DE94-005269] p 3222 N94-30909
SILICON DIOXIDE
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
Inorganic polymer-derived ceramic membranes
[DE94-000082] p 3216 N94-29830
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Kinetics of surface roughening and smoothing during ion sputtering
[DE94-006358] p 3219 N94-30263
Silica scintillating materials prepared by sol-gel methods
[DE94-005123] p 3220 N94-30778
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron
[DE94-005428] p 3221 N94-30896
SILICON FILMS
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Energy losses of fast charged particles in thin silicon detectors
[DE94-606065] p 3483 N94-28552
SILICON JUNCTIONS
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
SILICON NITRIDES
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
Sliding friction and wear between titanium nitride, M50 steel and silicon nitride (round 3 of VAMAS wear test program)
[IMR-TM-TR-003] p 3303 N94-30019
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
Synthesis of (SiC)3N4 thin films by ion implantation
[DE94-006311] p 3521 N94-30851
SILICON OXIDES
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
SILICON POLYMERS
Layered polysilicate: Properties and perspectives in applications p 3223 N94-29513
Inorganic polymer-derived ceramic membranes
[DE94-000082] p 3216 N94-29830
SILICON RADIATION DETECTORS
Energy losses of fast charged particles in thin silicon detectors
[DE94-606065] p 3483 N94-28552
Pulse height response of Si surface barrier detectors p 3497 N94-30221
A low noise silicon detector preamplifier system for room temperature x ray spectroscopy
[REPT-93-058] p 3291 N94-30930
SILICONES
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
SILOXANES
Polyimides containing pendent siloxane groups
[NASA-CASE-LAR-14638-1] p 3215 N94-29555
SILVER
Sweep rate and concentration effects on metastable structures formed in the underpotential deposition of silver on Pt(111)
[AD-A275369] p 3189 N94-29010
Crystallization of silver chromate from ethanol via salt metathesis reactions of solubilized precursors
[AD-A275178] p 3189 N94-29058
Haiogen chemisorption on silver(111): Scanning tunneling microscopy of coadsorbed halogen atoms
[AD-A275219] p 3486 N94-29060
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
SILVER ALLOYS
Giant magnetoresistance and microstructural characteristics of epitaxial Fe-Ag and Co-Ag granular thin films
[DE94-006287] p 3519 N94-30707
SIMULATED ANNEALING
Use of snakes to link edge points to create left ventricular boundaries in echocardiographic images
[TELECOM-93-D-016] p 3395 N94-30970
SIMULATION
CBSD: The celestial background scene descriptor
[AD-A275521] p 3538 N94-28671
Simulator for multistatic radar
[PB94-135506] p 3245 N94-29311
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046
Logic of transition systems
[CT-93-03] p 3424 N94-30371
Three metric domains of processes for bisimulation
[CWI-CS-R9335] p 3459 N94-30427
A structural co-induction theorem
[CWI-CS-R9346] p 3461 N94-30753
A laboratory simulation of urban heat-island-induced circulation in a stratified environment p 3367 N94-30921
SIMULATORS
Fiscal 1990 geothermal development promotion survey
[DE94-732333] p 3337 N94-28628
Simulator for multistatic radar
[PB94-135506] p 3245 N94-29311
Simulation of fully automated air traffic control concepts p 3139 N94-29569
The Common Modular Simulator (CMS): An architecture test bed for future advanced ATM systems p 3141 N94-29582
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
SINE SERIES
Some remarkable sine and cosine functions
[PB94-137759] p 3453 N94-29439
SINE WAVES
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008
SINGLE CHANNEL PER CARRIER TRANSMISSION
The two-way time synchronization system via a satellite voice channel p 3471 N94-30658
SINGLE CRYSTALS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field
[DE94-606851] p 3511 N94-28626
Sputtering of single crystals: Experimental evidence of the ejection process
[AD-A275819] p 3512 N94-28775
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787
Synthesis and neutron diffraction study of Na3WN3 and Na3MoN3
[AD-A275158] p 3203 N94-29043
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201
Incommensurate magnetic order in UNi2Al3
[DE94-005449] p 3209 N94-30246
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336
Butterfly and scaling law in YBa2Cu4O8
[DE94-006037] p 3519 N94-30338
Magnetotransport measurements in magnetic fields up to 50T in SmB6 and FeSi
[DE94-006227] p 3520 N94-30848

SINGLE EVENT UPSETS
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Proceedings of the 1991 Single Event Upset Symposium
[DSIS-92-00652] p 3495 N94-30211
Single event upset and latchup measurements at Brookhaven National Laboratory p 3495 N94-30212
Single event upset susceptibilities of latchup immune CMOS process programmable gate arrays p 3495 N94-30214
Multiple single event upsets in CMOS static rams p 3496 N94-30215
McMaster accelerator facility p 3496 N94-30217
Advanced development of the Spectrum Sciences Model 5005-TF, single event test fixture p 3291 N94-30218
Using Cf-252 for single event upset testing p 3496 N94-30219
Charge collection spectroscopy applied to MOS RAM's p 3201 N94-30220

SINTERING
Analysis of pressureless densification of ceramic matrix composites p 3216 N94-29766

SIS (SUPERCONDUCTORS)
Picosecond response of the quasiparticle current in superconducting tunnel junctions
[DE94-006300] p 3515 N94-30009

SISO (CONTROL SYSTEMS)
A neural network-based technique for structural identification of SISO systems
[REPT-93-076] p 3449 N94-30941

SITE SELECTION
Site comparison for optical visibility statistics in southern California p 3247 N94-29617

SKID LANDINGS
Aircraft accident/incident summary report: In-flight loss of control, leading to forced landing and runway overrun, Continental Express, Inc., N24706 Embraer EMB-120 RT, Pine Bluff, Arkansas, 29 April 1993
[PB94-910404] p 3135 N94-29402

SKIN (ANATOMY)
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864

SKIN FRICTION
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824

SKIN TEMPERATURE (BIOLOGY)
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
A comparison of four methods of rewarming individuals cooled by immersion in cold water p 3382 N94-28442
Thermal strain generated by an enhanced anti-G protection system in a hot climate p 3383 N94-28445
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864

SKY SURVEYS (ASTRONOMY)
X ray studies of the Hyades cluster
[NASA-CR-189325] p 3538 N94-29001
A study of recycled pulsars in globular clusters p 3539 N94-29825
A near-infrared survey of the star forming region NGC 2264 p 3540 N94-29971

SKY WAVES
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106

SLEDS
Portable Linear Sled (PLS) for biomedical research p 3163 N94-29648

SLENDER BODIES
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705

SLEWING
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002

SLIDING FRICTION
Atomic-scale friction measurements using friction force microscopy. Part 2: Application to magnetic media
[AD-A275202] p 3298 N94-29290
Sliding friction and wear between titanium nitride, M50 steel and silicon nitride (round 3 of VAMAS wear test program)
[IMR-TM-TR-003] p 3303 N94-30019
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177

SLIP CASTING
Nonaqueous slip casting of YBa2Cu3O(7-x) superconductive ceramics
[NASA-CR-4575] p 3512 N94-29101

SLOPES
Influence of clearance and rake angles on the cutting force of rock p 3368 N94-29520
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046

SLOT ANTENNAS
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
Radial microstrip slotline feed network for circular mobile communications array
[NASA-TM-106540] p 3267 N94-30198

SLOTTED WIND TUNNELS
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545

SLURRIES
Dewatering of contaminated river sediments p 3354 N94-30472

SMART STRUCTURES
Collocated tunable wavenumber sensor/actuators for smart structures
[AD-A275872] p 3241 N94-28755
Report on smart materials
[PB94-137528] p 3203 N94-29015
Assessment of the fibre volume distribution around optical fibres
[FFA-TN-1993-12] p 3179 N94-29425
Intelligent material systems and structures. Part 7: Debonding and pull-out of two optical fibers from two epoxies
[PB94-137767] p 3180 N94-29475
Active control of delaminations in smart composite structures p 3181 N94-29593

SMOKE
Flowfield prediction of NO(x) and smoke production in aircraft engines p 3191 N94-29252
The influence of air distribution on homogeneity and pollutant formation in the primary zone of a tubular combustor p 3194 N94-29274
NATO SOCMET trials p 3258 N94-30503
The effects of man-made smokes and battlefield-induced smokes on the propagation of electromagnetic radiation p 3258 N94-30505

SMOOTHING
Output statistics of the SALFAS FM normalizer Smoothing/Prediction function
[AD-A275758] p 3463 N94-28759
The use of the AOA TTR-4P GPS receiver in operation at the BIPM for real-time restitution of GPS time p 3144 N94-30651

SNOW
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288

SNOW COVER
Physical processes in snowpacks during rain or melt events
[AD-A275445] p 3325 N94-28881
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288
Attenuation of outdoor sound propagation levels by a snow cover
[AD-A275387] p 3478 N94-29314
A newly developed snow vehicle (SM100S) for Antarctica. Part 5: Result of general performance tests p 3314 N94-29985
The role of sea ice dynamics in global climate change p 3350 N94-30620

SODIUM
Convective flow effects on protein crystal growth
[NASA-CR-195785] p 3515 N94-30015

SOFIA (AIRBORNE OBSERVATORY)
Aircraft system aft telescope cavity configuration study for Stratospheric Observatory for Infrared Astronomy (SOFIA), phase 2
[NASA-CR-194266] p 3147 N94-29685

SOFTWARE ENGINEERING
Technology transition push. Part 1: A case study of rate monotonic analysis
[AD-A275616] p 3407 N94-28633
A conceptual framework for software technology transition
[AD-A275637] p 3407 N94-28639
Software Technology for Adaptable, Reliable Systems (STARS) program
[AD-A275675] p 3407 N94-28664
Software systems reengineering process model, version 1.0
[AD-A275711] p 3407 N94-28691
Demonstration of improved software support labor estimation for Air Force operational flight programs through functional orientation
[AD-A275789] p 3121 N94-28743
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
[AD-A275860] p 3156 N94-28752
Cleanroom engineering handbook. Volume 4. Specification team practices
[AD-A275861] p 3156 N94-28753
Construction of a connectionist network supercomputer
[AD-A275765] p 3405 N94-28764
Cleanroom engineering handbook. Volume 2: Organization and project formation in the cleanroom environment
[AD-A275809] p 3156 N94-28772
Guide to the Environmental-Language
[AD-A275849] p 3408 N94-28784
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28896
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Investigation into formalization of domain-oriented parallel software development
[AD-A275177] p 3430 N94-29050
Reference model for project support environments, version 2.0
[AD-A275191] p 3410 N94-29068
A concurrent, object-based implementation for the tactical level of the rational behavior model
[AD-A275024] p 3410 N94-29115
Towards an information model and mechanisms for design rationale capture and use
[AD-A275060] p 3530 N94-29138
Ada, object-oriented techniques, and concurrency in teaching data structures and file management
[AD-A275385] p 3411 N94-29201
Aerospace Software Engineering for Advanced Systems Architectures
[AGARD-CP-545] p 3412 N94-29315
Object versus functional oriented design p 3413 N94-29321
Experiences with the HOOD design method on avionics software development p 3414 N94-29325
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Rome Laboratory software engineering technology program p 3414 N94-29330
A common Ada run-time system for avionics software p 3150 N94-29331
Software testing practices and their evolution for the 1990's p 3415 N94-29335
Validation and test of complex weapon systems p 3150 N94-29336
Testing Operational Flight Programs (OFPs) p 3415 N94-29337
Integrated formal verification and validation of safety critical software p 3416 N94-29338
A disciplined approach to software test and evaluation p 3416 N94-29339
The UNICON approach to through-life support and evolution of software-intensive systems p 3416 N94-29340
Application of information management methodologies for project quality improvement in a changing environment p 3416 N94-29342
The discipline of defining the software product p 3416 N94-29343
SDE's for the year 2000 and beyond: An EF perspective p 3417 N94-29344
A common approach for an aerospace software environment p 3417 N94-29346
DSSA-ADAGE: An environment for architecture-based avionics development p 3150 N94-29348
Entreprise 2: A PCTE integrated project support environment p 3417 N94-29349
Information engineering implementation and acceptance p 3530 N94-29533
Software Management Environment (SME) concepts and architecture, revision 1
[NASA-CR-189293] p 3419 N94-29727
Engineering specification editing tools
[AD-A275116] p 3419 N94-29746
Using RDD-100 with CoRE. Version 01.00.03
[AD-A275336] p 3419 N94-29797
Research and technology, 1992
[NASA-TM-103996] p 3555 N94-29891
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Software engineering and software management in a distributed UNIX environment
[NLR-TP-92233-U] p 3422 N94-30314

The ergonomics of computer interfaces: Designing a system for human use
[CWI-CS-R9258] p 3402 N94-30320
Graphics in the Views system
[CWI-CS-R9260] p 3422 N94-30322
The Views application environment
[CWI-CS-R9257] p 3423 N94-30341
The real-world navigator
[AIAA PAPER 94-1204-CP] p 3443 N94-30555

SOFTWARE RELIABILITY
Demonstration of improved software support labor estimation for Air Force operational flight programs through functional orientation
[AD-A275789] p 3121 N94-28743
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
Microcomputer-based protective functions in industrial production systems: Assessment method
[PB94-137817] p 3411 N94-29159
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3
[AD-A275390] p 3411 N94-29202
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) library access guide, revision 3
[AD-A275405] p 3411 N94-29207
Object versus functional oriented design
p 3413 N94-29321
The development procedures and tools applied for the attitude control software of the Italian satellite SAX
p 3170 N94-29324
Potential software failures methodology analysis
p 3414 N94-29329
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435

SOFTWARE REUSE
Automated interface for retrieving reusable software components
[AD-A275004] p 3409 N94-28896
Advanced languages for systems software
[AD-A275272] p 3410 N94-29007
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
A common Ada run-time system for avionics software
p 3150 N94-29331
DSSA-ADAGE: An environment for architecture-based avionics development p 3150 N94-29348
Aid to Ada component reuse at Aerospatiale Cannes (France)
[REPT-932-440-102] p 3418 N94-29418
Design reuse experience of space and hazardous operations robots
[AIAA PAPER 94-1220-CP] p 3445 N94-30568

SOFTWARE TOOLS
Work-oriented development of interactive software tools: Understanding the work of software maintainers and making an interactive software tool for them
[PB94-132032] p 3406 N94-28401
Transferable Output ASCII Data (TOAD) editor version 1.0 user's guide
[NASA-CR-187507] p 3408 N94-28818
Business planning model user's guide
[AD-A274978] p 3409 N94-28895
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
HYPER-NPSNET: Embedded multimedia in a 3D virtual world
[AD-A275063] p 3410 N94-29152
The development procedures and tools applied for the attitude control software of the Italian satellite SAX
p 3170 N94-29324
Rome Laboratory software engineering technology program p 3414 N94-29330
Design of a thinwire real-time multiprocessor operating system p 3415 N94-29333
The UNICON approach to through-life support and evolution of software-intensive systems
p 3416 N94-29340
SDE's for the year 2000 and beyond: An EF perspective p 3417 N94-29344
DSSA-ADAGE: An environment for architecture-based avionics development p 3150 N94-29348
Entreprise 2: A PCTE integrated project support environment p 3417 N94-29349
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415
Aid to Ada component reuse at Aerospatiale Cannes (France)
[REPT-932-440-102] p 3418 N94-29418
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane
[REPT-932-440-107] p 3168 N94-29543
A study of the relationship between the performance and dependability of a fault-tolerant computer
[NASA-CR-195758] p 3406 N94-29695
Extending the X Window System
[DE94-006496] p 3420 N94-29844
Addendum to the final report for the investigation of proof techniques within the EVES verification technology
[TR-93-5451-03] p 3421 N94-30155
GNU debugger internal architecture
[DE94-006665] p 3422 N94-30251
Software engineering and software management in a distributed UNIX environment
[NLR-TP-92233-U] p 3422 N94-30314
Modelling interaction tools in the Views architecture
[CWI-CS-R9261] p 3423 N94-30323
A user's guide to the Software Testpilot
[CWI-CS-R9343] p 3426 N94-30435
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439
A streamlined software environment for situated skills
[AIAA PAPER 94-1205-CP] p 3444 N94-30556
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739

SOHO MISSION
Three high duty cycle, space-qualified mechanisms
p 3162 N94-29642

SOI (SEMICONDUCTORS)
An investigation of distributed coupling in a nonlinear semiconductor waveguide p 3246 N94-29529

SOIL MECHANICS
Toward a molecular scale understanding of frost heaving, phase 1
[AD-A275446] p 3356 N94-28882
The undrained shear strength characteristics of undisturbed soil from fishing port areas
p 3234 N94-29704

SOIL MOISTURE
Sensitivity and feedbacks associated with vegetation-related land surface parameters in a general circulation model p 3348 N94-29800

SOIL SCIENCE
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
A toy model for estimating N2O emissions from natural soils p 3351 N94-30627
Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629
A toy terrestrial carbon flow model
p 3352 N94-30630

SOILS
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Growth condition of an ice layer in freezing soils under applied loads. Part 1: Experiment
[AD-A275215] p 3357 N94-29070
Collecting cometary soil samples? Development of the ROSETTA sample acquisition system
p 3160 N94-29628
The undrained shear strength characteristics of undisturbed soil from fishing port areas
p 3234 N94-29704
A toy model for estimating N2O emissions from natural soils p 3351 N94-30627
Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629

SOL-GEL PROCESSES
Densification and crystallization of zirconia thin films prepared by sol-gel processing
[DE94-005573] p 3518 N94-30315
Synthesis and characterization of advanced materials for Navy applications p 3223 N94-30474
Silica scintillating materials prepared by sol-gel methods
[DE94-005123] p 3220 N94-30778

SOLAR ACTIVITY
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
Solar-geophysical data number 592, December 1993. Part 1: Prompt reports. Data for October, November 1993 and late data
[PB94-142130] p 3550 N94-29123
Solar-geophysical data number 592, December 1993. Part 2: Comprehensive reports. Data for June 1993 and miscellaneous
[PB94-142148] p 3550 N94-29124
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948

SOLAR ACTIVITY EFFECTS
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244

SOLAR ARRAYS
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material
p 3165 N94-28701
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
The Solar Anomalous and Magnetospheric Particle Explorer (SAMPEX) yo-yo despin and solar array deployment mechanism p 3163 N94-29645
Modal analysis of solar panels using boundary integral equations
[NLT-TP-92218-U] p 3338 N94-30328

SOLAR ATMOSPHERE
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723

SOLAR CELLS
Advanced development of PV encapsulents
[DE94-000219] p 3336 N94-28500
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
Fiber optical solar simulator p 3341 N94-30486
Photovoltaic performance and reliability workshop
[DE94-000236] p 3339 N94-30601
PV Cz silicon manufacturing technology improvements
[DE94-000248] p 3339 N94-30603
Thin EFG octagons
[DE94-000257] p 3339 N94-30605
Crystalline-silicon solar cell development sponsored by the US Department of Energy
[DE94-003783] p 3340 N94-30609
NREL Photovoltaic Program FY 1993 bibliography
[DE94-000272] p 3340 N94-30820

SOLAR COLLECTORS
Quality and efficiency of solar collectors in Sweden
[PB94-137486] p 3337 N94-28909
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
Crystalline-silicon solar cell development sponsored by the US Department of Energy
[DE94-003783] p 3340 N94-30609

SOLAR CORONA
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
Coronal abundances and their variation
[NASA-CR-195767] p 3551 N94-29858

SOLAR CYCLES
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128

SOLAR DYNAMIC POWER SYSTEMS
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834

SOLAR ELECTRONS
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453

SOLAR ENERGY
Cosmic energy equipment p 3229 N94-28945
Analysis and modeling of environmental and economic impacts of the solar hydrogen energy system
p 3348 N94-29901

Interagency advanced power group: Solar working group
[DE94-004953] p 3340 N94-30833
SOLAR ENERGY CONVERSION
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
SOLAR FLARES
Identification of an unexpected space radiation hazard
[AD-A275170] p 3552 N94-29046
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
SOLAR FLUX
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A275203] p 3356 N94-28891
Production of fullerenes with concentrated solar flux
[DE94-000266] p 3514 N94-29801
Radiative flux calculations at UV and visible wavelengths
[DE94-004278] p 3350 N94-30613
Recent results from SAGE
[DE94-006229] p 3551 N94-30845
SOLAR FLUX DENSITY
Accurate modeling of F-region electron densities
[NASA-CR-195781] p 3364 N94-30014
SOLAR FURNACES
Production of fullerenes with concentrated solar flux
[DE94-000266] p 3514 N94-29801
SOLAR INSTRUMENTS
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
[NASA-TM-108448] p 3160 N94-29470
Solar neutrino experiments: An update
[DE94-006061] p 3551 N94-30884
SOLAR MAGNETIC FIELD
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
The structure of solar magnetic fields and their associated electric currents p 3544 N94-29723
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948
SOLAR NEUTRINOS
Recent results from SAGE
[DE94-006229] p 3551 N94-30845
Solar neutrino experiments: An update
[DE94-006061] p 3551 N94-30884
SOLAR OBSERVATORIES
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
[NASA-TM-108448] p 3160 N94-29470
SOLAR PHYSICS
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
Solar-geophysical data number 592, December 1993. Part 1: Prompt reports. Data for October, November 1993 and late data
[PB94-142130] p 3550 N94-29123
Solar-geophysical data number 592, December 1993. Part 2: Comprehensive reports. Data for June 1993 and miscellaneous
[PB94-142148] p 3550 N94-29124
SOLAR PLANETARY INTERACTIONS
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
SOLAR RADIATION
The automated rotating shadowband spectroradiometer
[DE94-001878] p 3269 N94-28464
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948
SOLAR RADIATION SHIELDING
Lunar surface operations. Volume 1: Lunar surface emergency shelter
[NASA-CR-195551] p 3299 N94-29354
SOLAR RADIO EMISSION
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment p 3250 N94-29659
SOLAR REFLECTORS
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799
SOLAR SIMULATORS
Fiber optical solar simulator p 3341 N94-30486
SOLAR SPECTRA
Fiber optical solar simulator p 3341 N94-30486
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948
SOLAR SPECTROMETERS
Solar measurements from the Airglow-Solar Spectrometer Instrument (ASSI) on the San Marco 5 satellite
[NASA-CR-193815] p 3551 N94-30948
SOLAR SYSTEM
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779
SOLAR TERRESTRIAL INTERACTIONS
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data
[NASA-CR-195119] p 3507 N94-30126
Experimental investigation of possible geomagnetic feedback from energetic (0.1 to 16 keV) terrestrial O(+) ions in the magnetotail current sheet
[PAPER-93JA01991] p 3507 N94-30128
SOLAR THERMAL ELECTRIC POWER PLANTS
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799
SOLAR WIND
Identification of an unexpected space radiation hazard
[AD-A275170] p 3552 N94-29046
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132
Proceedings of the NIPR Symposium on Upper Atmosphere Physics, no. 6
[JTN-94-80593] p 3359 N94-29233
Signatures of dayside solar wind/magnetosphere/ionosphere coupling as revealed by the pace HF radars and associated experiments p 3359 N94-29236
A theory of current generator in the magnetosphere-ionosphere coupling p 3360 N94-29240
A study of the formation and dynamics of the Earth's plasma sheet using ion composition data
[NASA-CR-195119] p 3507 N94-30126
SOLAR X-RAYS
Solar-geophysical data number 592, December 1993. Part 2: Comprehensive reports. Data for June 1993 and miscellaneous
[PB94-142148] p 3550 N94-29124
Coronal abundances and their variation
[NASA-CR-195767] p 3551 N94-29858
SOLDERED JOINTS
Surface tension of tin and its alloys with particular reference to solders
[PB94-138302] p 3204 N94-29119
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710
SOLDERING
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
SOLDERS
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Surface tension of tin and its alloys with particular reference to solders
[PB94-138302] p 3204 N94-29119
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710
SOLENOIDS
The static and nonstatic electrical solenoids
[DE94-606326] p 3261 N94-28585
Estimating the cost of large superconducting thin solenoid magnets
[DE94-006289] p 3468 N94-30026
Third-order beam optics of real solenoid magnetic lens
[DE94-608014] p 3500 N94-30084
SOLID ELECTROLYTES
Fuel Cell Seminar, 1992: Program and abstracts
[DE94-003882] p 3336 N94-28472
Enhanced ion dissociation of LiCF3SO3 by new carbonate plasticizers: Raman and IR studies
[DE94-005448] p 3485 N94-28741
Method for forming thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18877-1-CU] p 3264 N94-29357
SOLID LUBRICANTS
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177
SOLID PHASES
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Directional solidification studies in Ni-Al alloys
[DE94-005562] p 3201 N94-28527
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
SOLID PROPELLANT IGNITION
Development of a new generation solid rocket motor ignition computer code
[NASA-CR-195734] p 3171 N94-28800
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879
Correlation of cookoff behavior of rocket propellants with thermomechanical and thermochemical properties
[AD-A274983] p 3224 N94-29092
SOLID PROPELLANT ROCKET ENGINES
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets p 3151 N94-29294
A variable selection heuristic for solid rocket motor design p 3173 N94-29544
SOLID PROPELLANTS
A study of solid propellants using a microprobe mass spectrometer system
[AD-A275325] p 3224 N94-28879
SOLID ROCKET PROPELLANTS
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors p 3151 N94-29292
Research and development of ramjets/ramrockets. Part 1: Integral solid propellant ramrockets p 3151 N94-29294
SOLID STATE DEVICES
Solid-state, active-phased arrays: Some aspects of receiver design
[AD-A275893] p 3527 N94-28779
Fabrication of electronic materials in space p 3228 N94-28942
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
Miniaturization in x ray and gamma ray spectroscopy p 3236 N94-29773
SOLID STATE LASERS
Dynamics of a coupled solid state laser array p 3294 N94-29551
Solid state laser systems for space application
[NASA-CR-195777] p 3294 N94-29914
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614
Diode-pumped solid-state-laser drivers and the competitiveness of inertial fusion energy
[DE94-006654] p 3296 N94-30830
SOLID-SOLID INTERFACES
Effect of microstructure on the strength and fracture energy of bimaterial interfaces
[AD-A274987] p 3178 N94-29126
Interface engineering in alumina fiber/glass composites p 3182 N94-29852
A solid-on-solid invasion percolation model for self-affine interfaces
[DE94-608102] p 3521 N94-30888
SOLIDIFICATION
Melt flow during alloy solidification: Dimensional analysis and model problems
[PB94-138625] p 3206 N94-29997
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794

SOLIDS
Laser-material interactions: A study of laser energy coupling with solids
[DE94-005212] p 3292 N94-28478
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980
SOLITARY WAVES
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
On the linear stability of Verkley's modons
p 3324 N94-28695
A note on the Poisson brackets associated with Lax operators
[MATHS-REPT-A-195] p 3464 N94-29482
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
SOLUBILITY
Solubility of Nd in brine
[DE94-005099] p 3187 N94-28567
Crystallization of silver chromate from ethanol via salt metathesis reactions of solubilized precursors
[AD-A275178] p 3189 N94-29058
SOLUTIONS
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
SOLVENT EXTRACTION
Molecular structure of coal studied by solvent extraction p 3187 N94-28676
Methanol-mediated continuous extraction of phenolic compounds from coal liquid p 3188 N94-28679
SOLVENTS
Solubility of Nd in brine
[DE94-005099] p 3187 N94-28567
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
Poly(arylene ether-co-imidazole)s as toughness modifiers for epoxy resins
[NASA-CASE-LAR-15229-1-CU] p 3215 N94-29451
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution
p 3354 N94-30466
Supersonic gas-liquid cleaning system
p 3240 N94-30467
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468
Theory for electron-transfer reactions involving two Marcus surfaces with a different force constant
[DE94-005925] p 3493 N94-30874
SONAR
Seafloor characterization using texture
[AD-A275399] p 3377 N94-29204
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707
Sonar sensing and obstable detection
p 3309 N94-30301
Iterative removal of boundary minima of harmonic potential function for mobile robot navigation
[REPT-93-059] p 3449 N94-30962
SONIC BOOMS
Numerical analysis of sonic boom in the near field
p 3125 N94-28962
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464
SOOT
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Measurements and predictions of the combustion characteristics of enclosed swirl-stabilized propane flames
[IECE-CFE-TR-001] p 3198 N94-30017
SOUND DETECTING AND RANGING
A review of signal detection using the bispectrum with applications in underwater acoustics
[AD-A275227] p 3478 N94-29388
SOUND FIELDS
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404
SOUND GENERATORS
Analysis of spark-induced bubble experiments using CALE
[DE94-003667] p 3270 N94-28476
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
SOUND INTENSITY
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464
SOUND PRESSURE
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117
Determination of sound power levels of air terminal units according to ISO 5135-Nordic inter-laboratory tests, Nordtest project no. 968-91
[PB94-137411] p 3477 N94-29175
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
Modal analysis of solar panels using boundary integral equations
[NLT-TP-92218-U] p 3338 N94-30328
SOUND PROPAGATION
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117
Attenuation of outdoor sound propagation levels by a snow cover
[AD-A275387] p 3478 N94-29314
A non-local computational boundary condition for duct acoustics
[NASA-TM-109091] p 3478 N94-29382
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
SOUND RANGING
Sonar sensing and obstable detection
p 3309 N94-30301
SOUND TRANSDUCERS
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707
Sensing the gas metal arc welding process
p 3314 N94-30444
SOUND TRANSMISSION
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117
SOUND WAVES
Broad geoacoustic assessment of some regional areas
[AD-A275504] p 3356 N94-28791
Analysis of 3-D acoustic problems using boundary element method p 3127 N94-28974
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206
Improved in-flow acoustic sensor
[NASA-CASE-ARC-12001-1] p 3478 N94-29363
A non-local computational boundary condition for duct acoustics
[NASA-TM-109091] p 3478 N94-29382
Report of National Institute for Resources and Environment. No. 8: Research on blasting sound related to it's measurement, propagation prediction, control and evaluation
[JTN-94-80605] p 3479 N94-29597
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707
Convective turbulence and transport in stars
p 3546 N94-29913
SOUNDING ROCKETS
Time series comparisons of satellite and rocketsonde temperatures in 1978-1979
[NASA-TP-3409] p 3370 N94-29455
SOUTHERN HEMISPHERE
Generation mechanisms of quasi-stationary waves in the Southern Hemisphere p 3365 N94-30789
SOUTHERN OSCILLATION
Interannual-decadal variability in tropical climate systems: Stable isotope records and general circulation model experiments p 3373 N94-29962
On interannual variability and climate change in the North Pacific p 3374 N94-29963
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970
SPACE ADAPTATION SYNDROME
Japanese Journal of Aerospace and Environmental Medicine, volume 30, no. 1
[JTN-94-80598] p 3389 N94-28850
Space and vertigo: In relation to space motion sickness p 3390 N94-28857
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
SPACE BASED RADAR
Ground independent landing system
p 3137 N94-29564
Pointing mechanisms for the Shuttle Radar Laboratory
p 3162 N94-29638
SPACE COMMERCIALIZATION
The MERSS 5th Symposium on Space Medicine: Medical and Physiological Experiment Utilizing Parabolic Flight
[JTN-94-80588] p 3392 N94-29709
Start of space tourism p 3164 N94-29714
SPACE COMMUNICATION
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
The Telecommunications and Data Acquisition Report
[NASA-CR-195694] p 3246 N94-29613
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment
p 3250 N94-29659
Optimizing the Galileo space communication link
p 3250 N94-29663
Decoder synchronization for deep space missions
p 3250 N94-29664
SPACE DEBRIS
Orbital debris radar instrumentation
p 3248 N94-29626
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161
Space debris removal using a high-power ground-based laser
[DE94-006363] p 3169 N94-30264
SPACE ENVIRONMENT SIMULATION
Technology for robotic surface inspection in space
[AIAA PAPER 94-1193-CP] p 3442 N94-30544
SPACE ERECTABLE STRUCTURES
Deployable reflector structure
[NASA-CASE-LAR-14513-1-SB] p 3245 N94-29360
A module concept for a cable-mesh deployable antenna p 3161 N94-29631
Low melting temperature alloy deployment mechanism and recent experiments p 3163 N94-29644
SPACE EXPLORATION
MUADEE: Mars Upper Atmosphere Dynamics, Energetics, and Evolution discovery mission. Executive summary volume
[NASA-CR-195732] p 3549 N94-28418
The Pluto fast flyby mission: Completing the reconnaissance of the solar system
p 3235 N94-29768
Smart focal-plane technology for micro-instruments and micro-rovers p 3237 N94-29780
SPACE FLIGHT
NASA space and Earth science data on CD-ROM
[NASA-TM-109709] p 3528 N94-28414
SPACE FLIGHT FEEDING
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 3
[JTN-94-80606] p 3387 N94-28495
Some issues on Japan's space food development and relating preliminary experimental study
p 3388 N94-28498
SPACE HABITATS
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993
[NASA-TM-106514] p 3168 N94-29757
SPACE HEATING (BUILDINGS)
Maintaining acceptable thermal comfort with a low air temperature by means of local heating
[PB94-138526] p 3401 N94-29950
Control of heating, ventilation and air conditioning (HVAC) systems
[PB94-138807] p 3401 N94-30000
SPACE MAINTENANCE
System for the installation and replacement of components in hostile environments
[NASA-CASE-LEW-14906-1-SB] p 3300 N94-29427

Extra-vehicular activity translation tool
[NASA-CASE-MSC-21955-1] p 3300 N94-29428
SPACE MANUFACTURING
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Combustion studies under microgravity p 3228 N94-28940
Glass studies under microgravity p 3228 N94-28941
Fabrication of electronic materials in space p 3228 N94-28942
Protein crystal growth in microgravity p 3228 N94-28943
Cell culture in space p 3228 N94-28944
Cosmic energy equipment p 3229 N94-28945
Laser beam welding of AISI 316 stainless steel in microgravity environment: Experiments aboard a KC-135 flight
[ISBN-0-315-86095-2] p 3229 N94-30145
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
SPACE MISSIONS
MUADEE: Mars Upper Atmosphere Dynamics, Energetics, and Evolution discovery mission. Executive summary volume
[NASA-CR-195732] p 3549 N94-28418
Decoder synchronization for deep space missions p 3250 N94-29664
SPACE NAVIGATION
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
Enhanced orbit determination filter sensitivity analysis: Error budget development p 3159 N94-29655
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit p 3142 N94-29837
SPACE OBSERVATIONS (FROM EARTH)
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892
SPACE PERCEPTION
Disturbance of equilibrium on JAL flight crew p 3390 N94-28856
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
Extended occupancy grid method for modelling unknown dynamic environments p 3144 N94-30281
Using stereoscopic imaging for visualization applications
[DE94-006247] p 3536 N94-30706
SPACE PLASMAS
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
Electron beams at geosynchronous orbit
[AD-A275471] p 3355 N94-28684
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Computer simulations on development of the fast reconnection mechanism p 3360 N94-29241
Waves in space plasma dipole antenna subsystem p 3161 N94-29632
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Simulation of space-energy distributions of hot plasma on a geostationary orbit
[DE94-607324] p 3365 N94-30107
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3260 N94-30352
SPACE POWER REACTORS
SP-100 control drive assembly development p 3163 N94-29651
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847
SPACE PROCESSING
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session
[JTN-94-80584] p 3158 N94-28583
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Fluid and transportation phenomena under microgravity p 3227 N94-28939
Combustion studies under microgravity p 3228 N94-28940
Glass studies under microgravity p 3228 N94-28941
Fabrication of electronic materials in space p 3228 N94-28942
Protein crystal growth in microgravity p 3228 N94-28943
Cell culture in space p 3228 N94-28944
Cosmic energy equipment p 3229 N94-28945
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371
The 1992-1993 advanced design program. Part 1: The Mars methane engine project. Part 2: The Mars oxygen processor new furnace
[NASA-CR-195513] p 3299 N94-29409
Thermal enclosure system functional simulation user's manual
[NASA-TM-109094] p 3466 N94-29489
Directional solidification characteristics of hyper-eutectic Al-Cu alloys under varying gravity conditions
[ISBN-0-315-86108-8] p 3209 N94-30146
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session
[JTN-94-80583] p 3159 N94-30794
SPACE RENDEZVOUS
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit p 3142 N94-29837
SPACE SHUTTLE BOOSTERS
Development of a new generation solid rocket motor ignition computer code
[NASA-CR-195734] p 3171 N94-28800
Development of a unique polyurethane primer/topcoat p 3223 N94-30476
SPACE SHUTTLE MAIN ENGINE
Mechanical flexible joint design document
[NASA-CR-193941] p 3297 N94-28419
Composite load spectra for select space propulsion structural components
[NASA-CR-194476] p 3316 N94-28508
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868
SPACE SHUTTLE MISSIONS
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993
[NASA-TM-106514] p 3168 N94-29757
SPACE SHUTTLE ORBITERS
Extra-vehicular activity translation tool
[NASA-CASE-MSC-21955-1] p 3300 N94-29428
Waves in space plasma dipole antenna subsystem p 3161 N94-29632
SPACE SHUTTLE PAYLOADS
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635
Pointing mechanisms for the Shuttle Radar Laboratory p 3162 N94-29638
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993
[NASA-TM-106514] p 3168 N94-29757
SPACE SHUTTLES
SOCRATES simulation of the emission at wavelength 6300 A generated by the interaction between the atmosphere and the Space Shuttle exhaust
[AD-A275567] p 3164 N94-28827
Wind tunnel testing and research
[NASA-CR-188273] p 3156 N94-29052
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
Local interaction control for space construction p 3170 N94-30960
SPACE STATION FREEDOM
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
A Space Station robot walker and its shared control software
[AIAA PAPER 94-1192-CP] p 3442 N94-30543
SPACE STATION POWER SUPPLIES
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
SPACE STATIONS
Heavy-lift vehicle-launched Space Station method and apparatus
[NASA-CASE-MSC-21760-1] p 3160 N94-29369
Technology transfer and evaluation for Space Station telerobotics
[AIAA PAPER 94-1190-CP] p 3441 N94-30541
Local interaction control for space construction p 3170 N94-30960
SPACE STORAGE
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904
SPACE TEMPERATURE
Determining noise temperatures in beam waveguide systems p 3249 N94-29657
SPACE TOOLS
Extra-vehicular activity translation tool
[NASA-CASE-MSC-21955-1] p 3300 N94-29428
SPACE TRANSPORTATION
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355
SPACE TRANSPORTATION SYSTEM FLIGHTS
Physiological Anatomical Rodent Experiment (PARE) .04 feasibility test 2
[NASA-CR-195210] p 3385 N94-29968
SPACE VEHICLE CHECKOUT PROGRAM
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857
SPACE-TIME FUNCTIONS
Numerical analysis and computation of nonlinear partial differential equations from applied mathematics
[AD-A275582] p 3451 N94-28723
Three forms of relativity
[DE94-606338] p 3523 N94-28782
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
On dyonic black holes and cosmic censorship p 3546 N94-29912
Physics, astronomy, and astrophysics: A numerical study of the black hole plus Brill wave spacetime p 3540 N94-29990
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
SPACEBORNE EXPERIMENTS
Overview of space environment utilization science
[JTN-94-80581] p 3227 N94-28938
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405
GOME: Global Ozone Monitoring Experiment
[ESA-SP-1151] p 3347 N94-29452
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility
[NASA-CR-4586] p 3175 N94-29458
Thermal enclosure system functional simulation user's manual
[NASA-TM-109094] p 3466 N94-29489
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635
Study of activation data of metal samples from LDEF-1 and Spacelab-2
[NASA-CR-195802] p 3205 N94-29736
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993
[NASA-TM-106514] p 3168 N94-29757
Microgravity fluid science research in Europe
[AD-B179178] p 3229 N94-30409
Microencapsulation of anti-tumor, antibiotic and thrombolytic drugs in microgravity p 3397 N94-30453
A Modular Artificial Intelligence Inference Engine System (MAIS) for support of on orbit experiments
[AIAA PAPER 94-1237-CP] p 3448 N94-30584
SPACEBORNE LASERS
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment p 3250 N94-29659

Solid state laser systems for space application
[NASA-CR-195777] p 3294 N94-29914

SPACEBORNE TELESCOPES
An Earth observation telescope refocusing mechanism
[REPT-932-440-103] p 3332 N94-29417
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670

SPACECRAFT ANTENNAS
A comparison of full-spectrum and complex-symbol combining techniques for the Galileo S-band mission p 3250 N94-29665

SPACECRAFT CHARGING
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828

SPACECRAFT COMMUNICATION
The Telecommunications and Data Acquisition Report
[NASA-CR-195689] p 3249 N94-29652
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896

SPACECRAFT COMPONENTS
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
ESTEC wiring test programme materials related properties p 3165 N94-28698
Robust 300 C wire insulation system p 3165 N94-28699
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
Metal band drives in spacecraft mechanisms p 3162 N94-29637
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782

SPACECRAFT CONSTRUCTION MATERIALS
NASA Parts Project Office: Basic goals p 3166 N94-28703
Electrical and mechanical testing of wire insulation for space applications p 3166 N94-28710
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications p 3166 N94-28711
Wire insulation degradation and flammability in low gravity p 3166 N94-28712
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Functional New Materials Session
[JTN-94-80582] p 3159 N94-30162
Composite hot drape forming p 3240 N94-30448
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts p 3186 N94-30482

SPACECRAFT CONTROL
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Software engineering methods in the Hermes on-board software p 3414 N94-29326
Micro guidance and control technology overview p 3144 N94-29772
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798
Local interaction control for space construction p 3170 N94-30960

SPACECRAFT DESIGN
ESTEC wiring test programme materials related properties p 3165 N94-28698
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2 p 3125 N94-28966
The Solar Anomalous and Magnetospheric Particle Explorer (SAMPEX) yo-yo despin and solar array deployment mechanism p 3163 N94-29645
Analysis of EDP performance
[NASA-CR-195726] p 3420 N94-29945
The MACS-TSA applied in the ISO and SAX spacecraft projects
[PB94-126257] p 3170 N94-30857

SPACECRAFT DOCKING
Development and testing of the Automated Fluid Interface System p 3161 N94-29636
Local interaction control for space construction p 3170 N94-30960

SPACECRAFT ELECTRONIC EQUIPMENT
Time maintenance system for the BMDO MSX spacecraft p 3171 N94-30672

SPACECRAFT ENVIRONMENTS
Analysis of selected materials flown on interior locations of the Long Duration Exposure Facility
[NASA-CR-4586] p 3175 N94-29458

SPACECRAFT EQUIPMENT
Observations by ERS-1 start p 3327 N94-28933
Outline of JERS-1 system p 3330 N94-29220
Observatory system of Earth Resources Satellite-1 p 3330 N94-29221
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429
Development status of the Communications and Broadcasting Engineering Test Satellite (COMETS)
[JTN-94-80545] p 3169 N94-30811
Development status of COMETS missions
[JTN-94-80544] p 3170 N94-30932

SPACECRAFT GUIDANCE
Fault tolerant testbed evaluation, phase 1
[NASA-CR-188275] p 3171 N94-29035
Micro guidance and control technology overview p 3144 N94-29772
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit p 3142 N94-29837

SPACECRAFT INSTRUMENTS
Outline of JERS-1 system p 3330 N94-29220
Future manned systems advanced avionics study
[NASA-CR-188277] p 3150 N94-29377
Three high duty cycle, space-qualified mechanisms p 3162 N94-29642
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794
Ground control system for the midcourse space experiment UTC clock p 3474 N94-30674

SPACECRAFT LANDING
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477
Landing gear energy absorption system
[NASA-CASE-MSC-22277-1] p 3300 N94-29448

SPACECRAFT LAUNCHING
Heavy-lift vehicle-launched Space Station method and apparatus
[NASA-CASE-MSC-21760-1] p 3160 N94-29369
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Fission-activated laser as primary power for CW laser propulsion
[DE94-006138] p 3295 N94-30367
Measurement of the frequency stability of responders in aircraft p 3261 N94-30673
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847

SPACECRAFT MAINTENANCE
On-orbit spacecraft servicing: An element in the evolution of space robotics applications
[AIAA PAPER 94-1236-CP] p 3448 N94-30583

SPACECRAFT MODELS
Wind tunnel testing and research
[NASA-CR-188273] p 3156 N94-29052

SPACECRAFT POWER SUPPLIES
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847

SPACECRAFT PROPULSION
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833
Some problems of scramjet propulsion for aerospace planes. Part 1: Scramjet: Aims and features p 3151 N94-29295
Research and development of ramjets/ramrockets. Part 2: Integral liquid fuel ramjets p 3152 N94-29297
Research and development of ramjets/ramrockets. Part 3: The study of gaseous hydrogen ram combustors p 3152 N94-29298
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
A transportronic solution to the problem of interorbital transportation
[NASA-CR-191152] p 3164 N94-29355
Determination of pressure response times for gaseous flow in a tube
[AD-A275274] p 3272 N94-29435
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588

SPACECRAFT RADIATORS
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855

SPACECRAFT REENTRY
Numerical simulation of aerothermodynamic heating of hypersonic space transportation vehicles p 3124 N94-28955

SPACECRAFT STABILITY
A gimbaled low noise momentum wheel p 3162 N94-29640

SPACECRAFT STRUCTURES
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
Composite hot drape forming p 3240 N94-30448

SPACECRAFT SURVIVABILITY
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161

SPACECRAFT TRACKING
Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623
The Telecommunications and Data Acquisition Report
[NASA-CR-195689] p 3249 N94-29652
Toward astrometric tracking with the infrared spatial interferometer p 3249 N94-29653
Line-of-sight tropospheric calibration from measurements in arbitrary directions p 3249 N94-29654
Enhanced orbit determination filter sensitivity analysis: Error budget development p 3159 N94-29655
Enhanced orbit determination filter: Inclusion of ground system errors as filter parameters p 3159 N94-29656
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
Status of frequency and time support for NASA systems p 3468 N94-30640

SPACECRAFT TRAJECTORIES
Software engineering methods in the Hermes on-board software p 3414 N94-29326

SPACELAB
Study of activation data of metal samples from LDEF-1 and Spacelab-2
[NASA-CR-195802] p 3205 N94-29736

SPANWISE BLOWING
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760

SPARKS
Analysis of spark-induced bubble experiments using CALE
[DE94-003667] p 3270 N94-28476

SPATIAL DISTRIBUTION
U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions
[AD-A275018] p 3464 N94-29129
Multi-channel spatialization systems for audio signals
[NASA-CASE-ARC-12013-1-CU] p 3245 N94-29364
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022

SPATIAL FILTERING
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060

SPATIAL RESOLUTION
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970

SPECIFIC HEAT
Endothermic fuels for hypersonic aviation p 3197 N94-29285
Centrifugal atomization of lanthanide materials for cryogenic coolers
[DE94-006035] p 3219 N94-30337
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775

SPECIFICATIONS
Impact study on the use of biomass-derived fuels in gas turbines for power generation
[DE94-000261] p 3224 N94-28502
Cleanroom engineering handbook. Volume 4. Specification team practices
[AD-A275861] p 3156 N94-28753
Invariants, frames and postconditions: A comparison of two formal specification notations
[PB94-138153] p 3405 N94-29110

Engineering specification editing tools
[AD-A275116] p 3419 N94-29746
Using RDD-100 with CoRE. Version 01.00.03
[AD-A275336] p 3419 N94-29797
Second-order algebraic specification of state semantics
[CWI-CS-R9254] p 3453 N94-29889
Homomorphism preserving algebraic specifications require hidden sorts
[CWI-CS-R9344] p 3459 N94-30436
Service independent building blocks-1: Concepts, examples and formal specifications
[CWI-CS-R9326] p 3448 N94-30731

SPECTRAL BANDS
Temperature depencence of the far infrared optical constants of polyethylene
[PB94-124336] p 3213 N94-28795
Imaging spectrometry of the Earth and other solar system bodies p 3237 N94-29779
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781

SPECTRAL ENERGY DISTRIBUTION
Parameter identification of the rotordynamic coefficients of high-Reynolds-number hydrostatic bearings p 3311 N94-30792

SPECTRAL METHODS
A global forecast model comparison study - year 1
[AD-A275674] p 3369 N94-28663
Spectral analysis of wave propagation in connected waveguides p 3277 N94-29944
A spectral boundary integral equation method for the 2-D Helmholtz equation
[NASA-CR-194890] p 3454 N94-30207
Process modelling for materials preparation experiments
[NASA-CR-195782] p 3175 N94-30242
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958

SPECTRAL RESOLUTION
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781

SPECTROMETERS
Inter-comparison of Wildfire and High-resolution Interferometer Sounder (HIS) data from STORM-FEST: An investigation of wildfire spectral channel discrepancies
[NASA-TM-108439] p 3333 N94-29553
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
Algorithm and program ORANGE for magnetic field simulation of magnetic system spectrometer STORS
[DE94-608013] p 3421 N94-30083

SPECTRORADIOMETERS
The automated rotating shadowband spectroradiometer
[DE94-001878] p 3269 N94-28464

SPECTROSCOPIC ANALYSIS
Measurement of tropospheric OH by laser long-path absorption spectroscopy p 3343 N94-28596
On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses p 3188 N94-28682
Issues in light hadron spectroscopy
[PB94-138229] p 3486 N94-29112
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

SPECTROSCOPY
Issues in light hadron spectroscopy
[PB94-138229] p 3486 N94-29112
Knowledge based system for identification of gamma sources
[PB94-137742] p 3487 N94-29683
Backscatter Mossbauer Spectrometer (BaMS) for extraterrestrial applications p 3236 N94-29774
Non-invasive temperature measurements using electron paramagnetic resonance spectroscopy p 3198 N94-29881
Charge collection spectroscopy applied to MOS RAM's p 3201 N94-30220

SPECTRUM ANALYSIS
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses p 3188 N94-28682
Principles and application tendency of remote sensing: Its principle, function and utilization p 3328 N94-29037
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system
[AD-A275076] p 3329 N94-29095
Double-crystal analyser system for the PRISMA spectrometer: Test of a prototype
[PB94-138245] p 3286 N94-29113
A review of signal detection using the bispectrum with applications in underwater acoustics
[AD-A275227] p 3478 N94-29388
High redshift QSOs and the x ray background
[NASA-CR-195112] p 3540 N94-29957
Computational balance in real-time cyclic spectral analysis
[DE94-005091] p 3432 N94-30100
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802
Spectral analysis of heart rate and psychological state: A review of its validity as a workload index
[AD-B179387] p 3399 N94-30969
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979

SPEECH RECOGNITION
Subphonetic acoustic modeling for speaker-independent continuous speech recognition
[AD-A275217] p 3244 N94-29303

SPHERES
A study of the convergence of spherical harmonic expansions of gravity using distributed point-mass Earth models p 3362 N94-29909

SPHERICAL COORDINATES
Analytic rendering of curvilinear volume data
[DE94-004934] p 3407 N94-28506
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733

SPHERICAL WAVES
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733

SPIN
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field
[DE94-606851] p 3511 N94-28626

SPIN DYNAMICS
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470

SPIN REDUCTION
One-loop QCD mass effects in the production of polarized bottom and top quarks
[PB94-138104] p 3487 N94-29145
The Solar Anomalous and Magnetospheric Particle Explorer (SAMPEX) yo-yo despin and solar array deployment mechanism p 3163 N94-29645

SPINE
Image technology and information analysis of bone change with gravitational exposure p 3389 N94-28851

SPINEL
Dislocation loops in spinel crystals irradiated successively with deep and shallow ion implants
[DE94-005083] p 3517 N94-30201

SPIRAL GALAXIES
Multicolor photometry of barred spiral galaxies p 3541 N94-30270

SPLINE FUNCTIONS
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737
Splines and ocean wave modelling
[PB94-139409] p 3378 N94-30002

SPORES
Studies on bacterial spore ultraviolet light resistance and regulation of the activity of a spore protease
[AD-A275448] p 3384 N94-28884

SPRAY CHARACTERISTICS
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29365

SPRAYED COATINGS
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys
[NASA-CASE-LEW-15535-1] p 3205 N94-29507
Dual cure low-VOC coating process, phase 3
[DE94-003202] p 3221 N94-30826

SPRAYERS
Ducted kerosene spray flames p 3195 N94-29276
Spray combustion experiments and numerical predictions p 3195 N94-29277
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Aircraft evacuations: The effect of a cabin water spray system upon evacuation rates and behaviour
[CAA-PAPER-93008] p 3148 N94-29887
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447

SPRAYING
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Investigation of the two-phase flow in a research combustor under reacting and non-reacting conditions p 3196 N94-29282

SPREAD SPECTRUM TRANSMISSION
Communications subsystem for the Petite Amateur Navy Satellite (PANSAT)
[AD-A275532] p 3242 N94-28812
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
High-resolution robot tracking and direction finding for space station environment p 3168 N94-29896

SPRINGS (ELASTIC)
Manufacturing methods for machining spring ends parallel at loaded length
[NASA-CASE-MFS-28767-1] p 3231 N94-29379

SPRINGS (WATER)
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars?
[MATHS-REPT-A-198] p 3333 N94-29528

SPUTTERING
Sputtering of single crystals: Experimental evidence of the ejection process
[AD-A275819] p 3512 N94-28775
Kinetics of surface roughening and smoothing during ion sputtering
[DE94-006358] p 3219 N94-30263

SQUID (DETECTORS)
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low I/f noise
[DE94-005209] p 3261 N94-28546
The computer-aided system for the high resolution SQUID-magnetometer
[DE94-606138] p 3286 N94-28553
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082

STABILITY
Stability properties of inclusive connectivity for graphs
[AD-A275360] p 3452 N94-29016
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
The stability of perfect elliptic disks p 3545 N94-29834
Russian national time scale long-term stability p 3475 N94-30679

STAINLESS STEELS
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Laser beam welding of AISI 316 stainless steel in microgravity environment: Experiments aboard a KC-135 flight
[ISBN-0-315-86095-2] p 3229 N94-30145

STANDARD DEVIATION
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840

STANDARD MODEL (PARTICLE PHYSICS)
Report of the subgroup on the top quark
[DE94-004624] p 3481 N94-28462
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779
STANDARDIZATION
NASA Parts Program Office responsibilities
p 3165 N94-28702
NASA Parts Project Office: Basic goals
p 3166 N94-28703
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Organized wiring systems p 3166 N94-28705
SI (Metric) handbook
[NASA-TM-109197] p 3231 N94-29376
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
Neural network application to Particle Impact Noise Detection p 3437 N94-29840
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment
[PB94-139318] p 3184 N94-30438
Cascaded clocks measurement and simulation findings p 3469 N94-30649
STANDARDS
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Unscreened low tension cables scrape abrasion testing. Part 1: An interlaboratory study on scrape abrasion testing according to ISO DP 6722-1
[PB94-135605] p 3264 N94-29191
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Time and frequency technology at NIST
p 3468 N94-30641
European PTTI report p 3468 N94-30642
Report on NATO PTTI p 3469 N94-30645
Guidance notes for use with NPL low permeability reference materials
[NPL-DES-121] p 3476 N94-30780
STANDING WAVES
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
STAR CLUSTERS
X ray studies of the Hyades cluster
[NASA-CR-189325] p 3538 N94-29001
STAR FORMATION
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
Multicolor photometry of barred spiral galaxies
p 3541 N94-30270
Stellar and gas dynamics of interacting ring galaxies
p 3548 N94-30340
STAR TRACKERS
Miniature wide field-of-view star trackers for spacecraft attitude sensing and navigation p 3144 N94-29794
STARBURST GALAXIES
The kinematics of molecular gas and dust in the nearby galaxies Centaurus A and M82 p 3544 N94-29738
A multi wavelength observational study of the Cartwheel ring galaxy p 3539 N94-29821
STATE ESTIMATION
Systematic error estimation in multisensor fusion systems
[AD-B179298] p 3428 N94-30764
Robust control of robots via linear estimated state-feedback
[MEMO-1153] p 3449 N94-30963
STATIC LOADS
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206
STATIC PRESSURE
Blast overpressure studies with animals and man
[AD-A275038] p 3391 N94-29150
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788
STATIC STABILITY
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473
STATIC TESTS
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
Analysis and design of inflatable aerospace structures
p 3403 N94-30799
STATISTICAL ANALYSIS
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840
U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions
[AD-A275018] p 3464 N94-29129
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3
[AD-A275390] p 3411 N94-29202
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) library access guide, revision 3
[AD-A275405] p 3411 N94-29207
Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393
Simulation of interference between Earth stations and Earth-orbiting satellites p 3252 N94-29673
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
Acceptance sampling methods for sample results verification
[DE94-002882] p 3465 N94-29925
Comparison of 14 MeV isomer production of Hf-178m1 and Hf-179m2 using Feshbach-Kerman-Koonin and exciton preequilibrium models
[DE94-002640] p 3488 N94-30039
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Prediction and standard error estimation for a finite universe total when a stratum is not sampled
[DE94-004929] p 3465 N94-30696
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919
Substructure, dynamics and evolution in clusters of galaxies p 3548 N94-30951
STATISTICAL DISTRIBUTIONS
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450
STATISTICAL MECHANICS
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434
STATISTICAL TESTS
A moment plotting method for characterizing aircraft fatigue data population distributions
[AD-A275500] p 3145 N94-28660
Comparison of Savannah River Site's meteorological databases
[DE94-001751] p 3373 N94-29817
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434
STATORS
Numerical study on internal flows of centrifugal compressors p 3127 N94-28977
Rotary blood pump
[NASA-CASE-MSC-22424-1] p 3299 N94-29370
Rotordynamic analysis of annular honeycomb-stator turbulent gas seals using a new friction-factor model based on flat plate tests p 3302 N94-29916
STEADY FLOW
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades
[NASA-CR-195786] p 3153 N94-30013
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871
STEADY STATE
Frequency-domain analysis of nonlinear microwave circuits
[PB94-132024] p 3261 N94-28400
Non-isolated 30 kW class arcjet PCU
[NASA-CR-189148] p 3173 N94-29444
Numerical simulations of cluster cooling flows
p 3544 N94-29725
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
STEAM
Configuration and performance of the indirect-fired fuel cell bottomed turbine cycle
[DE94-005961] p 3338 N94-30313
STEEL STRUCTURES
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
STEELS
Analysis of data by long-time mechanical properties of 08KH18N10T steel irradiated by neutrons
[DE94-605337] p 3202 N94-28551
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Sliding friction and wear between titanium nitride, M50 steel and silicon nitride (round 3 of VAMAS wear test program)
[IMR-TM-TR-003] p 3303 N94-30019
Development of evaluated data bank of physical properties of perspective nuclear engineering steels and alloys
[DE94-607999] p 3207 N94-30076
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446
Photovoltaic power without batteries for continuous cathodic protection p 3341 N94-30465
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819
STEERING
Characterization of a diffraction grating as a simulant of a selective frequency antenna for radiometric applications
[AD-A275793] p 3241 N94-28745
STELLAR ACTIVITY
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
STELLAR ATMOSPHERES
Abundance patterns in red-giant CH stars
p 3539 N94-29820
STELLAR COMPOSITION
Abundance patterns in red-giant CH stars
p 3539 N94-29820
Coronal abundances and their variation
[NASA-CR-195767] p 3551 N94-29858
Study of the stellar populations of the Fornax dwarf spheroidal galaxy
[ISBN-0-315-85526-6] p 3541 N94-30231
STELLAR CORONAS
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
STELLAR EVOLUTION
Binary-single star scattering: An investigation of a realistic chaotic scattering system p 3543 N94-29719
Convective turbulence and transport in stars
p 3546 N94-29913
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011

STELLAR LUMINOSITY
Globular cluster photometry near the turnoff: Blue stragglers, relative ages, and the horizontal branch p 3538 N94-29732
Spatially resolved spectroscopy of AG Carinae, and direct evidence for stellar evolution: The central star of NGC 2392
[NASA-CR-189291] p 3545 N94-29871
A near-infrared survey of the star forming region NGC 2264 p 3540 N94-29971
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862
STELLAR MAGNITUDE
Globular cluster photometry near the turnoff: Blue stragglers, relative ages, and the horizontal branch p 3538 N94-29732
STELLAR MASS
A study of recycled pulsars in globular clusters p 3539 N94-29825
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011
STELLAR MASS ACCRETION
A study of white dwarf radiative accretion shocks p 3544 N94-29731
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991
STELLAR MASS EJECTION
Remote sensing of inner heliospheric plasmas
[AD-A275021] p 3550 N94-29132
STELLAR MODELS
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
Equation of state of stellar plasmas
[DE94-004186] p 3542 N94-28526
CBSD: The celestial background scene descriptor
[AD-A275521] p 3538 N94-28671
Abundance patterns in red-giant CH stars p 3539 N94-29820
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011
STELLAR ORBITS
A study of recycled pulsars in globular clusters p 3539 N94-29825
STELLAR OSCILLATIONS
On observing neutron star oscillations p 3538 N94-29795
Near-critical spherically symmetric accretion by neutron stars p 3546 N94-29991
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011
STELLAR RADIATION
A study of white dwarf radiative accretion shocks p 3544 N94-29731
On observing neutron star oscillations p 3538 N94-29795
A study of ultra high-energy radiation associated with Hercules X-1 p 3552 N94-29823
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Spatially resolved spectroscopy of AG Carinae, and direct evidence for stellar evolution: The central star of NGC 2392
[NASA-CR-189291] p 3545 N94-29871
STELLAR ROTATION
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
Convective turbulence and transport in stars p 3546 N94-29913
STELLAR SPECTRA
The role of cloud collisions in N-body simulations of disk galaxies p 3545 N94-29755
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Inhomogeneities in the wind from Wolf-Rayet stars
[ISBN-0-315-85893-1] p 3548 N94-30058
Reconstruction of stellar images from correlations
[ISBN-0-315-85382-4] p 3541 N94-30133
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862
STELLAR SYSTEMS
Study of the stellar populations of the Fornax dwarf spheroidal galaxy
[ISBN-0-315-85526-6] p 3541 N94-30231
STELLAR TEMPERATURE
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
STELLAR WINDS
Inhomogeneities in the wind from Wolf-Rayet stars
[ISBN-0-315-85893-1] p 3548 N94-30058
STELLARATORS
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Efficiencies of the ICRF minority heating in the CHS and LHD plasmas
[NIFS-270] p 3506 N94-29499
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339
STEREOPHOTOGRAPHY
The use of digital stereo photogrammetric methods in historical photo analysis
[AD-A275267] p 3288 N94-29437
STEREOSCOPIC VISION
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Navigation of military and space unmanned ground vehicles in unstructured terrains p 3144 N94-30282
Variable-resolution stereo matching p 3308 N94-30298
Obstacle detection for an autonomous vehicle p 3309 N94-30302
STEREOSCOPY
Aurora stereo observation in Iceland p 3359 N94-29234
Using stereoscopic imaging for visualization applications
[DE94-006247] p 3536 N94-30706
STIFFNESS
Performance of a higher-order triangular finite element for composite laminated structures p 3181 N94-29810
Transient thermal fatigue of ceramic composites p 3216 N94-29874
STIFFNESS MATRIX
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
Closed form expressions for a consistent stress material nonlinear finite element p 3322 N94-30258
STIMULATED EMISSION
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE94-006509] p 3489 N94-30061
STIRLING CYCLE
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
STIRLING ENGINES
Performance of the Southern California Edison Company Stirling dish
[DE94-004676] p 3337 N94-29018
STOCHASTIC PROCESSES
Research activities of Martin C. Casdagli at SFI September 1989--May 1991
[DE94-005655] p 3463 N94-28548
Derivation of a Fokker-Planck equation for bunched beams
[DE94-004950] p 3483 N94-28565
The lectures in complex systems, volume 5
[AD-A275458] p 3466 N94-28807
The modified Cramer-von mises goodness-of-fit criterion for time series
[AD-A275377] p 3464 N94-29014
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Hierarchical structures and asymmetric stochastic processes on p-adics and adeles
[PB94-138203] p 3464 N94-29178
On-line search for optimal controller parameters using interconnected learning automata
[MATHS-REPT-A-196] p 3436 N94-29526
Effects of diffusion and inertia on chaotic mixing: A computational and experimental study p 3488 N94-29903
Stochastic stability and nonlinear control in mechanical systems p 3303 N94-29966
Exclusive many-particle diffusion in disordered media and correlation functions for random vertex models
[DE94-608134] p 3525 N94-30121
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
A stochastic control approach to flight path monitoring
[AD-B174630] p 3143 N94-30853
Theory for electron-transfer reactions involving two Marcus surfaces with a different force constant
[DE94-005925] p 3493 N94-30874
Theory for electron-transfer reactions in a three-component system: The degenerate regime
[DE94-005919] p 3493 N94-30903
STOICHIOMETRY
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901
STOPPING POWER
Calculation of inelastic mean free path and stopping power for electrons in solids from an optical-data model
[USIP-92-06] p 3494 N94-30980
STORAGE BATTERIES
Method for forming thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18877-1-CU] p 3264 N94-29357
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411
STORAGE RINGS (PARTICLE ACCELERATORS)
Physics at HERA
[DE94-005117] p 3483 N94-28569
Tuning of AmPS
[NIKHEF-K-AMPS-93-01] p 3494 N94-29422
BPM901N monitor electronics for the determination of the bundle profile in the extraction line of AmPS
[DIGEL-1993-9] p 3495 N94-29467
Activity report of Synchrotron Radiation Laboratory 1992
[JTN-94-80600] p 3495 N94-29596
Stripline monitor electronics for the bundle position determination in AmPS
[DIGEL-1993-8] p 3495 N94-29888
STORAGE TANKS
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904
STORMS
Remote sensor observations during WISP91: The use of microwave radiometers, RASS, and lidar ceilometers for detection of aircraft icing conditions
[PB94-142106] p 3136 N94-30890
STRAIN DISTRIBUTION
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Analyses of stationary and growing crack tip deformation by digital image processing p 3320 N94-29690
Field methods to measure surface displacement and strain with the Video Image Correlation method
[NASA-CR-195796] p 3316 N94-29724
STRAIN ENERGY METHODS
Integrated active and passive control design methodology for the LaRC CSI evolutionary model
[NASA-CR-4580] p 3164 N94-28417
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
STRAIN ENERGY RELEASE RATE
Plane stress stable crack growth and J-integral/HRR field
[AD-A275761] p 3317 N94-28761
Transient thermal fatigue of ceramic composites p 3216 N94-29874
Computational simulation of composite structures with and without damage
[NASA-CR-194433] p 3183 N94-30190
STRAIN GAGES
Damage identification in composites using built-in piezoelectrics p 3184 N94-30355
STRAIN HARDENING
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811

STRAIN MEASUREMENT
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
STRAIN RATE
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys
[DE94-005013] p 3201 N94-28544
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals
p 3321 N94-29808
Nanodislocation structures generated in shocked crystals p 3514 N94-29915
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774
STRAKES
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes
p 3155 N94-29728
STRANGE ATTRACTORS
Controlling chaos in plasma filled diodes
[AD-A275525] p 3504 N94-28686
Boundary layer coherent structures
[AD-A275007] p 3272 N94-29195
STRANGENESS
Equation of state of neutron star matter, limiting rotational periods of fast pulsars, and the properties of strange stars
[DE94-005214] p 3542 N94-28480
Weak decays of charged K-mesons and charm particles
[PB94-138062] p 3486 N94-29143
STRATIFICATION
Modeling deep equatorial circulation
p 3378 N94-29815
STRATIGRAPHY
Field guide to Cretaceous-tertiary boundary sections in northeastern Mexico
[NASA-CR-195719] p 3354 N94-28416
STRATOSPHERE
Harvard ER-2 OH laser-induced fluorescence instrument p 3343 N94-28592
Time series comparisons of satellite and rocketsonde temperatures in 1978-1979
[NASA-TP-3409] p 3370 N94-29455
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549
Radar estimations of atmospheric winds in the troposphere and lower stratosphere
p 3370 N94-29697
STRATUS CLOUDS
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
STREAMS
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars?
[MATHS-REPT-A-198] p 3333 N94-29528
STRESS (PHYSIOLOGY)
Implications of climatic extremes in aircrew NBC operations p 3383 N94-28446
Physiological responses during shipboard firefighting
[AD-A275104] p 3391 N94-28912
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
Effects of endurance training on heat-exercise tolerance in men wearing NBC protective clothing
[AD-A275176] p 3391 N94-29049
STRESS (PSYCHOLOGY)
Strategies to sustain and enhance performance in stressful environments
[AD-A275223] p 3398 N94-29027
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
Spectral analysis of heart rate and psychological state: A review of its validity as a workload index
[AD-B179387] p 3399 N94-30969
STRESS ANALYSIS
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811
An anisotropic extension of Bodner's model of viscoplasticity: Model development
[NASA-CR-195289] p 3318 N94-28821
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel
[PB94-138328] p 3319 N94-29121
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Free edge and size effects on failure initiation and ultimate strength of laminates containing a center hole
p 3181 N94-29735
Performance of a higher-order triangular finite element for composite laminated structures
p 3181 N94-29810
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
Multiple Concentric Cylinder Model (MCCM) user's guide
[NASA-CR-195299] p 3183 N94-30125
Micromechanical analysis of thermo-inelastic multiphase short-fiber composites
[NASA-CR-195290] p 3183 N94-30178
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450
Approximate estimation of the effects of asymmetry on the testing of tensile specimens
[NPL-DMM(A)-117] p 3322 N94-30523
An investigation of fatigue crack propagation under mode 1 and mixed mode 1/2 loadings p 3323 N94-30814
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947
Numerical modeling and prediction of the thermomechanical behavior of fiber-reinforced composites p 3186 N94-30956
STRESS DISTRIBUTION
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
Stress transfer mechanics for multiple perfectly bonded concentric cylinder models of unidirectional composites
[PB94-138633] p 3181 N94-29524
Higher order asymptotic crack tip fields in a power-law hardening material p 3321 N94-29829
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827
STRESS INTENSITY FACTORS
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114
STRESS MEASUREMENT
Vacuum chamber and adaptors for shearography and holography
[NASA-CR-192467] p 3157 N94-29956
STRESS RELAXATION
Measurement and modelling of bolted joint stress relaxation in plastics
[PB94-124849] p 3318 N94-28841
STRESS WAVES
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203
STRESS-STRAIN RELATIONSHIPS
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
STRETCHING
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758
STRING THEORY
Twistor-like type 2 superstring and bosonic string
[DE94-606339] p 3523 N94-28802
Problems in particle theory
[DE94-003665] p 3491 N94-30685
STRINGS
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils
p 3221 N94-30797
STRONGLY COUPLED PLASMAS
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
STRONTIUM OXIDES
Influence of doping on the electronic structure of (La, Sr)2CuO4
[DE94-006383] p 3516 N94-30054
Investigation of the phase equilibria and phase transformations associated with the Bi2Sr2CaCu2O(y) superconductor
[DE94-004889] p 3519 N94-30691
STRUCTURAL ANALYSIS
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Composite load spectra for select space propulsion structural components
[NASA-CR-194476] p 3316 N94-28508
Effects of repair on structural integrity
[AD-A275756] p 3145 N94-28647
Service life prediction of composite structures through fiber testing
[AD-A275661] p 3176 N94-28654
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual
[NASA-CR-194462] p 3317 N94-28815
Structural/aerodynamic blade analyzer (SAB) user's guide, version 1.0
[NASA-CR-194460] p 3151 N94-29103
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Performing specifications for complex systems' software p 3155 N94-29317
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
Large-scale computations in analysis of structures
[DE94-004022] p 3321 N94-29951
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions
[DE94-004582] p 3519 N94-30718
Structural analysis of amorphous phosphates using high performance liquid chromatography
[DE94-004791] p 3199 N94-30723
Thin-walled orthotropic laminated beam theory
p 3324 N94-30920
STRUCTURAL DESIGN
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Review of sonic fatigue technology
[NASA-CR-4587] p 3479 N94-29407
Field methods to measure surface displacement and strain with the Video Image Correlation method
[NASA-CR-195796] p 3316 N94-29724
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Rotorcraft airframe structural optimization for vibration and dynamic stress reduction including damping treatment p 3147 N94-29878
Improved ground-penetrating radar, bridge decks
[DE94-004863] p 3254 N94-29929
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865
Integrated structure/control design of nonrigid robot arms for high-speed manipulation p 3312 N94-30866
STRUCTURAL DESIGN CRITERIA
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
STRUCTURAL FAILURE
Effects of repair on structural integrity
[AD-A275756] p 3145 N94-28647
Numerical and experimental investigation of the bending response of thin-walled composite cylinders
[NASA-CR-195730] p 3317 N94-28801
Test and analysis of a stitched RFI graphite-epoxy panel with a fuel access door
[NASA-TM-108992] p 3178 N94-29100
STRUCTURAL MEMBERS
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782

STRUCTURAL PROPERTIES (GEOLOGY)
Application of remote sensing techniques for the seismo-tectonic study of Nahanni earthquake area
[ISBN-0-315-85942-3] p 3334 N94-30037
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005915] p 3367 N94-30883
STRUCTURAL RELIABILITY
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
STRUCTURAL STABILITY
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
STRUCTURAL VIBRATION
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681
Rotorcraft airframe structural optimization for vibration and dynamic stress reduction including damping treatment p 3147 N94-29878
Spectral analysis of wave propagation in connected waveguides p 3277 N94-29944
Analysis and design of inflatable aerospace structures p 3403 N94-30799
STRUCTURED PROGRAMMING
Object-based design of embedded software
[PB94-132073] p 3407 N94-28403
The ABC structure editor: Structure-based editing for the ABC programming environment
[CWI-CS-R9256] p 3418 N94-29487
STRUTS
Mars rover mechanisms designed for Rocky 4 p 3161 N94-29630
STUDENTS
Summer intern program
[AD-A275194] p 3466 N94-28888
Application of digital video to hypermedia training systems
[AD-A274989] p 3409 N94-28910
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175
STYRENES
Ballistic performance of polycarbonate/polyester and polycarbonate/styrene- acrylonitrile microlayer sheets
[AD-A275462] p 3177 N94-28735
SUBDUCTION (GEOLOGY)
The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969
SUBJECTS
Catalog of Air Force weather technical publications 1992-1993
[AD-A275635] p 3368 N94-28638
SUBREFLECTORS
Beam scanning offset Cassegrain reflector antennas by subreflector movement
[NASA-CR-191604] p 3160 N94-28836
SUBROUTINE LIBRARIES (COMPUTERS)
Program derivation by proof transformation
[AD-A275260] p 3453 N94-29304
SUBSONIC FLOW
The 3-D LDV measurements on a 30-degree swept wing with a simulated ice accretion
[NASA-CR-195327] p 3132 N94-30124
Canonical-variables multigrid method for steady-state Euler equations
[NASA-CR-194888] p 3454 N94-30208
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design
[NLR-TP-92524-U] p 3134 N94-30493
SUBSONIC WIND TUNNELS
The nozzle acoustic test rig: An acoustic and aerodynamic free-jet facility
[NASA-TM-106495] p 3156 N94-28749
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
SUBSTITUTES
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
Non-aqueous cleaning solvent substitution
[DE94-005339] p 3219 N94-30245
Non-aqueous cleaning solvent substitution p 3354 N94-30466
Proceedings of the 1993 Windsor Workshop on Alternative Fuels
[DE94-003908] p 3226 N94-30612
SUBSTRATES
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Development of large area RF induction plasma for cost effective diamond
[AD-A275888] p 3504 N94-28776
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
Silicon germanium carbon heteroepitaxial growth on silicon
[AD-A275197] p 3512 N94-28889
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron
[DE94-005428] p 3221 N94-30896
SUDDEN IONOSPHERIC DISTURBANCES
Solar-geophysical data number 591, November 1993. Part 1: Prompt reports. Data for September, October 1993 and late data
[PB94-140548] p 3550 N94-29122
SUGARS
Instrumental development of novel detection and separation methods for capillary electrophoresis
[DE94-005554] p 3187 N94-28519
SUITS
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
SULFIDES
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336
SULFONES
Poly(arylene ether-co-imidazole)s as toughness modifiers for epoxy resins
[NASA-CASE-LAR-15229-1-CU] p 3215 N94-29451
SULFUR COMPOUNDS
Polyimides containing the penta fluoro sulfanyl benzene moiety
[NASA-CASE-LAR-15082-1] p 3175 N94-29554
SULFURIC ACID
Ion-assisted tropospheric OH measurement technique p 3344 N94-28601
SUM RULES
Improved QCD sum rule estimates of the higher twist contributions to polarised and unpolarised nucleon structure functions
[PB94-138112] p 3487 N94-29161
Theoretical studies in hadronic and nuclear physics
[DE94-003524] p 3492 N94-30838
SUMMER
Summer intern program
[AD-A275194] p 3466 N94-28888
SUN
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
SUNSPOT CYCLE
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
SUPERCOMPUTERS
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Construction of a connectionist network supercomputer
[AD-A275765] p 3405 N94-28764
Parallel Fortran programming for NWT p 3129 N94-28991
A method of user interface for NWT p 3129 N94-28993
A porting methodology for parallel database systems
[AD-A275256] p 3529 N94-29053
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739
Information system for flow simulation based on the Navier-Stokes equations vectorization
[AD-B179293] p 3281 N94-30763
Modeling data throughput on communication networks
[DE94-005077] p 3260 N94-30772
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844
Supercomputing has to be part of an organization-wide automation concept
[AD-B174654] p 3433 N94-30913
SUPERCONDUCTING DEVICES
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
SUPERCONDUCTING FILMS
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low I/f noise
[DE94-005209] p 3261 N94-28546
Exploratory research for a high temperature superconducting integrated circuit
[AD-A275798] p 3262 N94-28767
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787
High Tc superconducting bolometric and nonbolometric infrared (IR) detectors
[NASA-CR-195728] p 3262 N94-28846
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
SUPERCONDUCTING MAGNETS
Battery energy and superconducting magnetic energy storage for utility applications: A qualitative analysis
[DE94-005382] p 3336 N94-28489
Estimating the cost of large superconducting thin solenoid magnets
[DE94-006289] p 3468 N94-30026
Algorithm and program ORANGE for magnetic field simulation of magnetic system spectrometer STORS
[DE94-608013] p 3421 N94-30083
A magnetically coupled quench detector for superconducting magnets
[DE94-006040] p 3268 N94-30904
AC losses for the self field of an AC transport current with a DC transport current offset in high T(c) superconducting magnet coils for MagLev application
[DE94-005187] p 3268 N94-30907
SUPERCONDUCTIVITY
Normal state resistivity of MBa2Cu3O(7-x) ceramics
[DE94-608456] p 3220 N94-30745
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758
SUPERCONDUCTORS
Computing at the leading edge: Research in the energy sciences
[DE94-006121] p 3563 N94-30844
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850
Mathematical models of hysteresis
[DE94-005681] p 3260 N94-30902
SUPERCRITICAL AIRFOILS
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
SUPERCRITICAL FLUIDS
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087

SUPERFLUIDITY
Acoustic and optical investigations of superfluid (3)He
[PB94-135415] p 3477 N94-29186
SUPERHEATING
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator
p 3277 N94-29899
SUPERHIGH FREQUENCIES
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616
A portable X-band front-end test package for beam-waveguide antenna performance evaluation. Part 2: Tests on the antenna p 3247 N94-29620
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Optimizing the Galileo space communication link
p 3250 N94-29663
X-band ultralow-noise maser amplifier performance
p 3251 N94-29672
Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29897
Measurement basis of near fields in spherical coordinates in the 100 MHz to 6 GHz band
[REPT-932-430-107] p 3255 N94-30153
SUPERLATTICES
Carrier collection and scattering in quantum well and superlattice devices
[AD-A275443] p 3512 N94-28880
Band structure of superlattice with (delta)-like potential
[DE94-608108] p 3516 N94-30072
Interband optical absorption in the Wannier-Stark ladder under the electron-LO-phonon resonance condition
[DE94-608097] p 3267 N94-30092
The growth of InAsSb/InGaAs strained-layer superlattices by metal-organic chemical vapor deposition
[DE94-005576] p 3518 N94-30316
SUPERNOVA REMNANTS
A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833
SUPERPLASTICITY
Superplasticity in fine-grained ceramics
[AD-A275461] p 3212 N94-28733
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479
SUPERSONIC AIRCRAFT
Advanced fuel properties: A computer program for estimating property values
[AD-A275248] p 3224 N94-28901
Numerical analysis of supersonic transport wings
p 3124 N94-28959
SUPERSONIC COMBUSTION
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor
p 3152 N94-29300
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
SUPERSONIC COMBUSTION RAMJET ENGINES
Numerical study on the interaction between scramjet engine modules caused by thermal choke
p 3125 N94-28960
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors
p 3151 N94-29292
Some problems of scramjet propulsion for aerospace planes. Part 1: Scramjet: Aims and features
p 3151 N94-29295
Scramjet CFD methods and analysis. Part 1: Scramjet CFD methods. Numerical simulation of the flow in scramjet duct p 3152 N94-29296
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor
p 3152 N94-29300
Some problems of scramjet propulsion for aerospace planes. Part 2: Scramjet: Development and test problems p 3152 N94-29301
Liquid atomization in supersonic flows
p 3276 N94-29839
SUPERSONIC FLIGHT
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
SUPERSONIC FLOW
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
Higher-order accurate numerical simulation of 3D supersonic mixing layers p 3124 N94-28954
Numerical simulation of supersonic flow around space plane with engine installed p 3125 N94-28961
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Scramjet CFD methods and analysis. Part 2: Scramjet CFD analysis. Numerical simulation of supersonic mixing and combustion applied to scramjet combustor
p 3152 N94-29300
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824
Liquid atomization in supersonic flows
p 3276 N94-29839
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
SUPERSONIC HEAT TRANSFER
Numerical simulation of aerothermodynamic heating of hypersonic space transportation vehicles
p 3124 N94-28955
SUPERSONIC INLETS
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
SUPERSONIC JET FLOW
Liquid atomization in supersonic flows
p 3276 N94-29839
SUPERSONIC NOZZLES
Supersonic gas-liquid cleaning system
p 3240 N94-30467
SUPERSONIC TRANSPORTS
Combustion for future supersonic transport propulsion
p 3190 N94-29249
A study of low emissions gas turbine combustions
[NASA-CR-195763] p 3152 N94-29860
SUPERSONIC WAKES
Numerical study on internal flows of centrifugal compressors p 3127 N94-28977
SUPERSONIC WIND TUNNELS
Laminar Flow Supersonic Wind Tunnel primary air injector p 3158 N94-29649
SUPERSYMMETRY
Emission of supersymmetric neutron pair by charged lepton in magnetic field
[DE93-634365] p 3481 N94-28468
Model of polylinear Bose- and Fermi-like oscillator
[DE94-606303] p 3485 N94-28718
Twistor-like type 2 superstring and bosonic string
[DE94-606339] p 3523 N94-28802
Operator analysis for quark and lepton masses in SO(10)
[DE94-005201] p 3491 N94-30709
Graded Froelicher-Nijenhuis brackets and the theory of recursion operators for super differential equations
[MEMO-1147] p 3460 N94-30736
SUPPORT SYSTEMS
Flight command software development: RAFALE studies p 3413 N94-29320
A Modular Artificial Intelligence Inference Engine System (MAIS) for support of on orbit experiments
[AIAA PAPER 94-1237-CP] p 3448 N94-30584
SUPPORTS
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809
SUPPRESSORS
Measurand transient signal suppressor
[NASA-CASE-MSC-22027-1] p 3435 N94-29466
SURFACE COOLING
The thermal consequences of giant impacts in the early solar system p 3543 N94-29698
SURFACE DEFECTS
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901
SURFACE EMITTING LASERS
Visible vertical cavity surface emitting lasers
[AD-A275334] p 3293 N94-28919
SURFACE ENERGY
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene
[NASA-TM-106460] p 3213 N94-28922
SURFACE FINISHING
Analysis of cost: CVD diamond deposition and finishing --- Quarterly report
[AD-A275586] p 3212 N94-28725
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
Evaluation of corrosion protecting properties of modern aircraft paint systems
[AD-B179388] p 3220 N94-30420
SURFACE LAYERS
Large eddy simulation of the upper atmospheric surface layer
[ISBN-0-315-85393-X] p 3365 N94-30134
SURFACE NAVIGATION
Automatic control steps for aircraft taxi guidance
p 3141 N94-29584
Navigation of military and space unmanned ground vehicles in unstructured terrains p 3144 N94-30282
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
SURFACE PROPERTIES
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
Density reduction: A mechanism for amorphization at high ion doses
[DE94-004793] p 3483 N94-28559
Surface structure and stereochemical properties of self-assembled monolayer materials
[DE94-004960] p 3484 N94-28578
Lead detection and mapping with reference to relationships between scale, sensor characteristics, surface conditions and atmospheric properties
[AD-A275321] p 3377 N94-28877
Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states
p 3294 N94-29531
The performance of gloss meters on curving surfaces
[NPL-DMM(A)-111] p 3501 N94-30522
Nuclear magnetic relaxation studies of semiconductor nanocrystals and solids
[DE94-006301] p 3520 N94-30842
Influence of surface defects and local structure on oxygenate reaction pathways over metal oxide surfaces
[DE94-005680] p 3522 N94-30901
SURFACE REACTIONS
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
The effects of molecular orientation geometry and surface anisotropy upon etching
[AD-A275154] p 3486 N94-29032
Electrochemical behavior and surface chemistry of nonequilibrium aluminum alloys: Passivity mechanism and fabrication methods
[AD-A275401] p 3204 N94-29196
Theoretical investigation of gas-surface interactions
[NASA-CR-195755] p 3272 N94-29378
Effect of non-metallic inclusions on the machinability of steel
[PB93-230233] p 3204 N94-29387
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253
Direct measurement of the reactivity of NH and OH on a silicon nitride surface
[DE94-005286] p 3199 N94-30260
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521
Modelling erosion damage from low-energy plasma gun simulations of disruptions
[DE94-005196] p 3509 N94-30697
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron
[DE94-005428] p 3221 N94-30896
SURFACE ROUGHNESS
Considerations in the modelling of seafloor acoustic backscatter
[AD-A275404] p 3478 N94-29206
Sensitivity and feedbacks associated with vegetation-related land surface parameters in a general circulation model p 3348 N94-29800
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions
p 3253 N94-29882
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096
An experimental study of the aerodynamics of a swept and unswept semispan wing with a simulated glaze ice accretion
[NASA-CR-195330] p 3133 N94-30152
Kinetics of surface roughening and smoothing during ion sputtering
[DE94-006358] p 3219 N94-30263

Experiments and theoretical considerations regarding the allowable roughness height in laminar flow
[PB94-125556] p 3133 N94-30389
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922

SURFACE TEMPERATURE
Prediction of survival times on land in a cold climate p 3379 N94-28423
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Thermal variation in vegetated or snow-covered background scenes and its effect on passive infrared systems
[AD-A275174] p 3325 N94-28849
The effects of molecular orientation geometry and surface anisotropy upon etching
[AD-A275154] p 3486 N94-29032
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Nonlinear absorption in high reflector multilayers
[DE94-005818] p 3295 N94-30598
Dual-band infrared imaging for quantitative corrosion detection in aging aircraft
[DE94-004187] p 3149 N94-30687
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899

SURFACE TREATMENT
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
The effect of mechanical paint stripping on the fatigue and fracture of thin aluminum airplane skin p 3205 N94-29900
Practical applications of plasma surface modification
[DE94-004892] p 3349 N94-29932
Ablation of polymers by ultraviolet pulsed laser
[DE94-608100] p 3218 N94-30066
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

SURFACE VEHICLES
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel p 3126 N94-28967
A generic semi-autonomous ground vehicle control system p 3306 N94-30283
Encoding technique for automated guided vehicle POSE recovery in a structured environment p 3144 N94-30286

SURFACE WAVES
The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969
On the nonlinear dynamics of ocean wave systems p 3378 N94-30790

SURFACTANTS
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468

SURGERY
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
A force-controllable macro-micro manipulator and its application to medical robots p 3314 N94-30441
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455
Dexterity enhancement in microsurgery using telemicro-robotics
[AIAA PAPER 94-1230-CP] p 3447 N94-30579

SURVEILLANCE
Cockpit video: A low cost BDA source
[AD-A275228] p 3150 N94-29389
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Airside ground movements surveillance p 3141 N94-29585
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350

SURVEILLANCE RADAR
GPS/GNSS for ATM p 3138 N94-29565
Development of precision runway monitor system for increasing capacity of parallel runway operations p 3142 N94-29587

SURVEYS
Advanced development of PV encapsulents
[DE94-000219] p 3336 N94-28500
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
An evaluation of techniques for ranking academic information systems journals
[AD-A275179] p 3529 N94-29066
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) library access guide, revision 3
[AD-A275405] p 3411 N94-29207
A survey of NASA and military standards on fault tolerance and reliability applied to robotics
[AIAA PAPER 94-1211-CP] p 3445 N94-30562

SURVIVAL
Prediction of survival times on land in a cold climate p 3379 N94-28423
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report p 3381 N94-28435
Advanced integrated cold protection for aircrew p 3381 N94-28436
Thermoregulation in the extreme cold environment p 3381 N94-28438

SUSPENSION SYSTEMS (VEHICLES)
Identification of the damping ratio relationship of an autovehicle suspension
[REPT-93-063] p 3313 N94-30937

SWELLING
Relationship between swelling and irradiation creep in cold-worked PCA stainless steel irradiated to approximately 178 dpa at approximately 400 C
[DE94-004368] p 3201 N94-28456
Molecular aspects of transport in thin films of controlled architecture
[DE94-004552] p 3211 N94-28457
Radiation effects in beryllium used for plasma protection
[DE94-004599] p 3201 N94-28460

SWEPT WINGS
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
The 3-D LDV measurements on a 30-degree swept wing with a simulated ice accretion
[NASA-CR-195327] p 3132 N94-30124
An experimental study of the aerodynamics of a swept and unswept semispan wing with a simulated glaze ice accretion
[NASA-CR-195330] p 3133 N94-30152

SWEPTBACK WINGS
Design and fabrication of forward-swept counterrotation blade configuration for wind tunnel testing
[NASA-CR-194868] p 3155 N94-28510

SWIRLING
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974

SWITCHES
The 100 kA, 5000 V solid-state opening switch for inductive energy storage
[AD-A274993] p 3263 N94-28994
Proton switches
[AD-A275150] p 3167 N94-29022

SWITCHING
Quantum interference phenomena and novel switching in split gate high electron mobility transistors p 3266 N94-29734

SWITCHING CIRCUITS
Photoconductive switching for high power microwave generation
[PB94-137460] p 3244 N94-29177

SWIVELS
Parachute Swivel Mechanism for planetary entry p 3162 N94-29643

SYMBOLS
A comparison of three aircraft attitude display symbology structures
[AD-A275172] p 3150 N94-29048

SYMMETRY
Some constraints and solutions of the Kadomtsev-Petviashvili equation
[DE93-634355] p 3466 N94-28467
Extended nonabelian symmetries for free fermionic model
[DE94-601554] p 3481 N94-28470
Remarks on Galois symmetry in RCFT
[PB94-138179] p 3467 N94-29147
A numerical study of gravitational collapse p 3548 N94-30271

SYMPATHETIC NERVOUS SYSTEM
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effect of water immersion on muscle sympathetic nerve response during static muscle contraction p 3394 N94-29865

SYMPTOMOLOGY
The Environmental Symptoms Questionnaire: Assessing reactions to environmental extremes in military operations p 3383 N94-28447

SYNAPSES
Synaptogenesis, selective stabilization, and free association
[AD-A275250] p 3392 N94-29431

SYNCHROCYCLOTRONS
On the (mu)SR activity at LNP JINR phasotron
[DE94-608385] p 3517 N94-30195

SYNCHRONISM
Synchronization in multistatic radar
[PB94-136975] p 3242 N94-28885
Acquisition time analysis of noncoherent PN sequence acquisition schemes
[AD-A275017] p 3244 N94-29094
Synchronization of microwave oscillators by direct optical injection
[ISBN-0-315-85546-0] p 3500 N94-30233
On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Loran-C time management p 3144 N94-30644
Optical techniques for time and frequency transfer p 3469 N94-30647
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653
The two-way time synchronization system via a satellite voice channel p 3471 N94-30658
LASSO experiment: Intercalibrations of the LASSO ranging stations p 3297 N94-30666
Time synchronized video systems p 3261 N94-30675
Using GLONASS signal for clock synchronization p 3475 N94-30680

SYNCHRONOUS PLATFORMS
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657

SYNCHRONOUS SATELLITES
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415

SYNCHROPHASOTRONS
Experimental setups and methods to obtain new nuclear data at intermediate and high energies
[DE94-607850] p 3489 N94-30052

SYNCHROTRON RADIATION
Activity report of Synchrotron Radiation Laboratory 1992
[JTN-94-80600] p 3495 N94-29596
Photoelectron diffraction and holography: Some new directions
[DE94-006297] p 3289 N94-30027
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717

SYNCHROTRONS
Measurement of the W mass in the D0 detector
[DE94-006002] p 3490 N94-30103
Search for the top quark in the electron-electron and electron-muon channels at D0
[DE94-006174] p 3492 N94-30779

SYNTAX
Models of the untyped lambda-calculus in semi Cartesian closed categories
[ML-93-05] p 3456 N94-30381
The Vanilla meta-interpreter for definite logic programs and ambivalent syntax
[CT-93-01] p 3424 N94-30386
The conjoinability relation in Lambek calculus in linear logic
[ML-93-03] p 3457 N94-30397
Comparative semantics for linear arrays of communicating processes
[CWI-CS-R9336] p 3426 N94-30491
Federal grammars and modular compilers
[REPT-93-054] p 3429 N94-30928

SYNTHESIS (CHEMISTRY)
Synthesis and characterization of novel ternary and quaternary reduced molybdenum oxides
[DE94-005563] p 3510 N94-28529
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide
[AD-A275019] p 3513 N94-29130
Synthesis and molecular structures of R(Me3CCH2)2In-E(SiMe3) (R = Me3CCH2, E = P or As; R = Me, E = P)
[AD-A275020] p 3486 N94-29131
Tris(trimethylsily)arsine and lithium bis(trimethylsily)arsenide
[AD-A275075] p 3189 N94-29140

The synthesis and structural characterization of Na3WO3N
[AD-A275243] p 3204 N94-29395
Preparation of monodispersed fine particles containing rare metals and rare earths p 3201 N94-29514
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma p 3211 N94-29516
Preparation of graphite fibers from polyimide p 3223 N94-29517
Production of fullerenes with concentrated solar flux
[DE94-000266] p 3514 N94-29801
Bench-scale synthesis of nanoscale materials p 3240 N94-30473
Synthesis and characterization of advanced materials for Navy applications p 3223 N94-30474

SYNTHETIC APERTURE RADAR
Proceedings of the International Symposium on Remote Sensing
[JTN-94-80578] p 3325 N94-28925
Keynote address --- Japanese Earth Resources Satellite 1 (JERS-1) and future remote sensing projects p 3326 N94-28926
Synthetic aperture radar applications: Now and in the future p 3260 N94-28927
Observations by ERS-1 start p 3327 N94-28933
Sea ice and oceans applications of SAR p 3327 N94-28934
Observatory system of Earth Resources Satellite-1 p 3330 N94-29221
Application of JERS-1 data to geologic analyses p 3330 N94-29222
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A275275] p 3377 N94-29436
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536
Pointing mechanisms for the Shuttle Radar Laboratory p 3162 N94-29638
Analysis and an image recovery algorithm for ultrasonic tomography system p 3397 N94-30456

SYNTHETIC FIBERS
Preparation of graphite fibers from polyimide p 3223 N94-29517
The flow field near the body surface with thin filaments p 3234 N94-29706

SYNTHETIC FUELS
Proceedings of the 1993 Windsor Workshop on Alternative Fuels
[DE94-003908] p 3226 N94-30612
Proceedings of the low cost materials of construction for biological processes workshop
[DE94-000218] p 3226 N94-30761

SYSTEM FAILURES
Algorithms for treating redundancy in repairable and non-repairable systems
[DE94-005289] p 3315 N94-29020
Potential software failures methodology analysis p 3414 N94-29329
Distributed applications and failure tolerance programs using a reconfigurable parallel architecture p 3417 N94-29345
TOTAL user manual
[NASA-TM-109101] p 3432 N94-30160
Flight simulator evaluation of advanced MLS procedures
[AD-B174270] p 3143 N94-30915

SYSTEM IDENTIFICATION
A neural network-based technique for structural identification of SISO systems
[REPT-93-076] p 3449 N94-30941

SYSTEMS ANALYSIS
SAFSIM theory manual: A computer program for the engineering simulation of flow systems
[DE94-005381] p 3270 N94-28488
Identification of components to optimize improvement in system reliability
[DE94-001601] p 3315 N94-28503
Rome Laboratory software engineering technology program p 3414 N94-29330
Dependability analysis of parallel systems using a simulation-based approach
[NASA-CR-195762] p 3431 N94-29846
Modelling the evolution of information systems
[TR-92-36] p 3535 N94-30329
Evolving information systems: Meeting the ever-changing environment
[TR-92-24] p 3535 N94-30359

SYSTEMS ENGINEERING
Design of parallel systems for signal processing
[AD-A275490] p 3430 N94-28659
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
[AD-A275860] p 3156 N94-28752
Designing for performance: A cognitive systems engineering approach to modifying an AWACS human computer interface
[AD-A275187] p 3399 N94-28861
Towards an information model and mechanisms for design rationale capture and use
[AD-A275060] p 3530 N94-29138
Artificial intelligence technology program at Rome Laboratory p 3414 N94-29328
Rome Laboratory software engineering technology program p 3414 N94-29330
On ground system integration and testing: A modern approach p 3150 N94-29334
A disciplined approach to software test and evaluation p 3416 N94-29339
A generalization of the software engineering maturity model p 3416 N94-29341
A common approach for an aerospace software environment p 3417 N94-29346
ISO overview: General presentation of the satellite, cryogenic aspects
[REPT-932-440-102] p 3231 N94-29416
The Common Modular Simulator (CMS): An architecture test bed for future advanced ATM systems p 3141 N94-29582
Advanced Design of Ventilation Systems
[VKI-LS-1993-07] p 3231 N94-29598
Introduction to the design of ventilation systems p 3231 N94-29599
Industrial ventilation p 3232 N94-29604
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
[AIAA PAPER 94-1212-CP] p 3445 N94-30563
Engineering of systems for application of scientific computing in industry WP project management ISNaS 9209099
[PB94-126232] p 3428 N94-30739
Solar photovoltaics for development applications
[DE94-006116] p 3340 N94-30843
A review of the status and capabilities of Navstar GPS
[AD-B174629] p 3143 N94-30854
Validation experiments with an Ethernet model using the simulation tool 'PROMISE'
[AD-B174795] p 3429 N94-30912

SYSTEMS INTEGRATION
Arcjet system integration development
[NASA-CR-187147] p 3171 N94-28736
On ground system integration and testing: A modern approach p 3150 N94-29334
Future manned systems advanced avionics study
[NASA-CR-188277] p 3150 N94-29377
Automation of the NDT diagnostic using neural nets. Application: Inspection of Airbus longitudinal joints during maintenance
[REPT-932-600-104] p 3315 N94-29474
Air-ground integration of the ATM system in PHARE p 3141 N94-29579
Integration of pyrotechnics into aerospace systems p 3161 N94-29634
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570
Robotic NDE inspection of advanced solid rocket motor casings
[AIAA PAPER 94-1222-CP] p 3446 N94-30571
The Automated Aircraft Rework System (AARS): A system integration approach
[AIAA PAPER 94-1225-CP] p 3446 N94-30574
View integration: A survey of current developments
[REPT-93-053] p 3536 N94-30927

SYSTEMS MANAGEMENT
Publications of the NASA Controlled Ecological Life Support System (CELSS) program 1989-1992
[NASA-CR-4603] p 3401 N94-30122

SYSTEMS SIMULATION
Thermal enclosure system functional simulation user's manual
[NASA-TM-109094] p 3466 N94-29489
The Common Modular Simulator (CMS): An architecture test bed for future advanced ATM systems p 3141 N94-29582
The use of task network simulation in workload prediction
[DCIEM-92-32] p 3402 N94-30132

SYSTEMS STABILITY
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
Dynamics and control of tethered satellite systems p 3170 N94-30864
Local interaction control for space construction p 3170 N94-30960

T

TABLES (DATA)
Transferable Output ASCII Data (TOAD) editor version 1.0 user's guide
[NASA-CR-187507] p 3408 N94-28818

TACTILE DISCRIMINATION
Tactility as a function of grasp force: Effects of glove, orientation, pressure, load, and handle
[NASA-TP-3474] p 3402 N94-30210

TAIL ROTORS
Acquisition, design modification, assembly, and ground test of NPS Hummingbird remotely piloted helicopter
[AD-A275546] p 3146 N94-28837

TALC
Non-chromate talc conversion coatings for aluminum
[DE94-005281] p 3207 N94-30053

TANKER AIRCRAFT
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report p 3381 N94-28435

TANTALUM
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774

TANTALUM ALLOYS
An investigation of the corrosion properties of aluminum-tantalum alloys using electrochemical impedance spectroscopy and local electrochemical impedance spectroscopy p 3209 N94-30521
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776

TANTALUM CARBIDES
Deposition of tantalum carbide coatings on graphite by laser interactions p 3223 N94-30475

TARGET ACQUISITION
Using multiple searchers to locate a randomly moving target
[AD-A275602] p 3463 N94-28768
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions p 3253 N94-29882
Infrared polarization signatures p 3258 N94-30506
Model for the simulation of atmospheric effects on targets to background passive signatures p 3258 N94-30507
The effect of enhanced backscattering on target detection p 3258 N94-30508
A hybrid electromagnetic-statistical approach for characterizing MMW scattering by terrain p 3259 N94-30510
Radar cross sections of ground clutter at 95 GHz for summer and fall conditions p 3259 N94-30512

TARGET RECOGNITION
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862
Spectral and polarimetric analysis of hyperspectral data collected by an acousto-optic tunable filter system
[AD-A275076] p 3329 N94-29095
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867
Knowledge combination and data fusion with application to recognition systems p 3259 N94-30513

TARGET THICKNESS
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551

TARGETS
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867
Experimental evaluation of camouflage effectiveness in the thermal infrared p 3257 N94-30502

TASK PLANNING (ROBOTICS)
A Space Station robot walker and its shared control software
[AIAA PAPER 94-1192-CP] p 3442 N94-30543
Task-level control for autonomous robots
[AIAA PAPER 94-1210-CP] p 3444 N94-30561
Using generic tool kits to build intelligent systems
[AIAA PAPER 94-1214-CP] p 3445 N94-30565

A reactive system for open terrain navigation: Performance and limitations
| AIAA PAPER 94-1218-CP | p 3445 N94-30566
The road plan model: Information model for planning road building activities
| AIAA PAPER 94-1219-CP | p 3445 N94-30567

TASKS
Simulation Networking/Training Requirements Relational Database: User's guide
| AD-A275634 | p 3528 N94-28637
Toward a model of expert knowledge structure and their role in cognitive task performance
| AD-A275641 | p 3529 N94-28645
Cognitive approach to specifications on air traffic controllers' decision assistance systems p 3139 N94-29571
Considerations on graphical user interfaces for intelligent ATM support systems p 3139 N94-29572
The use of task network simulation in workload prediction
| DCIEM-92-32 | p 3402 N94-30132

TASTE
Some issues on Japan's space food development and relating preliminary experimental study p 3388 N94-28498

TAXIING
Automatic control steps for aircraft taxi guidance p 3141 N94-29584
Airside ground movements surveillance p 3141 N94-29585
A novel near-range radar network for airport surface control p 3142 N94-29586

TAYLOR INSTABILITY
Dynamic response of ceramics
| AD-A275396 | p 3214 N94-29203
A review of the ablative stabilization of the Rayleigh-Taylor instability in regimes relevant to ICF
| DE94-005809 | p 3509 N94-30597
Design of an electromagnetic accelerator for turbulent hydrodynamic mix studies
| DE94-005821 | p 3281 N94-30600

TEACHING MACHINES
Reinforcement learning for robots using neural networks p 3437 N94-29853
Use of bad training data for better predictions
| DE94-006233 | p 3427 N94-30705

TECHNOLOGIES
Proceedings: SISAL 1993
| DE94-006641 | p 3420 N94-30056

TECHNOLOGY ASSESSMENT
A conceptual framework for software technology transition
| AD-A275637 | p 3407 N94-28639
Technology base enhancement program. Metal matrix composites
| AD-A275531 | p 3176 N94-28688
Report on smart materials
| PB94-137528 | p 3203 N94-29015
Combustion technology needs for advanced high pressure cycle engines p 3190 N94-29248
Proceedings of the Workshop on Microtechnologies and Applications to Space Systems
| NASA-CR-195688 | p 3235 N94-29767
Micro guidance and control technology overview p 3144 N94-29772
Technical analysis of alternative fueled vehicles
| DE94-744238 | p 3304 N94-30269
A look into the crystal ball: The next 25 years p 3475 N94-30681
Frequency standards from government laboratories over the next 25 years p 3475 N94-30682
Frequency standards from industry over the next 25 years p 3475 N94-30683
The future of time and frequency dissemination p 3476 N94-30684
DOE New Technology: Sharing New Frontiers, April 1, 1993 - September 30, 1993
| DE93-041289 | p 3535 N94-30699
DOE/KEURP site operator program
| DE94-005832 | p 3267 N94-30701
Investigation of the technology development status of alternate fuel vehicles
| DE94-744237 | p 3312 N94-30831
A review of the status and capabilities of Navstar GPS
| AD-B174629 | p 3143 N94-30854
Compressed natural gas fueled vehicles: The Houston experience
| DE94-005804 | p 3312 N94-30878

TECHNOLOGY TRANSFER
Spin-off companies as agents of technology transfer: An empirical study of the spin-off companies of the Technical Research Centre of Finland
| PB94-132248 | p 3537 N94-28405
Cleanroom engineering handbook. Volume 3: Project execution in the cleanroom environment
| AD-A275860 | p 3156 N94-28752
Cleanroom engineering handbook. Volume 4: Specification team practices
| AD-A275861 | p 3156 N94-28753
Technology transfer initiatives
| NASA-CR-195151 | p 3537 N94-29410
Overview of microoptics: Past, present, and future p 3235 N94-29771
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 1
| NASA-CP-3249 | p 3555 N94-30440
Precision and manufacturing at the Lawrence Livermore National Laboratory p 3240 N94-30449
Technology transfer and evaluation for Space Station telerobotics
| AIAA PAPER 94-1190-CP | p 3441 N94-30541
DOE New Technology: Sharing New Frontiers, April 1, 1993 - September 30, 1993
| DE93-041289 | p 3535 N94-30699
Geothermal direct-heat utilization assistance
| DE94-005831 | p 3340 N94-30700

TECHNOLOGY UTILIZATION
Spin-off companies as agents of technology transfer: An empirical study of the spin-off companies of the Technical Research Centre of Finland
| PB94-132248 | p 3537 N94-28405
Current leads and magnetic bearings
| DE94-004607 | p 3297 N94-28461
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Protein Crystal Growth Session
| JTN-94-80584 | p 3158 N94-28583
Remote sensing and global management p 3328 N94-28937
Computational fluid dynamics in ventilation. 4: Commercial application of CFD in ventilation p 3233 N94-29609
A 32 GHz microstrip array antenna for microspacecraft application p 3251 N94-29668
Human and institutional factors in GIS implementation by local governments p 3532 N94-29804
Robotics and the battlefield of the future p 3304 N94-30277
Hybrid optics for space applications
| ESA-CP-1158 | p 3501 N94-30418
Cubanes: Super explosives and potential pharmaceutical intermediates p 3227 N94-30454
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455
Composite redesign of obstetrical forceps p 3397 N94-30457
Intelligent robotics can boost America's economic growth
| AIAA PAPER 94-1301-CP | p 3439 N94-30527
On-orbit spacecraft servicing: An element in the evolution of space robotics applications
| AIAA PAPER 94-1236-CP | p 3448 N94-30583
DOE New Technology: Sharing New Frontiers, April 1, 1993 - September 30, 1993
| DE93-041289 | p 3535 N94-30699

TECTONICS
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940
The rupture process of large earthquakes along convergent margins: Cast studies from Alaska and Armenia p 3363 N94-29969

TEFLON (TRADEMARK)
High damage threshold anti-reflectors by physical vapor deposited amorphous fluoropolymer
| DE94-004865 | p 3212 N94-28560

TELECOMMUNICATION
The Telecommunications and Data Acquisition Report
| NASA-CR-195694 | p 3246 N94-29613
Hypra/TR: A tuple oriented recovery method for a continuously available distributed DBMS on a shared nothing multi-computer
| PB94-141264 | p 3533 N94-29921

TELECONFERENCING
Security aspects of computer supported collaborative work
| AD-A275638 | p 3528 N94-28640

TELEMETRY
A space-based classification system for RF transients
| DE94-003933 | p 3240 N94-28522
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
A dual-cavity ruby maser for the Ka-band link experiment p 3250 N94-29658
A digital combining-weight estimation algorithm for broadband sources with the array feed compensation system p 3250 N94-29660

TELEOPERATORS
Teleoperated systems for nuclear reactors: Inspection and maintenance
| AIAA PAPER 94-1176-CP | p 3439 N94-30528
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
| AIAA PAPER 94-1209-CP | p 3444 N94-30560
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
| AIAA PAPER 94-1212-CP | p 3445 N94-30563
A control method for bilateral teleoperating systems
| ISBN-0-315-78705-8 | p 3313 N94-30952

TELEROBOTICS
A new method for recognizing quadric surfaces from range data and its application to telerobotics and automation, final phase
| NASA-CR-195733 | p 3408 N94-28825
Thermal enclosure system functional simulation user's manual
| NASA-TM-109094 | p 3466 N94-29489
Aspects of the operator interface for military robotic applications in unstructured environments p 3309 N94-30304
A multiplexed two-way solid communications link for teleoperated robots p 3310 N94-30310
Task automation in a successful industrial telerobot
| AIAA PAPER 94-1189-CP | p 3441 N94-30539
Technology transfer and evaluation for Space Station telerobotics
| AIAA PAPER 94-1190-CP | p 3441 N94-30541
Space flight manipulator technologies and requirements for the NASA Flight Telerobotic Servicer (FTS)
| AIAA PAPER 94-1191-CP | p 3441 N94-30542
A Space Station robot walker and its shared control software
| AIAA PAPER 94-1192-CP | p 3442 N94-30543
Technology for robotic surface inspection in space
| AIAA PAPER 94-1193-CP | p 3442 N94-30544
Object-based task-level control: A hierarchical control architecture for remote operation of space robots
| AIAA PAPER 94-1209-CP | p 3444 N94-30560
A performance analysis method for distributed real-time robotic systems: A case study of remote teleoperation
| AIAA PAPER 94-1212-CP | p 3445 N94-30563
Dexterity enhancement in microsurgery using telemicro-robotics
| AIAA PAPER 94-1230-CP | p 3447 N94-30579
Terrestrial applications of NASA space telerobotics technologies
| AIAA PAPER 94-1235-CP | p 3448 N94-30582
A control method for bilateral teleoperating systems
| ISBN-0-315-78705-8 | p 3313 N94-30952

TELESCOPES
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
| NASA-TM-108448 | p 3160 N94-29470
Aircraft system aft telescope cavity configuration study for Stratospheric Observatory for Infrared Astronomy (SOFIA), phase 2
| NASA-CR-194266 | p 3147 N94-29685

TELEVISION SYSTEMS
A space-based classification system for RF transients
| DE94-003933 | p 3240 N94-28522

TELLURIUM ALLOYS
Thermodynamics of molten K-TE alloys
| DE94-608095 | p 3208 N94-30090

TEMPERATURE
Estimation of the net production of moss community at Langhovde, East Antarctica p 3358 N94-29081

TEMPERATURE CONTROL
Fuels combustion research
| AD-A275122 | p 3189 N94-29004
An alternate method for achieving temperature control in the -160 to +90 C range
| NASA-CASE-NPO-18995-1-CU | p 3288 N94-29497
Maintaining acceptable thermal comfort with a low air temperature by means of local heating
| PB94-138526 | p 3401 N94-29950
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
| NASA-TM-106546 | p 3279 N94-30147
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
| NASA-TM-109105 | p 3157 N94-30200
Process modelling for materials preparation experiments
| NASA-CR-195782 | p 3175 N94-30242

TEMPERATURE DEPENDENCE
Experimental and analytical studies of high heat flux components for fusion experimental reactor
| DE94-707671 | p 3504 N94-28556

Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
Creep and physical aging of PVC: Dependence on stress and temperature
[NPL-DMM(A)-115] p 3217 N94-29886
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Global patterns of cloud optical thickness variation with temperature and the implications for climate change
p 3374 N94-29972
Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures
[ISBN-0-315-85923-7] p 3218 N94-30036
The bases for the development of high-temperature integrated SQUID-systems
[DE94-607901] p 3267 N94-30073
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Strain relaxation and surface roughness as a function of growth temperature in linearly graded In(x)Al(1-x)As (x = 0.05 to 0.25) buffers
[DE94-005430] p 3519 N94-30592
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690
Scaling in heavy-fermion systems
[DE94-005002] p 3492 N94-30775

TEMPERATURE DISTRIBUTION
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
A novel spectroscopic measurement method of RF plasma for temperature and electron density diagnoses
p 3188 N94-28682
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
The mixing process in the quenching zone of the rich-lean-combustion concept p 3196 N94-29281
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288
Four-dimensional data assimilation using the adjoint method p 3455 N94-30353
Intra- versus interlayer pairing in the copper oxide superconductors: Response to a magnetic field
[DE94-005475] p 3521 N94-30898

TEMPERATURE EFFECTS
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407
Physiological investigations of the isolated rat's liver in hypothermia and hypoxia and their relevance in aircraft incidents above the sea p 3382 N94-28439
High temperature polymer dielectric film insulation
p 3167 N94-28715
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-195284] p 3318 N94-28840
Low temperature behavior of virgin martensite
[PB94-132925] p 3204 N94-29142
Pollutant emissions from and within a model gas turbine combustor at elevated pressures and temperatures
p 3194 N94-29271
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688
Mechanisms and effects of heat generation at the tips of dynamic cracks and notches in metals
p 3321 N94-29808
An actively cooled floating element skin friction balance for direct measurement in high enthalpy supersonic flows p 3289 N94-29824
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885
Antarctic Record, vol. 36, no. 3
[REPT-108] p 3363 N94-29978
Theory and application of a Radio-Acoustic Sounding System (RASS) p 3367 N94-30869

TEMPERATURE GRADIENTS
Lock-up failure of a four-bar linkage deployment mechanism p 3163 N94-29646
Theory and application of a Radio-Acoustic Sounding System (RASS) p 3367 N94-30869

TEMPERATURE MEASUREMENT
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Global Acoustic Mapping of Ocean Temperatures (GAMOT)
[AD-A275777] p 3376 N94-28740
Heat flux instrumentation for Hyflite thermal protection system
[NASA-CR-195731] p 3286 N94-28824
System for improving measurement accuracy of transducer by measuring transducer temperature and resistance change using thermoelectric voltages
[NASA-CASE-ARC-12014-1] p 3287 N94-29361
Determining noise temperatures in beam waveguide systems p 3249 N94-29657
Non-invasive temperature measurements using electron paramagnetic resonance spectroscopy
p 3198 N94-29881
A low noise silicon detector preamplifier system for room temperature x ray spectroscopy
[REPT-93-058] p 3291 N94-30930

TEMPERATURE PROFILES
On the temperature distribution near a cold surface
[AD-A275162] p 3332 N94-29288
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars?
[MATHS-REPT-A-198] p 3333 N94-29528
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
p 3375 N94-30863

TEMPERATURE SENSORS
Heat flux instrumentation for Hyflite thermal protection system
[NASA-CR-195731] p 3286 N94-28824

TEMPLATES
Template synthesized nanoscopic gold particles: Optical spectra and the effects of particle size and shape
[AD-A275378] p 3197 N94-29312

TEMPORAL DISTRIBUTION
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
Time and frequency technology at NIST
p 3468 N94-30641

TEMPORAL RESOLUTION
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Development of high time-resolution laser flash equipment for thermal diffusivity measurements using miniature-size specimens
[NIFS-268] p 3295 N94-30186
Multitemporal analysis of a braiding river: The advanced study of 1992
[NLR-TP-93100-U] p 3335 N94-30942

TENSILE CREEP
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885

TENSILE PROPERTIES
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822
An analysis of the microstructure and reinforcement distribution of an extruded particle-reinforced Al 6061-10 volume percent Al2O3 metal matrix composite
[AD-A275050] p 3178 N94-29166
Low dielectric polyimide fibers
[NASA-CASE-LAR-14526-1] p 3214 N94-29359

TENSILE STRENGTH
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
Numerical analysis of dynamic direct tension and direct compression tests
[AD-A275255] p 3319 N94-29433
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
Delamination growth in composites under cyclic loads
p 3183 N94-30256
Controlling the material properties of in vitro collagen through directed orientation and cross-linking of fibrils
p 3221 N94-30797

TENSILE STRESS
Micromechanics of the dynamic response of ceramics and ceramic composites p 3217 N94-29975

TENSILE TESTS
Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperatures under tension-tension loading
[AD-A275466] p 3176 N94-28673
Fatigue behavior of a cross-ply ceramic matrix composite under strain controlled tension-tension and tension-compression loading
[AD-A275374] p 3177 N94-29012
Microstructure/property relationships for SCS6/Timetal 21-S composite
[AD-A275056] p 3178 N94-29135
The effect of temperature on creep and physical ageing of PVC
[NPL-DMM(A)-93] p 3217 N94-29885
Particulate metal matrix composites: Draft procedure for tensile tests at ambient temperature
[NPL-DMM(A)-100] p 3184 N94-30419
Approximate estimation of the effects of asymmetry on the testing of tensile specimens
[NPL-DMM(A)-117] p 3322 N94-30523

TENSORS
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
A note on the Poisson brackets associated with Lax operators
[MATHS-REPT-A-195] p 3464 N94-29482
Anomalous algebraic structures in quantum field theories p 3524 N94-29911
Homogeneous Poisson structures
[DE94-608112] p 3453 N94-30119

TERBIUM COMPOUNDS
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690

TERMINAL BALLISTICS
Least-squares determination of burst-point coordinates
[AD-A275423] p 3452 N94-28864

TERMS
Index expression belief networks for information disclosure
[TR-92-23] p 3465 N94-30358
Total termination of term rewriting
[RUU-CS-92-42] p 3460 N94-30744

TERNARY ALLOYS
Terfenol: A study of the phase equilibrium diagram and the solidification process
[DE94-004883] p 3209 N94-30690

TERNARY SYSTEMS
The synthesis and structural characterization of Na3WO3N
[AD-A275243] p 3204 N94-29395
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336

TERRAIN
Environmental characterization for target acquisition. Analysis of thermal and visible imagery
[AD-A275414] p 3242 N94-28862
Feature mapping in a photogrammetric GIS
[AD-A275418] p 3325 N94-28863
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958
A physical optics model for scattering of HF radiation by irregular terrain
[DE94-006187] p 3255 N94-30106
A hybrid electromagnetic-statistical approach for characterizing MMW scattering by terrain
p 3259 N94-30510

TERRAIN ANALYSIS
The uses and limitations of fractal geometry in digital terrain modelling p 3333 N94-29958
Applicability of digital terrain analyses to wind energy prospecting and siting
[DE94-004363] p 3374 N94-30587

TEST CHAMBERS
Vacuum chamber and adaptors for shearography and holography
[NASA-CR-192467] p 3157 N94-29956
A modernised HST of NLR
[AD-B179220] p 3158 N94-30423

TEST EQUIPMENT
Modelling soft impacts for vibrational excitation of civil engineering structures
[PB94-137619] p 3320 N94-29681

TEST FACILITIES
Testing laboratories as notified bodies
[PB94-132396] p 3160 N94-28413
Data fusion and correlation techniques testbed development. Phase 1: Interim report
[SKD-1600-73-015] p 3405 N94-28533
Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000
CIAM experimental turboramjets p 3152 N94-29299
Development of electromagnetic compatibility tests
[REPT-932-430-110] p 3245 N94-29421
McMaster accelerator facility p 3496 N94-30217

Advanced development of the Spectrum Sciences Model 5005-TF, single event test fixture p 3291 N94-30218
Using Cf-252 for single event upset testing p 3496 N94-30219
A testbed for the development of ground-based control of space-based manipulators p 3309 N94-30306
Technology transfer and evaluation for Space Station telerobotics [AIAA PAPER 94-1190-CP] p 3441 N94-30541
Free-floating dual-arm robots for space assembly [AIAA PAPER 94-1195-CP] p 3442 N94-30546
The MACS-TSA applied in the ISO and SAX spacecraft projects [PB94-126257] p 3170 N94-30857

TEST PATTERN GENERATORS
An UIO-based method for protocol conformance testing [REPT-93-060] p 3429 N94-30931

TEST STANDS
Technology rigs: A tool for afterburner development p 3154 N94-29270

TEST VEHICLES
Mars rover mechanisms designed for Rocky 4 p 3161 N94-29630
DOE/KEURP site operator program [DE94-005832] p 3267 N94-30701

TESTING TIME
Validation and test of complex weapon systems p 3150 N94-29336

TETHERED SATELLITES
Dynamics and control of tethered satellite systems p 3170 N94-30864

TETRAETHYL ORTHOSILICATE
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron [DE94-005428] p 3221 N94-30896

TETRAHEDRONS
Rotator phases in narrow-gap semiconductors [DE94-005472] p 3521 N94-30897

TEXTILES
The potential of new textiles in improving survival prospects p 3380 N94-28430
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Development of braided rope engine seals [NASA-TM-105902] p 3298 N94-28838
Low dielectric polyimide fibers [NASA-CASE-LAR-14526-1] p 3214 N94-29359
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials [NASA-CR-195766] p 3183 N94-30016

TEXTURES
Failures to model the development of a cube texture during the high temperature compression of Al-Mg alloys [DE94-005013] p 3201 N94-28544
Seafloor characterization using texture [AD-A275399] p 3377 N94-29204
Unsupervised texture image segmentation by improved neural network ART2 [AIAA PAPER 94-1199-CP] p 3442 N94-30549
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum [DE94-004994] p 3210 N94-30774
A comparison of the evolution of cold and hot deformation microstructures and textures in fcc metals [DE94-005103] p 3210 N94-30777

THAILAND
Utilization of remote sensing data in Southeast Asia p 3327 N94-28936

THALLIUM COMPOUNDS
InTlSb for long-wavelength infrared photodetectors and arrays [AD-A275079] p 3512 N94-28872

THEMATIC MAPPING
Evaluation of simulated JERS-1 data for geologic mapping at Drum Mountains, Utah, Silver Bell, Arizona, and Wind River, Wyoming under the GEOSAT-ERSDAC/JAPEX/JGI/RESTEC joint studies p 3326 N94-28929
Extrapolation of point data for resource mapping p 3334 N94-29959

THEOREM PROVING
Partial support for the Second International Symposium on Artificial Intelligence and Mathematics [AD-A275199] p 3434 N94-29026
Program derivation by proof transformation [AD-A275260] p 3453 N94-29304
Addendum to the final report for the investigation of proof techniques within the EVES verification technology [TR-93-5451-03] p 3421 N94-30155
A smart child of Peano's [ML-92-10] p 3455 N94-30325
Only few graphs have bounded treewidth [RUU-CS-92-35] p 3455 N94-30333
Two algorithms for finding rectangular duals of planar graphs [RUU-CS-92-41] p 3423 N94-30345
Derivation lengths in term rewriting from interpretations in the naturals [RUU-CS-92-43] p 3455 N94-30346
The transient period of a cyclic process: An horizon theorem [MEMO-1149] p 3427 N94-30585
Bisimulations and predicate logic [CWI-CS-R9333] p 3460 N94-30735

THEOREMS
Dynamic generalized quantifiers and monotonicity [LP-93-02] p 3454 N94-30319
Modal quantification over structured domains [ML-93-02] p 3457 N94-30396
The transient period of a cyclic process: An horizon theorem [MEMO-1149] p 3427 N94-30585
Perfect binary space partitions [RUU-CS-93-23] p 3460 N94-30728
The structure of exponentials: Uncovering the dynamics of linear logic proofs [ML-93-10] p 3430 N94-30973
Inventory of fragments and exact models in intuitionistic proportional logic [ML-93-11] p 3463 N94-30974
Undecidability in diagonalizable algebras [ML-93-13] p 3463 N94-30976

THEORETICAL PHYSICS
Specialized data base management system for data processing in the experiments at low energies [DE94-606268] p 3485 N94-28621
Weak decays of charged K-mesons and charm particles [PB94-138062] p 3486 N94-29143
Magnetic properties of a quantum transverse spin-1 Blume-Emery-Griffiths model [DE94-608114] p 3517 N94-30109
Research laboratories annual report 1992 [DE94-608124] p 3555 N94-30168

THERMAL ANALYSIS
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual [NASA-CR-194462] p 3317 N94-28815
Modelling and analysis of creep deformation and fracture in a 1 Cr 1/2 Mo ferritic steel [PB94-138328] p 3319 N94-29121
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane [REPT-932-440-107] p 3168 N94-29543
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy [DE94-605138] p 3514 N94-29691
Analysis of infrared radiation heating process considering chemical reaction of material to be heated [DE94-744116] p 3199 N94-30267
Terfenol: A study of the phase equilibrium diagram and the solidification process [DE94-004883] p 3209 N94-30690

THERMAL BOUNDARY LAYER
Hydrodynamics of convection under winter polar leads [AD-A275182] p 3369 N94-29067

THERMAL BUCKLING
Free vibration of thermally loaded panels including initial imperfections and post-buckling effects [NASA-TM-109097] p 3479 N94-29461

THERMAL COMFORT
Thermal strain generated by an enhanced anti-G protection system in a hot climate p 3383 N94-28445
Recent Canadian advances in active thermal protection p 3384 N94-28451
Maintaining acceptable thermal comfort with a low air temperature by means of local heating [PB94-138526] p 3401 N94-29950

THERMAL CONDUCTIVITY
Properties of graphite fiber reinforced copper matrix composites for space power applications [NASA-CR-191026] p 3178 N94-29208
Insulative properties of two thermo-metal neoprenes [AD-A275209] p 3401 N94-29302
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228
Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites [DE94-006046] p 3508 N94-30365
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K [DE94-004796] p 3520 N94-30724
Design of a variable-conductance vacuum insulation [DE94-000270] p 3268 N94-30819
Self-similar variables and the problem of nonlocal electron heat conductivity [DE94-005826] p 3493 N94-30881

THERMAL CONTROL COATINGS
Thick thermal barrier coatings for diesel components [NASA-CR-187111] p 3537 N94-29350
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys [NASA-CASE-LEW-15535-1] p 3205 N94-29507

THERMAL CYCLING TESTS
Electron beam irradiation experiments of monoblock divertor mock-up [DE94-707497] p 3503 N94-28555
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems [NASA-TM-106549] p 3172 N94-28834
Static fracture behavior of a ceramic matrix composite at elevated temperatures [AD-A275363] p 3177 N94-29008
Evaluation of oxide-coated iridium-rhenium chambers [NASA-TM-106442] p 3172 N94-29097
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen [DE94-005451] p 3487 N94-29841

THERMAL DECOMPOSITION
Peroxy radical measurements with NCAR's chemical amplifier p 3345 N94-28603
Insensitive energetic materials: The importance of physical properties and molecular structure [AD-A275393] p 3225 N94-29308
Bench-scale synthesis of nanoscale materials p 3240 N94-30473

THERMAL DEGRADATION
Advanced development of PV encapsulents [DE94-000219] p 3336 N94-28500

THERMAL DIFFUSION
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments [NASA-TM-106532] p 3271 N94-28835
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface [DE94-005551] p 3521 N94-30899

THERMAL DIFFUSIVITY
Beta enhancement of thermal diffusivity in tokamaks [PPL-141] p 3508 N94-30159
Development of high time-resolution laser flash equipment for thermal diffusivity measurements using miniature-size specimens [NIFS-268] p 3295 N94-30186

THERMAL DISSOCIATION
Preparation, characterization, and facile thermolysis of (X2GaP(SiMe3)2) (X = Br, I) and (Cl3Ga2P)n; new precursors to nanocrystalline gallium phosphide [AD-A275019] p 3513 N94-29130

THERMAL EMISSION
Global approach towards the evaluation of thermal infrared countermeasures p 3258 N94-30504

THERMAL ENERGY
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262

THERMAL EXPANSION
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements [NASA-TM-106516] p 3214 N94-29105
Properties of graphite fiber reinforced copper matrix composites for space power applications [NASA-CR-191026] p 3178 N94-29208
Controlled thermal expansion printed wiring boards based on liquid crystal polymer dielectrics [NASA-CR-189338] p 3287 N94-29400
Scaling in heavy-fermion systems [DE94-005002] p 3492 N94-30775

THERMAL FATIGUE
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations [NASA-TM-106359] p 3317 N94-28819
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, mechanical fatigue, creep and thermal fatigue effects [NASA-CR-195284] p 3318 N94-28840
Transient thermal fatigue of ceramic composites p 3216 N94-29874

THERMAL INSULATION
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
High temperature arc-track resistant aerospace insulation p 3167 N94-28716
Quality and efficiency of solar collectors in Sweden [PB94-137486] p 3337 N94-28909
Insulative properties of two thermo-metal neoprenes [AD-A275209] p 3401 N94-29302

Composite flexible blanket insulation
[NASA-CASE-ARC-11955-1-CU] p 3180 N94-29509
Design of a variable-conductance vacuum insulation
[DE94-000270] p 3268 N94-30819

THERMAL MAPPING
Evolution of miniature detectors and focal plane arrays for infrared sensors p 3237 N94-29781
Thermal imaging for a mobile robot
p 3308 N94-30300

THERMAL PLASMAS
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564
Study on the formation of ultrafine particles of Sm-Co intermetallic compounds using RF thermal plasma
p 3211 N94-29516

THERMAL PROTECTION
Alleviation of thermal strain in the CF: Keeping our cool during the Gulf conflict p 3383 N94-28449
Recent Canadian advances in active thermal protection p 3384 N94-28451
Test of a new protection suit in a climatic chamber
p 3384 N94-28452
Heat flux instrumentation for Hyflite thermal protection system
[NASA-CR-195731] p 3286 N94-28824
Fuel injector design for high temperature aircraft engine p 3154 N94-29263
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147

THERMAL RADIATION
Thermal variation in vegetated or snow-covered background scenes and its effect on passive infrared systems
[AD-A275174] p 3325 N94-28849

THERMAL RESISTANCE
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302

THERMAL SHOCK
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097

THERMAL STABILITY
Barley cell culture as a producer of heterologous protein
[PB94-132339] p 3379 N94-28408
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
High temperature resistant jet fuels
p 3192 N94-29260
Research and development of high thermal stability fuels p 3192 N94-29261
Development of global/chemistry model for jet-fuel thermal stability based on observations from static and flowing experiments p 3192 N94-29262
Insensitive energetic materials: The importance of physical properties and molecular structure
[AD-A275393] p 3225 N94-29308

THERMAL STRESSES
Thermal strain generated by an enhanced anti-G protection system in a hot climate p 3383 N94-28445
Composite load spectra for select space propulsion structural components
[NASA-CR-194476] p 3316 N94-28508
An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Research and development of high thermal stability fuels p 3192 N94-29261
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Transient thermal fatigue of ceramic composites
p 3216 N94-29874
Multiple Concentric Cylinder Model (MCCM) user's guide
[NASA-CR-195299] p 3183 N94-30125

THERMAL VACUUM TESTS
Arcjet system integration development
[NASA-CR-187147] p 3171 N94-28736
An alternate method for achieving temperature control in the -160 to +90 C range
[NASA-CASE-NPO-18995-1-CU] p 3288 N94-29497

THERMIONIC CONVERTERS
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846

THERMIONIC DIODES
Investigations of large area electron beam diodes for excimer lasers
[DE94-005670] p 3295 N94-30595

THERMIONIC POWER GENERATION
TOPAZ 2 system description
[DE94-006230] p 3498 N94-30846
The TOPAZ 2 space reactor response under accident conditions
[DE94-004998] p 3498 N94-30847

THERMISTORS
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
The use of thermistors in the NPL electron-beam calorimeter
[PB94-139334] p 3290 N94-30782

THERMOCHEMICAL PROPERTIES
Advanced fuel properties: A computer program for estimating property values
[AD-A275248] p 3224 N94-28901

THERMOCHEMISTRY
Gas phase thermochemistry of organogermanium compounds
[DE94-004885] p 3187 N94-28561
Brief summary of accomplishments since our DOE-sponsored radon project commenced
[DE94-004643] p 3348 N94-29926

THERMOCOUPLES
System for improving measurement accuracy of transducer by measuring transducer temperature and resistance change using thermoelectric voltages
[NASA-CASE-ARC-12014-1] p 3287 N94-29361

THERMODYNAMIC CYCLES
Chambers of turboreactors with variable geometry: A response to the matrix of pollution in cycles at high temperature, high pressure p 3194 N94-29273
Lunar base heat pump, phase 1 draft
[NASA-CR-195211] p 3278 N94-29977

THERMODYNAMIC EFFICIENCY
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
Quality and efficiency of solar collectors in Sweden
[PB94-137486] p 3337 N94-28909

THERMODYNAMIC EQUILIBRIUM
Theoretical studies of solid-fluid phase equilibria
[DE94-006406] p 3226 N94-30708

THERMODYNAMIC PROPERTIES
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
WINDOW 4.0: Documentation of calculation procedures
[DE94-004935] p 3410 N94-29019
Surface tension of tin and its alloys with particular reference to solders
[PB94-138302] p 3204 N94-29119
Mechanical alloying processing with application to structural materials: ASSERT supplement
[AD-A275400] p 3204 N94-29205
Thermomechanical properties of 3-D transition metals
[DE94-604015] p 3487 N94-29500
The influence of temperature on microelectronic device failure mechanisms, phase 2
[AD-A275029] p 3265 N94-29511
Aspects of model-based rocket engine condition monitoring and control
[NASA-CR-195116] p 3173 N94-29848
Transient thermal fatigue of ceramic composites
p 3216 N94-29874
Particle kinetic simulation of high altitude hypervelocity flight
[NASA-CR-194535] p 3131 N94-29893
Thermodynamics of molten K-TE alloys
[DE94-608095] p 3208 N94-30090
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
The role of sea ice dynamics in global climate change
p 3350 N94-30620

THERMODYNAMICS
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203
Thermodynamic analysis of chemical compatibility of several compounds with Fe-Cr-Al alloys
[NASA-CR-191166] p 3181 N94-29684
Statistical description of hot and dense clustering matter
[DE94-608155] p 3490 N94-30112
Thermodynamics of computation and information distance
[CWI-CS-R9341] p 3526 N94-30433
The Boltzmann entropy and randomness tests
[CWI-CS-R9342] p 3426 N94-30434
The role of sea ice dynamics in global climate change
p 3350 N94-30620

THERMOGRAPHY
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Study of the problems of nonuniformity of heating in infrared vision applied to the inspection of materials having non-planar relief
[ISBN-0-315-85637-8] p 3316 N94-30235
Dual-band infrared imaging for quantitative corrosion detection in aging aircraft
[DE94-004187] p 3149 N94-30687

THERMOGRAVIMETRY
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691

THERMOMECHANICAL TREATMENT
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822

THERMONUCLEAR POWER GENERATION
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339

THERMOPHYSICAL PROPERTIES
Characterisation and processing of SiC/MAS-L glass ceramic matrix composite
[REPT-932-430-111] p 3179 N94-29412
Glass-ceramic matrix composites
[REPT-932-430-112] p 3179 N94-29413

THERMOPLASTIC RESINS
Polymer infiltration studies
[NASA-CR-195729] p 3213 N94-28748
Composite redesign of obstetrical forceps
p 3397 N94-30457
Improved construction materials for polar regions using microcellular thermoplastic foams p 3223 N94-30483

THERMOPLASTICITY
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688

THERMOREGULATION
Prediction of survival times on land in a cold climate
p 3379 N94-28423
Fuelling shivering in humans during cold water immersion p 3379 N94-28426
Biochemical enhancement of cold tolerance
p 3380 N94-28427
Treatment of mild immersion hypothermia by body-to-body and forced-air warming
p 3380 N94-28428
The potential of new textiles in improving survival prospects p 3380 N94-28430
Thermoregulation in the extreme cold environment
p 3381 N94-28438
Thermal strain generated by an enhanced anti-G protection system in a hot climate p 3383 N94-28445
Alleviation of thermal strain in the CF: Keeping our cool during the Gulf conflict p 3383 N94-28449
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29863
Effects of make-up on the heat transfer from the head in hyperthermic conditions p 3394 N94-29864

THERMOSPHERE
A study of the thermospheric dynamics of the high-latitude E region using a spectral thermospheric general circulation model p 3362 N94-29743

THESAURI
Computer-based linking of thesauri
p 3534 N94-29961

THICK PLATES
Further investigation of curve veering phenomena
p 3460 N94-30515

THICKNESS
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
An electromagnetic noncontacting sensor for thickness measurement in a dispersive medium
[AIAA PAPER 94-1200-CP] p 3443 N94-30551

THIN AIRFOILS
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471

THIN FILMS
Molecular aspects of transport in thin films of controlled architecture
[DE94-004552] p 3211 N94-28457

Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
Geometric structures of thin film: Pt on Pd(110) and NiO on Ni(100)
[DE94-005564] p 3211 N94-28530
A 3M high temperature dielectric film
p 3167 N94-28717
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
Method for forming thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18877-1-CU] p 3264 N94-29357
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD
p 3223 N94-29518
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635
Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films
p 3500 N94-29759
Micro-opto-mechanical devices and systems using epitaxial lift off p 3239 N94-29793
Lubricant rheology at high shear rates
p 3217 N94-29967
ECR plasma synthesis of silicon nitride films on GaAs and InSb
[DE94-005575] p 3515 N94-30006
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures
[ISBN-0-315-85923-7] p 3218 N94-30036
The bases for the development of high-temperature integrated SQUID-systems
[DE94-608462] p 3517 N94-30082
Plasma enhanced chemical vapor deposition of ZrO2 thin films
[DE94-006031] p 3218 N94-30104
Distribution functions of electrons within aluminium oxide thin films
[DE94-608418] p 3490 N94-30184
Effects of hydrogen on the resistivity of thin Au and Cu films p 3218 N94-30225
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247
Densification and crystallization of zirconia thin films prepared by sol-gel processing
[DE94-005573] p 3518 N94-30315
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773
Synthesis of (SiC)3N4 thin films by ion implantation
[DE94-006311] p 3521 N94-30851
RHEED studies of the nucleation, growth, and mobility of Ag atoms on the Si(111)7 x 7 surface
[DE94-005551] p 3521 N94-30899

THIN PLATES
Performance of a higher-order triangular finite element for composite laminated structures
p 3181 N94-29810

THIN WALLS
Numerical and experimental investigation of the bending response of thin-walled composite cylinders
[NASA-CR-195730] p 3317 N94-28801
Thin-walled orthotropic laminated beam theory
p 3324 N94-30920

THOMSON SCATTERING
Photon counting spectroscopy as done with a Thomson scattering diagnostic
[DE94-005543] p 3503 N94-28515

THREE BODY PROBLEM
A guidance and navigation system for two spacecraft rendezvous in translunar halo orbit
p 3142 N94-29837
Optimal low-thrust, Earth-Moon trajectories
p 3159 N94-30961

THREE DIMENSIONAL BODIES
Comparison of RCS prediction techniques, computations and measurements
[PB94-125515] p 3256 N94-30392

THREE DIMENSIONAL BOUNDARY LAYER
Long-wavelength asymptotics of unstable crossflow modes, including the effect of surface curvature
[NASA-CR-4579] p 3273 N94-29460

THREE DIMENSIONAL COMPOSITES
On the dynamic mechanical behavior of 3-D integrated fabric reinforced composites
[AD-A275424] p 3177 N94-28865

THREE DIMENSIONAL FLOW
Boundary layers induced by three-dimensional vortex loops
[AD-A275678] p 3270 N94-28665
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics
[NAL-SP-19] p 3123 N94-28946
On the numerical analysis of shear flows
p 3126 N94-28972
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
Application of flow field simulation to turbine vane design p 3127 N94-28978
Three-dimensional external flow computations using prismatic grid p 3127 N94-28979
An elliptic-hyperbolic grid generation method and application to compressor flows p 3128 N94-28981
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method
p 3128 N94-28983
A free-wake Euler and Navier-Stokes CFD method and its application to helicopter rotors including dynamic stall
[AD-A275416] p 3129 N94-29197
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries
p 3154 N94-29255
Time-resolved measurements in a three dimensional model combustor p 3196 N94-29283
RNS optimization procedure for three-dimensional composite velocity multi-block applications
p 3273 N94-29534
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
Numerical solution of 3-D Navier-Stokes equations in vorticity-velocity form for incompressible flows
p 3276 N94-29843
Unsteady transonic aerodynamics in frequency domain for flutter analysis p 3131 N94-29879
The 3-D LDV measurements on a 30-degree swept wing with a simulated ice accretion
[NASA-CR-195327] p 3132 N94-30124
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
The design of a system of codes for industrial calculations of flows around aircraft and other complex aerodynamic configurations
[PB94-125598] p 3133 N94-30387
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519

THREE DIMENSIONAL MODELS
Three-dimensional finite element modeling of a magnet array spinning above a conductor
[DE94-004573] p 3468 N94-28459
Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations
[AD-A275459] p 3325 N94-28808
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Higher-order accurate numerical simulation of 3D supersonic mixing layers p 3124 N94-28954
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel
p 3126 N94-28967
Some efficient procedures for correcting triangulated models
[PB94-136926] p 3452 N94-29171
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608
Effects and implications of fault zone heterogeneity and anisotropy on earthquake strong ground motion
p 3363 N94-29941
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
Magnetic properties of the three dimensional Ising model with interface single-ion anisotropy
[DE94-608116] p 3525 N94-30164
Magnetic properties of a transverse spin-1 Ising model with longitudinal crystal field interactions
[DE94-608118] p 3517 N94-30165
A deterministic algorithm for the three-dimensional diameter problem
[RUU-CS-92-45] p 3424 N94-30348
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525
A laboratory simulation of urban heat-island-induced circulation in a stratified environment
p 3367 N94-30921

THREE DIMENSIONAL MOTION
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Dynamic modeling of multibody flexible structures
p 3323 N94-30813

THROTTLING
Method of reducing hydraulic instability
[NASA-CASE-LEW-15463-1] p 3273 N94-29539

THRUST BEARINGS
Parachute Swivel Mechanism for planetary entry
p 3162 N94-29643

THRUST CHAMBERS
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097

THRUST VECTOR CONTROL
Design and test of electromechanical actuators for thrust vector control p 3163 N94-29650

THRUST-WEIGHT RATIO
Small low mass advanced PBR's for propulsion
[DE94-005142] p 3497 N94-30588

THUNDERSTORMS
Numerical simulations of a mountain thunderstorm. A comparison with Doppler radar observations
[AD-A275296] p 3369 N94-28873

TIDES
Tidal atlas software development
[AD-A275251] p 3377 N94-29432

TIMBER IDENTIFICATION
The extraction and representation of forest inventory information using continuous density surfaces
[ISBN-0-315-85658-0] p 3334 N94-30236

TIMBER INVENTORY
The extraction and representation of forest inventory information using continuous density surfaces
[ISBN-0-315-85658-0] p 3334 N94-30236

TIME
A time reasoning system based on the event calculus for scheduling in aeronautic maintenance
[REPT-932-710-101] p 3122 N94-29463

TIME CONSTANT
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555

TIME DEPENDENCE
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Numerical solution of the two-dimensional time-dependent incompressible Euler equations
[NASA-CR-195775] p 3277 N94-29859
Large-scale 3-D solutions of the time-dependent Dirac equation
[DE94-005591] p 3454 N94-30317

TIME DIVISION MULTIPLE ACCESS
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
M-interference queue analysis by decomposition method
[ISBN-0-315-85795-1] p 3453 N94-30139

TIME FUNCTIONS
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3462 N94-30971

TIME LAG
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
End-to-end delay reduction in narrow bandwidth real-time multimedia tele-education applications
[AD-B179614] p 3260 N94-30518
Tropospheric corrections to GPS measurements using locally measured meteorological parameters compared with general tropospheric corrections
p 3144 N94-30655
A comparison of several GPS data reduction methods
p 3145 N94-30662
Ionospheric corrections to precise time transfer using GPS p 3145 N94-30677

TIME MARCHING
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519

TIME MEASUREMENT
Cosmogenic C-14 in Antarctic and non-Antarctic meteorites and lunar samples
[NASA-CR-195795] p 3546 N94-29905
The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods
[DE94-006428] p 3514 N94-30001
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Status of frequency and time support for NASA systems p 3468 N94-30640
Time and frequency technology at NIST p 3468 N94-30641
European PTTI report p 3468 N94-30642
Loran-C time management p 3144 N94-30644
Report on NATO PTTI p 3469 N94-30645
GPS common-view time transfer p 3144 N94-30648
Cascaded clocks measurement and simulation findings p 3469 N94-30649
Time and position accuracy using codeless GPS p 3144 N94-30650
Relativistic theory for picosecond time transfer in the vicinity of Earth p 3470 N94-30653
Tropospheric corrections to GPS measurements using locally measured meteorological parameters compared with general tropospheric corrections p 3144 N94-30655
The two-way time synchronization system via a satellite voice channel p 3471 N94-30658
Remote clocks linked by a fully calibrated two-way timing link p 3471 N94-30659
Some applications of GPS timing information p 3145 N94-30661
A comparison of several GPS data reduction methods p 3145 N94-30662
Cesium and rubidium frequency standards status and performance on the GPS program p 3145 N94-30663
Comparison of LASSO and GPS time transfers p 3145 N94-30665
Noise and drift analysis of non-equally spaced timing data p 3472 N94-30667
An algorithm for the Italian atomic time scale p 3473 N94-30668
A comparative study of clock rate and drift estimation p 3473 N94-30669
Time maintenance system for the BMDO MSX spacecraft p 3171 N94-30672
Hydrogen maser clocks in space for solid-Earth research and time-transfer applications: Experiment overview and evaluation of Russian miniature sapphire loaded cavity p 3474 N94-30676
Russian national time scale long-term stability p 3475 N94-30679
Using GLONASS signal for clock synchronization p 3475 N94-30680
A look into the crystal ball: The next 25 years p 3475 N94-30681
The future of time and frequency dissemination p 3476 N94-30684

TIME OF FLIGHT SPECTROMETERS
Experimental setup for study of hadron and hard photon production in nucleus-nucleus collisions
[DE94-607849] p 3489 N94-30051

TIME OPTIMAL CONTROL
Pulse response based minimum time control of flexible structures p 3436 N94-29720
Nearly time-optimal feedback control of a magnetically levitated photolithography positioning system
[DE94-005288] p 3266 N94-30055
Neural network based time-optimal control of a magnetically levitated precision positioning system
[DE94-006573] p 3437 N94-30250

TIME RESPONSE
The two-way time synchronization system via a satellite voice channel p 3471 N94-30658

TIME SERIES ANALYSIS
Research activities of Martin C. Casdagli at SFI September 1989--May 1991
[DE94-005655] p 3463 N94-28548
A fractal analysis of near-field atmospheric concentration data
[AD-A275460] p 3355 N94-28728
The modified Cramer-von mises goodness-of-fit criterion for time series
[AD-A275377] p 3464 N94-29014
Time series comparisons of satellite and rocketsonde temperatures in 1978-1979
[NASA-TP-3409] p 3370 N94-29455
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919

TIME SIGNALS
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639
Two-way satellite time transfer: Overview and recent developments p 3469 N94-30646
Optical techniques for time and frequency transfer p 3469 N94-30647
Time transfer using geostationary satellites: Implementation of a Kalman filter p 3471 N94-30657
Comparison of LASSO and GPS time transfers p 3145 N94-30665
Time maintenance system for the BMDO MSX spacecraft p 3171 N94-30672
Time synchronized video systems p 3261 N94-30675
Ionospheric corrections to precise time transfer using GPS p 3145 N94-30677
The NIST Internet time service p 3475 N94-30678
Using GLONASS signal for clock synchronization p 3475 N94-30680

TIME TEMPERATURE PARAMETER
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen
[DE94-005451] p 3487 N94-29841
XCHEM-1D: A heat transfer/chemical kinetics computer program for multilayered reactive materials
[DE94-005072] p 3226 N94-30615

TIMING DEVICES
Status of frequency and time support for NASA systems p 3468 N94-30640
Time and frequency technology at NIST p 3468 N94-30641
European PTTI report p 3468 N94-30642
Report on NATO PTTI p 3469 N94-30645
LASSO experiment: Intercalibrations of the LASSO ranging stations p 3297 N94-30666

TIN
Intermetallic growth at the interface between copper and bismuth-tin solder
[AD-A275716] p 3202 N94-28643
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850

TIN ALLOYS
Surface tension of tin and its alloys with particular reference to solders
[PB94-138302] p 3204 N94-29119
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936
Microstructural development and mechanical behavior of eutectic bismuth-tin and eutectic indium-tin in response to high temperature deformation
[DE94-005202] p 3210 N94-30710
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850

TIN COMPOUNDS
The polymerization of epsilon-caprolactone with stannous catalyst and lactide/epsilon-caprolactone (LA/epsilon-CL) and lactide/glycolide (LA/GA) copolymers. Polymer technology publication series no. 15
[PB94-137551] p 3220 N94-30713

TIN OXIDES
Interface engineering in alumina fiber/glass composites p 3182 N94-29852

TIRES
Asphaltic concrete performance under heavy fighter aircraft loading
[AD-A275046] p 3157 N94-29151

TITANIUM
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Insulative properties of two thermo-metal neoprenes
[AD-A275209] p 3401 N94-29302
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472

TITANIUM ALLOYS
Effect of surface condition on strength and fatigue behavior of alumina ceramic
[AD-A275053] p 3214 N94-29133
Nature of dissolution of binary tantalum-titanium alloys by molten plutonium
[DE94-005090] p 3210 N94-30776
Fractographic and microstructural analysis of fatigue crack growth in Ti-6Al-4V fan disc forgings
[AD-B174765] p 3153 N94-30914

TITANIUM CARBIDES
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Metafusion: A breakthrough in metallurgy p 3211 N94-30446

TITANIUM NITRIDES
Sliding friction and wear between titanium nitride, M50 steel and silicon nitride (round 3 of VAMAS wear test program)
[IMR-TM-TR-003] p 3303 N94-30019

TITANIUM OXIDES
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
Induced crystallization in CW laser-irradiated sol-gel deposited titania films
[DE94-006527] p 3207 N94-30062

TITRATION
Measurement of atmospheric OH by titration of near-IR fluorescent dyes p 3344 N94-28599
The active titration method for measuring local hydroxyl radical concentration p 3345 N94-28602

TOKAMAK DEVICES
Theoretical reversed field pinch and tokamak studies
[DE94-005409] p 3503 N94-28490
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Electron beam irradiation experiments of monoblock divertor mock-up
[DE94-707497] p 3503 N94-28555
TFTR Ion Cyclotron Range of Frequencies (ICRF) experimental data analysis collaboration
[DE94-004699] p 3504 N94-28575
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
Liquid metal MHD and heat transfer in a tokamak blanket slotted coolant channel
[DE94-004622] p 3506 N94-29510
Higher order collisionless ballooning mode in tokamaks
[PPL-143] p 3507 N94-30156
Eigenmode analysis of the destabilized ion acoustic mode in tokamaks
[PPL-142] p 3507 N94-30158
Beta enhancement of thermal diffusivity in tokamaks
[PPL-141] p 3508 N94-30159
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760
Advanced steady-state operating scenarios
[DE94-004810] p 3509 N94-30768
Application of divertor cryopumping to H-mode density control in DIII-D
[DE94-004859] p 3510 N94-30832
Superdiffusion
[DE94-002333] p 3492 N94-30834
Magnetic flux reconstruction methods for shaped tokamaks
[DE94-005827] p 3510 N94-30882

TOLUENE
Fuels combustion research
[AD-A275122] p 3189 N94-29004

TOMOGRAPHY
Dual-Band Infrared (DBIR) imaging inspections of Boeing 737 and KC-135 aircraft panels
[DE94-005700] p 3122 N94-29842
Analysis and an image recovery algorithm for ultrasonic tomography system p 3397 N94-30456

TOOLING
Near-net-shape manufacturing: Spray-formed metal matrix composites and tooling p 3186 N94-30447

TOPEX
TOPEX/POSEIDON operational orbit determination results using global positioning satellites p 3160 N94-29666

TOPOGRAPHY
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Exploitation of stereophotogrammetrically derived 3-D wireframe models to produce urban simulations
[AD-A275459] p 3325 N94-28808
Feature mapping in a photogrammetric GIS
[AD-A275418] p 3325 N94-28863
Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393
Applicability of digital terrain analyses to wind energy prospecting and siting
[DE94-004363] p 3374 N94-30587

TOPOLOGY
Reidemeister numbers of equivariant maps
[PB94-138286] p 3452 N94-29118

High throughput network for multiprocessor interconnections
[VTT-PUBS-147] p 3245 N94-29468
Symplectic topology of integrable Hamiltonian systems
[DE94-608120] p 3467 N94-30166
Topological models for higher order control flow
[CWI-CS-R9340] p 3425 N94-30432
A monotonicity conjecture for real cubic maps
[DE94-003969] p 3335 N94-30610
Non-commutative geometry
[PB94-139342] p 3462 N94-30889

TORCHES
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446

TORNADOES
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report
p 3481 N94-28435
On the origins of low-level tornadic circulations within the remnants of hurricane Andrews
[AD-A275373] p 3369 N94-29011
Dynamics of tornado-like vortices
p 3371 N94-29753

TOROIDAL PLASMAS
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
Formation and self-healing of magnetic islands in finite-beta helias equilibria
[NIFS-269] p 3505 N94-29483

TORQUE
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538
The response of flexible manipulators to a new computed torque control strategy: Simulation results
p 3308 N94-30295

TORQUE MOTORS
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358

TORQUEMETERS
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538

TORSION
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Interlaminar fracture analysis for laminated composites under combined loading p 3182 N94-29964

TORUSES
Infrared properties of obscuring dust tori in active galactic nuclei p 3545 N94-29832

TOTAL QUALITY MANAGEMENT
The development and demonstration of the metric assessment tool
[AD-A275788] p 3230 N94-28742
An evaluation of techniques for ranking academic information systems journals
[AD-A275179] p 3529 N94-29066
Why TQM fails (and what you can do about it)
[DE93-018945] p 3527 N94-30698

TOUGHNESS
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
Poly(arylene ether-co-imidazole)s as toughness modifiers for epoxy resins
[NASA-CASE-LAR-15229-1-CU] p 3215 N94-29451

TOWED BODIES
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838

TOWERS
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160

TOXIC HAZARDS
Characterization of air emissions from the simulated open combustion of fiberglass materials
[PB94-136231] p 3347 N94-29192
Toxicity of carbon monoxide-hydrogen cyanide gas mixtures: Exposure concentration, time-to-incapacitation, carboxyhemoglobin, and blood cyanide parameters
[DOT/FAA/AM-94/7] p 3395 N94-29919

TOXICITY
Toxicity of carbon monoxide-hydrogen cyanide gas mixtures: Exposure concentration, time-to-incapacitation, carboxyhemoglobin, and blood cyanide parameters
[DOT/FAA/AM-94/7] p 3395 N94-29919
Intermedia transfer factors for fifteen toxic pollutants released to air basins in California
[DE94-005699] p 3349 N94-30044
Computerized in vitro test for chemical toxicity based on tetrahymena swimming patterns
p 3354 N94-30463

TOXICITY AND SAFETY HAZARD
Fire behavior of aeronautical materials
[REPT-932-600-105] p 3197 N94-29457

TOXINS AND ANTITOXINS
Effects of pressure on membrane-associated receptors and effector elements
[AD-A275813] p 3384 N94-28829

TRACE CONTAMINANTS
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Using spacecraft trace contaminant control systems to cure sick building syndrome p 3354 N94-30470
A new material for removing heavy metals from water
p 3354 N94-30471

TRACE ELEMENTS
JPL Fourier transform ultraviolet spectrometer
p 3343 N94-28593
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
Evaluating models of climate and forest vegetation
p 3353 N94-30637
The development and evaluation of a tunable diode laser trace gas sensor for the measurement of N2O and CH4 fluxes using micrometeorological techniques
[ISBN-0-315-78975-1] p 3296 N94-30801
Geochemical and fluid dynamic investigations into the nature of chemical variability in the Earth's mantle
p 3367 N94-30917

TRACKED VEHICLES
A newly developed snow vehicle (SM100S) for Antarctica. Part 1: Necessity and process of the development p 3314 N94-29981
A newly developed snow vehicle (SM100S) for Antarctica. Part 2: Design of the system
p 3314 N94-29982
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel
p 3364 N94-29983
A newly developed snow vehicle (SM100S) for Antarctica. Part 4: Low temperature properties of crawler belt p 3314 N94-29984
A newly developed snow vehicle (SM100S) for Antarctica. Part 5: Result of general performance tests
p 3314 N94-29985

TRACKING (POSITION)
Digital tracking and control of retinal images
[AD-A275469] p 3389 N94-28810
Non-intrusive gaze tracking using artificial neural networks
[AD-A275186] p 3397 N94-28860
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
ACCS Surveillance Exploratory Prototype (ASEP)
p 3138 N94-29566
An improved conscan algorithm based on a Kalman filter p 3251 N94-29670

TRACKING NETWORKS
The 25th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3267] p 3468 N94-30639

TRACKING STATIONS
Radio science ground data system for the Voyager-Neptune encounter, part 1
p 3248 N94-29623

TRAILERS
Lunar surface operations. Volume 4: Lunar rover trailer
[NASA-CR-195554] p 3299 N94-29386

TRAILING EDGES
Numerical analysis of airfoil for helicopter blade at high angle of attack using Navier-Stokes code
p 3124 N94-28958

TRAINING DEVICES
A cognitive model of decision making: Chunking and the radar detection device
[AD-A275185] p 3242 N94-28859

TRAINING SIMULATORS
Data fusion and correlation techniques testbed development. Phase 1: Interim report
[SKD-1600-73-015] p 3405 N94-28533
Simulation Networking/Training Requirements Relational Database: User's guide
[AD-A275634] p 3528 N94-28637

TRAJECTORIES
Iterative procedure as equation of motion
[DE94-608008] p 3453 N94-30078
Fast precise algorithm for simulation of ionization energy losses
[DE94-608010] p 3421 N94-30080

TRAJECTORY ANALYSIS
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Advanced air traffic control and flight management system concepts p 3140 N94-29576
Experimental flight management system
p 3141 N94-29580
Optimal low-thrust, Earth-Moon trajectories
p 3159 N94-30961

TRAJECTORY CONTROL
A 6MeV heavy ion beam probe for the Large Helical Device
[NIFS-272] p 3505 N94-29397
Profile negotiation: An air/ground automation integration concept for managing arrival traffic
p 3140 N94-29578
Optimal low-thrust, Earth-Moon trajectories
p 3159 N94-30961

TRAJECTORY MEASUREMENT
A simulator for multi-radar analysis for realistic traffic
[AD-B179099] p 3142 N94-30439

TRAJECTORY OPTIMIZATION
Profile negotiation: An air/ground automation integration concept for managing arrival traffic
p 3140 N94-29578
Optimal low-thrust, Earth-Moon trajectories
p 3159 N94-30961

TRAJECTORY PLANNING
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480
Air-ground integration of the ATM system in PHARE
p 3141 N94-29579
Experimental flight management system
p 3141 N94-29580
The PHARE advanced tools p 3141 N94-29581
Collision avoidance and control of multiple revolute manipulators p 3302 N94-29884
The NRC mobile robot project p 3305 N94-30280
An optimal obstacle avoidance path planning algorithm for the Excalibur robot p 3306 N94-30287
Motion control of mobile robots p 3310 N94-30309
Unmanned vehicle mobility: Limits of autonomous navigation p 3310 N94-30311
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
Fuzzy logic based robotic controller
[AIAA PAPER 94-1202-CP] p 3443 N94-30553
Aspects of vision and planning in a dynamic, uncertain environment p 3448 N94-30803
The experimental flight management system: An air traffic management research tool
[NLR-TP-92253-U] p 3143 N94-30943

TRANSATMOSPHERIC VEHICLES
Numerical study on the interaction between scramjet engine modules caused by thermal choke
p 3125 N94-28960

TRANSDUCERS
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404
System for improving measurement accuracy of transducer by measuring transducer temperature and resistance change using thermoelectric voltages
[NASA-CASE-ARC-12014-1] p 3287 N94-29361
Method and apparatus for indicating disbonds in joint regions
[NASA-CASE-LAR-14626-1] p 3315 N94-29548

TRANSFER FUNCTIONS
Frequency-domain transfer-function identification using Chebyshev polynomials
[DE94-004777] p 3451 N94-28739
Polynomial modeling of analog-to-digital converters
[DE94-005579] p 3406 N94-30008

TRANSFORMATIONS (MATHEMATICS)
Reidemeister numbers of equivariant maps
[PB94-138286] p 3452 N94-29118
Trace formulas and dynamical zeta functions in the Nielsen theory
[PB94-138195] p 3467 N94-29163
Integer cosine transform for image compression
p 3247 N94-29619
Parsing in ISBES
[TR-92-32] p 3432 N94-30363
Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403
Termination of term rewriting by semantic labelling
[RUU-CS-93-24] p 3459 N94-30424
Isomorphisms between predicate and state transformers
[CWI-CS-R9338] p 3459 N94-30430

Relating state transformation semantics and predicate transformer semantics for parallel programs
[CWI-CS-R9339] p 3433 N94-30431

TRANSFORMERS
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low l/f noise
[DE94-005209] p 3261 N94-28546

TRANSIENT LOADS
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469
Transient thermal fatigue of ceramic composites
p 3216 N94-29874

TRANSIENT RESPONSE
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
Performance evaluation of a 22.5/30 kW 270 volts direct current generator system
[AD-A275106] p 3263 N94-28913
Evaluation of the transient operation of advanced gas turbine combustors p 3154 N94-29269
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469
Concurrent simulation and constraint stabilization for flexible multibody systems p 3154 N94-29532

TRANSISTORS
Tunnelling hot electron transfer amplifiers
[AD-A275529] p 3262 N94-28687
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040

TRANSITION FLOW
Long-wavelength asymptotics of unstable crossflow modes, including the effect of surface curvature
[NASA-CR-4579] p 3273 N94-29460
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958

TRANSITION METALS
Polymer technology publication series no. 16
[PB94-135522] p 3214 N94-29157
Thermomechanical properties of 3-D transition metals
[DE94-604015] p 3487 N94-29500
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
Studies of high temperature ternary phases in mixed-metal-rich early transition metal sulfide and phosphide systems
[DE94-006034] p 3209 N94-30336

TRANSITION TEMPERATURE
Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Calculating the J(c), B, T surface for commercial niobium tin conductors using a reduced state model
[DE94-006296] p 3520 N94-30850

TRANSLATING
More problems on rewriting
[CWI-CS-R9332] p 3428 N94-30734

TRANSMISSION
A combined electron beam/optical lithography process step for the fabrication of sub-half-micron-gate-length MMIC chips p 3240 N94-30445

TRANSMISSION EFFICIENCY
End-to-end delay reduction in narrow bandwidth real-time multimedia tele-education applications
[AD-B179614] p 3260 N94-30518

TRANSMISSION LINES
Preliminary analysis of Asynchronous Transfer Mode (ATM) over microwave channels
[AD-A275214] p 3243 N94-29069
Development of an accurate transmission line fault locator using the global positioning system satellites
p 3144 N94-30652
Electric power lines: Questions and answers on research into health effects
[DE94-005637] p 3353 N94-30757

TRANSMISSION LOSS
Investigation on application of genetic algorithms to optimal reactive power dispatch of power systems
[MATHS-REPT-A-197] p 3266 N94-29527
A transmission-loss monitor using current transformers
[DE94-003974] p 3267 N94-30716

TRANSMISSIONS (MACHINE ELEMENTS)
Experimental validation of finite element and boundary element methods for predicting structural vibration and radiated noise
[NASA-CR-4561] p 3301 N94-29552
Metal band drives in spacecraft mechanisms
p 3162 N94-29637

TRANSMITTANCE
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Multispectral transmittance measurements through man-made water fogs p 3257 N94-30499
Estimation of transmittance from satellite imagery
p 3257 N94-30500

TRANSMITTER RECEIVERS
Solid-state, active-phased arrays: Some aspects of receiver design
[AD-A275893] p 3527 N94-28779
Ground independent landing system
p 3137 N94-29564
A commercialized, continuous flow fiber optic sensor for trichloroethylene and haloforms
p 3502 N94-30462

TRANSMITTERS
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522

TRANSOCEANIC FLIGHT
Opportunities for integrating the aircraft FMS, aeronautical operational control centers, and future air traffic management systems in oceanic airspace
p 3140 N94-29577

TRANSONIC FLOW
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual
[NASA-CR-187105] p 3152 N94-29438
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545
Unsteady transonic aerodynamics in frequency domain for flutter analysis p 3131 N94-29879
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
A residual correction method applied to 2D multi-point airfoil design and 3D single-point wing design
[NLR-TP-92524-U] p 3134 N94-30493
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade
p 3282 N94-30816

TRANSONIC FLUTTER
Prospects of time-linearized unsteady calculation methods for exponentially diverging motions in aeroelasticity
[PB94-126224] p 3134 N94-30740
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade
p 3282 N94-30816

TRANSONIC WIND TUNNELS
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545
A modernised HST of NLR
[AD-B179220] p 3158 N94-30423
Analysis of fluctuating static pressure measurements in a large high Reynolds number transonic cryogenic wind tunnel p 3158 N94-30788

TRANSPARENCE
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042

TRANSPIRATION
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments
[NASA-TM-106532] p 3271 N94-28835

TRANSPONDERS
Design and analysis of a low-loss linear analog phase modulator for deep space spacecraft X-band transponder applications p 3248 N94-29625
Design and implementation of a hybrid digital phase-locked loop with a TMS320C25: An application to a transponder receiver breadboard
p 3251 N94-29667
Measurement of the frequency stability of responders in aircraft p 3261 N94-30673

TRANSPORT AIRCRAFT
Numerical analysis of supersonic transport wings
p 3124 N94-28959
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721

TRANSPORT PROPERTIES
Molecular aspects of transport in thin films of controlled architecture
[DE94-004552] p 3211 N94-28457
Transport properties of epitaxial lift off films
[NASA-TM-106156] p 3264 N94-29209
The effect of magnetic field configuration on particle pinch velocity in Compact Helical System (CHS)
[NIFS-267] p 3505 N94-29398
Nonadiabatic effects in the quantum Hall regime
p 3513 N94-29530
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045
Volume averaged model for the mechanics of alloys solidification
[PB94-138617] p 3208 N94-30113
Process modelling for materials preparation experiments
[NASA-CR-195782] p 3175 N94-30242
The long-range transport of aerosol particles over the North Atlantic Ocean p 3386 N94-30867

TRANSPORT THEORY
Solution of charged particle transport equation by Monte-Carlo method in the BRANDZ code system
[DE94-606270] p 3484 N94-28614
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339
Ten new checks to assess the statistical quality of Monte Carlo solutions in MCNP
[DE94-006137] p 3465 N94-30366
Theory of ultra dense matter and the dynamics of high energy interactions involving nuclei
[DE94-004178] p 3491 N94-30686
Superdiffusion
[DE94-002333] p 3492 N94-30834

TRANSPORTATION
Electrical engineering and industrial electronics education days: Control of asynchronous generators
[PB94-135514] p 3266 N94-29523
TCM exemptions to promote alternative-fuel vehicles: The good, the bad, and the ugly
[DE94-005924] p 3311 N94-30703
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818

TRANSPORTER
An update on Lab Rover: A hospital material transporter
[AIAA PAPER 94-1228-CP] p 3447 N94-30577

TRAPPED PARTICLES
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191

TRAPPING
Charge trapping and breakdown in N2O oxides
[DE94-003775] p 3266 N94-30040
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191

TRAVELING WAVES
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
Development of an accurate transmission line fault locator using the global positioning system satellites
p 3144 N94-30652
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758

TREES
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461

TREES (MATHEMATICS)
Only few graphs have bounded treewidth
[RUU-CS-92-35] p 3455 N94-30333
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378
Treewidth of circle graphs
[RUU-CS-93-12] p 3458 N94-30405

A more compact visibility representation
[RUU-CS-93-26] p 3425 N94-30426
Efficient and constructive algorithms for the pathwidth and treewidth of graphs
[RUU-CS-93-27] p 3426 N94-30488
TREES (PLANTS)
Caesium-137 in a boreal forest ecosystem: Aspects on the long-term behavior
[PB94-137809] p 3347 N94-29158
Fractal approach to computer-analytical modelling of tree crown
[DE94-608089] p 3467 N94-30088
TRENDS
Interannual temperature variability and cyclone frequency over Eastern Canada and the New England States. A case study: Winter seasons 1931-1932 to 1984-1985
[ISBN-0-315-74841-9] p 3373 N94-29908
TRIANGULATION
Some efficient procedures for correcting triangulated models
[PB94-136926] p 3452 N94-29171
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406
Optimal size finite element meshes without obtuse and small angles
[RUU-CS-92-39] p 3462 N94-30860
TRIAXIAL STRESSES
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047
TRIBOLOGY
Atomic-scale friction measurements using friction force microscopy. Part 2: Application to magnetic media
[AD-A275202] p 3298 N94-29290
Lubrication of space systems
[NASA-TM-106392] p 3214 N94-29399
The 27th Aerospace Mechanisms Symposium
[NASA-CP-3205] p 3160 N94-29627
Metal band drives in spacecraft mechanisms p 3162 N94-29637
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
An asymptotic analysis for compressible gas lubrication of rough surfaces p 3222 N94-30922
TRIGGER CIRCUITS
Recent results from testing fast ADCs
[DE94-005565] p 3406 N94-30004
TRIGONOMETRIC FUNCTIONS
Some remarkable sine and cosine functions
[PB94-137759] p 3453 N94-29439
TRIMETHYL COMPOUNDS
Tris(trimethylsily)arsine and lithium bis(trimethylsily)arsenide
[AD-A275075] p 3189 N94-29140
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron
[DE94-005428] p 3221 N94-30896
TRITIUM
Argon frost continuous cryopump for fusion applications
[DE94-004478] p 3230 N94-29017
TROPICAL METEOROLOGY
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970
TROPICAL REGIONS
The dynamics of tropical intraseasonal variability p 3371 N94-29741
On the annual cycle of the tropical Pacific atmosphere and ocean p 3371 N94-29763
Interannual-decadal variability in tropical climate systems: Stable isotope records and general circulation model experiments p 3373 N94-29962
FAME: A Forest Assessment and Monitoring Environment scenario
[AD-B179106] p 3335 N94-30759
TROPOSPHERE
Local Measurement of Tropospheric HO(x)
[NASA-CP-3245] p 3342 N94-28587
In situ detection of tropospheric OH and HO2 by laser-induced fluorescence in a detection chamber at low pressure p 3342 N94-28589
Tropospheric HO determination by FAGE p 3342 N94-28590
Detection of tropospheric OH and HO2 by laser-induced fluorescence at low pressure using the 308nm excitation of OH p 3343 N94-28591
Absolute determination of local tropospheric OH concentrations p 3343 N94-28594
UV laser long-path abscrption spectroscopy p 3343 N94-28595
Measurement of tropospheric OH by laser long-path absorption spectroscopy p 3343 N94-28596
Ion-assisted tropospheric OH measurement technique p 3344 N94-28601
An improved method of measuring tropospheric NO2, NO3, HO2, and RO2 by Matrix Isolation and Electronic Spin Resonance (MIESR) p 3345 N94-28605
Tropospheric HO2 determination by FAGE p 3345 N94-28606
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
Line-of-sight tropospheric calibration from measurements in arbitrary directions p 3249 N94-29654
Radar estimations of atmospheric winds in the troposphere and lower stratosphere p 3370 N94-29697
Developing a diode array spectrometer for tropospheric chemistry studies p 3362 N94-29752
Radiative flux calculations at UV and visible wavelengths
[DE94-004278] p 3350 N94-30613
Tropospheric corrections to GPS measurements using locally measured meteorological parameters compared with general tropospheric corrections p 3144 N94-30655
Modeling studies of frontogenesis in the upper and middle troposphere p 3375 N94-30868
Tropospheric radiative forcing of O3 for the 1994 IPCC report
[DE94-005698] p 3367 N94-30876
TRUCKS
Prediction and standard error estimation for a finite universe total when a stratum is not sampled
[DE94-004929] p 3465 N94-30696
Compressed natural gas fueled vehicles: The Houston experience
[DE94-005804] p 3312 N94-30878
TUNABLE LASERS
Near-IR diode laser absorption for measurement of tropospheric HO2 p 3345 N94-28607
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608
Advances in tunable powerful lasers: The advanced free-electron laser
[DE94-004997] p 3294 N94-29934
TUNGSTEN
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774
Studies of supported molybdenum and tungsten
[DE94-006207] p 3210 N94-30839
TUNGSTEN ALLOYS
Electrochemical behavior and surface chemistry of nonequilibrium aluminum alloys: Passivity mechanism and fabrication methods
[AD-A275401] p 3204 N94-29196
Influence of tungsten alloying additions on the mechanical properties and texture of tantalum
[DE94-004994] p 3210 N94-30774
TUNGSTEN CARBIDES
Metafusion: A breakthrough in metallurgy p 3211 N94-30446
TUNGSTEN COMPOUNDS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
TUNING
Tuning of AmPS
[NIKHEF-K-AMPS-93-01] p 3494 N94-29422
TUNING FORK GYROSCOPES
Emerging technologies in microguidance and control p 3144 N94-29788
TUNNEL JUNCTIONS
Picosecond response of the quasiparticle current in superconducting tunnel junctions
[DE94-006300] p 3515 N94-30009
Strong overlap and transmission in triple barrier resonant structures
[DE94-608103] p 3516 N94-30067
TUNNELS
Three dimensional simulation of compressible flow induced by a high-speed train moving into a tunnel p 3126 N94-28967
TURBIDITY
Statistical analysis of a satellite imagery time series: Implications for the study of coastal and estuarine circulation p 3335 N94-30919
TURBINE BLADES
Design and fabrication of forward-swept counterrotation blade configuration for wind tunnel testing
[NASA-CR-194868] p 3155 N94-28510
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual
[NASA-CR-194462] p 3317 N94-28815
Application of flow field simulation to turbine vane design p 3127 N94-28978
Automated inspection of turbine blades: Challenges and opportunities
[AIAA PAPER 94-1226-CP] p 3446 N94-30575
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872
TURBINE PUMPS
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
TURBINES
Development of laser velocimetry for the measurements of turbulence intensity and flow velocity ahead of a NGV row in a full-stage rotating turbine
[AD-A275712] p 3270 N94-28692
TURBOFAN ENGINES
Spray combustion experiments and numerical predictions p 3195 N94-29277
Integrated propulsion-airframe dynamics and control p 3147 N94-29854
TURBOJET ENGINES
Aerothermochemical calculations in afterburners p 3154 N94-29258
CIAM experimental turboramjets p 3152 N94-29299
TURBOMACHINE BLADES
Structural/aerodynamic blade analyzer (SAB) user's guide, version 1.0
[NASA-CR-194460] p 3151 N94-29103
Turbomachinery forced response prediction system (FREPS): User's manual
[NASA-CR-194465] p 3319 N94-29104
Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades
[NASA-CR-195786] p 3153 N94-30013
Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade p 3282 N94-30816
TURBOMACHINERY
A numerical method for confined unsteady flows related to fluid-structure interactions
[ISBN-0-315-74739-0] p 3277 N94-29902
TURBOPROP ENGINES
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
TURBORAMJET ENGINES
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Introduction and overview of research and development of solid propellant ramrockets, liquid fuel ramjets and experimental hydrogen ram combustors p 3151 N94-29292
Turboramjet engines: Types and performances p 3151 N94-29293
Research and development of ramjets/ramrockets. Part 3: The study of gaseous hydrogen ram combustors p 3152 N94-29298
TURBULENCE
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Dynamics of tornado-like vortices p 3371 N94-29753
Convective turbulence and transport in stars p 3546 N94-29913
Correction of X hot-wire measurements for gradients normal to the plane of the wires
[PB94-125473] p 3157 N94-30399
A laboratory simulation of urban heat-island-induced circulation in a stratified environment p 3367 N94-30921
Transition to turbulence in confined compressible mixing layers p 3283 N94-30958
TURBULENCE EFFECTS
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Theory and application of a Radio-Acoustic Sounding System (RASS) p 3367 N94-30869
TURBULENCE MODELS
Study of modeling of turbulence of renormalization group analysis p 3126 N94-28970
An alternative assessment of second-order closure models in turbulent shear flows
[NASA-CR-194881] p 3272 N94-29381
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450

Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Turbulence models and their application in implosion analyses with two-phase flow
[GKSS-92/E/98] p 3284 N94-30967

TURBULENT BOUNDARY LAYER
Wall pressure events from the direct numerical simulation of a turbulent wall-bounded flow
[AD-A275890] p 3271 N94-28778
A flow visualization study of acoustically enhanced hairpin vortices
[AD-A275467] p 3271 N94-28809
An alternative assessment of second-order closure models in turbulent shear flows
[NASA-CR-194881] p 3272 N94-29381
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer
p 3282 N94-30807

TURBULENT COMBUSTION
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Simulation of pollutant formation in turbulent combustors using an extended coherent flame model
p 3190 N94-29251
Numerical prediction of turbulent sooting diffusion flames p 3191 N94-29253
Lifted turbulent jet flames p 3198 N94-29676
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911

TURBULENT DIFFUSION
Similarity solutions and numerical modeling in buoyancy controlled turbulent diffusion flames
[AD-A275820] p 3188 N94-28777

TURBULENT FLOW
New parameters for characterizing turbulence at a potential wind site
[DE94-004355] p 3368 N94-28455
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Development of laser velocimetry for the measurements of turbulence intensity and flow velocity ahead of a NGV row in a full-stage rotating turbine
[AD-A275712] p 3270 N94-28692
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
Structure of neutrally stratified turbulent Ekman layer as predicted by closure models with prognostic equation for master length scale p 3325 N94-28696
Wall pressure events from the direct numerical simulation of a turbulent wall-bounded flow
[AD-A275890] p 3271 N94-28778
Study of modeling of turbulence of renormalization group analysis p 3126 N94-28970
Similarity between turbulent flows through curved pipe and orthogonal rotating pipe p 3128 N94-28986
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Numerical modelling of turbine combustion chambers
p 3154 N94-29254
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries
p 3154 N94-29255
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Time-resolved measurements in a three dimensional model combustor p 3196 N94-29283
An alternative assessment of second-order closure models in turbulent shear flows
[NASA-CR-194881] p 3272 N94-29381
Finite element method for numerical simulation of turbulent flows. The N3S code p 3233 N94-29612
Spherical model for turbulence p 3274 N94-29730
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
A numerical method for confined unsteady flows related to fluid-structure interactions
[ISBN-0-315-74739-0] p 3277 N94-29902
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228
The effect of a wavy boundary on turbulent flow
p 3280 N94-30272
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
A new orthogonal decomposition method for turbulent flows p 3281 N94-30494
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer
p 3282 N94-30807
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865
Turbulence models and their application in implosion analyses with two-phase flow
[GKSS-92/E/98] p 3284 N94-30967

TURBULENT HEAT TRANSFER
A flow visualization study of acoustically enhanced hairpin vortices
[AD-A275467] p 3271 N94-28809
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code p 3285 N94-30450

TURBULENT JETS
Lifted turbulent jet flames p 3198 N94-29676
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet
p 3278 N94-29976

TURBULENT MIXING
Higher-order accurate numerical simulation of 3D supersonic mixing layers p 3124 N94-28954
Study on mixing and injection of hydrogen into a supersonic flow p 3127 N94-28975
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Computational fluid dynamics in ventilation. 5: New developments in CFD with relevance to ventilation
p 3233 N94-29610
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Effects of diffusion and inertia on chaotic mixing: A computational and experimental study
p 3488 N94-29903
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
Design of an electromagnetic accelerator for turbulent hydrodynamic mix studies
[DE94-005821] p 3281 N94-30600

TURING MACHINES
A note on the complexity of local search problems
[CT-93-02] p 3456 N94-30370

TVD SCHEMES
A design of third-generation airfoils for helicopter rotor blades using Navier-Stokes p 3124 N94-28957
Numerical analysis of sonic boom in the near field
p 3125 N94-28962
Numerical analysis of two dimensional/axisymmetric non-equilibrium hypersonic flow p 3125 N94-28963
Role of computational fluid dynamics in aeronautical engineering. Part 10: Numerical analysis of flow around 2-D multi-element HLD p 3125 N94-28964

TWO BODY PROBLEM
Quasipotential in the fourth order of perturbation theory
[DE94-606299] p 3484 N94-28584
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783

TWO DIMENSIONAL FLOW
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Calculus of variations applied to 2D multi-point airfoil design
[PB94-125457] p 3133 N94-30401

TWO DIMENSIONAL MODELS
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828
Role of computational fluid dynamics in aeronautical engineering. Part 10: Numerical analysis of flow around 2-D multi-element HLD p 3125 N94-28964
Computational fluid dynamics in ventilation. 2: Theory and codes p 3233 N94-29607
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608

TWO FLUID MODELS
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352

TWO PHASE FLOW
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries
p 3154 N94-29255
Modeling of the phase liquidates in combustion chambers p 3195 N94-29278
A new Eulerian model for turbulent evaporating sprays in recirculating flows p 3195 N94-29279
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Investigation of the two-phase flow in a research combustor under reacting and non-reacting conditions
p 3196 N94-29282
An experimental investigation of flow patterns and liquid entrainment in a horizontal-tube evaporator
p 3277 N94-29899
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020
Numerical simulation of a condenser in two-phase heat transport systems: A feasibility study
[AD-B173650] p 3282 N94-30855
Local two-phase flow simulations including interface tracking with mass transfer p 3283 N94-30954
Turbulence models and their application in implosion analyses with two-phase flow
[GKSS-92/E/98] p 3284 N94-30967
Numerical simulation and prediction of implosion phenomena
[GKSS-92/E/99] p 3284 N94-30968

TWO-WAVELENGTH LASERS
Investigations of large area electron beam diodes for excimer lasers
[DE94-005670] p 3295 N94-30595

U

U BENDS
Flow and heat transfer in a rotating square sectioned U-bend p 3128 N94-28984

ULTRAHIGH FREQUENCIES
ULF waves and magnetic field characteristics in the polar cusp observed at Godhavn p 3361 N94-29244
Precision frequency synthesizing sources with excellent time/frequency performances p 3473 N94-30671

ULTRAHIGH VACUUM
Retention latch mechanism for the Wake Shield Facility p 3161 N94-29635

ULTRASONIC FLAW DETECTION
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment
[PB94-139318] p 3184 N94-30438
Sensing the gas metal arc welding process
p 3314 N94-30444

ULTRASONIC RADIATION
Absolute calibration technique for broadband ultrasonic transducers
[NASA-CASE-LAR-14672-1] p 3287 N94-29199
Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface
p 3479 N94-29988
Analysis and an image recovery algorithm for ultrasonic tomography system p 3397 N94-30456

ULTRASONIC SCANNERS
Conformal external radiotherapy of prostatic carcinoma: Requirements and preliminary results
p 3395 N94-30029
Three methods to improve the accuracy of a PUMA 560 robot p 3307 N94-30290
Standardisation requirements for ultrasonic C-scanning of polymer matrix composites: An initial assessment
[PB94-139318] p 3184 N94-30438

ULTRASONIC SPECTROSCOPY
Resonant ultrasound spectroscopy for elastic constant measurements
[DE94-005016] p 3480 N94-30098

ULTRASONIC TESTS
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-195766] p 3183 N94-30016
Resonant ultrasound spectroscopy for elastic constant measurements
[DE94-005016] p 3480 N94-30098

ULTRASONIC WAVE TRANSDUCERS
Absolute calibration technique for broadband ultrasonic transducers
[NASA-CASE-LAR-14672-1] p 3287 N94-29199

ULTRASONICS
Acoustic and optical investigations of superfluid (3)He
[PB94-135415] p 3477 N94-29186

Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface p 3479 N94-29988

ULTRAVIOLET ABSORPTION

Optical modeling of visibility and visibility instrumentation using stratified Mie theory p 3348 N94-29750

Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures

[ISBN-0-315-85923-7] p 3218 N94-30036

ULTRAVIOLET ASTRONOMY

Observation of Jovian auroral Ly-alpha line profile and emission variability with a sounding rocket and the IUE archives p 3550 N94-30798

ULTRAVIOLET DETECTORS

MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications

[AD-A275078] p 3512 N94-28871

ULTRAVIOLET EMISSION

A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833

Observation of Jovian auroral Ly-alpha line profile and emission variability with a sounding rocket and the IUE archives p 3550 N94-30798

ULTRAVIOLET LASERS

UV laser long-path absorption spectroscopy p 3343 N94-28595

On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597

Ablation of polymers by ultraviolet pulsed laser

[DE94-608100] p 3218 N94-30066

Investigations into ultraviolet matrix-assisted laser desorption

[DE94-005265] p 3296 N94-30908

ULTRAVIOLET MICROSCOPY

Near-ultraviolet laser photoemission: Scanning microscopy, buried interfaces and image-potential states p 3294 N94-29531

ULTRAVIOLET PHOTOGRAPHY

Far ultraviolet images of the nighttime ionosphere

[AD-A275083] p 3356 N94-28843

ULTRAVIOLET RADIATION

Studies on bacterial spore ultraviolet light resistance and regulation of the activity of a spore protease

[AD-A275448] p 3384 N94-28884

Radiative flux calculations at UV and visible wavelengths

[DE94-004278] p 3350 N94-30613

Radiation transport in cloudy and aerosol loaded atmospheres p 3366 N94-30805

ULTRAVIOLET REFLECTION

Deformed ellipsoidal diffraction grating blank

[NASA-CR-189334] p 3289 N94-29872

ULTRAVIOLET SPECTRA

Spatially resolved spectroscopy of AG Carinae, and direct evidence for stellar evolution: The central star of NGC 2392

[NASA-CR-189291] p 3545 N94-29871

Study of the ultraviolet absorption and photoconduction spectra of polyimide films fabricated at various curing temperatures

[ISBN-0-315-85923-7] p 3218 N94-30036

ULTRAVIOLET SPECTROMETERS

Broadband EUV survey spectrometer for short-timescale experiments

[DE94-005459] p 3498 N94-28534

JPL Fourier transform ultraviolet spectrometer p 3343 N94-28593

A multiwavelength study of two prototypical supernova remnants p 3540 N94-29833

Deformed ellipsoidal diffraction grating blank

[NASA-CR-189334] p 3289 N94-29872

A sounding rocket program in extreme and far ultraviolet interferometry

[NASA-CR-195114] p 3289 N94-29907

ULTRAVIOLET SPECTROSCOPY

Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice

[AD-A275149] p 3486 N94-29021

UNDERWATER ACOUSTICS

Analysis of spark-induced bubble experiments using CALE

[DE94-003667] p 3270 N94-28476

Global Acoustic Mapping of Ocean Temperatures (GAMOT)

[AD-A275777] p 3376 N94-28740

Broad geoacoustic assessment of some regional areas

[AD-A275504] p 3356 N94-28791

Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean

[AD-A275121] p 3477 N94-29003

A review of signal detection using the bispectrum with applications in underwater acoustics

[AD-A275227] p 3478 N94-29388

Bulletin of National Research Institute of Fisheries Engineering, No. 13

[JTN-94-80596] p 3233 N94-29701

Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707

Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface p 3479 N94-29988

UNDERWATER BREATHING APPARATUS

Advanced seal delivery system life support parameters

[AD-A275304] p 3401 N94-29184

UNDERWATER EXPLOSIONS

Analysis of spark-induced bubble experiments using CALE

[DE94-003667] p 3270 N94-28476

UNDERWATER RESOURCES

Journal of NIRE, Vol. 2, No. 2

[JTN-94-80552] p 3187 N94-28675

On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel p 3188 N94-28683

UNDERWATER STRUCTURES

Development of the breakwater with submerged mound for interchanging sea water p 3234 N94-29703

UNDERWATER VEHICLES

Alumina ceramic: A cost effective replacement for titanium in deep submergence pressure housings

[AD-A275640] p 3212 N94-28641

The state transition diagram with path priority and it's applications

[AD-A275524] p 3434 N94-28672

A concurrent, object-based implementation for the tactical level of the rational behavior model

[AD-A275024] p 3410 N94-29115

Effect of surface condition on strength and fatigue behavior of alumina ceramic

[AD-A275053] p 3214 N94-29133

Advanced seal delivery system life support parameters

[AD-A275304] p 3401 N94-29184

UNIFIED FIELD THEORY

Experimental and theoretical studies of molecular solids

[AD-A275511] p 3485 N94-28668

UNIFORM FLOW

Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764

UNIQUENESS

Some results on the phase diagram of the antiferromagnetic Potts model in an external magnetic field

[DE94-608115] p 3468 N94-30110

UNITED STATES

On United States-Japan Conference on Development and Utilization of Natural Resources: Report of the 14th Joint Meeting of U. S. and Japan Marine Mining Panel p 3188 N94-28683

The European community directive: An alternative environmental impact assessment procedure after Massey?

[AD-A275550] p 3347 N94-28844

National Transportation Safety Board annual review of aircraft accident data. US general aviation, 1990

[PB94-126869] p 3135 N94-29185

Prediction and standard error estimation for a finite universe total when a stratum is not sampled

[DE94-004929] p 3465 N94-30696

UNITS OF MEASUREMENT

SI (Metric) handbook

[NASA-TM-109197] p 3231 N94-29376

UNIVERSAL TIME

Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614

Loran-C time management p 3144 N94-30644

Report on NATO PTTI p 3469 N94-30645

A real-time prediction of UTC p 3470 N94-30654

UNIVERSE

Energetic events in the early universe p 3547 N94-30012

A theory approach for creation of the matter of universe

[DE94-608109] p 3548 N94-30163

UNIX (OPERATING SYSTEM)

Summer intern program

[AD-A275194] p 3466 N94-28888

The MSRC ab initio methods benchmark suite: A measurement of hardware and software performance in the area of electronic structure methods

[DE94-006428] p 3514 N94-30001

Comparative semantics for linear arrays of communicating processes

[CWI-CS-R9336] p 3426 N94-30491

Mapping objects to files: A UNIX file system interface to an object management system

[RUU-CS-93-08] p 3428 N94-30746

UNSTEADY AERODYNAMICS

Numerical study on the interaction between scramjet engine modules caused by thermal choke p 3125 N94-28960

Unsteady aerodynamic computations around NACA0012 at high angles of attack p 3126 N94-28969

Unsteady transonic aerodynamics in frequency domain for flutter analysis p 3131 N94-29879

Algorithm and code development for unsteady three-dimensional Navier-Stokes equations

[NASA-CR-195774] p 3277 N94-29942

Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades

[NASA-CR-195786] p 3153 N94-30013

Computational analysis of high resolution unsteady airloads for rotor aeroacoustics

[NASA-CR-194894] p 3480 N94-30274

Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)

[NLR-TP-92156-U] p 3148 N94-30342

UNSTEADY FLOW

Boundary layers induced by three-dimensional vortex loops

[AD-A275678] p 3270 N94-28665

An experimental study of wing tip vortex in the near wake of a rectangular wing

[AD-A275389] p 3129 N94-29306

Investigation of advanced counterrotation blade configuration concepts for high speed turboprop systems. Task 2: Unsteady ducted propfan analysis computer program users manual

[NASA-CR-187105] p 3152 N94-29438

Numerical solution of the two-dimensional time-dependent incompressible Euler equations

[NASA-CR-195775] p 3277 N94-29859

A numerical method for confined unsteady flows related to fluid-structure interactions

[ISBN-0-315-74739-0] p 3277 N94-29902

Effects of diffusion and inertia on chaotic mixing: A computational and experimental study p 3488 N94-29903

Aeroacoustic sensitivity analysis and optimal aeroacoustic design of turbomachinery blades

[NASA-CR-195786] p 3153 N94-30013

A new orthogonal decomposition method for turbulent flows p 3281 N94-30494

Prospects of time-linearized unsteady calculation methods for exponentially diverging motions in aeroelasticity

[PB94-126224] p 3134 N94-30740

Development and application of particle image velocimetry in high-speed separated flow: Two-dimensional base cavities p 3282 N94-30791

Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804

Mixed Eulerian-Lagrangian finite element solutions of unsteady flow and flutter in transonic cascade p 3282 N94-30816

UNSWEPT WINGS

An experimental study of the aerodynamics of a swept and unswept semispan wing with a simulated glaze ice accretion

[NASA-CR-195330] p 3133 N94-30152

UPLINKING

Adaptive power control as a fade countermeasure on satellite links p 3253 N94-29897

Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670

Time maintenance system for the BMDO MSX spacecraft p 3171 N94-30672

UPPER ATMOSPHERE

Predissociation in N2(C'4, 1 Sigma u +) and other N2 states and its importance in the atmospheres of Titan and Triton

[NASA-CR-195727] p 3549 N94-28816

Far ultraviolet images of the nighttime ionosphere

[AD-A275083] p 3356 N94-28843

US National Weather experiment STORM-FEST: Waves and turbulence in frontal zones

[AD-A275084] p 3369 N94-28847

Large eddy simulation of the upper atmospheric surface layer

[ISBN-0-315-85393-X] p 3365 N94-30134

Atmosphere, ocean, and land: Critical gaps in Earth system models p 3350 N94-30617

UPSTREAM

Wall pressure events from the direct numerical simulation of a turbulent wall-bounded flow

[AD-A275890] p 3271 N94-28778

Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream

[AD-A275107] p 3122 N94-28899

UPWIND SCHEMES (MATHEMATICS)
Code development for hypersonic real-gas flow simulations toward the design of space vehicles, part 2 p 3125 N94-28966
On the numerical analysis of shear flows p 3126 N94-28972
Upwind method using local interpolation p 3128 N94-28982
An implicit upwind scheme for the three-dimensional Euler equations using a pointwise relaxation method p 3128 N94-28983
Time-marching aeroelastic and spatial adaptation procedures on triangular and tetrahedral meshes using an unstructured-grid Euler method p 3131 N94-29877
URANIUM ALLOYS
Incommensurate magnetic order in UNi2Al3 [DE94-005449] p 3209 N94-30246
URANUS (PLANET)
Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623
URBAN DEVELOPMENT
Cities for tomorrow: Directions for change [PB94-136850] p 3537 N94-29168
URBAN PLANNING
Cities for tomorrow: Directions for change [PB94-136850] p 3537 N94-29168
URBAN RESEARCH
The suitability of low-cost urban airshed modeling in the Chicago area [DE94-005114] p 3349 N94-30023
URBAN TRANSPORTATION
Optimization techniques for a dial-a-ride transportation system in urban environment [REPT-93-051] p 3537 N94-30926
URINALYSIS
Markov chains for random urinalysis 3: Daily model and drug kinetics [AD-A275540] p 3389 N94-28797
USER MANUALS (COMPUTER PROGRAMS)
A program for rapid computation of multioffset vertical seismic profile synthetic seismograms for layered media [AD-A275464] p 3355 N94-28737
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual [NASA-CR-194462] p 3317 N94-28815
Transferable Output ASCII Data (TOAD) editor version 1.0 user's guide [NASA-CR-187507] p 3408 N94-28818
Laser velocimeter data acquisition system for the Langley 14- by 22-foot subsonic tunnel. Software reference guide version 3.3 [NASA-CR-191606] p 3293 N94-28839
Procedural guide for modelling and analyzing the flight characteristics of a helicopter design using flightlab [AD-A275077] p 3146 N94-28870
Business planning model user's guide [AD-A274978] p 3409 N94-28895
Learning about the Internet bibliography and beginners' guide [AD-A275205] p 3430 N94-29051
Financial resource review model user's guide [AD-A274979] p 3410 N94-29088
Structural/aerodynamic blade analyzer (SAB) user's guide, version 1.0 [NASA-CR-194460] p 3151 N94-29103
Turbomachinery forced response prediction system (FREPS): User's manual [NASA-CR-194465] p 3319 N94-29104
EXTdesign. Version 1.0: Reference manual [PB94-136827] p 3411 N94-29193
Statistical Modeling and Estimation of Reliability Functions for Software (SMERFS) user's guide, revision 3 [AD-A275390] p 3411 N94-29202
Animation techniques in BRL-CAD [AD-A275232] p 3417 N94-29392
Thermal enclosure system functional simulation user's manual [NASA-TM-109094] p 3466 N94-29489
ASSIST internals reference manual [NASA-TM-109102] p 3431 N94-29494
RIPE integrity primitives, part 1 (RACE Integrity Primitives Evaluation) [CWI-CS-R9324-PT-1] p 3252 N94-29692
RIPE integrity primitives, part 2 (RACE Integrity Primitives Evaluation) [CWI-CS-R9325-PT-2] p 3252 N94-29693
AFGWC Dial-In Subsystem (AFDIS) software users manual, version 2.2 [AD-A275844] p 3371 N94-29747
Multiple Concentric Cylinder Model (MCCM) user's guide [NASA-CR-195299] p 3183 N94-30125
TOTAL user manual [NASA-TM-109101] p 3432 N94-30160
A user's guide to the Software Testpilot [CWI-CS-R9343] p 3426 N94-30435
USER REQUIREMENTS
User-centered guidelines for environmental management [DE94-004313] p 3341 N94-28454
A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center [NASA-TM-108438] p 3529 N94-28820
Aid to Ada component reuse at Aerospatiale Cannes (France) [REPT-932-440-102] p 3418 N94-29418
Information engineering implementation and acceptance p 3530 N94-29533
Use of advanced technologies in ATM (air traffic management) domain p 3137 N94-29561
Information center assessment p 3533 N94-29855
Pausing behavior of end-users in online searching p 3533 N94-29960
UTILITIES
Nuclear energy related research [DE94-606286] p 3494 N94-28623
UTILIZATION
The universal applications of microtubes and microtube composites p 3186 N94-30452

V

V-22 AIRCRAFT
Organized wiring systems p 3166 N94-28705
V/STOL AIRCRAFT
Computation of wind tunnel wall effects for complex models using a low-order panel method [NASA-TM-104019] p 3132 N94-30151
VACUUM
RF vacuum microelectronics [AD-A275221] p 3263 N94-28915
Fabrication of electronic materials in space p 3228 N94-28942
Metal inert gas welding system for use in vacuum [NASA-CASE-MFS-28808-1] p 3298 N94-29352
Collecting cometary soil samples? Development of the ROSETTA sample acquisition system p 3160 N94-29628
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass [DE94-608128] p 3525 N94-30170
Survey report of JSUP Space Environment Utilization Research Committee in fiscal year 1992: Metallic Materials Session [JTN-94-80583] p 3159 N94-30794
Design of a variable-conductance vacuum insulation [DE94-000270] p 3268 N94-30819
VACUUM APPARATUS
Composite hot drape forming p 3240 N94-30448
VACUUM CHAMBERS
Vacuum chamber and adaptors for shearography and holography [NASA-CR-192467] p 3157 N94-29956
VACUUM DEPOSITION
Vacuum vapor deposition [NASA-CASE-MFS-28652-1] p 3215 N94-29446
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan [DE94-003739] p 3519 N94-30611
VACUUM EFFECTS
Fabrication of electronic materials in space p 3228 N94-28942
The impact of electrically charged microspheres with planar surfaces under vacuum conditions p 3320 N94-29765
VACUUM SYSTEMS
Argon frost continuous cryopump for fusion applications [DE94-004478] p 3230 N94-29017
VACUUM TESTS
Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709
VALENCE
Band structure of superlattice with (delta)-like potential [DE94-608108] p 3516 N94-30072
VALLEYS
Glacial landforms and late Cenozoic history of the western Soer-Rondane mountains p 3357 N94-29080
VANELESS DIFFUSERS
Fluid dynamic noise in a centrifugal pump [AD-A275264] p 3477 N94-28904
VANES
Thermal/structural tailoring of engine blades (T/SEAEBL). Theoretical manual [NASA-CR-194462] p 3317 N94-28815
VAPOR BARRIER CLOTHING
Development of a new chemical warfare agent protective material p 3381 N94-28432
VAPOR DEPOSITION
High damage threshold anti-reflectors by physical vapor deposited amorphous fluoropolymer [DE94-004865] p 3212 N94-28560
Analysis of cost: CVD diamond deposition and finishing --- Quarterly report [AD-A275586] p 3212 N94-28725
Development of large area RF induction plasma for cost effective diamond [AD-A275888] p 3504 N94-28776
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite [NASA-CASE-LEW-15264-2] p 3180 N94-29508
Synthesis of diamond in a hydrogen plasma jet: Simulations of XRD patterns of diamond polytypes and boundary layer on a substrate p 3522 N94-29515
Preparation and structure of amorphous hydrogenated carbon film deposited with RF plasma CVD p 3223 N94-29518
A photoemission electron microscope investigation of chemical vapor deposition diamond films and diamond nucleation p 3215 N94-29745
Performance of CVD and CVR coated carbon-carbon in high temperature hydrogen [DE94-005451] p 3487 N94-29841
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls [DE94-005577] p 3206 N94-30007
Plasma enhanced chemical vapor deposition of ZrO2 thin films [DE94-006031] p 3218 N94-30104
The growth of InAsSb/InGaAs strained-layer superlattices by metal-organic chemical vapor deposition [DE94-005576] p 3518 N94-30316
Large-area triple-junction a-Si alloy production scale up [DE94-000249] p 3339 N94-30604
Fullerenes as precursors for diamond film growth without hydrogen or oxygen additions [DE94-004582] p 3519 N94-30718
Surface chemistry of boron-doped SiO2 CVD: Enhanced uptake of tetraethyl orthosilicate by hydroxyl groups bonded to boron [DE94-005428] p 3221 N94-30896
Thermochemical data for CVD modeling from ab initio calculations [DE94-005269] p 3222 N94-30909
VAPOR PHASE EPITAXY
Innovative optoelectronic materials and structures using OMVPE [AD-A275811] p 3511 N94-28773
High resistivity buffer layers by oxygen doping [AD-A274986] p 3513 N94-29125
VAPOR PHASES
Gas phase thermochemistry of organogermanium compounds [DE94-004885] p 3187 N94-28561
Ion-assisted tropospheric OH measurement technique p 3344 N94-28601
Numerical simulation of aerothermal characteristics in gas turbine combustors with complex geometries p 3154 N94-29255
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone [NASA-CR-195779] p 3347 N94-29549
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry [DE94-006208] p 3207 N94-30024
Investigations into ultraviolet matrix-assisted laser desorption [DE94-005265] p 3296 N94-30908
VAPOR PRESSURE
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone [NASA-CR-195779] p 3347 N94-29549
Studies of interfaces and vapors with Optical Second Harmonic Generation [DE94-006295] p 3476 N94-30841
VAPORIZING
Liquid-oxygen droplet vaporization and combustion: Analysis of transcritical behavior and application to liquid-rocket combustion instability p 3197 N94-29592
VAPORS
Interaction of multiple spark-generated bubbles in a compressible liquid [AD-A275037] p 3272 N94-29149
VARIABILITY
The dynamics of tropical intraseasonal variability p 3371 N94-29741
Yield and variability optimization of integrated circuits: Principles and practical solutions p 3266 N94-29805

Interannual temperature variability and cyclone frequency over Eastern Canada and the New England States. A case study: Winter seasons 1931-1932 to 1984-1985
[ISBN-0-315-74841-9] p 3373 N94-29908
Interannual-decadal variability in tropical climate systems: Stable isotope records and general circulation model experiments p 3373 N94-29962
On interannual variability and climate change in the North Pacific p 3374 N94-29963
Satellite estimation of the global distribution and interannual variability of photosynthetically active radiation p 3334 N94-29970
Seed viability detection using computerized false-color radiographic image enhancement p 3387 N94-30461

VARIANCE (STATISTICS)
Ten new checks to assess the statistical quality of Monte Carlo solutions in MCNP
[DE94-006137] p 3465 N94-30366

VARIATIONAL PRINCIPLES
Dissipative quantum dynamics and nonlinear sigma-model
[DE94-606295] p 3523 N94-28617

VECTOR PROCESSING (COMPUTERS)
Parallelization techniques for highly parallel vector computer p 3129 N94-28990
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
A method of user interface for NWT p 3129 N94-28993
Information system for flow simulation based on the Navier-Stokes equations vectorization
[AD-B179293] p 3281 N94-30763

VECTOR QUANTIZATION
Low frame rate video coding for small bandwidth realtime multimedia tele-education systems
[PB94-125531] p 3256 N94-30398

VECTOR SPACES
Homogeneous Poisson structures
[DE94-608112] p 3453 N94-30119

VEGETATION
GCM studies of the influence of vegetation on the general circulation: The role of albedo in modulating climate change p 3348 N94-29749
Sensitivity and feedbacks associated with vegetation-related land surface parameters in a general circulation model p 3348 N94-29800
Use of satellite data to improve parameterization of spatial and temporal variations of gaseous dry deposition in regional-scale models
[DE94-005110] p 3334 N94-30022
A coupled approach to spatially derived parameters necessary for ecosystem modeling on the North Slope of Alaska: Appendix A
[DE94-005853] p 3349 N94-30046
Frequency dependence of polarization phase difference
[NASA-TM-109737] p 3254 N94-30094
A bottom-up evolution of terrestrial ecosystem modeling theory, and ideas toward global vegetation modeling p 3351 N94-30628
Development of simplified ecosystem models for applications in Earth system studies: The Century experience p 3352 N94-30629
Evaluating models of climate and forest vegetation p 3353 N94-30637

VEGETATION GROWTH
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189
Cellular polarity and interactions in plant graviperception
[NASA-CR-195261] p 3385 N94-29943

VELOCITY DISTRIBUTION
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
The velocity field in the Northeast Atlantic from satellite-tracked drifting buoys
[AD-A275704] p 3376 N94-28690
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Electron beam analysis for cyclotron harmonic and free-electron laser devices
[AD-A275070] p 3293 N94-29179
Spherical model for turbulence p 3274 N94-29730
Tail lobe ion composition at energies of 0.1 to 16 keV/e: Evidence for mass-dependent density gradients
[PAPER-93JA03201] p 3507 N94-30127
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274
A single-fluid, self-consistent formulation of particle transport and fluid dynamics p 3280 N94-30352

VELOCITY ERRORS
Pushing the limit: Precision radial velocities, techniques, and applications p 3542 N94-30861

VELOCITY MEASUREMENT
Annual summary of basic research thermoacoustic heat transport, 1993
[AD-A275751] p 3230 N94-28644
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Stereo imaging based particle velocimeter
[NASA-CR-195800] p 3289 N94-29742
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764
The impact of electrically charged microspheres with planar surfaces under vacuum conditions p 3320 N94-29765
The effect of a wavy boundary on turbulent flow p 3280 N94-30272
Pushing the limit: Precision radial velocities, techniques, and applications p 3542 N94-30861

VENTILATION
Advanced Design of Ventilation Systems
[VKI-LS-1993-07] p 3231 N94-29598
Introduction to the design of ventilation systems p 3231 N94-29599
Human requirements to the indoor air quality and the thermal environment p 3232 N94-29600
Ventilation systems p 3232 N94-29601
Theory of age distribution p 3232 N94-29602
Ventilation models p 3232 N94-29603
Industrial ventilation p 3232 N94-29604
Ventilation cost and air cleaning p 3232 N94-29605
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Computational fluid dynamics in ventilation. 2: Theory and codes p 3233 N94-29607
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608
Computational fluid dynamics in ventilation. 4: Commercial application of CFD in ventilation p 3233 N94-29609
Computational fluid dynamics in ventilation. 5: New developments in CFD with relevance to ventilation p 3233 N94-29610
Computational fluid dynamics in ventilation: Practical approach p 3233 N94-29611
Control of heating, ventilation and air conditioning (HVAC) systems
[PB94-138807] p 3401 N94-30000
Using spacecraft trace contaminant control systems to cure sick building syndrome p 3354 N94-30470

VENTILATION FANS
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902

VENTILATORS
Determination of sound power levels of air terminal units according to ISO 5135-Nordic inter-laboratory tests, Nordtest project no. 968-91
[PB94-137411] p 3477 N94-29175
Advanced Design of Ventilation Systems
[VKI-LS-1993-07] p 3231 N94-29598
Introduction to the design of ventilation systems p 3231 N94-29599
Ventilation models p 3232 N94-29603
Ventilation cost and air cleaning p 3232 N94-29605

VENUS (PLANET)
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102
Analysis of crustal structure of Venus utilizing residual Line-of-Sight (LOS) gravity acceleration and surface topography data. A trial of global modeling of Venus gravity field using harmonic spline method
[NASA-CR-195799] p 3549 N94-29737
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892

VENUS ATMOSPHERE
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102

VENUS CLOUDS
Correlation studies of Pioneer Venus imagery obtained from PV experiments with near IR imagery obtained from ground-based observations during Venus inferior conjunction
[NASA-CR-195772] p 3550 N94-29892

VENUS SURFACE
Venus Data Analysis Program: Directory of Research Projects (1993-1994)
[NASA-CR-195742] p 3549 N94-29102

VERTICAL AIR CURRENTS
On eddy accumulation with limited conditional sampling to measure air-surface exchange
[DE94-005112] p 3368 N94-28568
On the origins of low-level tornadic circulations within the remnants of hurricane Andrews
[AD-A275373] p 3369 N94-29011
A study of the thermospheric dynamics of the high-latitude E region using a spectral thermospheric general circulation model p 3362 N94-29743
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744

VERTICAL DISTRIBUTION
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802
Atmospheric turbulence within and above a coniferous forest
[ISBN-0-315-75468-0] p 3375 N94-30870

VERTIGO
Basic understanding of vertigo p 3390 N94-28855
Space and vertigo: In relation to space motion sickness p 3390 N94-28857
Equilibrium dysfunction in the clinical field p 3390 N94-28858

VERY HIGH FREQUENCIES
A space-based classification system for RF transients
[DE94-003933] p 3240 N94-28522
VHF impedance measurement: A review
[PB94-138682] p 3267 N94-30115
Measurement basis of near fields in spherical coordinates in the 100 MHz to 6 GHz band
[REPT-932-430-107] p 3255 N94-30153

VERY LARGE ARRAY (VLA)
Phasing the Very Large Array on Galileo in the presence of Jupiter's strong radio emission p 3164 N94-29621

VERY LARGE SCALE INTEGRATION
Construction of a connectionist network supercomputer
[AD-A275765] p 3405 N94-28764
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
Micromanufacturing: Recent developments in this country and abroad p 3235 N94-29769
Self-stressing test structures used for high-frequency electromigration
[DE94-006142] p 3267 N94-30368

VERY LONG BASE INTERFEROMETRY
Combining GPS and VLBI earth-rotation data for improved universal time p 3144 N94-29614
Line-of-sight tropospheric calibration from measurements in arbitrary directions p 3249 N94-29654
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670

VERY LOW FREQUENCIES
Study of generation mechanisms of magnetospheric VLF/ELF emissions based on the direction findings p 3361 N94-29245

VESTIBULAR NYSTAGMUS
Equilibrium dysfunction in the clinical field p 3390 N94-28858

VESTIBULAR TESTS
Equilibrium dysfunction in the clinical field p 3390 N94-28858
Portable Linear Sled (PLS) for biomedical research p 3163 N94-29648

VESTIBULES
Basic understanding of vertigo p 3390 N94-28855
Posture control of goldfishes under microgravity p 3387 N94-29712

VESTS
Comparison of two cool vests on heat-strain reduction while wearing a firefighting ensemble in a hot/humid environment
[AD-A275103] p 3400 N94-28902

VIBRATION
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404

Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
Minutes: Accredited Standards Committee on Mechanical Vibration and Shock, S2. US TAG for ISO/TC 108 Mechanical Vibration and Shock
[AD-A275591] p 3316 N94-28726
Index of NPL acoustics publications 1981-1990
[NPL-RSA(EXT)-0044] p 3480 N94-30786
Rotor instability induced by dead band clearance in bearing supports p 3312 N94-30809
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972

VIBRATION DAMPING
Integrated active and passive control design methodology for the LaRC CSI evolutionary model
[NASA-CR-4580] p 3164 N94-28417
Closed loop vibrational control: Theory and applications
[AD-A275451] p 3154 N94-28632
General theory and algorithms for the non-casual inversion, slewing and control of space-based articulated structures
[AD-A275118] p 3167 N94-29002
Study of bridge design and technology
[PB94-137916] p 3121 N94-29160
Tuned mass damper for integrally bladed turbine rotor
[NASA-CASE-MFS-28697-1] p 3298 N94-29353
Position control of a flexible beam with active damping of vibrations
[ISBN-0-315-85841-9] p 3321 N94-30033
Analysis and design of inflatable aerospace structures p 3403 N94-30799
Second-order structural identification via state space-based system realizations p 3323 N94-30815

VIBRATION EFFECTS
The influence of appendage vibration on the attitude dynamics of a dual-spin satellite p 3168 N94-29828

VIBRATION ISOLATORS
Tuned mass damper for integrally bladed turbine rotor
[NASA-CASE-MFS-28697-1] p 3298 N94-29353
Activities of Ishikawajima-Harima Heavy Industries Co. Ltd.
[PB94-137981] p 3555 N94-29798

VIBRATION MEASUREMENT
Specialized data analysis of SSME and advanced propulsion system vibration measurements
[NASA-CR-193940] p 3174 N94-29868

VIBRATION MODE
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
Computation of vibration mode elastic-rigid and effective weight coefficients from finite-element computer program output p 3247 N94-29615
Vibrational properties of homopolar and heteropolar surfaces and interfaces of the CdTe/HgTe system
[DE94-608105] p 3516 N94-30069
Three-dimensional free vibration analysis of thick arbitrarily laminated, rectangular, cylindrical and spherical composite panels p 3184 N94-30257
Second-order structural identification via state space-based system realizations p 3323 N94-30815

VIBRATION TESTS
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415

VIBRATIONAL SPECTRA
Journal of NIRE, Vol. 2, No. 2
[JTN-94-80552] p 3187 N94-28675
Ab initio study of vibrational frequency shift upon the 1:1 acetone-iodine complex formation p 3188 N94-28681

VIBRATIONAL STATES
Low frequency dynamics of CO/Cu-breakdown of Born-Oppenheimer approximation
[DE94-005508] p 3510 N94-28512
SHARC, a model for calculating atmospheric and infrared radiation under non-equilibrium conditions
[AD-A275207] p 3357 N94-28893
Models for vibration-dissociation coupling in high-temperature gases p 3273 N94-29675
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE94-006509] p 3489 N94-30061
Application of semiclassical methods to reaction rate theory
[DE94-007041] p 3199 N94-30266

VIDEO COMMUNICATION
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
Low frame rate video coding for small bandwidth realtime multimedia tele-education systems
[PB94-125531] p 3256 N94-30398

VIDEO COMPRESSION
MPEG-2 video decoding architecture: Analysis and design
[REPT-93-069] p 3260 N94-30940

VIDEO DATA
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
Automating geographically referenced digital mosaics from aerial videography with area-based feature matching p 3333 N94-29540
Low frame rate video coding for small bandwidth realtime multimedia tele-education systems
[PB94-125531] p 3256 N94-30398
Time synchronized video systems p 3261 N94-30675
MPEG-2 video decoding architecture: Analysis and design
[REPT-93-069] p 3260 N94-30940

VIDEO TAPE RECORDERS
Cockpit video: A low cost BDA source
[AD-A275228] p 3150 N94-29389

VIEW EFFECTS
Synthetic image generator model; application of view angle dependent reflectivity components and performance evaluation in the visible region
[AD-A275365] p 3499 N94-29009

VIKING LANDER SPACECRAFT
BAG: A code for predicting the performance of a gas bag impact attenuation system for the Pathfinder lander
[DE94-003688] p 3165 N94-28477

VINYL POLYMERS
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

VINYLIDENE
Plasma treatment of polymer dielectric films to improve capacitive energy storage p 3223 N94-30479

VIRTUAL REALITY
HYPER-NPSNET: Embedded multimedia in a 3D virtual world
[AD-A275063] p 3410 N94-29152

VISCOELASTIC DAMPING
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782

VISCOELASTICITY
Viscous and elastic-plastic material model in the ABAQUS
[PB94-132347] p 3316 N94-28409
Measurement and modelling of bolted joint stress relaxation in plastics
[PB94-124849] p 3318 N94-28841
Effects of physical aging on long-term creep of polymers and polymer matrix composites
[NASA-TM-109081] p 3181 N94-29541
Analysis of pressureless densification of ceramic matrix composites p 3216 N94-29766
On the structure and atomic motions in liquid sodium
[DE94-608386] p 3490 N94-30182
Generalized Eulerian-Lagrangian formulations in free and moving boundary problems: Processing of viscoelastic polymers and fiber suspensions p 3283 N94-30955

VISCOPLASTICITY
An anisotropic extension of Bodner's model of viscoplasticity: Model development
[NASA-CR-195289] p 3318 N94-28821
Prediction of stress-strain response of SCS-6/Timetal-21S subjected to a hypersonic flight profile
[NASA-TM-109026] p 3177 N94-28823
Finite element analysis of axisymmetric deformations of thick thermoviscoplastic targets p 3320 N94-29688
Micromechanical analysis of thermo-inelastic multiphase short-fiber composites
[NASA-CR-195290] p 3183 N94-30178

VISCOSITY
The motion of deforming bodies
[AD-A275224] p 3271 N94-29061
Numerical modelling of turbine combustion chambers p 3154 N94-29254
Electromagnetic effect on turbulent transport in liquid metals and electrolytes (bath)
[PB94-138450] p 3206 N94-29946
Two-phase power-law modeling of pipe flows displaying shear-thinning phenomena
[DE94-005115] p 3279 N94-30020

VISCOUS DAMPING
Low melting temperature alloy deployment mechanism and recent experiments p 3163 N94-29644

VISCOUS FLOW
Innovative processing of composites for ultra-high temperature applications, book 3
[AD-A275599] p 3177 N94-28731
Numerical analysis of incompressible viscous flow around a bubble p 3126 N94-28968
Verification of a three-dimensional viscous flow analysis for a single stage compressor p 3127 N94-28976
Three-dimensional external flow computations using prismatic grid p 3127 N94-28979
The motion of deforming bodies
[AD-A275224] p 3271 N94-29061
CFD analyses for advanced pump design
[NASA-CR-194866] p 3300 N94-29550
The h-p adaptive methods for incompressible viscous flow problems p 3275 N94-29836
Hopf bifurcation in viscous, low-speed flows about an airfoil with structural coupling p 3134 N94-30865

VISCOUS FLUIDS
Low melting temperature alloy deployment mechanism and recent experiments p 3163 N94-29644

VISIBILITY
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
Optical modeling of visibility and visibility instrumentation using stratified Mie theory p 3348 N94-29750

VISION
Naval aviation vision standards research at the naval aerospace medical research laboratory: The long view
[AD-A275885] p 3388 N94-28756
Dual use of image based tracking techniques: Laser eye surgery and low vision prosthesis p 3397 N94-30455

VISUAL ACUITY
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042

VISUAL DISCRIMINATION
Japanese Journal of Aerospace and Environmental Medicine, vol. 30, no. 2
[JTN-94-80599] p 3394 N94-29883
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867

VISUAL PERCEPTION
Naval aviation vision standards research at the naval aerospace medical research laboratory: The long view
[AD-A275885] p 3388 N94-28756
An investigation of stereopsis with AN/AVS-6 night vision goggles at varying levels of illuminance and contrast
[AD-A275332] p 3400 N94-28918
The appearance of the Sun and Moon seen through clouds
[AD-A275338] p 3551 N94-29212
Empirical studies of the value of algorithm animation in algorithm understanding
[AD-A275135] p 3412 N94-29287
Behavior and visual control of cyprinodonts under microgravity p 3367 N94-29713
Psychophysiological study on the effects of co-existence of lines for detecting dot target p 3394 N94-29867

VISUAL TASKS
Scanning and monitoring performance: Effects of the reinforcement values of the events being monitored
[DOT/FAA/AM-94/8] p 3398 N94-29918
Sampling behaviour in a four instrument monitoring task: Effects of signal bandwidth and number of events per signal
[AD-B179613] p 3402 N94-30422
Maintaining vigilance on a simulated ATC monitoring task across repeated sessions
[DOT/FAA/AM-94/6] p 3143 N94-30933

VITERBI DECODERS
Convolutional encoding of self-dual codes p 3250 N94-29662
Decoder synchronization for deep space missions p 3250 N94-29664

VOIDS
A modeling study of the effect of stress state on void linking during ductile fracture
[AD-A275505] p 3317 N94-28811

VOLATILITY
Measurement of volatile metal species at elevated temperatures
[PB94-132321] p 3186 N94-28407

VOLCANOLOGY
Studies in Jurassic and Cretaceous North American apparent polar wander p 3362 N94-29940

VORTEX BREAKDOWN
Dynamics of tornado-like vortices p 3371 N94-29753
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492

VORTEX FILAMENTS
The instantaneous concentration field in the self-similar region of a high Schmidt number round jet p 3278 N94-29976
VORTEX GENERATORS
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
VORTEX INJECTORS
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
VORTEX SHEDDING
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911
VORTICES
Modeling turbulence in flows with a strong rotational component
[DE94-003577] p 3270 N94-28475
Large eddy simulations using lattice Boltzmann algorithms
[DE94-005686] p 3270 N94-28549
Objective analysis of a coastal ocean eddy using satellite AVHRR and in situ hydrographic data
[AD-A275715] p 3376 N94-28642
Boundary layers induced by three-dimensional vortex loops
[AD-A275678] p 3270 N94-28665
Spin-up in a rectangular cylinder
[AD-A275465] p 3271 N94-28738
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
Long-wavelength asymptotics of unstable crossflow modes, including the effect of surface curvature
[NASA-CR-4579] p 3273 N94-29460
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes p 3155 N94-29728
Dynamics of tornado-like vortices p 3371 N94-29753
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764
Direct and large-eddy simulations of turbulent flow in a square duct p 3275 N94-29809
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Large eddy simulation of subsonic mixing layers p 3276 N94-29851
Hydrodynamic stability analysis of swirling jets p 3278 N94-29974
Large eddy simulation of the upper atmospheric surface layer
[ISBN-0-315-85393-X] p 3365 N94-30134
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274
Numerical investigation into high-angle-of-attack leading-edge vortex flow
[PB94-125564] p 3133 N94-30388
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
Aspects of the modeling and numerical simulation of leading-edge vortex flow
[AD-B179108] p 3133 N94-30492
Three dimensional compressible turbulent flow computations for a diffusing S-duct with/without vortex generators p 3281 N94-30519
Experiments on the aerodynamic generation of noise in centrifugal turbomachinery p 3480 N94-30804
Numerical simulation of leading-edge vortex flow
[AD-B175154] p 3134 N94-30871
An investigation of the reacting vortex structures associated with pulse combustion p 3200 N94-30911
VORTICITY
On the origins of low-level tornadic circulations within the remnants of hurricane Andrews
[AD-A275373] p 3369 N94-29011
A model analysis of potential vorticity on isopycnal surfaces for the global ocean
[AD-A275047] p 3377 N94-29164
Evolution of the large-scale vortices in turbulent mixing-layers p 3273 N94-29686
Physical processes associated with variability in successive operational model forecasts of cyclogenesis
[ISBN-0-315-74753-6] p 3371 N94-29751
A vorticity transport closure method for turbulent reacting flows p 3274 N94-29761
Numerical solution of 3-D Navier-Stokes equations in vorticity-velocity form for incompressible flows p 3276 N94-29843
Large eddy simulation of subsonic mixing layers p 3276 N94-29851
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
VOYAGER PROJECT
Radio science ground data system for the Voyager-Neptune encounter, part 1 p 3248 N94-29623
VULNERABILITY
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161

W

WAFERS
Silicon-Film (tm) photovoltaic manufacturing technology
[DE94-000258] p 3336 N94-28501
A sub-cm micromachined electron microscope p 3236 N94-29775
WAKES
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564
Boundary layers induced by three-dimensional vortex loops
[AD-A275678] p 3270 N94-28665
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
Computational analysis of high resolution unsteady airloads for rotor aeroacoustics
[NASA-CR-194894] p 3480 N94-30274
WALKING MACHINES
Biologically-inspired hexapod robot design and simulation
[AIAA PAPER 94-1178-CP] p 3439 N94-30530
ODYSSEUS autonomous walking robot: The leg/arm design
[AIAA PAPER 94-1180-CP] p 3439 N94-30531
WALL FLOW
A method for the modelling of porous and solid wind tunnel walls in computational fluid dynamics codes
[NASA-CR-195699] p 3270 N94-28724
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545
WALL PRESSURE
Wall pressure events from the direct numerical simulation of a turbulent wall-bounded flow
[AD-A275890] p 3271 N94-28778
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3268 N94-29484
Wall pressure fluctuations in the reattachment region of a supersonic free shear layer
[NASA-CR-195790] p 3132 N94-29920
WALL TEMPERATURE
Development of buoyancy affected laminar flow in a heated pipe p 3128 N94-28988
WALLS
Proceedings of Japan-US Workshop P-196 on High Heat Flux Components and Plasma Surface Interactions for Next Devices
[DE94-701164] p 3503 N94-28513
Wall pressure events from the direct numerical simulation of a turbulent wall-bounded flow
[AD-A275890] p 3271 N94-28778
The effect of a wavy boundary on turbulent flow p 3280 N94-30272
WARFARE
Autonomous intelligent military robots: Army ants, killer bees, and cybernetic soldiers p 3304 N94-30276
Robotics and the battlefield of the future p 3304 N94-30277
DREV activities related to military vehicles robotization p 3305 N94-30278
Autonomous Robotic Refueling System (ARRS) for rapid aircraft turnaround p 3305 N94-30279
WARNING SYSTEMS
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
Initial wave-type identification with neural networks and its contribution to automated processing in IMS version 3.0
[AD-A275058] p 3359 N94-29137
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350
WASHERS (SPACERS)
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538
WASHINGTON
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005915] p 3367 N94-30883
WASTE DISPOSAL
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
A modular approach for automated sample preparation and chemical analysis p 3354 N94-30464
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824
WASTE ENERGY UTILIZATION
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
WASTE TREATMENT
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE94-005896] p 3349 N94-30047
Benchmarking for cost improvement
[DE94-002276] p 3528 N94-30824
WASTE UTILIZATION
Electrochemical incineration of wastes
[NASA-CR-195262] p 3198 N94-29938
Publications of the NASA Controlled Ecological Life Support System (CELSS) program 1989-1992
[NASA-CR-4603] p 3401 N94-30122
WASTE WATER
Growth of hydrocarbon-rich microalga Botryococcus braunii in secondarily treated sewage and its consumption of nitrate ion and phosphate ion p 3387 N94-29519
WATER
Speciation in Water and Soil: A literature review
[PB94-132388] p 3341 N94-28412
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
Development of novel switchable protein surfaces
[AD-A275510] p 3384 N94-28667
Nominally two-dimensional flow about a normal flat plate p 3275 N94-29838
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917
Fatigue of carbon and low-alloy steels in LWR environments
[DE94-005116] p 3207 N94-30021
Regenerating using aqueous cleaners with ozone and electrolysis p 3240 N94-30468
WATER CONSUMPTION
Nutrition and hydration status of aircrew members consuming an improved survival ration during a simulated survival scenario p 3380 N94-28429
WATER CURRENTS
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Development of a simple current meter using solution p 3233 N94-29702
WATER DEPTH
Tidal atlas software development
[AD-A275251] p 3377 N94-29432
WATER FLOW
Papers in meteorology and geophysics, vol. 44, no.1
[JTN-94-80585] p 3324 N94-28693
The Japan Sea proper water and water circulation in the Japan Sea p 3324 N94-28694
Development and application of a thermistor current meter
[AD-A275816] p 3286 N94-28831
Fronts at the confluences of spring-fed streams with Joekulsa a Fjoellum: Possibly thermal bars?
[MATHS-REPT-A-198] p 3333 N94-29528
Development of a simple current meter using solution p 3233 N94-29702
The flow field near the body surface with thin filaments p 3234 N94-29706
WATER IMMERSION
Fuelling shivering in humans during cold water immersion p 3379 N94-28426

Advanced integrated cold protection for aircrew p 3381 N94-28436
Emergency underwater breathing aids for helicopter passengers and crew p 3381 N94-28437
A comparison of four methods of rewarming individuals cooled by immersion in cold water p 3382 N94-28442

WATER MANAGEMENT
Bulletin of National Research Institute of Fisheries Engineering, No. 13
[JTN-94-80596] p 3233 N94-29701
Development of the breakwater with submerged mound for interchanging sea water p 3234 N94-29703

WATER MASERS
Finnish astronomy days, 1992-1993. Proceedings of the Finnish Astronomical Society
[PB94-136892] p 3538 N94-29170

WATER RECLAMATION
An improved plating process p 3223 N94-30451

WATER RESOURCES
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627
Fiscal 1990 geothermal development promotion survey
[DE94-732333] p 3337 N94-28628
Model-oriented data analysis with applications to lake and soil water simulation
[PB94-136942] p 3329 N94-29173
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

WATER RUNOFF
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

WATER TEMPERATURE
Effectiveness of protection clothing for cold weather conditions after ejection over sea: A case report p 3381 N94-28435

WATER TREATMENT
A new material for removing heavy metals from water p 3354 N94-30471

WATER TUNNEL TESTS
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443

WATER VAPOR
Fire-resistant water vapour permeable buoyant insulation p 3380 N94-28431
Low energy ion-molecule reactions and chemiionization kinetics
[DE94-005414] p 3481 N94-28491
On the effect of emissions from aircraft engines on the state of the atmosphere p 3189 N94-29247
Propagation modeling of moist air and suspended water/ice particles at frequencies below 1000 GHz p 3256 N94-30497
Estimation of transmittance from satellite imagery p 3257 N94-30500
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean p 3375 N94-30863

WATER WAVES
An improvement of the slender body theory for oscillating ships with finite forward speed p 3234 N94-29705
The dynamics of tropical intraseasonal variability p 3371 N94-29741
Splines and ocean wave modelling
[PB94-139409] p 3378 N94-30002
On the nonlinear dynamics of ocean wave systems p 3378 N94-30790

WATERPROOFING
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406

WATERSHEDS
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

WATERWAYS
Glaciohydrologic and glaciohydraulic effects on runoff and sediment yield in glacierized basins
[AD-A275134] p 3361 N94-29286

WAVE ATTENUATION
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740

WAVE DIFFRACTION
Characterization of a diffraction grating as a simulant of a selective frequency antenna for radiometric applications
[AD-A275793] p 3241 N94-28745

WAVE DISPERSION
Investigations of dispersion characteristics of microwave/optical guided wave structures by using transmission line matrix method
[ISBN-0-315-85856-7] p 3254 N94-30034
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
Theory and observations of horizontal and vertical structure of gravity wave perturbations in the middle atmosphere p 3366 N94-30802

WAVE EQUATIONS
The (j,0) + (0,j) representation space: Majorna-like construct
[DE94-005010] p 3522 N94-28543
Exact spherical wave solutions to Maxwell's equations with applications p 3252 N94-29733
A numerical study of gravitational collapse p 3548 N94-30271
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972

WAVE FUNCTIONS
The (j,0) + (0,j) representation space: Dirac-like construct
[DE94-005011] p 3522 N94-28572
Miln equation for the calculation of the phases and amplitudes of wave functions for continuum spectrum of Coulomb two-center problem
[DE94-606292] p 3522 N94-28616
Classical interpretation of quantum mechanics
[DE94-606304] p 3523 N94-28719
The solving of the relativistic two-body problem with a nonlinear dependence upon a spectrum parameter
[DE94-606343] p 3451 N94-28783
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096

WAVE GENERATION
Forced generation of solitary waves in a rotating fluid and their stability p 3274 N94-29689
Wave generation by contaminant ions near a large spacecraft
[NASA-CR-195797] p 3169 N94-29917

WAVE INTERACTION
Interaction of sound with sound by novel mechanisms: Ultrasonic four-wave mixing mediated by a suspension and ultrasonic three-wave mixing at a free surface p 3479 N94-29988
On the nonlinear dynamics of ocean wave systems p 3378 N94-30790
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953

WAVE PACKETS
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities p 3506 N94-29822
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172

WAVE PROPAGATION
Characterization of structural vibration: Field descriptors based on energy density and intensity
[PB94-132230] p 3316 N94-28404
Broad geoacoustic assessment of some regional areas
[AD-A275504] p 3356 N94-28791
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003
Dynamic response of ceramics
[AD-A275396] p 3214 N94-29203
Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393
The dynamics of tropical intraseasonal variability p 3371 N94-29741
Nonlinear wave packet evolution in a dispersive plasma: Application to rotational discontinuities p 3506 N94-29822
Spectral analysis of wave propagation in connected waveguides p 3277 N94-29944
The effects of propagational factors on quantum wires in close parallel proximity
[ISBN-0-315-86157-6] p 3254 N94-30035
A relativistic solitary wave in electron positron plasma
[DE94-608107] p 3507 N94-30071
Extension of love wave transformation theory to laterally heterogeneous structures
[DE94-608098] p 3365 N94-30093
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
Accurate finite difference methods for time-harmonic wave propagation
[NASA-CR-194887] p 3454 N94-30209

WAVE REFLECTION
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003

WAVE SCATTERING
Statistical characterization of rugged propagation paths with application to Rg scattering study
[AD-A275237] p 3361 N94-29393
A spectral boundary integral equation method for the 2-D Helmholtz equation
[NASA-CR-194890] p 3454 N94-30207

WAVEFORMS
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
Design of the biosonar simulator for dolphin's clicks waveform reproduction p 3234 N94-29707
Numerical simulations of piano strings. Part 1: A physical model for a struck string using finite difference methods
[TELECOM-93-C-003] p 3481 N94-30972

WAVEGUIDE ANTENNAS
Printed circuit elements with applications to antennas, scattering, and circuits
[AD-A275512] p 3262 N94-28669
X-/Ka-band dichroic plate design and grating lobe study p 3247 N94-29616
A portable X-band front-end test package for beam-waveguide antenna performance evaluation. Part 2: Tests on the antenna p 3247 N94-29620
Determining noise temperatures in beam waveguide systems p 3249 N94-29657

WAVEGUIDES
Three dimensional transient analysis of microstrip circuits in multilayered anisotropic media
[AD-A274995] p 3263 N94-28995
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117
Spectral analysis of wave propagation in connected waveguides p 3277 N94-29944
Investigations of dispersion characteristics of microwave/optical guided wave structures by using transmission line matrix method
[ISBN-0-315-85856-7] p 3254 N94-30034
Electrooptical and optical evaluation of Pb(Zr,Ti)O3 thin films using waveguide refractometry
[DE94-006374] p 3518 N94-30247

WAVELET ANALYSIS
Taxonomy of gamma ray burster data using a self-organizing neural network
[DE94-006480] p 3553 N94-30248
The Stroemberg wavelet on the interval and the Franklin system
[TELECOM-93-C-002] p 3482 N94-30971
Noise reduction techniques for the restoration of musical recordings
[TELECOM-93-E-019] p 3291 N94-30979

WAVERIDERS
Advanced vehicle concepts systems and design analysis studies
[NASA-CR-195115] p 3147 N94-29721
Expanding the waverider design space using arbitrary generating flowfields p 3148 N94-30516

WEAK INTERACTIONS (FIELD THEORY)
A measurement of the tau polarization at the resonance with the DELPHI detector at LEP
[DE94-005557] p 3482 N94-28520
Weak decays of charged K-mesons and charm particles
[PB94-138062] p 3486 N94-29143
A Tevatron collider beauty factory
[DE94-004879] p 3488 N94-29930
High sensitivity tests of the standard model for electroweak interactions
[DE94-005415] p 3490 N94-30262

WEAPON SYSTEMS
A common Ada run-time system for avionics software p 3150 N94-29331
Validation and test of complex weapon systems p 3150 N94-29336
Testing Operational Flight Programs (OFPs) p 3415 N94-29337
A disciplined approach to software test and evaluation p 3416 N94-29339

WEAPONS DELIVERY
Characterization of a diffraction grating as a simulant of a selective frequency antenna for radiometric applications
[AD-A275793] p 3241 N94-28745

WEAR
Lubrication of space systems
[NASA-TM-106392] p 3214 N94-29399

WEAR RESISTANCE
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838

Unscreened low tension cables scrape abrasion testing. Part 1: An interlaboratory study on scrape abrasion testing according to ISO DP 6722-1
[PB94-135605] p 3264 N94-29191

WEAR TESTS
Unscreened low tension cables scrape abrasion testing. Part 1: An interlaboratory study on scrape abrasion testing according to ISO DP 6722-1
[PB94-135605] p 3264 N94-29191
Sliding friction and wear between titanium nitride, M50 steel and silicon nitride (round 3 of VAMAS wear test program)
[IMR-TM-TR-003] p 3303 N94-30019

WEATHER
Catalog of Air Force weather technical publications 1992-1993
[AD-A275635] p 3368 N94-28638
Capabilities, products, and services of USAFETAC (USAF Environmental Technical Applications Center)
[AD-A275654] p 3368 N94-28652
AFGWC Dial-In Subsystem (AFDIS) software users manual, version 2.2
[AD-A275844] p 3371 N94-29747
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777

WEATHER STATIONS
Spatial interpolation, network bias, and terrestrial air temperature variability p 3374 N94-30810

WEATHERING
An outdoor exposure testing program for optical materials used in solar thermal electric technologies
[DE94-000265] p 3500 N94-29799

WEDGES
Quadruplet expansion of the acoustic pressure field in a wedge shaped ocean
[AD-A275121] p 3477 N94-29003
A comparison of two computer models of sound propagation for a wedge shaped ocean over a penetrable bottom
[AD-A275031] p 3477 N94-29117

WEIBULL DENSITY FUNCTIONS
Estimation of Weibull modulus from dynamic and static fatigue experiments
[PB94-138641] p 3322 N94-30114

WEIGHT INDICATORS
A non-contacting vertical alignment system for mass properties measuring instruments
[DE94-004680] p 3289 N94-29927

WEIGHT REDUCTION
Advanced microfabrication technologies for microspacecraft p 3171 N94-29782
Use of magnetic compression to support turbine engine rotors p 3314 N94-30484

WEIGHTING FUNCTIONS
Track filtering by robust neural network
[DE94-606067] p 3434 N94-28613
Weighted and unweighted maximum clique algorithms with upper bounds from fractional coloring
[AD-A275328] p 3409 N94-28917

WEIGHTLESSNESS SIMULATION
Free-floating dual-arm robots for space assembly
[AIAA PAPER 94-1195-CP] p 3442 N94-30546

WELD STRENGTH
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel
p 3364 N94-29983

WELDABILITY
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts
p 3186 N94-30482

WELDED JOINTS
Fundamental studies on the corrosion behavior of weldments in marine microbial environments
[AD-A275247] p 3203 N94-28900
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel
p 3364 N94-29983

WELDING
On the prediction of HAZ grain size using Monte Carlo simulation
[DE94-005465] p 3511 N94-28535
Programmable Automated Welding System (PAWS): Control of welding through software and hardware
p 3314 N94-30443
Metafusion: A breakthrough in metallurgy
p 3211 N94-30446
Programmable Automated Welding System (PAWS)
[AIAA PAPER 94-1221-CP] p 3446 N94-30570

WELLS
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627

WENTZEL-KRAMER-BRILLOUIN METHOD
Application of semiclassical methods to reaction rate theory
[DE94-007041] p 3199 N94-30266

WETTABILITY
Logistics for the implementation of lead-free solders on electronic assemblies
[DE94-004800] p 3206 N94-29936

WHARVES
The undrained shear strength characteristics of undisturbed soil from fishing port areas
p 3234 N94-29704

WHEELCHAIRS
A robotic wheelchair
[AIAA PAPER 94-1229-CP] p 3447 N94-30578

WHISKER COMPOSITES
Technology base enhancement program. Metal matrix composites
[AD-A275531] p 3176 N94-28688
Superplasticity in fine-grained ceramics
[AD-A275461] p 3212 N94-28733

WHISTLERS
Active electron and ion beam experiments in space
[AD-A275570] p 3504 N94-28828

WHITE DWARF STARS
A study of white dwarf radiative accretion shocks
p 3544 N94-29731
Theoretical asteroseismology of white dwarf stars: The encyclopedia Seismologica p 3547 N94-30011

WHITE NOISE
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072
Partially coherent detection of PSK signals in Rician channels
[ISBN-0-315-85799-4] p 3254 N94-30031

WILDLIFE
Development and implementation of a scrub habitat compensation plan for Kennedy Space Center
[NASA-TM-109202] p 3347 N94-29099

WIND (METEOROLOGY)
On the linear stability of Verkley's modons
p 3324 N94-28695
Radar estimations of atmospheric winds in the troposphere and lower stratosphere
p 3370 N94-29697
On interannual variability and climate change in the North Pacific p 3374 N94-29963
Test of prototype liquid-water-content meter for aircraft use
[NASA-CR-189304] p 3374 N94-30187

WIND DIRECTION
The active titration method for measuring local hydroxyl radical concentration p 3345 N94-28602

WIND EFFECTS
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
Deterioration of manual performance in cold and windy climates p 3381 N94-28434

WIND MEASUREMENT
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
New parameters for characterizing turbulence at a potential wind site
[DE94-004355] p 3368 N94-28455
Radar estimations of atmospheric winds in the troposphere and lower stratosphere
p 3370 N94-29697
Four-dimensional data assimilation using the adjoint method p 3455 N94-30353

WIND TUNNEL APPARATUS
Laminar Flow Supersonic Wind Tunnel primary air injector p 3158 N94-29649
'Real time' and the NLR aerodynamic facilities
[AD-B173626] p 3158 N94-30856

WIND TUNNEL CALIBRATION
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545

WIND TUNNEL MODELS
Variable soft sphere molecular model in the Monte Carlo simulation of air species p 3123 N94-28949
Rarefied gas numerical wind tunnel. Part 8: HOPE
p 3123 N94-28950
Numerical simulation of arc heated wind tunnel flow
p 3123 N94-28951
Numerical simulation of aerothermodynamic heating of hypersonic space transportation vehicles
p 3124 N94-28955
Wind tunnel testing and research
[NASA-CR-188273] p 3156 N94-29052
Low-speed longitudinal aerodynamic characteristics of a flat-plate planform model of an advanced fighter configuration
[NASA-TM-109045] p 3130 N94-29443
Miniature linear-to-rotary motion actuator
p 3163 N94-29647

WIND TUNNEL TESTS
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
Design and fabrication of forward-swept counterrotation blade configuration for wind tunnel testing
[NASA-CR-194868] p 3155 N94-28510
Steady pressure measurements on an Aeroelastic Research Wing (ARW-2)
[NASA-TM-109046] p 3122 N94-28658
A method for the modelling of porous and solid wind tunnel walls in computational fluid dynamics codes
[NASA-CR-195699] p 3270 N94-28724
A flow visualization study of acoustically enhanced hairpin vortices
[AD-A275467] p 3271 N94-28809
Laser velocimeter data acquisition system for the Langley 14- by 22-foot subsonic tunnel. Software reference guide version 3.3
[NASA-CR-191606] p 3293 N94-28839
Wind tunnel testing and research
[NASA-CR-188273] p 3156 N94-29052
An experimental study of wing tip vortex in the near wake of a rectangular wing
[AD-A275389] p 3129 N94-29306
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
p 3130 N94-29674
An experimental investigation of the effect of leading edge extensions on directional stability and the effectiveness of forebody nose strakes
p 3155 N94-29728
Algorithm and code development for unsteady three-dimensional Navier-Stokes equations
[NASA-CR-195774] p 3277 N94-29942
The 3-D LDV measurements on a 30-degree swept wing with a simulated ice accretion
[NASA-CR-195327] p 3132 N94-30124
Computation of wind tunnel wall effects for complex models using a low-order panel method
[NASA-TM-104019] p 3132 N94-30151
Three-dimensional flow characteristics downstream of a blade endwall corner p 3280 N94-30229
The enhancement of compressible turbulent mixing via streamwise vorticity p 3280 N94-30487
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer
p 3282 N94-30807
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946

WIND TUNNEL WALLS
A method for the modelling of porous and solid wind tunnel walls in computational fluid dynamics codes
[NASA-CR-195699] p 3270 N94-28724
Computation of wind tunnel wall effects for complex models using a low-order panel method
[NASA-TM-104019] p 3132 N94-30151

WIND TUNNELS
Holographic interferometry: A user's guide
[DE94-003136] p 3286 N94-28466
Performance evaluation of the NWT with parallel Fortran p 3129 N94-28992
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
[NASA-TM-109105] p 3157 N94-30200
The effect of pressure gradient on the structure of an equilibrium turbulent boundary layer
p 3282 N94-30807

WIND TURBINES
New parameters for characterizing turbulence at a potential wind site
[DE94-004355] p 3368 N94-28455
International collaborative research in wind turbine rotor aerodynamics
[DE94-000244] p 3339 N94-30602
WISPER and WISPERX: Final definition of two standardised fatigue loading sequences for wind turbine blades
[AD-B175835] p 3324 N94-30872

The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946

WIND VELOCITY
Simulation of the effect of wind on clothing by measurements and calculations
[PB94-132289] p 3399 N94-28406
Prediction of survival times on land in a cold climate p 3379 N94-28423
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196
Atmospheric turbulence within and above a coniferous forest
[ISBN-0-315-75468-0] p 3375 N94-30870

WIND VELOCITY MEASUREMENT
Micro-sensors for in-situ meteorological measurements p 3236 N94-29777

WINDOWS (APERTURES)
WINDOW 4.0: Documentation of calculation procedures
[DE94-004935] p 3410 N94-29019

WINDOWS (COMPUTER PROGRAMS)
Extending the X Window System
[DE94-006496] p 3420 N94-29844
The Views application environment
[CWI-CS-R9257] p 3423 N94-30341

WINDPOWER UTILIZATION
Applicability of digital terrain analyses to wind energy prospecting and siting
[DE94-004363] p 3374 N94-30587
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946

WINDS ALOFT
Mesopause winds and OH intensities at Mid-Latitudes-Fabry-Perot interferometer observations of the OH emission at 8430 A from bear lake observatory
[AD-A275246] p 3361 N94-29430

WINDSHIELDS
Backscatter haze device for measurement of haze in aircraft transparencies
[AD-A275127] p 3146 N94-29042

WING NACELLE CONFIGURATIONS
Aerodynamic analysis of slipstream/wing/nacelle interference for preliminary design of aircraft configurations
[AD-B173651] p 3135 N94-30916

WING OSCILLATIONS
Development of a method to predict transonic limit cycle oscillation characteristics of fighter aircraft (continued)
[NLR-TP-92156-U] p 3148 N94-30342
Prospects of time-linearized unsteady calculation methods for exponentially diverging motions in aeroelasticity
[PB94-126224] p 3134 N94-30740

WING PROFILES
Numerical analysis of supersonic transport wings p 3124 N94-28959
Numerical solution of inverse problem in aerodynamics p 3125 N94-28965

WING TIP VORTICES
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
An experimental study of wing tip vortex in the near wake of a rectangular wing
[AD-A275389] p 3129 N94-29306

WING TIPS
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899

WINGS
Experimental investigation of three-dimensional vortex-airfoil interaction in a supersonic stream
[AD-A275107] p 3122 N94-28899
Numerical study of the trailing vortex of a wing with wing-tip blowing
[NASA-CR-195803] p 3130 N94-29760
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
Sensitivity analysis of the static aeroelastic response of a wing p 3134 N94-30525

WINTER
Hydrodynamics of convection under winter polar leads
[AD-A275182] p 3369 N94-29067
Interannual temperature variability and cyclone frequency over Eastern Canada and the New England States. A case study: Winter seasons 1931-1932 to 1984-1985
[ISBN-0-315-74841-9] p 3373 N94-29908

WIRE
Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1-SB] p 3300 N94-29506

WIRE CLOTH
Flow past a circular cylinder with a permeable wake splitter plate p 3275 N94-29764

WIRE WINDING
Rotary actuator
[NASA-CASE-MFS-28581-1] p 3205 N94-29447

WIRELESS COMMUNICATION
Evaluation of wireless Local Area Networks
[AD-A275133] p 3243 N94-29064
The 19th Convention on Radio Science: Abstracts of Papers
[PB94-136868] p 3244 N94-29169

WIRING
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
ESTEC wiring test programme materials related properties p 3165 N94-28698
NASA wiring program: Survey of NASA experiences in wiring system safety p 3165 N94-28700
NAVAIR aircraft wiring standardization and qualification program p 3166 N94-28704
Organized wiring systems p 3166 N94-28705
MSFC inspections of installed polyimide wire p 3166 N94-28707
Wiring for space applications program p 3166 N94-28708
Cryogenic on-orbit liquid depot storage acquisition and transfer (COLD-SAT) experiment subsystem instrumentation and wire harness design report
[NASA-CR-189172] p 3168 N94-29405

WOLF-RAYET STARS
Inhomogeneities in the wind from Wolf-Rayet stars
[ISBN-0-315-85893-1] p 3548 N94-30058

WORD PROCESSING
Smart Document System (SDS) used in managing DOE order's with electronic Engineering Procedures
[DE94-005076] p 3534 N94-30099

WORK CAPACITY
Circadian countermeasures for shiftworkers during USMP-2: A report to mission management
[NASA-CR-195260] p 3402 N94-30188

WORK FUNCTIONS
Engineering of systems for application of scientific computing in industry p 3123 N94-28947

WORKING FLUIDS
ARTI Refrigerant Database
[DE94-004906] p 3230 N94-28563
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740

WORKLOADS (PSYCHOPHYSIOLOGY)
Effects of workload on communication processes in decision making teams
[AD-A275894] p 3527 N94-28796
Information presentation for expert systems in future fighter aircraft
[AD-A275126] p 3149 N94-29005
Stress and ergonomic design and evaluation of person-machine systems
[AD-A275156] p 3400 N94-29034
The use of task network simulation in workload prediction
[DCIEM-92-32] p 3402 N94-30132
Spectral analysis of heart rate and psychological state: A review of its validity as a workload index
[AD-B179387] p 3399 N94-30969

WORKSTATIONS
The High Performance Storage System
[DE94-004350] p 3404 N94-28505
Data fusion and correlation techniques testbed development. Phase 1: Interim report
[SKD-1600-73-015] p 3405 N94-28533
ACCS Surveillance Exploratory Prototype (ASEP) p 3138 N94-29566
Performance of MCNP4A on seven computing platforms
[DE93-040101] p 3419 N94-29816
PAW using under MS DOS
[DE94-608012] p 3406 N94-30081
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175

WOVEN COMPOSITES
Delamination of woven E-glass fabric composites
[DE94-003227] p 3185 N94-30827

WROUGHT ALLOYS
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921

WURTZITE
The synthesis and structural characterization of Na3WO3N
[AD-A275243] p 3204 N94-29395

X

X RAY ABSORPTION
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073

X RAY ANALYSIS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
A novel approach to the fabrication of SiC structures of arbitrary shape
[AD-A275475] p 3214 N94-29073
Electron microscopy: Metal alloy x ray microanalysis
[REPT-932-600-101] p 3205 N94-29525

X RAY ASTRONOMY
X ray studies of the Hyades cluster
[NASA-CR-189325] p 3538 N94-29001
Coronal temperatures of unusually active K-dwarf binary systems
[NASA-CR-189335] p 3545 N94-29861
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862

X RAY BINARIES
A study of ultra high-energy radiation associated with Hercules X-1 p 3552 N94-29823
Spectral and temporal behavior of low mass x ray binaries observed with the Einstein SSS and MPC, and the Broad Band X Ray Telescope p 3542 N94-30862

X RAY DETECTORS
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717

X RAY DIFFRACTION
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021

X RAY INSPECTION
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454

X RAY IRRADIATION
Irradiation polymerization of bismaleimide resins
[REPT-932-430-105] p 3215 N94-29441

X RAY LASERS
Linac Coherent Light Source (LCLS) at 2-4 nm using the SLAC linac
[DE94-005235] p 3292 N94-28481
Enhanced coherence x ray laser experiments and simulations
[DE94-005367] p 3295 N94-30060

X RAY SOURCES
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
On observing neutron star oscillations p 3538 N94-29795
High redshift QSOs and the x ray background
[NASA-CR-195112] p 3540 N94-29957
Conceptual study of moderately coupled plasmas and experimental comparison of laboratory x ray sources
[DE94-005828] p 3506 N94-30045

X RAY SPECTRA
Coronal abundances and their variation
[NASA-CR-195767] p 3551 N94-29858
A high rate, low noise, x ray silicon strip detector system
[DE94-004557] p 3268 N94-30717

X RAY SPECTROSCOPY
Structure of ordinary ice I(sub h). Part 1: Ideal structure of ice
[AD-A275149] p 3486 N94-29021
Miniaturization in x ray and gamma ray spectroscopy p 3236 N94-29773
Aggregation equilibria in arsenic doped silicon
[DE94-607269] p 3515 N94-30005
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177
A low noise silicon detector preamplifier system for room temperature x ray spectroscopy
[REPT-93-058] p 3291 N94-30930

X RAYS
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
X ray emission scaling and energy balance of small gas-puff Z-pinch p 3505 N94-29077
X ray crystal structures of ((Me3SiCH2)2InCl)2 and ((Me3SiCH2)InCl2)
[AD-A275074] p 3513 N94-29155
X ray standing wave studies of underpotentially deposited metal monolayers
[AD-A275409] p 3513 N94-29215
Correlative analysis of hard and soft x ray observations of solar flares
[NASA-CR-189329] p 3551 N94-29453
Microactuator production via high aspect ratio, high edge acuity metal fabrication technology
p 3235 N94-29770
Characteristics of secondary electron emission from CsI induced by x rays with energies up to 100 keV
[DE94-608422] p 3395 N94-30185
Determination of photon fluence spectra from the NPL Mobaltron Co-60 unit
[NPL-RSA(EXT)-46] p 3492 N94-30795
Role of x ray-induced transcripts in adaptive responses following x rays
[DE94-005412] p 3386 N94-30895
XANTHINES
Biochemical enhancement of cold tolerance
p 3380 N94-28427
XENON
Computer simulation of molecular interactions in supercritical solvents
[AD-A274977] p 3486 N94-29087
Remote pumping of solid state lasers with nuclear driven fluorescers
[DE94-004846] p 3296 N94-30614

Y

YAG LASERS
Laser beam steering with semiconductor waveguide
[AD-A275775] p 3292 N94-28765
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency
[AD-A275394] p 3293 N94-29309
The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts
[REPT-932-430-113] p 3225 N94-29414
YANG-MILLS THEORY
Theory of fundamental interactions
[DE94-608126] p 3525 N94-30169
Periodic electromagnetic vacuum in the two-dimensional Yang-Mills theory with the Chern-Simons mass
[DE94-608128] p 3525 N94-30170
YARNS
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838
YAW
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946
YBCO SUPERCONDUCTORS
Fabrication issues in optimizing YBa(2)Cu(3)O(7-x) flux transformers for low I/f noise
[DE94-005209] p 3261 N94-28546
Ion channeling peculiarities in YBa2Cu3 O7 monocrystal
[DE94-606885] p 3512 N94-28787
Atomic and magnetic structure of YBa2(Cu(1-x)Fe(x))3O(6+y) at 0.05 less than or equal to x less than or equal to 0.30, y is approximately equal to 1 and y is approximately equal to 0.5
[DE94-606852] p 3513 N94-29210
MuSR measurement of the magnetic penetration depth and coherence length in the high-Tc superconductor YBa2Cu3O(6.95)
[ISBN-0-315-85385-9] p 3517 N94-30203
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724
YEAST
Plant-microbe interactions: Plant hormone production by phylloplane fungi
[PB94-135563] p 3385 N94-29189
YIELD POINT
High damage threshold anti-reflectors by physical vapor deposited amorphous fluoropolymer
[DE94-004865] p 3212 N94-28560
YIELD STRENGTH
Bolt and nut evaluator
[NASA-CASE-GSC-13468-1] p 3288 N94-29538
YO-YO DEVICES
The Solar Anomalous and Magnetospheric Particle Explorer (SAMPEX) yo-yo despin and solar array deployment mechanism p 3163 N94-29645
YTTRIA-STABILIZED ZIRCONIA
Superplasticity in fine-grained ceramics
[AD-A275461] p 3212 N94-28733
YTTRIUM ALLOYS
Studies on the optimization of deformation processed metal-metal matrix composites
[DE94-006033] p 3185 N94-30704
YUKAWA POTENTIAL
Possible explanation of the interaction cross-section growth at high energies
[DE94-606457] p 3494 N94-28612

Z

ZEOLITES
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy
[DE94-605138] p 3514 N94-29691
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE94-004958] p 3200 N94-30769
ZETA PINCH
Progress in Z-Pinch Research
[IPPCZ-321] p 3505 N94-29074
Investigation of intense XUV emission of nitrogen-puff Z-pinch with small energy input
[PH-23] p 3505 N94-29075
Multichannel x ray spectral measurement of hot plasma evolution in nitrogen-puff Z-pinch
[PH-24] p 3505 N94-29076
X ray emission scaling and energy balance of small gas-puff Z-pinch p 3505 N94-29077
ZINC
Pit initiation on passivated metal surfaces: Crystallographic orientation and environmental effects
[ISBN-0-315-85433-2] p 3208 N94-30138
ZINC ALLOYS
Study of nucleation and growth in Al-Zn alloys using TEM
[DE94-006312] p 3211 N94-30852
ZINC SELENIDES
Optical properties of cadmium sulfide, zinc selenide, and zinc manganese selenide semiconductor films
p 3500 N94-29759
Electronic structure of Zn-based quantum wells
[DE94-608104] p 3516 N94-30068
ZINC TELLURIDES
Dual-use applications of infrared sensitive materials
[AD-A275140] p 3499 N94-29694
ZINCBLENDE
II-VI wide band gap semiconductors under hydrostatic pressure
[DE94-608106] p 3516 N94-30070
ZIRCONIUM ALLOYS
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822
ZIRCONIUM CARBIDES
The organometallic chemical vapor deposition of transition metal carbides: The use of homoleptic alkyls
[DE94-005577] p 3206 N94-30007
ZIRCONIUM COMPOUNDS
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
ZIRCONIUM OXIDES
Interstitially stabilized phases in the zirconium-nickel system
[DE94-005561] p 3201 N94-28525
Pull-test adhesion measurements of diamondlike carbon films on silicon carbide, silicon nitride, aluminum oxide, and zirconium oxide
[DE94-005469] p 3211 N94-28536
Thick thermal barrier coatings for diesel components
[NASA-CR-187111] p 3537 N94-29350
Brittle composites modeling: Comparisons with MoSi2/ZrO2
[DE94-004978] p 3182 N94-29933
Plasma enhanced chemical vapor deposition of ZrO2 thin films
[DE94-006031] p 3218 N94-30104
Densification and crystallization of zirconia thin films prepared by sol-gel processing
[DE94-005573] p 3518 N94-30315
ZODIACAL DUST
Infrared observations of cometary dust by COBE
p 3541 N94-29994
ZODIACAL LIGHT
CBSD: The celestial background scene descriptor
[AD-A275521] p 3538 N94-28671
ZOOPLANKTON
Copepods collected along 33.5 deg E longitude of the Antarctic Ocean in the 1976 summer
p 3358 N94-29082

Typical Personal Author Index Listing

ALEXOPOULOS, JIM S. ..... p 436 N94-12023

PERSONAL AUTHOR | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AARONS, JULES ..... p 3356 N94-28891
AARTS, H. F. M. ..... p 3466 N94-30737

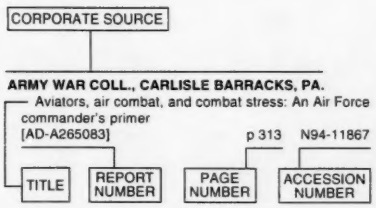
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

AALBORG UNIV. (DENMARK).
Computational fluid dynamics in ventilation. 1: Theory and one-dimensional test case p 3232 N94-29606
Computational fluid dynamics in ventilation. 2: Theory and codes p 3233 N94-29607
Computational fluid dynamics in ventilation. 3: The IEA annex 20 work p 3233 N94-29608
Computational fluid dynamics in ventilation. 4: Commercial application of CFD in ventilation p 3233 N94-29609
Computational fluid dynamics in ventilation. 5: New developments in CFD with relevance to ventilation p 3233 N94-29610

ABACUS TECHNOLOGY CORP., CHEVY CHASE, MD.
Alternative fuel vehicles for the state fleets: Results of the 5-year planning process
[DE94-004709] p 3224 N94-28577

ACADEMY OF SCIENCES OF THE ARMENIAN SSR, ERIVAN.
Coulomb field effect on plasma focusing and wake field acceleration
[DE94-004937] p 3504 N94-28564

ACADEMY OF SCIENCES (USSR), LENINGRAD.
Observation of the phase shift of the wave function of the neutron under total reflection
[DE94-608244] p 3489 N94-30096

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK.
Resistive ballooning mode in a gas-dynamic trap
[DE94-608328] p 3508 N94-30171
On determination of a momentum of Alfven wave packet
[DE94-608329] p 3255 N94-30172
Langmuir waves in the electron-positron plasma
[DE94-608330] p 3508 N94-30191
Experiments on the two-stage dense plasma heating on the GOL-3 device
[DE94-608356] p 3508 N94-30193
Peculiarities of heat transfer in the experiments of beam injection heating of a plasma at the GOL-3 device
[DE94-608357] p 3508 N94-30194
Computer simulation of the interaction of fast hydrogen atoms with a molybdenum containing sorbed hydrogen
[DE94-608419] p 3209 N94-30253

ACOUSTICAL SOCIETY OF AMERICA, NEW YORK, NY.
Minutes. Accredited Standards Committee on Noise, S12. US tag for ISO/TC 43/SC1 noise and ISO/TC 94/SC12 hearing protection
[AD-A275622] p 3477 N94-28636
Minutes. Accredited Standards Committee on Acoustics, S1. US tag for ISO/TC 43 acoustics and IEC/TC 29 electroacoustics
[AD-A275702] p 3477 N94-28689
Minutes: Accredited Standards Committee on Mechanical Vibration and Shock, S2. US TAG for ISO/TC 108 Mechanical Vibration and Shock
[AD-A275591] p 3316 N94-28726

ACUREX CORP., RESEARCH TRIANGLE PARK, NC.
Characterization of air emissions from the simulated open combustion of fiberglass materials
[PB94-136231] p 3347 N94-29192

ADVANCED AVIATION CONCEPTS, JUPITER, FL.
Extremely Low Visibility IFR Rotorcraft Approach (ELVIRA) operational concept development. Volume 1: Executive Summary
[DOT/FAA/RD-94/1,I] p 3142 N94-30189

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
The Support of Air Operations under Extreme Hot and Cold Weather Conditions
[AGARD-CP-540] p 3379 N94-28420
Fuels and Combustion Technology for Advanced Aircraft Engines
[AGARD-CP-536] p 3189 N94-29246
Research and Development of Ram/Scramjets and Turboramjets in Russia
[AGARD-LS-194] p 3151 N94-29291
Aerospace Software Engineering for Advanced Systems Architectures
[AGARD-CP-545] p 3412 N94-29315
Machine Intelligence in Air Traffic Management
[AGARD-CP-538] p 3136 N94-29558
TacSats for NATO
[AGARD-AR-322] p 3169 N94-30350
Atmospheric Propagation Effects Through Natural and Man-Made Obscurants for Visible to MM-Wave Radiation
[AGARD-CP-542] p 3256 N94-30495
Marketing tools for increasing proactivity in technical information centers
[AGARD-AR-326] p 3528 N94-30934

AERODYNE RESEARCH, INC., BILLERICA, MA.
On the possibility of measuring atmospheric OH using intracavity laser spectroscopy p 3344 N94-28597
HO2 detection by near infrared absorption using tunable diode lasers p 3346 N94-28608
Laboratory studies of chemical and photochemical processes relevant to stratospheric ozone
[NASA-CR-195779] p 3347 N94-29549

AERONAUTICAL RESEARCH INST. OF SWEDEN, STOCKHOLM.
Experimental determination of orthotropic elastic constants
[FFA-TN-1991-35] p 3215 N94-29424
Assessment of the fibre volume distribution around optical fibres
[FFA-TN-1993-12] p 3179 N94-29425
The execution of wind energy projects 1986 - 1992 between China Aerodynamics Research and Development Centre (CARDC) and The Aeronautical Research Institute of Sweden (FFA)
[FFA-TN-1993-19] p 3340 N94-30945
Wind tunnel tests of a 5.3 m diameter yaw controlled turbine
[FFA-TN-1993-20] p 3340 N94-30946
Fatigue management and verification of airframes
[FFA-TN-1993-55] p 3149 N94-30947

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Fishermans Bend: A centre of Australian aviation
[AD-A274981] p 3121 N94-29090
Cold expansion and interference for extending the fatigue life of multi-layer metal joints
[AD-A274982] p 3318 N94-29091

AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.
KC-135 cockpit modernization study and crew reduction feasibility demonstration
[AD-A275230] p 3146 N94-29391

AEROSPACE CORP., EL SEGUNDO, CA.
Space-time structure of the morning aurora inferred from coincident DMSP-F6, -F8, and Sondrestrom incoherent scatter radar observations
[AD-A275442] p 3356 N94-28869
Proton switches
[AD-A275150] p 3167 N94-29022
System requirements review for the High-Resolution Ozone Imager (HIROIG)
[AD-A275151] p 3347 N94-29023
Identification of an unexpected space radiation hazard
[AD-A275170] p 3552 N94-29046
Advantages of the LBL 88-inch cyclotron ion beam for SEP studies
[AD-A275142] p 3494 N94-29065
Screening of flexible cables by nonlinear resistance measurements
[AD-A275193] p 3264 N94-29289
The use of screening tests in spacecraft lubricant evaluation p 3162 N94-29641
Single event upset susceptibilities of latchup immune CMOS process programmable gate arrays p 3495 N94-30214

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Aeromedical support for casualties in extremely hot climates p 3382 N94-28443
Comparative centrifuge evaluation of the Air Force Advanced Technology Anti-G Suit (ATAGS) and the Navy Enhanced Anti-G Lower Ensemble (EAGLE)
[AD-A275348] p 3400 N94-28996

AEROSPATIALE, BORDEAUX (FRANCE).
Irradiation polymerization of bismaleimide resins
[REPT-932-430-105] p 3215 N94-29441

AEROSPATIALE, CANNES (FRANCE).
Microvibrations on a GEO telecommunication satellite
[REPT-932-440-101] p 3168 N94-29415
ISO overview: General presentation of the satellite, cryogenic aspects
[REPT-932-440-102] p 3231 N94-29416
An Earth observation telescope refocusing mechanism
[REPT-932-440-103] p 3332 N94-29417
Aid to Ada component reuse at Aerospatiale Cannes (France)
[REPT-932-440-102] p 3418 N94-29418
Satellites: Reliability and operation security
[REPT-932-440-108] p 3168 N94-29419
Theoretical and experimental study of a cylindrical microstrip antenna
[REPT-932-440-109] p 3245 N94-29456
GLRS-R 2-colour retroreflector target design and predicted performance
[REPT-932-440-106] p 3246 N94-29542
Application of FLUIDNET-G software to the preliminary thermal and hydraulic design of Hermes spaceplane
[REPT-932-440-107] p 3168 N94-29543
New perspectives for high accuracy SLR with second generation geodesic satellites
[REPT-932-440-105] p 3336 N94-30965

AEROSPATIALE, CHATILLON (FRANCE).
Electron microscopy: Metal alloy x ray microanalysis
[REPT-932-600-101] p 3205 N94-29525

The laser approach for sequential pyrotechnic initiation systems: Envisageable chain architecture and concepts
[REPT-932-430-113] p 3225 N94-29414

AEROSPATIALE, PARIS (FRANCE).
A time reasoning system based on the event calculus for scheduling in aeronautic maintenance
[REPT-932-710-101] p 3122 N94-29463

AEROSPATIALE, SURESNES (FRANCE).
Fire behavior of aeronautical materials
[REPT-932-600-105] p 3197 N94-29457
Rules and definition of the range of paints applied on aeronautical structrural composites
[REPT-932-600-106] p 3215 N94-29459
Correlation between wet ageing, humidity absorption and properties on composite materials based on different resins family
[REPT-932-600-107] p 3179 N94-29462
Automation of the NDT diagnostic using neural nets. Application: Inspection of Airbus longitudinal joints during maintenance
[REPT-932-600-104] p 3315 N94-29474
Numerical simulation of industrial workpiece superplastic forming
[REPT-932-600-102] p 3418 N94-29479
Integration of a path generation algorithm into off-line programming of airbus panels
[REPT-932-600-103] p 3435 N94-29480
AEROSPATIALE, TOULOUSE (FRANCE).
How to control the increase in the complexity of civil aircraft on-board systems p 3150 N94-29316
AEROSPATIALE AQUITAINE, SAINT-MEDARD EN JALLES (FRANCE).
Characterisation and processing of SiC/MAS-L glass ceramic matrix composite
[REPT-932-430-111] p 3179 N94-29412
Glass-ceramic matrix composites
[REPT-932-430-112] p 3179 N94-29413
Development of electromagnetic compatibility tests
[REPT-932-430-110] p 3245 N94-29421
Pyrotechnic shock: Devices in pyrotechnic environment qualification logic
[REPT-932-430-108] p 3225 N94-29429
Radioelectric characterization of materials at 1000 C
[REPT-932-430-104] p 3245 N94-29440
Damage meso-modeling of 3D evolutive composites
[REPT-932-430-106] p 3179 N94-29442
Microfocus radioscopy, a high resolution means of inspecting composite materials
[REPT-932-430-109] p 3179 N94-29454
A normative frame of reference for the metrology function
[REPT-932-430-102] p 3231 N94-29477
Reliability of composite material structures. Application: High pressure spherical coded tanks
[REPT-932-430-103] p 3180 N94-29478
Measurement basis of near fields in spherical coordinates in the 100 MHz to 6 GHz band
[REPT-932-430-107] p 3255 N94-30153
AEROSPATIALE ETABLISSEMENT DES MUREAUX (FRANCE).
Software engineering methods in the Hermes on-board software p 3414 N94-29326
AICHI FISHERIES RESEARCH INST., MINATO (JAPAN).
Copepods collected along 33.5 deg E longitude of the Antarctic Ocean in the 1976 summer p 3358 N94-29082
AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-004905] p 3220 N94-30692
AIR FORCE CIVIL ENGINEERING CENTER, TYNDALL AFB, FL.
Asphaltic concrete performance under heavy fighter aircraft loading

Free vibration of thermally loaded panels including initial imperfections and post-buckling effects
[NASA-TM-109097] p 3479 N94-29461
Subjective response to sonic booms having different shapes, rise times, and durations
[NASA-TM-109090] p 3479 N94-29464
Preliminary evaluation of hybrid titanium composite laminates
[NASA-TM-109095] p 3180 N94-29472
An experimental and theoretical study of the aerodynamic characteristics of some generic missile concepts at Mach numbers from 2 to 6.8
[NASA-TM-109110] p 3130 N94-29473
Method for making a dynamic pressure sensor and a pressure sensor made according to the method
[NASA-CASE-LAR-14029-1] p 3288 N94-29484
Non-rectangular towpreg architectures
[NASA-CASE-LAR-14863-1-CU] p 3180 N94-29485
Thermal enclosure system functional simulation user's manual
[NASA-TM-109094] p 3466 N94-29489
ASSIST internals reference manual
[NASA-TM-109102] p 3431 N94-29494
Apparatus for providing a uniform, consolidated, unidirectional, continuous, fiber-reinforced polymeric material and method relating thereto
[NASA-CASE-LAR-15173-1-CU] p 3180 N94-29496
Effects of physical aging on long-term creep of polymers and polymer matrix composites
[NASA-TM-109081] p 3181 N94-29541
Experimental studies of transonic flow field near a longitudinally slotted wind tunnel wall
[NASA-TP-3392] p 3130 N94-29545
Method and apparatus for indicating disbonds in joint regions
[NASA-CASE-LAR-14626-1] p 3315 N94-29548
Polyimides containing the penta fluoro sulfanyl benzene moiety
[NASA-CASE-LAR-15082-1] p 3175 N94-29554
Polyimides containing pendent siloxane groups
[NASA-CASE-LAR-14638-1] p 3215 N94-29555
Profile negotiation: An air/ground automation integration concept for managing arrival traffic p 3140 N94-29578
Design and testing of the LITE Variable Field Stop mechanism p 3161 N94-29633
Integration of pyrotechnics into aerospace systems p 3161 N94-29634
Miniature linear-to-rotary motion actuator p 3163 N94-29647
Dynamic fracture mechanics analysis for an edge delamination crack
[NASA-TM-109106] p 3479 N94-29856
Aerodynamic characteristics of a propeller-powered high-lift semispan wing
[NASA-TM-4541] p 3132 N94-29937
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 23: The communications practices of US aerospace engineering faculty and students: Results of the phase 3 survey
[NASA-TM-109085] p 3534 N94-30149
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 22: US academic librarians and technical information specialists as information intermediaries: Results of the phase 3 survey
[NASA-TM-109067] p 3534 N94-30150
TOTAL user manual
[NASA-TM-109101] p 3432 N94-30160
User's manual for the model interface and plugboard cabinets in the 14- by 22-foot subsonic tunnel
[NASA-TM-109062] p 3133 N94-30176
Application of fuzzy logic to the control of wind tunnel settling chamber temperature
[NASA-TM-109105] p 3157 N94-30200
Four advances in carbon-carbon materials technology p 3186 N94-30481

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. LEWIS RESEARCH CENTER, CLEVELAND, OH.
Second NASA Workshop on Wiring for Space Applications
[NASA-CP-3244] p 3165 N94-28697
Selection of the Space Station Freedom (SSF) Flat Collector Circuit (FCC) insulation material p 3165 N94-28701
Wire insulation degradation and flammability in low gravity p 3166 N94-28712
Formation and chemical reactivity of carbon fibers prepared by defluorination of graphite fluoride
[NASA-TM-106398] p 3174 N94-28747
The nozzle acoustic test rig: An acoustic and aerodynamic free-jet facility
[NASA-TM-106495] p 3156 N94-28749
Hypervelocity impact induced arcing and Kapton pyrolization in a plasma environment
[NASA-TM-106528] p 3167 N94-28814

An analysis of isothermal, bithermal, and thermomechanical fatigue data of Haynes 188 and B1900+Hf by energy considerations
[NASA-TM-106359] p 3317 N94-28819
Effects of thermomechanical processing on tensile and long-time creep behavior of Nb-1 percent Zr-0.1 percent C sheet
[NASA-TM-106319] p 3202 N94-28822
Defocussing characteristics of the ACTS, T1-VSAT Earth terminal antennas
[NASA-TM-106420] p 3242 N94-28826
Matrix isolation studies of the interactions of BF3 with water and substituted diethyl ethers. Chemical ionization mass spectrometric determination of the proton affinity of (CF3CH2)2O
[NASA-TM-106422] p 3189 N94-28832
Nuclear electric propulsion: A better, safer, cheaper transportation system for human exploration of Mars
[NASA-TM-106406] p 3171 N94-28833
Performance and durability of high emittance heat receiver surfaces for solar dynamic power systems
[NASA-TM-106549] p 3172 N94-28834
Calculation of propulsive nozzle flowfields in multidiffusing chemically reacting environments
[NASA-TM-106532] p 3271 N94-28835
Development of braided rope engine seals
[NASA-TM-105902] p 3298 N94-28838
Cyclic axial-torsional deformation behavior of a cobalt-base superalloy
[NASA-TM-106372] p 3203 N94-28921
Surface energy changes produced by ultraviolet-ozone irradiation of poly(methylmethacrylate), polycarbone and polytetrafluoroethylene
[NASA-TM-106460] p 3213 N94-28922
A random distribution reacting mixing layer model
[NASA-TM-106517] p 3150 N94-28923
Graphite intercalation compounds prepared from graphite fluoride
[NASA-TM-106447] p 3174 N94-28924
Low Earth orbit durability evaluation of protected silicone for advanced refractive photovoltaic concentrator arrays
[NASA-TM-106543] p 3172 N94-28999
Cryogenic probe station for use in automated microwave and noise figure measurements
[NASA-TM-106560] p 3286 N94-29000
Theoretical study of the incompressible Navier-Stokes equations by the least-squares method
[NASA-TM-106535] p 3272 N94-29096
Evaluation of oxide-coated iridium-rhenium chambers
[NASA-TM-106442] p 3172 N94-29097
Thermal expansion and elastic anisotropy in single crystal Al2O3 and SiC reinforcements
[NASA-TM-106516] p 3214 N94-29105
Transport properties of epitaxial lift off films
[NASA-TM-106156] p 3264 N94-29209
Spray combustion experiments and numerical predictions p 3195 N94-29277
Experimental studies on effervescent atomizers with wide spray angles p 3196 N94-29280
Thick thermal barrier coatings for diesel components
[NASA-CR-187111] p 3537 N94-29350
Fuel-rich catalytic combustion of a high density fuel
[NASA-TP-3281] p 3197 N94-29356
Hypervelocity impact testing of Space Station Freedom solar cells
[NASA-TM-106509] p 3167 N94-29383
A method for the probabilistic design assessment of composite structures
[NASA-TM-106384] p 3319 N94-29384
Lubrication of space systems
[NASA-TM-106392] p 3214 N94-29399
Rocket engine system reliability analyses using probabilistic and fuzzy logic techniques
[NASA-TM-106519] p 3173 N94-29403
Stiffness-generated rigid-body mode shapes for Lanczos eigensolution with SUPORT DOF by way of a MSC/NASTRAN DMAP alter
[NASA-TM-106537] p 3319 N94-29406
System for the installation and replacement of components in hostile environments
[NASA-CASE-LEW-14906-1-SB] p 3300 N94-29427
Transient analysis mode participation for modal survey target mode selection using MSC/NASTRAN DMAP
[NASA-TM-106536] p 3319 N94-29469
A new flux-conserving numerical scheme for the steady, incompressible Navier-Stokes equations
[NASA-TM-106520] p 3273 N94-29471
Plasma sprayed ceramic thermal barrier coating for NiAl-based intermetallic alloys
[NASA-CASE-LEW-15535-1] p 3205 N94-29507
Method of producing a ceramic fiber-reinforced glass-ceramic matrix composite
[NASA-CASE-LEW-15264-2] p 3180 N94-29508
Method of reducing hydraulic instability
[NASA-CASE-LEW-15463-1] p 3273 N94-29539
Fusion welding with self-generated filler metal
[NASA-CASE-LEW-15671-1] p 3301 N94-29557
Non-orthogonal subband/transform coder
[NASA-CASE-LEW-15310-1] p 3246 N94-29589
A compact roller-gear pitch-yaw joint module: Design and control issues p 3161 N94-29629
Method for cancelling expansion waves in a wave rotor
[NASA-CASE-LEW-15218-2] p 3274 N94-29740
Summary report of mission acceleration measurements for Spacehab-01, STS-57 launched 21 June 1993
[NASA-TM-106514] p 3168 N94-29757
The effect of various metallurgical parameters on the flow and fracture behavior of polycrystalline NiAl near the brittle-to-ductile transition
[NASA-TM-106534] p 3205 N94-29758
Large scale cryogenic fluid systems testing
[NASA-TM-109735] p 3157 N94-29904
Electric power system test and verification program
[NASA-TM-106405] p 3169 N94-30123
Numerical comparison of convective heat transfer augmentation devices used in cooling channels of hypersonic vehicles
[NASA-TM-106546] p 3279 N94-30147
An interactive, design and educational tool for supersonic external-compression inlets
[NASA-TM-106581] p 3421 N94-30174
An interactive educational tool for compressible aerodynamics
[NASA-TM-106568] p 3422 N94-30175
XPS analysis of 440C steel surfaces lubricated with perfluoropolyethers under sliding conditions in high vacuum
[NASA-TM-106548] p 3218 N94-30177
The viability of photovoltaics on the Martian surface
[NASA-TM-106478] p 3338 N94-30196
Radial microstrip slotline feed network for circular mobile communications array
[NASA-TM-106540] p 3267 N94-30198
A novel approach to noise-filtering based on a gain-scheduling neural network architecture
[NASA-TM-106563] p 3155 N94-30204
Surface fatigue life of high temperature gear materials
[NASA-TM-106562] p 3303 N94-30227
A new material for removing heavy metals from water p 3354 N94-30471
Evaluation of flip-flop jet nozzles for use as practical excitation devices
[NASA-TM-106377] p 3135 N94-30949

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. MARSHALL SPACE FLIGHT CENTER, HUNTSVILLE, AL.

MSFC inspections of installed polyimide wire p 3166 N94-28707
A survey of geographical information systems applications for the Earth Science and Applications Division, Space Sciences Laboratory, Marshall Space Flight Center
[NASA-TM-108438] p 3529 N94-28820
Plasma arc welding torch having means for vortexing plasma for exiting the welding torch
[NASA-CASE-MFS-28828-1] p 3298 N94-29351
Metal inert gas welding system for use in vacuum
[NASA-CASE-MFS-28808-1] p 3298 N94-29352
Tuned mass damper for integrally bladed turbine rotor
[NASA-CASE-MFS-28697-1] p 3298 N94-29353
Suspension system for gimbal supported scanning payloads
[NASA-CASE-MFS-28817-1] p 3287 N94-29358
Apparatus for testing high pressure injector elements
[NASA-CASE-MFS-28773-1] p 3299 N94-29365
Collapsible mechanical joint
[NASA-CASE-MFS-28765-1] p 3299 N94-29367
Multi-speed multi-phase resolver converter
[NASA-CASE-MFS-28855-1] p 3264 N94-29372
Manufacturing methods for machining spring ends parallel at loaded length
[NASA-CASE-MFS-28767-1] p 3231 N94-29379
Chamber free fusion welding root side purging method and apparatus
[NASA-CASE-MFS-28832-1] p 3204 N94-29380
Vacuum vapor deposition
[NASA-CASE-MFS-28652-1] p 3215 N94-29446
Rotary actuator
[NASA-CASE-MFS-28581-1] p 3205 N94-29447
NASA Marshall Space Flight Center Solar Observatory report, July - October 1993
[NASA-TM-108448] p 3160 N94-29470
Quick connect fastener
[NASA-CASE-MFS-28829-1] p 3300 N94-29486
Welding wire pressure sensor assembly
[NASA-CASE-MFS-26216-1-SB] p 3300 N94-29506
Inter-comparison of Wildfire and High-resolution Interferometer Sounder (HIS) data from STORM-FEST: An investigation of wildfire spectral channel discrepancies
[NASA-TM-108429] p 3333 N94-29553
Development and testing of the Automated Fluid Interface System p 3161 N94-29636
Design and test of electromechanical actuators for thrust vector control p 3163 N94-29650
Vulnerability of manned spacecraft to crew loss from orbital debris penetration
[NASA-TM-108452] p 3169 N94-30161
Ternary arc gas plasma welding torch
[NASA-CASE-MFS-28857-1] p 3303 N94-30173
Ampoule failure sensor time response testing: Experiment 1
[NASA-TM-108449] p 3290 N94-30199
Root-sum-square structural strength verification approach
[NASA-TM-108453] p 3322 N94-30206
Composite redesign of obstetrical forceps p 3397 N94-30457
Computerized in vitro test for chemical toxicity based on tetrahymena swimming patterns p 3354 N94-30463
Casting of weldable graphite/magnesium metal matrix composites with built-in metallic inserts p 3186 N94-30482
Graphical simulation for aerospace manufacturing
[AIAA PAPER 94-1224-CP] p 3446 N94-30573

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. PASADENA OFFICE, CA.

Method for forming thin composite solid electrolyte film for lithium batteries
[NASA-CASE-NPO-18877-1-CU] p 3264 N94-29357
Plasma heating for containerless and microgravity materials processing
[NASA-CASE-NPO-18819-1-CU] p 3229 N94-29371
Digital camera with apparatus for authentication of images produced from an image file
[NASA-CASE-NPO-19108-1-CU] p 3287 N94-29373
Method of implementing digital phase-locked loops
[NASA-CASE-NPO-18757-1-CU] p 3265 N94-29374
Dendrite preventing separator for secondary lithium batteries
[NASA-CASE-NPO-18585-1-CU] p 3265 N94-29411
An emergency response mobile robot for operations in combustible atmospheres
[NASA-CASE-NPO-19020-1-CU] p 3299 N94-29420
Nonvolatile programmable neural network synaptic array
[NASA-CASE-NPO-18578-1-CU] p 3265 N94-29426
High level language-based robotic control system
[NASA-CASE-NPO-17918-2-CU] p 3435 N94-29465
Monolithic in-based III-V compound semiconductor focal plane array cell with single stage CCD output
[NASA-CASE-NPO-18978-1-CU] p 3265 N94-29488
Catalytic ignitor for regenerative propellant gun
[NASA-CASE-NPO-18987-1-CU] p 3225 N94-29490
Reconfigurable optical interconnections via dynamic computer-generated holograms
[NASA-CASE-NPO-19039-1-CU] p 3499 N94-29491
A neural network with modular hierarchical learning
[NASA-CASE-NPO-19077-1-CU] p 3435 N94-29492
Lasercom system architecture with reduced complexity
[NASA-CASE-NPO-19069-1-CU] p 3293 N94-29493
Extended horizon lifting for periodic gain adjustment in control systems, and for equalization of communication channels
[NASA-CASE-NPO-19166-1-CU] p 3246 N94-29495
An alternate method for achieving temperature control in the -160 to +90 C range
[NASA-CASE-NPO-18995-1-CU] p 3288 N94-29497
Epitaxial heterojunctions of oxide semiconductors and metals on high temperature superconductors
[NASA-CASE-NPO-18483-1-CU] p 3513 N94-29501
Kinematic functions for redundancy resolution using configuration control
[NASA-CASE-NPO-18608-1-CU] p 3436 N94-29504
Anode for rechargeable ambient temperature lithium cells
[NASA-CASE-NPO-18580-1-CU] p 3265 N94-29505
Neural network with dynamically adaptable neurons
[NASA-CASE-NPO-17803-1-CU] p 3436 N94-29756

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. WHITE SANDS TEST FACILITY, NM.

Flammability, odor, offgassing, thermal vacuum stability, and compatibility with aerospace fluids of wire insulations p 3166 N94-28709

NAVY PERSONNEL RESEARCH AND DEVELOPMENT CENTER, SAN DIEGO, CA.
Markov chains for random urinalysis 3: Daily model and drug kinetics
[AD-A275540] p 3389 N94-28797

NEBRASKA UNIV., LINCOLN.
Experimental and theoretical studies of molecular solids
[AD-A275511] p 3485 N94-28668
Video transmission on ATM networks
[NASA-CR-195124] p 3244 N94-29106
Performance of a higher-order triangular finite element for composite laminated structures p 3181 N94-29810

NEOCOMM SYSTEMS, INC., LA CANADA-FLINTRIDGE, CA.
Providing hydrogen maser timing stability to orbiting VLBI radio telescope observations by post-measurement compensation of linked frequency standard imperfections p 3297 N94-30670

NETHERLANDS AGENCY FOR AEROSPACE PROGRAMS, DELFT.
ENGRID: A graphical interactive code for the computation of structured grids for blocked flow domains p 3124 N94-28956

NEW ENERGY AND INDUSTRIAL TECHNOLOGY DEVELOPMENT ORGANIZATION, TOKYO (JAPAN).
Fiscal 1991 geothermal development promotion energy
[DE94-732332] p 3337 N94-28627
Fiscal 1990 geothermal development promotion survey
[DE94-732333] p 3337 N94-28628
Feasibility study on introduction of a large methanol engine power generation plant
[DE94-732338] p 3224 N94-28629
Survey on effects of petroleum substitution energy utilization on the global environment
[DE94-732339] p 3346 N94-28630

Report of feasibility study on international-cooperation in high efficient energy conversion technology
[DE94-732340] p 3337 N94-28631
Technical analysis of alternative fueled vehicles
[DE94-744238] p 3304 N94-30269
Investigation of the technology development status of alternate fuel vehicles
[DE94-744237] p 3312 N94-30831

NEW HAMPSHIRE UNIV., DURHAM.
Corrosion inhibition by electrodeposited conductive-polymer film
[AD-A275456] p 3213 N94-28806
Four simple ocean carbon models
p 3351 N94-30625

NEW JERSEY INST. OF TECH., NEWARK.
The bootstrapped algorithm: A fast algorithm for blind signal separation
[AD-A275759] p 3408 N94-28760

NEW MEXICO INST. OF MINING AND TECHNOLOGY, SOCORRO.
Interface engineering in alumina fiber/glass composites p 3182 N94-29852

NEW MEXICO STATE UNIV., LAS CRUCES.
The Rb 780-nanometer Faraday anomalous dispersion optical filter: Theory and experiment
p 3250 N94-29659
An analysis of carrier phase jitter in an MPSK receiver utilizing map estimation
[NASA-CR-195806] p 3164 N94-29880
Remote observatory access via the advanced communications technology satellite
p 3253 N94-29894
Significant figures and Lyapunov exponents in chaos and constrained divergence of chaotic orbits
p 3467 N94-29910

NEW MEXICO STATE UNIV., UNIVERSITY PARK.
Surface differential rotation in a sample of cool dwarf stars p 3545 N94-29827

NEW MEXICO UNIV., ALBUQUERQUE.
Float polishing studies of fused silica
[AD-A275001] p 3213 N94-28886
Automatic focus and registration of synthetic aperture radar images p 3246 N94-29536

NEW ORLEANS UNIV., LA.
Superior energetic materials that contain carbocations and anions. Energetic materials restricted in composition to C, H, N, and O atoms
[AD-A275449] p 3225 N94-29310

NEW TECHNOLOGY, INC., HUNTSVILLE, AL.
A Modular Artificial Intelligence Inference Engine System (MAIS) for support of on orbit experiments
[AIAA PAPER 94-1237-CP] p 3448 N94-30584

NEW YORK UNIV., NEW YORK.
Applied analysis/computational mathematics
[DE94-005133] p 3451 N94-28571
Computational fluid and combustion dynamics
[DE94-006596] p 3279 N94-30003
Superdiffusion
[DE94-002333] p 3492 N94-30834

NIHON UNIV., TOKYO (JAPAN).
Arterial oxygen saturation during +Gz acceleration by short-radius centrifuge p 3389 N94-28852
Effect of chronic centrifugation on in vitro fertilization and early development in mice ova
p 3386 N94-28853

NIJMEGEN UNIV. (NETHERLANDS).
Modelling the evolution of information systems
[TR-92-36] p 3535 N94-30329
Genetic algorithms for optimal database design
[TR-93-01] p 3535 N94-30330
The beauty and the beast
[TR-93-03] p 3423 N94-30331
Increasing the applicability of LR parsing
[TR-93-06] p 3423 N94-30332
A conceptual language for the description and manipulation of complex information models
[TR-92-34] p 3423 N94-30344
Generalized left-corner parsing
[TR-92-21] p 3432 N94-30356
Towards a general theory for the evolution of application domains
[TR-92-22] p 3535 N94-30357
Index expression belief networks for information disclosure
[TR-92-23] p 3465 N94-30358
Evolving information systems: Meeting the ever-changing environment
[TR-92-24] p 3535 N94-30359
A general theory for the evolution of application domains
[TR-92-26] p 3535 N94-30360
A framework for comparing conceptual modelling languages
[TR-92-29] p 3535 N94-30361
A note on schema equivalence
[TR-92-30] p 3535 N94-30362
Parsing in ISBES
[TR-92-32] p 3432 N94-30363

NIPPON KOKAN K. K., KAWASAKI (JAPAN).
A newly developed snow vehicle (SM100S) for Antarctica. Part 3: Low temperature toughness of the welded joints of the structural steel
p 3364 N94-29983

NIPPON TELEGRAPH AND TELEPHONE PUBLIC CORP., YOKOSUKA (JAPAN).
A module concept for a cable-mesh deployable antenna p 3161 N94-29631

NORGES TEKNISKE HOEGSKOLE, TRONDHEIM.
Progress report for the PTUF Project-93 Q1 and Q2

NORSK DATA A.S., OSLO.
Progress report for the PTUF Project-93 Q1 and Q2
[PB94-138591] p 3431 N94-29995

NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIV., GREENSBORO.
Computational methods in continuum mechanics
[AD-A275560] p 3451 N94-28792

NORTH CAROLINA STATE UNIV., RALEIGH.
Fusion of range and luminance data from laser radar systems
[AD-A275608] p 3292 N94-28770
Modeling, analysis, and simulation of an optical time-division multiple-access network architecture
[AD-A275847] p 3498 N94-28780
Anodization of copper in chloride media
[AD-A275565] p 3202 N94-28793
Carrier collection and scattering in quantum well and superlattice devices
[AD-A275443] p 3512 N94-28880
A numerical solver for initial and boundary value problems in differential-algebraic systems
[AD-A275447] p 3452 N94-28883
A laboratory simulation of urban heat-island-induced circulation in a stratified environment
p 3367 N94-30921
An investigation into certain geometrical and variational properties of the P(4) theory of gravitation and electromagnetism p 3526 N94-30950

NORTH CAROLINA UNIV., CHAPEL HILL.
Human and institutional factors in GIS implementation by local governments p 3532 N94-29804
Enhancing performance of full-text retrieval systems using relevance feedback p 3532 N94-29806

NORTH DAKOTA STATE UNIV., FARGO.
Crosslinking and surface reactions in macromolecules: Spectroscopic FT-IR studies p 3221 N94-30812

NORTH DAKOTA UNIV., GRAND FORKS.
Catalytic fabric filtration for simultaneous NO(x) and particulate control
[DE94-001660] p 3341 N94-28463

NORTHEASTERN UNIV., BOSTON, MA.
Radar returns from a low-flying target over a rough sea surface under multipath and clutter conditions
p 3253 N94-29882

NORTHWESTERN UNIV., EVANSTON, IL.
Toughening mechanisms in ultrahigh-strength steels
[AD-A275439] p 3202 N94-28867
MOCVD growth of GaN, AlN and AlGaN for UV photodetector applications
[AD-A275078] p 3512 N94-28871
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A275079] p 3512 N94-28872
Stability of dynamical systems in the presence of noise
[AD-A275383] p 3243 N94-29072

NORWEGIAN BUILDING RESEARCH INST., OSLO.
Theory of age distribution p 3232 N94-29602
Ventilation models p 3232 N94-29603

NORWEGIAN TRANSARCTIC EXPEDITION, HIS.
Evaluation of life support equipment during an unsupported North Pole expedition
p 3379 N94-28422

NOTRE DAME UNIV., IN.
The impact of electrically charged microspheres with planar surfaces under vacuum conditions
p 3320 N94-29765
Transient studies of low temperature catalysts for methane conversion
[DE94-005767] p 3200 N94-30877
An experimental study of nonlinear wave coupling and energy transfer characterizing the transition of a planar jet shear layer p 3282 N94-30953

NOTTINGHAM UNIV. (ENGLAND).
Granular bases for heavily loaded pavements
[AD-A275171] p 3156 N94-29047

O

OAK RIDGE K-25 SITE, TN.
Reinterpretation of rate data for the reaction of ClF and F2
[DE94-005819] p 3200 N94-30880

OAK RIDGE NATIONAL LAB., TN.
On the prediction of HAZ grain size using Monte Carlo simulation
[DE94-005465] p 3511 N94-28535
Density reduction: A mechanism for amorphization at high ion doses
[DE94-004793] p 3483 N94-28559
Overview of shielding analyses for the MHTGR from 1986 to 1991
[DE94-002448] p 3495 N94-29924
Issues arising with the application of optical fiber transmission in class 1E systems in nuclear power plants
[DE94-004743] p 3500 N94-29928
Nanosize metal alloy particle formation in Ag and Cu sequentially implanted silica
[DE94-005592] p 3207 N94-30042
Structural characterization of semiconductor heterostructures by atomic resolution Z-contrast imaging at 300 kV
[DE94-006561] p 3516 N94-30063
Atomic-scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM
[DE94-006563] p 3516 N94-30064
Three-dimensional effects for radio frequency antenna modeling
[DE94-006102] p 3255 N94-30105
The influence of an in-situ electric field on H(+) and He(+) implantation induced defects insil icon
[DE94-006553] p 3518 N94-30249
Large-scale 3-D solutions of the time-dependent Dirac equation
[DE94-005591] p 3454 N94-30317
Characterization of thermally annealed Sb implanted fused silica
[DE94-005464] p 3219 N94-30335
Overview of the US stellarator reactor study
[DE94-006042] p 3508 N94-30339
Irradiation-induced structure and property changes in tokamak plasma-facing, carbon-carbon composites
[DE94-006046] p 3508 N94-30365
Task automation in a successful industrial telerobot
[AIAA PAPER 94-1189-CP] p 3441 N94-30539
Research on the atomic layer-by-layer growth of high-temperature superconductor thin films at the Institute of Scientific and Industrial Research, Japan
[DE94-003739] p 3519 N94-30611
Experimental and analytical comparison of constraint effects due to biaxial loading and shallow-flaws
[DE94-004794] p 3323 N94-30689
Prediction and standard error estimation for a finite universe total when a stratum is not sampled
[DE94-004929] p 3465 N94-30696
Structural analysis of amorphous phosphates using high performance liquid chromatography
[DE94-004791] p 3199 N94-30723
Thermal conductivities, electrical resistivities, and Seebeck coefficients of YBa2Cu3O(7-x) superconductors from 80 to 300 K
[DE94-004796] p 3520 N94-30724
On some general properties of parabolic conservation equations
[DE94-006101] p 3461 N94-30758
The impact of improved physics on commercial tokamak reactors
[DE94-006103] p 3509 N94-30760
Ionic conduction mechanisms in CaF2 and CaF2-Al2O3 nanocomposite films on Al2O3 substrates
[DE94-004792] p 3520 N94-30773
Using the log-normal distribution in analyzing aerosols: The mathematical reasoning underlying the various diameters used and the plotting procedure
[DE94-006459] p 3461 N94-30817
Fuel cycle evaluations of biomass-ethanol and reformulated gasoline
[DE94-000227] p 3226 N94-30818
Synthesis of (SiC)3N4 thin films by ion implantation
[DE94-006311] p 3521 N94-30851
Study of nucleation and growth in Ai-Zn alloys using TEM
[DE94-006312] p 3211 N94-30852

UNIVERSITY OF SOUTHWESTERN LOUISIANA, LAFAYETTE.
A unified framework for retrieval in image databases p 3533 N94-29811
UNIVERSITY OF WESTERN ONTARIO, LONDON.
Extended occupancy grid method for modelling unknown dynamic environments p 3144 N94-30281
UNIVIEW SYSTEMS, MOUNTAIN VIEW, CA.
Formal specification and verification of real-time sequential control systems
[AD-A275776] p 3419 N94-29678
URBAN CONSORTIUM FOR TECHNOLOGY INITIATIVES.
Compressed natural gas fueled vehicles: The Houston experience
[DE94-005804] p 3312 N94-30878
USBI BOOSTER PRODUCTION CO., TITUSVILLE, FL.
Development of a unique polyurethane primer/topcoat p 3223 N94-30476
UTAH UNIV., SALT LAKE CITY.
Halogen chemisorption on silver(111): Scanning tunneling microscopy of coadsorbed halogen atoms
[AD-A275219] p 3486 N94-29060
Pitting corrosion of titanium
[AD-A274980] p 3203 N94-29089
Evaluation of the National Meteorological Center mesoscale model for prediction of severe convection over Central Arizona p 3371 N94-29744
Cloud and aerosol characterization for the ARM central facility: Multiple remote sensor techniques development
[DE94-003523] p 3365 N94-30608
UTRECHT STATE UNIV. (NETHERLANDS).
Conditional dependence in probabilistic networks
[RUU-CS-92-34] p 3464 N94-29450
Only few graphs have bounded treewidth
[RUU-CS-92-35] p 3455 N94-30333
A lateral inhibition neural network that emulates a winner-takes-all algorithm
[RUU-CS-92-46] p 3438 N94-30334
Two algorithms for finding rectangular duals of planar graphs
[RUU-CS-92-41] p 3423 N94-30345
Derivation lengths in term rewriting from interpretations in the naturals
[RUU-CS-92-43] p 3455 N94-30346
On blocks: Locality and asynchronous communication (extended abstract)
[RUU-CS-92-44] p 3424 N94-30347
A deterministic algorithm for the three-dimensional diameter problem
[RUU-CS-92-45] p 3424 N94-30348
A multiscale approach to image segmentation using Kohonen networks
[RUU-CS-93-06] p 3438 N94-30349
Generalized hidden surface removal
[RUU-CS-93-05] p 3424 N94-30364
Bayesian belief networks and conditional independencies
[RUU-CS-92-36] p 3465 N94-30376
The exact fitting problem in higher dimensions
[RUU-CS-92-37] p 3456 N94-30377
Pearl's belief propagation: The proofs
[RUU-CS-92-47] p 3456 N94-30378
Self-stabilizing l-exclusion algorithms
[RUU-CS-93-01] p 3424 N94-30379
A note on the Smyth powerdomain construction
[RUU-CS-93-02] p 3457 N94-30393
Algebraic domains, chain completion, and the Plotkin powerdomain construction
[RUU-CS-93-03] p 3457 N94-30394
Isomorphisms between predicate and state transformers
[RUU-CS-93-09] p 3458 N94-30403
Minimum fill-in for chordal bipartite graphs
[RUU-CS-93-11] p 3458 N94-30404
Treewidth of circle graphs
[RUU-CS-93-12] p 3458 N94-30405
L(sub)p optimal d dimensional triangulations for piecewise linear interpolation: A new result on data dependent triangulations
[RUU-CS-93-13] p 3458 N94-30406
Shape from diameter: Negative results
[RUU-CS-93-16] p 3458 N94-30407
Shape from diameter: Positive results
[RUU-CS-93-17] p 3458 N94-30408
A probabilistic approach to motion planning for car-like robots
[RUU-CS-93-18] p 3438 N94-30410
An all pairs shortest paths distributed algorithm using 2n(exp 2) messages
[RUU-CS-93-19] p 3432 N94-30411
Termination of term rewriting by semantic labelling
[RUU-CS-93-24] p 3459 N94-30424
Rectilinear decompositions with low stabbing number
[RUU-CS-93-25] p 3459 N94-30425
A more compact visibility representation
[RUU-CS-93-26] p 3425 N94-30426
Efficient and constructive algorithms for the pathwidth and treewidth of graphs
[RUU-CS-93-27] p 3426 N94-30488
Efficient bounded timestamping using traceable use abstraction: Is writer's guessing better than reader's telling?
[RUU-CS-93-28] p 3426 N94-30489
The secrets of causality
[RUU-CS-93-29] p 3426 N94-30490
On the relation between Unity properties and sequences of states
[RUU-CS-93-07] p 3433 N94-30720
Piecewise linear paths among convex obstacles
[RUU-CS-93-20] p 3460 N94-30721
Placing registration marks
[RUU-CS-93-21] p 3427 N94-30725
Dynamic microsets for RAMs
[RUU-CS-93-22] p 3406 N94-30727
Perfect binary space partitions
[RUU-CS-93-23] p 3460 N94-30728
Total termination of term rewriting
[RUU-CS-92-42] p 3460 N94-30744
Mapping objects to files: A UNIX file system interface to an object management system
[RUU-CS-93-08] p 3428 N94-30746
The (n squared)-hard problems in computational geometry
[RUU-CS-93-15] p 3461 N94-30747
Unravelling nondeterminism: On having the ability to choose
[RUU-CS-93-30] p 3428 N94-30749
Termination of term rewriting by semantic labelling
[RUU-CS-92-38] p 3462 N94-30859
Optimal size finite element meshes without obtuse and small angles
[RUU-CS-92-39] p 3462 N94-30860

V

VALPARAISO UNIV., IN.
High sensitivity tests of the standard model for electroweak interactions
[DE94-005415] p 3490 N94-30262
VANDERBILT UNIV., NASHVILLE, TN.
EVA glove evaluation methodology and test protocol p 3401 N94-29729
Prediction of fluid flow and heat transfer in internally finned tubes p 3280 N94-30228
An intelligent robotic aid system for human services
[AIAA PAPER 94-1232-CP] p 3447 N94-30580
Analysis and design of inflatable aerospace structures p 3403 N94-30799

VIRGINIA CENTER OF EXCELLANCE FOR SOFTWARE REUSE AND TECHNOLOGY TRANSFER, HERNDON.
Using RDD-100 with CoRE. Version 01.00.03

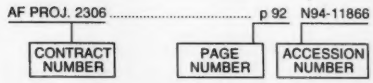
YORK UNIV. (ONTARIO).
The radical amplifier p 3345 N94-28604

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

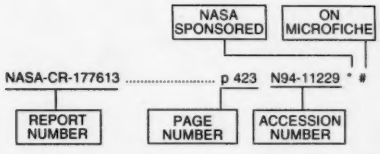
Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION

Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance.* For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

SCAN Goes Electronic!

If you have NASA Mail or if you can access the Internet you can get biweekly issues of *SCAN* delivered to your desktop — absolutely *free*!

Electronic SCAN takes advantage of computer technology to alert you to the latest aerospace-related, worldwide scientific and technical information that has been published.

No more waiting while the paper copy is printed and mailed to you. You can review *Electronic SCAN* the same day it is released! And you get all 191 — or any combination of — subject areas of announcements with abstracts to browse at your leisure. When you locate a publication of interest, you can print the announcement or electronically add it to your publication order list.

Start your free access to *Electronic SCAN* today. Over 1,000 announcements of new reports, books, conference proceedings, journal articles . . . and more — delivered to your computer every two weeks.

Electronic SCAN.
